Saint Paul College—A Community & Technical College reserves the right to change requirements of this catalog as a result of state and federal legislation, policies of the Minnesota State Colleges and Universities Board of Trustees, and other reasons deemed necessary by the faculty and administration.

NONDISCRIMINATION POLICY:

Saint Paul College is committed to a policy of nondiscrimination in employment and education opportunity. No person shall be discriminated against in the terms and conditions of employment, personnel practices, or access to and participation in, programs, services, and activities with regard to race, sex, color, creed, religion, age, national origin, disability, marital status, status with regard to public assistance, sexual orientation, gender identity, gender expression, or membership or activity in a local commission as defined by law.

Harassment of an individual or group on the basis of race, sex, color, creed, religion, age, national origin, disability, marital status, status with regard to public assistance, sexual orientation, gender identity, gender expression, or membership or activity in a local commission has no place in a learning or work environment and is prohibited. Sexual violence has no place in a learning or work environment. Further, Saint Paul College shall work to eliminate violence in all its forms.

Physical contact by designated system, college, and university staff members may be appropriate if necessary, to avoid physical harm to persons or property.

This document is available in alternative formats to individuals with disabilities by contacting the Director of Access & Disability Resources at 651.350.3008 or AccessResources@saintpaul.edu.

AVAILABLE IN ALTERNATE FORMAT to individuals with disabilities by contacting 651.350.3008 or AccessResources@saintpaul.edu. This document is available electronically at saintpaul.edu/catalog.

The name of the organization is Saint Paul College—A Community & Technical College, hereinafter referred to interchangeably as “the College” in policy and procedure statements.

Saint Paul College is committed to providing equal access to education for all students. Students who have a disability, or believe they may have a disability, are invited to contact the Office of Access & Disability Resources as soon as possible to determine eligibility and/or request accommodations. Accommodations are determined on a case-by-case basis. Please contact the Director of Access & Disability Resources at AccessResources@saintpaul.edu or 651.350.3008, or in office 1405 to request reasonable accommodations. For additional information, visit www.saintpaul.edu/accessresources.

The accommodations authorized on your forms should be discussed with your instructor. All discussions will remain confidential. Accommodations are not provided retroactively, so it is essential to discuss your needs at the beginning of the semester. Additionally, only accommodations approved by the Office of Access & Disability Resources will be provided.

Saint Paul College is committed to fostering an environment without discrimination and harassment. The College has a complaint process to review complaints of discrimination, harassment and sexual violence. Inquiries regarding compliance to Federal and State Laws and Statutes may be addressed to the Vice President of Student Affairs.

Refer to the Saint Paul College Student Handbook for important information that each student should read to assure success at the College. Saint Paul College—A Community & Technical College complies with Minnesota Statute 197.775 which exceeds all criteria of Title 38 United States Code Section 3679(e).

Welcome to
Saint Paul College

Our mission at Saint Paul College is to empower students to lead purposeful lives and discover rewarding careers. Students who complete our programs learn the skills necessary to succeed in the marketplace and provide access to enhanced economic opportunities.

As one of the most diverse colleges in Minnesota, we value equity, inclusion, and social justice. Our commitment to being an anti-racist and trauma informed institution is centered on supporting our students, and creating a safe and inclusive environment for everyone. With a student-oriented campus environment, our administrators, faculty, and staff are committed to assisting our students throughout their educational journey.

Over the past ten years, Saint Paul College has been frequently recognized as one of the nation’s top community and technical colleges. This recognition is due to our service to first-generation college students as well as populations traditionally underrepresented in American colleges and universities. It is also due to our program completion rates and low loan burden resulting from our constant effort to keep tuition and other costs as low as possible.

Students considering Saint Paul College can choose from over 100 degree, diploma and certificate programs in Liberal and Fine Arts, Business, Career and Technical Education, Health Sciences, Service, and Science Technology Engineering and Math (STEM) fields. This catalog provides details on those programs, including course offerings, credential requirements, and other important information.

If you have questions about any of the information contained in this catalog, please contact our One Stop staff by calling 651.846.1555, emailing registration@saintpaul.edu, or stopping by Room 1300 near the College’s main entrance off Marshall Avenue.

On behalf of our faculty, staff, and administrators, I want to thank you for considering Saint Paul College as your partner on the pathway to a brighter future. We look forward to working with you each step of the way.

Deidra Peaslee, Ed.D.
President, Saint Paul College
VISION
Saint Paul College advances racial equity; enriches community vibrancy; and inspires students to reach their full potential.

MISSION
Grounded in equity and inclusion, Saint Paul College educates and empowers students to lead purposeful lives and discover rewarding careers.

VALUES
We believe students are the heart of our work.
With compassion and dedication, we collaborate to create an inclusive and supportive learning environment to meet student needs, interests, and goals. When all students have access to resources and support, they are empowered to achieve success.

We are excellence-minded, equity-driven.
Diversity enriches our intellectual and professional community. Saint Paul College cultivates an environment of safety and transparency where all members are heard, valued, and respected. We apply anti-racism, trauma-informed practices that work to eliminate racism and increase access and opportunity for all.

We are guided by evidence-based decision-making.
As a learning organization, we continually strive for improvement through purposeful and transparent decision-making with intentional consideration to identify what will best serve our students and the community.

We strive to bring value to our community.
We value collaborating and establishing partnerships that foster and enhance community connections. We are dedicated to meeting the needs of the changing labor market, supporting economic vitality and preparing students to contribute to a more socially just world.

GENERAL INFORMATION

Accreditation
Saint Paul College—A Community & Technical College is accredited by the Higher Learning Commission, which is recognized by the U.S. Department of Education.

Saint Paul College meets established standards and is approved for the instruction of veterans and members of the workforce needing training or retraining. Saint Paul College meets the definition of an institution of higher education, and students are entitled to participate in federal financial assistance programs.

