ADVERTISING
the student is...

... the most important person on the campus. Without students there would be no need for the institution.

... not a cold enrollment statistic but a flesh and blood human being with feelings and emotions like our own.

... not someone to be tolerated so that we can do our thing. They are our thing.

... not dependent on us. Rather, we are dependent on them.

... not an interruption of our work, but the purpose of it. We are not doing them a favor by seeing them. They are doing us a favor by giving us the opportunity to do so.

Health Science Information Session
Tuesday, July 24 • 6pm

Learn about our high demand programs, tour the new health simulation center and meet faculty.

Why Saint Paul College
Saint Paul College offers multiple options. Choose from health science degree, diploma and certificate programs in highly sought-after career fields.

You’ll learn the skills and qualities needed for employment. Students work in both independent and team environments to prepare for direct career paths or transfer to 4-year college or university.

Our faculty makes your success their top priority. Faculty work with national organizations to develop a curriculum that meets industry needs.

Saint Paul College is affordable. Experience more than 50% savings on the cost of private colleges.

An Environment of Innovation
SIMULATION CENTER (SIM)
Health science students have access to train in a new 10,000 square foot Simulation Center (SIM). With its mission of “changing lives one simulation at a time,” the SIM Center provides a dynamic setting for students to learn and practice patient care through the use of innovative and collaborative approaches.

SIM Lab Rooms within the SIM Center are fully equipped to provide all clinical skills on high-fidelity simulators including adults, babies, and newborns, and all the lab care is video recorded and recorded.

The SIM Center is also home to the only SynDaver in Minnesota. Considered to be the world’s most sophisticated synthetic surgical simulation and anatomy model, the SynDaver is an alternative to a human cadaver and offers students a better representation of live human tissue.

During our CPR simulation, everything from the sounds and smells to the location of the equipment and dress of the ‘patient’ to the actual hospital.