Program Accreditation
To ensure the highest possible program standards, Saint Paul College is also accredited by:

- Accreditation Commission for Education in Nursing (ACEN)
- Accreditation Council for Business Schools and Programs (ACBSP)
- Accreditation Council for Pharmacy Education (ACPE) / American Society of Health-System Pharmacists (ASHP)
- American Culinary Federation Education Foundation Accrediting Commission (ACFEFAC)
- Commission on Accreditation for Health Informatics and Information Management Education (CAHIIM)
- Commission on Accreditation for Respiratory Care (CoARC)
- Commission on Accreditation of Allied Health Education Programs (CAAHEP)
- National Accrediting Agency for Clinical Laboratory Sciences (NAACLS)
- ASE Education Foundation
- National Institute for Metalworking Skills (NIMS)

Minnesota State Colleges and Universities
Saint Paul College is one of the 37 colleges and universities in the Minnesota State Colleges and Universities system. The colleges in the system provide a wide array of opportunities for lifelong education in academic and technical fields, ranging from short-term certificate programs to doctoral programs. Approximately 34,000 students graduate from Minnesota State Colleges and Universities each year. Refer to the System website www.minnstate.edu for further information.

Alliances and Memberships

Students, Alumni & the Employer Connection
Saint Paul College offers undergraduate programs of two years or less to a widely diverse student population. Students are welcome regardless of their background, experience, or previous educational endeavors. The common goal of all students, however, is their desire for Education for Employment... Education for Life!

Alumni Relations
The College sponsors an Alumni Association to complement the educational process. All Saint Paul College graduates are encouraged to join. Call 651.846.1469 or visit saintpaul.edu/Alumni for further information.

Alliances with Business and Industry
Saint Paul College's greatest asset is its success in providing employment opportunity for graduates. This is due to its partnerships with the businesses, industries and trade unions with whom we collaborate. Saint Paul College relies on these major stakeholders to:

1. Hire our graduates;
2. Serve on our Advisory Committees to ensure relevant and current curriculum content and instruction; and
3. Provide quality assurance and identity within the community.

The College's relationships with businesses, industries, trade unions and alumni have remained strong to help ensure that the tradition of quality will be continuously enhanced through information, involvement and improvement.

Workforce Training & Continuing Education (WTCE)

The Workforce Training and Continuing Education division at Saint Paul College serves the non-credit educational and professional development needs of organizations and individuals in the greater metropolitan area. For over 20 years, Saint Paul College's Workforce Training & Continuing Education division has delivered high quality workforce training and continuing education ranging from development of assessments to consulting with business to meet industry, government, non-profit organizations, entrepreneurs, and individual needs, resulting in recognized credentials that boost performance and career opportunities. We are committed to your organizational and individual success!

Workforce Training
Workforce training provides quality training programs delivered at your location, online or on campus. We assist businesses and organizations in staying informed and knowledgeable about advances and best practices pertinent to workplace skills, leadership, organizational sustainability, and business solutions.

Training is provided in the format that best meets the needs of the client, for example:

- Offering over 100 unique courses through Web-based training.
• Presenting seminars on pertinent and timely topics for industry partners and individual professional development.
• Designing hands-on experiential workshops to promote application of newly acquired behaviors, attitudes, or skills.
• Enhancing skills or specific knowledge relating to career and professional development through continuing education courses.

Continuing Education
Continuing Education provides adult learners the opportunity to enroll in non-credit courses that build career related skills for personal or professional enrichment. Choose from online or classroom-based courses in a variety of fields and content areas.

Examples of training offered through WTCE:
• AutoCAD Training
• Business Management
• Communication Skills
• Customer Service
• Child Development
• Esthetics Re-licensure & Training
• Forklift Training
• Health Care
• Leadership/Management
• Microsoft Training
• Motorcycle Training
• Safety
• ServSafe® Certification
• Supervisory & Management Training
• Welding
• Workers Compensation

All WTCE classes can be offered at your work site or custom tailored to meet your employees’ needs. Call 651.846.1800 or visit saintpaul.edu/WTCE for more information.

ONE STOP
Admissions Process
Admission to the College is open to students who are at least sixteen years of age, have completed their high school diploma, GED, or equivalent, or meet Ability to Benefit requirements, and who are able to benefit from the educational offerings of the College. Admission to the College does not guarantee admission into a specific program or college-level classes. Clear and accessible information regarding college program admission requirements shall be provided in One Stop and in other locations. Academic, fiscal and facilities considerations may limit admission to a particular program. The exception to this policy relates to those Minnesota high school students who meet the requirements of the Post-Secondary Enrollment Options (PSEO) Act of 1985 (See Minnesota State Policy 3.5) or other special high school programs.

Admission to a Major Program
Students are accepted into a major program for the purpose of obtaining a specific degree, diploma, or certificate. Students may change their major by meeting the prescribed admission requirements for the desired program. Some programs have a separate application process. For more information about specific majors, please check the Program Requirement Guides.

Application Procedure
If you have not previously enrolled at Saint Paul College,

1. Complete an Application for Admission online at saintpaul.edu/apply.
2. There is a one time, non-refundable $20 application fee. Saint Paul College is currently waiving this fee.
3. Complete the Assessment in Reading and Math or complete the English as a Second Language (ESL) Assessment if you are a nonnative speaker of English. Call 651.846.1555 for more information. Scores must be turned in to One Stop. A student may be exempted from taking this Assessment based on documentation of subject area test scores on the ACT, SAT, or MCA. If you have taken the ACT, SAT, or MCA test within the last five (5) years, please bring a copy of your scores to One Stop (Room 1300) for further review.
4. Request high school transcripts and/or GED scores, as well as official transcripts from all secondary and post-secondary institutions attended be sent to Saint Paul College.
5. If you have previously applied, enrolled, or requested information from Saint Paul College please contact One Stop so your records can be updated.

Some major programs require additional assessment. Applicants will be notified if their program requires additional assessment. Assessment requirements may be waived based on previous college experience as validated by college transcripts or determined by the One Stop Staff.

Intake Assessment
Research shows that students who enter courses at the level that best matches their background and abilities are more successful. Therefore, Saint Paul College and Minnesota State colleges and universities require assessment of basic academic skills. The assessment for those whose native language is English covers reading comprehension and mathematical computation. The assessment for students whose native language is not English is the English as a Second Language (ESL) assessment. You may be assessed in additional subjects for admission to selected programs or placement into certain courses.

The assessments are computerized and available on a walk-in basis in the Assessment Center -- room 3140 -- and usually take from 1 ½ to 2 ½ hours. Scores determine course placement. In some cases, assessment results may indicate that you may benefit from developmental coursework in reading, writing, grammar, and/or math, prior to entering your major program.

Students are granted two attempts at the assessment each calendar year. There is no cost for the first attempt. The second attempt carries a fee of $5.00. Students who want to review before taking the exam can access the following websites:
General Information

The assessment requirement may be waived depending on previous college experience and/or college coursework. Contact One Stop at 651.846.1555 to have previous college coursework reviewed for an assessment waiver. Please call 651.846.1555 for additional information about the assessment process.

Immunization Requirements

Minnesota Law (M.S. 135A. 14) requires that all students born after 1956 and enrolled in a postsecondary educational institution be immunized against measles, rubella, mumps after the age of 12 months and against diphtheria and tetanus within 10 years of first registration, allowing for certain specified exemptions. You must submit a statement indicating the month and year of each immunization when you register for classes, or no later than 45 days after the start of your first semester. Students born in 1956 or before are not required to provide information. Students who graduated from a Minnesota high school in 1997 or later are also exempt.

The Immunization Record form is designed to provide the College with the information required by law and will be available for review by the Minnesota Department of Health. The form is available on the College website. Students enrolled in Health programs are required to obtain additional immunizations in accordance with clinical site policy. For more information regarding immunization requirements and resources available to meet those requirements, contact the Dean of Health Sciences and Service Programs.

Application Procedure for Transfer Students

Students seeking admission to Saint Paul College based on previous college coursework should contact One Stop - Room 1300 651.846.1555 after completing the online application. Students seeking a degree, diploma or certificate, who have previously attended accredited institutions, must have all official transcripts sent directly from the previous colleges to the Saint Paul College Records Office. If a transcript is hand carried by the student, it is to be delivered in a sealed envelope. Student copies and faxed transcripts are not considered official but can be used for admission purposes.

Re-Admission

Students who have interrupted attendance at Saint Paul College must contact One Stop to apply for re-admission. To have assessment tests waived based on coursework completed at another institution, contact One Stop at 651.846.1555.

Undeclared Students

Undeclared students are not assigned an advisor, do not qualify for financial aid or veterans education benefits, and their transcripts will not be evaluated for transfer credit.

Change of Major

Students who have been admitted to Saint Paul College in a specific major and want to change that major must complete the Change of Major eForm found online. Mid-semester major program changes are not permitted. The change of major program will be effective for the next semester.

Post-Secondary Enrollment Options Program (PSEO)

The PSEO program enables eligible Minnesota high school sophomores, juniors and seniors to take college classes for credit. The purpose of the program is to promote rigorous academic pursuits and provide a wider variety of options than may be available in high school. Eligible students may attend either part-time or full-time. Tuition, fees and textbooks are provided at no cost to the student. For more information about the PSEO program, please contact the PSEO Coordinator at 651.846.1713. Please identify yourself as a PSEO student.

High School Articulated Credit

Articulated Credit affords high school students an opportunity to receive college credit in many subjects. Articulated Credit programs effectively blend academic and technical education in a challenging and purposeful course of study that can lead to employment and credit toward further education. Since the workplace has changed significantly enough to require some training after high school, but not necessarily a full four-year degree, articulated credit programs offer viable new options for high school students who want to connect learning with life. Programs are articulated between Saint Paul Public Schools and Saint Paul College. Consult a high school counselor for more information concerning Articulated Credit.

Transfer of Credits from Other Institutions

The College will review official transcripts received from other post-secondary institutions for transfer of credit for those students who are admitted to a declared major. Transfer credits accepted will appear on the Saint Paul College transcript and can be used to satisfy the program graduation requirements but will not be used to calculate the grade point average. Students seeking admission to the College who have attended another college or university and do not meet the College's Satisfactory Academic Progress Standards must appeal for admission.

If you are interested in receiving transfer credit, you must request an official transcript from each institution attended be sent to Saint Paul College - Records Office. If you previously attended a Minnesota State college or university (excludes the University of Minnesota), the Records Office may be able to access your transcript electronically. Contact the Records Office to confirm the availability of a Minnesota State transcript. Each credit to be considered for transfer must be supported by an official transcript from the originating institution prior to the awarding of credit. The College does not review for transfer of credit for visiting students or students admitted as Undeclared.

A student shall earn a minimum of 20 credits for all associate degrees at the College. The residency requirement shall be reduced to 12 credits for students transferring with at least 12 college-level credits from another Minnesota State institution and/or the University of Minnesota. One-third of the credits required for a diploma or certificate must be earned at Saint Paul College. At least one course must be completed at Saint Paul College in order to earn the Minnesota Transfer Curriculum (MnTC).
Students also may be eligible to transfer credit to the College through the following:

- AP - Advanced Placement Exams (for high school students)
- CLEP - College Level Examination Program
- Credit for Life Work/Work Experience (Prior Learning)
- IB - International Baccalaureate (for high school students)
- International Credentials
- Military - Related courses and experience

Transfer of Credit Policies
Transfer of credit will be evaluated based on Saint Paul College policies and procedures and in accordance with Minnesota State system policies and procedures.

Institution Accreditation
Transfer of credit will be considered for college level coursework completed at accredited institutions:

- Regionally Accredited: Degree-granting public, private, nonprofit and for-profit, two- and four-year institutions in the United States accredited by the Higher Learning Commission and/or parallel accrediting agencies in other regions of the United States.
- Nationally Accredited: Specialized institutions, including distance learning providers and freestanding professional schools recognized by the Council of Higher Education Accreditation (CHEA) and the U.S. Department of Education (USDE).

Coursework will be considered on a course-by-course basis through an appeal process and will be judged to be comparable or equivalent to courses offered at Saint Paul College.

Transfer Course Evaluation
Courses will be reviewed and considered for transfer as follows:

- General education coursework completed at Minnesota State that fulfills the Minnesota General Education Transfer Curriculum (MnTC) will transfer based on the assigned goal area at the sending institution.
- General education coursework completed at the University of Minnesota or other institutions outside the Minnesota State system will be considered for transfer as:
  - Equivalent to a Saint Paul College general education course and MnTC Goal Area
  - Not equivalent to a specific Saint Paul College course, but will fulfill a MnTC Goal Area
  - Coursework that is not general education will be considered for transfer as:
  - Equivalent to a specific course in a technical program (within five years of course completion, if in a technical program)
  - Elective credit that does not apply toward general education or technical course requirements (including technical courses over five years old)

Transfer Equivalency
Courses approved for transfer must be comparable in nature, content, and level, and match at least 75% of the content and goals of the course syllabus for which the student is seeking equivalent credit.

Transfer Appeal
If a credit transfer is denied, you may request an appeal. Appeal forms are available online. If you are not satisfied with the results of the appeal, you may appeal to the Vice President of Academic Affairs at the College. A third and final transfer appeal is available at the system level.

Transfer Grades
All college level courses in which a student has received a grade of A, B, C, D or P/S will be considered for transfer evaluation. No F or D- grade courses will be accepted. Please note that while D grades will transfer, some programs require a grade of C or higher for all courses to fulfill requirements.

Time Limit for Courses
General education courses shall have no transfer time limit. Additionally, technical courses applying toward an Associate of Arts (AA) degree shall have no transfer time limit. To ensure students graduate with up-to-date skills, technical credits are valid for five years or have a five-year “lifespan”. This includes transfer technical credits which are used for specific technical program requirements. Technical courses that are beyond the five-year limit may be accepted, based on currency, relevancy and the student’s current work experience.

Degree Residency
A student shall earn a minimum of 20 credits for all associate degrees at the College. The residency requirement shall be reduced to 12 college-level credits for students transferring with at least 12 college-level credits from another Minnesota State Colleges and Universities institution or the University of Minnesota. One-third of the credits required for a diploma or certificate must be earned at the College.

Equivalency
The number of transfer credits granted per course shall not exceed the number granted by the originating institution. All quarter credits will be converted to semester credits.

Additional Types of Credit

AP—Advanced Placement Exams (for High School Students)
Advanced Placement (AP) gives high school students an opportunity to take college-level courses in various subject areas. A score of 3 is the minimum for credit awarded. Grades of 3, 4 or 5 qualify students for credits and/or placement into advanced courses at Saint Paul College. There is no limit to the number of credits a student may earn through the AP exams. However, credits earned through Advanced Placement will not satisfy the residency requirement for graduation at Saint Paul College. Credit can be given for a specific college course if a test covers substantially similar material. If the test material does not match an existing course, students will be given elective credits.

CLEP—College Level Examination Program
Saint Paul College will consider CLEP exam credits for students who want to test out of general education courses and selected business courses. There is no limit to the number of credits a student may earn through the CLEP exam. However, credits
earned through CLEP examinations will not satisfy the residency requirement for graduation at Saint Paul College. A student must provide the College with an official report of CLEP examination scores in order to obtain credit. Equivalent courses and required scores can be found on the College website at saintpaul.edu.

**Note:** Colleges establish their own policies for accepting CLEP credit. Students should consult their transfer college’s CLEP policy to determine whether CLEP credits will transfer and/or how they will be accepted. Consult the College Board website www.collegeboard.org for testing locations, fees and exam information.

**Credit for Prior Learning**

Prior Learning (Competency-Based Education) allows students to present nontraditional learning as competencies to be evaluated for credit by qualified faculty members towards their educational program. These competencies must be the equivalent of what would have been achieved through college coursework. At Saint Paul College, Credit for Prior Learning offers, on a limited basis, students with sufficient work, non-college credit and/or life learning experiences, the opportunity to document competencies and theory learning relevant to specific courses offered at the College. The Credit for Prior Learning option may be available for a limited number of courses. Students interested in pursuing the option of earning credit for prior learning must discuss this option with a qualified faculty member.

**IB—International Baccalaureate (for High School Students)**

The International Baccalaureate (IB) program is an internationally recognized program through which high school students complete a comprehensive curriculum of rigorous study and demonstrate performance on IB examinations. Students may present a full IB diploma or a certificate recognizing specific higher level or standard level test scores. Credit may be awarded for scores of 4 or higher on individual IB examinations or successful completion of the IB diploma. Credit can be given for a specific college course if an exam covers substantially similar material. There is no limit to the number of credits a student may earn through the International Baccalaureate (IB) program. However, credits earned through International Baccalaureate (IB) will not satisfy the residency requirement for graduation at Saint Paul College.

**International Transcripts**

Saint Paul College does not evaluate international transcripts. Students who have completed courses in another country must have their transcripts evaluated by an approved third-party evaluation service. Colleges and universities differ in how they accept these courses.

**Military Education and Experience**

Saint Paul College will consider academic credit for military education and experience gained while on active duty. The American Council on Education's Guide to the Evaluation of Educational Experience in the Armed Forces will be used to evaluate military education and experience. A copy of the student’s Report of Transfer or Discharge (Form DD-214) and an official SMART or AARTS transcript are required for evaluation. For more information on military transcripts, go to the American Council of Education website at www.acenet.edu.

A maximum of 16 semester technical credits will be accepted as elective credits in transfer from military transcripts. General education credits satisfying the Minnesota Transfer Curriculum (MnTC) will be accepted beyond the 16 semester credit maximum. Students may petition for an evaluation of military credits believed to be equivalent to a specific program.

**DANTES—Defense Activity for Non-Traditional Education Support**

The DANTES program supports the voluntary educational program for active military personnel and members of the National Guard and Reserves. The DANTES Subject Standardized Tests (DSSTs), however, are now available for use by civilians at universities and colleges throughout the country. The DSSTs are a series of examinations in various college and technical subjects. The DSST program allows students the opportunity to demonstrate college-level learning acquired outside the classroom. All tests carry ACE (American Council on Education) credit recommendations. Saint Paul College will honor the ACE recommendation and accept courses applicable to a program or course of study.

**Minnesota Bilingual Seals Program**

High School students who earned Minnesota Bilingual or Multilingual seals may earn college credit through transfer. Students must submit their seal/certificate and high school transcript within 3 years of graduating high school to earn college credit. Students must be admitted to the college and have a declared major.

**ACE - American Council on Education Recommendations**

Saint Paul College reviews coursework from external sources with American Council on Education (ACE) Recommendation for potential transfer of credit. The transcript must come from ACE's transcript issuer Credly.

**Background Checks Policy**

Designated Health and Child Development Careers program students are affected by the following:

Minnesota Statutes require that the Department of Human Services (DHS) conduct background studies on individuals providing direct contact services to people receiving services from facilities and agencies licensed by DHS and the Minnesota Department of Health (MDH). Direct contact is defined as providing face-to-face care, training, supervision, counseling, consultation, or medication assistance to people receiving services from the agency or facility. A fee will be applied for the background check.

An individual who is disqualified from having direct contact with persons served by the program as a result of the background study and whose disqualification is not set aside will not be permitted to participate in a clinical placement in facilities with programs subject to licensure under Minnesota statutes. This is to protect the health, safety and rights of persons served by those programs. Failure to participate in a clinical placement required by the academic program could result in ineligibility to qualify for a degree in this program. The Department of Human Services (DHS) determines disqualification and the Department of Human Services will inform an individual of this report.

Students are reminded of the background study requirement upon admission to the program, during the first introductory course in the program and when a work setting is identified for a clinical placement. Background studies must be submitted annually.
REGISTRATION

The College Course Schedule is available online and contains a complete listing of classes that are available each semester. It is available approximately ten weeks before the beginning of the semester. The Course Schedule lists the courses, number of credits, class times, instructors’ names, room numbers and prerequisites. Please note this information is subject to change without notice.

Returning students in a declared major have registration priority. When planning for future courses you are encouraged to work with an Advisor or your program faculty. If you need help in making career decisions, you should make an appointment with the Director of the Career Services. Classes have limited enrollment. Closed classes are posted on the online course schedule.

Registration for classes takes place each semester, including summer semester. Information on how and when to register is sent to new students when they are accepted for admission. Information is also posted on the College website. Not all courses listed in the College Catalog are offered every semester.

A Registration Schedule is published on the College website for each semester and indicates assigned dates and times for registration. Students with an unpaid balance at the College or any other Minnesota State College or University may be unable to register for courses until unpaid balances have been paid.

Returning students have a variety of resources to assist with course selection, including Pathway Advisors, Degree Audit Reports, and Program Requirement Guides.

Registration Process for Current & Returning Students

1. Review Program Requirements Guide and Degree Audit Report (DARS) and meet with a Pathway Advisor or assigned advisor. Select courses.
2. Login into your account to register online; or if assistance is needed, contact your assigned advisor.
3. Pay tuition online or present your fee statement and present it with payment at the Tuition Office before the posted due date. You will receive a paid fee statement upon receipt of payment. Refer to Tuition & Fees for details for payment options.
4. Purchase books and supplies.
5. Attend all courses for which you’ve registered.

Helpful Hint: Purchase your books prior to the start of class online at saintpaulcollegebookstore.com.

Adding, Dropping, or Withdrawing

Students bear primary responsibility for their Course Registrations. Students are responsible for canceling their registration by the due dates posted in the course schedule or to pay any balance due. To cancel registration, a student must login to their e-services account and drop their classes prior to the end of the designated drop/add period. Non-attendance is not a cancellation and students will be held responsible to pay any amount owed.

All students, including those receiving financial aid, will be assessed tuition and fees for the semester based on the number of credits for which they are registered on the 6th day of the semester.

Students may add courses at any time during the published “add” period for each semester. For a course that meets for the full semester, students who drop a course through the 5th day of a semester, may receive a tuition refund (pro-rated for summer semester). The refund schedule varies for courses that meet less than the full semester. Contact the Tuition Office for details on short courses. The add/drop and withdrawal deadlines are listed on the course schedule.

Students may withdraw from courses to receive a “W” grade from the 6th day of the semester through the posted date of withdrawal for the semester. For courses that do not run the entire semester, withdrawal is permitted before 80% of the class session is over.

Students must withdraw from courses online in eServices. No refund is permitted after the 5th day. Courses from which a student officially withdraws will be assigned the letter grade “W” (withdraw). Students who fail to withdraw from a course but stop attending before the end of the semester are subject to being assigned a grade of FW. Refer to the current online schedule in eServices for details regarding withdraw dates.

Students who cannot attend class during the first week of classes (or do not plan to log on for the first day of an online class) need to make arrangements in advance for all absences with their instructor. Students who miss class the first week without making prior arrangements with their instructor are subject to being assigned a grade of FN (Failure for Nonattendance). Students must drop courses they do not intend to attend before the end of the add/drop period.

Student Records

The Records Office is the official recorder of student academic records and progress.

Student Transcripts

Requests for Saint Paul College official transcripts are processed through the Student Records Office. Financial obligations to the College may be required before transcripts are released. An official transcript is issued for a fee upon written request or online submission from the college website: saintpaul.edu/student-services/Student-Records. The transcript serves as the official record of student effort while enrolled at the College. Requests are processed within three business days. There is an additional fee for next business day service.

Satisfactory Academic Progress Guidelines

Saint Paul College is dedicated to providing all students with the opportunity to reach their educational goals. Students are responsible for maintaining an acceptable level of academic progress. The Satisfactory Academic Progress (SAP) standards define the GPA and completion rates students must meet.

To support their efforts to meet academic standards, students should attend class regularly and actively engage in the learning process. Students are also expected to monitor their own academic progress. The following standards are used to determine a student’s academic status at the end of a semester:
Grade Point Average (GPA) Requirement

- Students must successfully maintain a minimum 2.0 cumulative grade point average.

Completion Rate Requirement

Completion rates are calculated with the first attempted credit and for grades A, B, C, D, and P. Grades of I, F, FN, FW, and W are counted as attempted credits.

- Students must successfully maintain a minimum 67% cumulative completion rate.

Academic Warning

The first time academic standards are not met, the student will be placed on academic warning for the next semester of enrollment. Once the warning is issued, a hold is placed on the student's account. Students must complete the online Academic Warning Agreement Form to have their registration hold removed and are strongly encouraged to meet with their Pathway Advisor to develop a success plan to improve their academic standing. Students must earn a minimum 2.0 cumulative GPA and 67% cumulative completion rate while on a warning.

Academic Suspension

Students who fail to meet academic standards in their warning period will be placed on academic suspension for two semesters. All students placed on suspension must appeal to be reinstated. First-semester students who attempt six or more credits and earn grades of all F's, FN's, and/or FW's will be immediately placed on academic suspension.

Appealing Academic Suspension

Appealing Due to Extenuating Circumstances

- Students who believe they failed to achieve satisfactory academic progress due to extenuating circumstances may file an appeal prior to taking the required two semesters off. However, students must provide documentation supporting their claim of extenuating circumstances interfering with their ability to be successful in school.

Appealing for Reinstatement After Serving the Required Two Semesters

- Students who have served their suspension period must appeal for reinstatement by completing the Suspension Appeal Packet, which can be obtained in One Stop or via the Saint Paul College website.

Academic Probation

Students with an approved appeal will be reinstated to the College on probationary status. Students will stay on probation and may continue to attend Saint Paul College if they receive a 2.5 GPA and 100% completion for the semester, even if they have not met the cumulative standards.

Once a student has met the cumulative standards (cumulative 2.0 GPA and cumulative 67% completion rate), they will be in good standing and no longer on probation. Students who do not meet the semester standard will be suspended again.

Academic Forgiveness Policy

The Academic Forgiveness policy is available only to students whose coursework was taken at Saint Paul College (formerly St. Paul Technical College). The policy is a one-time opportunity. The student cannot have been enrolled at Saint Paul College for a minimum of two calendar years (24 months) and the student must have a cumulative GPA of less than 2.0. The coursework forgiven will remain on the student's transcript; however, the credits and the grades will not be carried forward into the student's cumulative grade point average. The student will be permitted to select the courses within the semester to be forgiven. Only Ds, Fs, FNs, FWs and Ws can be forgiven. A maximum of two terms may be forgiven. In order to meet eligibility requirements for Academic Forgiveness, the student must have completed a minimum of 12 credits in residence at Saint Paul College with at least a 2.0 GPA after returning from the minimum 2-year absence. Work completed at another institution cannot be used to satisfy this requirement. The student can obtain the Request for Academic Forgiveness at One Stop.

Satisfactory Progress Standards - for financial aid recipients

Federal regulations require that a college develop a standard of satisfactory academic progress. This satisfactory academic progress standard must have both a qualitative standard (grade point average) and a quantitative standard (course completion).

If the student fails to meet either of these two standards, the student will first be given a warning semester. If the student fails to meet either of the satisfactory academic progress standards during the warning semester, the student will be suspended from financial aid.

Students who have been suspended from financial aid due to these standards, may receive financial aid again after they have met the satisfactory academic standards or by successfully appealing the loss of aid. Appeal procedures for the loss of financial aid may be found online at saintpaul.edu/financialaid.

If the appeal is approved, the student will be placed on probation until both standards have been met. Students bear primary responsibility for their own academic progress and for seeking assistance when experiencing academic difficulty. Students are encouraged to keep a file of their grades and transcripts.

Qualitative Standard

Students are required to maintain a minimum 2.0 cumulative GPA for all coursework including withdrawals, incompletes and non-credit courses. For repeated courses, the highest grade achieved will be used for the GPA. Transfer credits do not affect the student's GPA.

Quantitative Standard

Students are required to complete 67% of the cumulative credits attempted based on their enrollment status. All credits attempted will be calculated into the completion percentage. This includes courses that are designated with a withdrawal, incomplete, non-credit courses and courses that have been repeated. Any coursework that has been accepted as transfer credit toward current program completion will also be included in progress made toward the current program.
Maximum Time Frame
All students are expected to complete their program within an acceptable period of time. Financial aid recipients meeting Satisfactory Academic Progress requirements may receive aid until they complete their program or until they have attempted 150% of the required coursework in their current program/declared major. All credits attempted at the College count toward maximum time frame. This includes withdrawals, incompletes, non-credit courses, and courses that have been repeated. Credits taken under a previous major and transfer credits will count toward maximum time frame.

Implementation
Academic progress is evaluated at the end of each semester. A student who fails to meet cumulative progress requirements will be placed on financial aid probation or suspension. Academic progress will be monitored as follows:

1. Satisfactory Academic progress monitoring begins with the first credit. Upon six (6) credits of enrollment, all students with registered credits during a semester will be evaluated at the end of the semester.
2. Any student who fails to meet cumulative GPA and completion rate satisfactory academic progress requirements for one semester will be placed on warning for the subsequent semester and will be notified by email. Financial aid may be received during a warning status.
3. A student on warning who fails to meet the required cumulative standards will be suspended from financial aid and notified by email.
4. Upon evaluation, if the College determines that it is not possible for a student to meet the minimum cumulative standards prior to completing a degree/diploma or certificate for their declared major, the student will be suspended from financial aid and will be notified by email.
5. A student who has exceeded the maximum time frame will be placed on suspension from financial aid and will be notified by email.

Suspension for Extraordinary Circumstances
The College may immediately suspend a student in certain circumstances, such as but not limited to:

- A student who was previously suspended and whose academic performance falls below acceptable levels during a subsequent semester
- A student who registered for but does not earn any credits for one semester by earning all FN/FW/F grades
- A student who demonstrates an attendance pattern that abuses the receipt of financial aid.

Financial Aid Appeals
A student who fails to make satisfactory academic progress and is suspended from financial aid has the right to appeal based on unusual or extenuating circumstances, which may include but shall not be limited to a death in the family, student’s injury or illness, etc.

Appeals Process
Appeals forms are available online at saintpaul.edu/financialaid. The appeal must include a thorough explanation of the circumstances that affected academic progress and complete “Financial Awareness” counseling on www.studentloans.gov. If applicable, the appeal must include supporting documentation beyond the written explanation. Appeals must be submitted to the Financial Aid Office to be evaluated for an approval or denial. A written decision on the appeal will be provided to the student.

If the appeal is approved, the student may receive financial aid for the next semester. When GPA and/or completion rate requirements for the approved appeal semester are met, the student will remain financial aid eligible. If these requirements are not met for the semester and the student does not meet required standards, the student will be suspended from financial aid eligibility.

Probation
Students who have successfully appealed their suspension will be placed on probation for the next enrolled semester. If, at the end of that semester, the student has met the college’s cumulative grade point average (2.0 GPA) and completion rate (67%) requirements, the student will be in good standing. Students who do not reach the college’s cumulative grade point average and completion requirements, but have a semester GPA of at least 2.5 and course completion of 100% on probation for another semester of enrollment. Students who fail to meet cumulative or semester requirements for GPA and completion will be placed back on financial aid suspension.

TUITION AND FEES

Tuition Rates
The Board of Trustees for Minnesota State Colleges and Universities establishes tuition rates annually. Tuition rates are established on a per-credit basis for all credit course offerings and are subject to change. The Course Schedule lists tuition and fee rates for the term.

Senior Citizen Tuition Options
If you are a qualified senior citizen (over the age of 62) you may be eligible to attend classes at a reduced tuition rate. You must be a MN resident. Refer to the current Course Schedule for details. Registration is allowed on a space-available basis beginning second class session. Registration must happen in-person at the One Stop, Room 1300. Senior citizens who register before the first day of the semester must pay full tuition and fees.

Student Fees
Course Fees Selected courses have additional course fees which can include, but are not limited to, charges for such items as: tools, books, materials and supplies retained by the student, liability insurance (clinical experiences), or special testing fees, etc. Course fees are listed in the Course Schedule displayed on the College website. To determine if a course has additional course fees, select the course from the semester course schedule and place cursor on the course title and click the link to view the course details.
Fees Charged Per Credit MSCSA (Student Association) Fee

The Minnesota State College Student Association fee, assessed to all students, provides for support of the statewide student association by providing training and development of campus leaders, and lobbying of student interests with the legislative and executive branches of the State of Minnesota as well as at the national government level. The MSCSA Fee is 35¢ per credit for the 2021-2022 school year.

Parking/Safety/Facilities Fee

This fee at the College covers costs associated with parking, safety, and facilities. The fee must cover all costs associated with the parking operations of the College. Parking Prices can be found on the College website at saintpaul.edu/parking. Students who do not use their Student ID card are charged a daily fee to use the parking facilities.

Student Life Fee

These funds are for the support and development of Student Life groups, activities and functions.

Technology Fee

A technology fee is charged as allowed by the Minnesota State. The technology fee is used for purchasing instructional equipment and materials such as computers and software, audio-visual equipment, library technology, and support staff.

Other Fees

Health Services fee

A health services fee is charged as allowed by the Minnesota State. The health services fee will be used to support the expansion of professional health resources and services available for students.

Late Fee

There is a late fee of up to $50.00 per semester fee charged to debtors who do not pay their account balance, in full, by the established deadlines. A hold will be placed on your account for any unpaid balance. This hold will prevent you from registering for classes if the balance is $301 or greater, and is more than 30 days old.

Library Fine

Students who fail to return materials will be charged for all overdue library materials.

Non-sufficient Funds/Returned Check Fee

When checks are returned to the college, due to non-sufficient funds (NSF), account closure or stop payment a fee of $24.00 is assessed for each check.

Transcript Fee

There is a $6.25 charge for each academic transcript request. Allow three business days for processing. An additional fee will be charged for next business day service.

SPC Card Replacement Fee

The SPC Card provides multiple campus functions and is used as a photo ID, a parking access card and door access card. There is a $15 charge to replace a lost or stolen SPC Card.

The fee must be paid before the card is re-issued.

All fees are subject to change.

ACCUPLACER Re-Test fee

Students are granted two attempts at the ACCUPLACER each calendar year. The second attempt carries a fee of $5. The fee must be paid before retaking the assessment.

Tuition Payment/Deferment Options

The full tuition and fees must be paid by the posted due date for the semester or classes will be deregistered. You may defer tuition and fees by any of the seven options below.

1. Online through your student account. Payment types accepted are Visa, MasterCard, Discover, or E-Check.
2. Make a payment at the Tuition Office during business hours. Payment types accepted are Master Card, Visa, Discover, cash, or check.
3. Mail your payment to the address below. (Please do not mail cash) Make sure to include your student ID number, name, and phone number. Mail your payment no later than five business days before tuition is due.

Saint Paul College Tuition Office
235 Marshall Avenue
Saint Paul, MN 55102

4. Drop your payment in the Tuition Office Drop Box located next to the tuition windows. Please include your student ID number, name, and phone number. Payments dropped after business hours will be processed the next business day.

5. Set up a payment plan through Nelnet Business Solutions. NBS is a third party tuition management company. For a fee they will set up a payment schedule and forward your payments to the Tuition Office. Allow at least one week prior to the tuition due date for processing.

6. Complete a Financial Aid (FA) application (FAFSA). Please allow two weeks for the Institutional Student Information Record (ISIR) to be received at the school. You are responsible for completing the full FA process.

7. Students who receive funding from scholarships, sponsoring agencies, or organizations will have their tuition deferred. Authorizations should be submitted using the Saint Paul College Authorization for Payment or a similar form that provides the same information. It is the student’s responsibility to ensure that the Tuition Office receives the proper authorization from the third party one week before the tuition due date.

For students registering or adding classes after the tuition due date, the tuition is due within 24 hours of adding classes. Invoices are not mailed. Students must check their account balance online and pay any balance due by the posted due dates on the academic calendar. Students should also check their Saint Paul College email accounts for tuition payment deadline reminders and informational announcements.

For further details on different payment options visit: saintpaul.edu/admissions/tuition-and-fees-payment-options. Students will be responsible for any balances remaining after financial aid, third party, and Nelnet payments have been finalized.
Tuition Policy
You are responsible for dropping the courses you do not wish to take. Please check your eServices account each day during the add/drop period to ensure your schedule is what you intend to take. You are financially and academically responsible for any registered courses. Non-attendance is not a cancellation and students will be held responsible to pay any amount owed.

Non-Resident Tuition Status
The College considers resident and non-resident students the same for tuition rate purposes. Only MN residents are eligible for the Senior Citizen Rate.

Non-Payment of Tuition
Students who have not made payment or do not have a tuition deferment by the posted due date may lose their place in each registered class. Students who are not planning on attending should drop themselves from courses prior to the start of the semester. Students who have not deregistered are responsible for the unpaid balance. Refer to the current Course Schedule for details.

Tuition Refund Policy
Refunds for Total Withdrawal from College
If you withdraw from all courses, you may be eligible for a tuition refund according to the schedule below. You may submit the request online through your account or present an Add/Drop/Withdraw Form to One Stop by the noted due dates. Failure to attend class does not constitute withdrawal.

Withdrawal Period - Fall & Spring Semester Refund
Prior to the 1st day of the semester 100%
1st through 5th business day of the semester 100%
6th through 10th business day of the semester 75%
11th through 15th business day of the semester 50%
16th through 20th business day of the semester 25%
After the 20th business day of the semester 0%

Withdrawal Period - Summer/Other Semester Refund
At least 3 weeks but less than 10 weeks in length
Prior to the 1st day of the semester 100%
1st through 5th business day of the semester 100%
6th through 10th business day of the semester 50%
After the 10th business day of the semester 0%

Refunds for Change of Credit Load
No tuition refund will be made, nor will fees be reduced, by withdrawing from only part of your credits after the 5th business day of the semester.

Refund Time Frame
Refunds for tuition payments made by cash or check will be made to the student’s refund preference with Disbursements, a technology solution, powered by BMTX, Inc. Credit card payments will be refunded to the same credit card that was used when the tuition was paid. A minimum of one week is required to process refunds paid by cash or credit card. A minimum of two weeks is required to process refunds for tuition and fees paid by check.

Waivers
The College may waive amounts due for the following reasons: employee benefit provided by bargaining agreement, death of a student, medical reasons, college error, employment related condition, significant documented personal circumstances, student leader stipends, course conditions, natural disasters or other situations beyond the control of the College. The College cannot waive the LeadMN student association fee. Contact the Tuition Office if you feel you are entitled to a waiver.

FINANCIAL AID
General Information
Financial aid is money that is available to help students finance the cost of an education. Financial aid comes in the form of grants (money that the student does not have to pay back), loans (money that the student must pay back) and college work-study (money the student earns through employment). Eligibility is determined from the results of the Free Application for Federal Student Aid (FAFSA).

As a student, you have the primary responsibility to pay for your education. Financial aid is intended to supplement the difference between the cost of education and the expected family contribution. Several programs are available to help you meet your educational expenses. The Financial Aid Office determines Saint Paul College financial aid eligibility after receiving the FAFSA results and after processing all required documents. The student must be admitted to a program/declare a major at Saint Paul College that leads toward a degree, diploma, or eligible certificate to be qualified to receive financial aid.

Financial Aid Definitions
• FAFSA - The FAFSA is the Free Application for Federal Student Aid, FAFSA. This is the application for all types of financial aid: grants, loans, or college work-study.
• Cost of Attendance - This is considered the cost of education at the College. It includes tuition, fees, a room and board allowance, books, supplies, a transportation allowance, and a personal expense allowance. It helps determine how much financial aid a student is able to receive during a semester of enrollment.
• Expected Family Contribution - An amount, determined by a formula called Federal Methodology, that indicates how much of the student and the student’s family’s resources should be available to help pay for school. The Expected Family Contribution (EFC) is used in determining the student’s eligibility for federal and state financial aid. If a student has unusual expenses that may affect the student’s ability to pay for school, the student should notify the Financial Aid Office.
Types of Financial Aid

Grants
Grants are gift aid, which the student does not have to pay back. Students who have completed a bachelor's degree, or the equivalent from another college, are not eligible for grants.

Federal Pell Grant
Students apply for the Federal Pell Grant by completing the FAFSA. Pell Grants vary from $400 per year up to the federally legislated maximum. Pell Grant recipients must be enrolled in an eligible program and must maintain satisfactory progress in their coursework.

Federal Supplemental Education Opportunity Grant (SEOG)
This program is designed for students who have exceptional financial need. Funds are limited. Eligibility is determined by the Financial Aid Office with priority given to students who apply for Financial Aid early.

Minnesota State Grant
A grant for Minnesota residents who are attending an accredited post-secondary institution, the award process is similar to the Pell Grant. Students apply by completing the FAFSA.

Minnesota Postsecondary Child Care Grant
This grant is for students who are Minnesota residents, have children ages 12 and under (14 and under, if disabled), have financial need, and have child care expenses. Recipients must not be receiving Minnesota Family Investment Program (MFIP) assistance. Students who have received an award letter can request an application from the Financial Aid Office or online.

Work-Study Programs
These programs employ students on campus. Pay is established by the College. These programs provide work for up to 20 hours per week. Total work-study earnings are not to exceed the cost of attendance. Work study positions available on campus include tutors, office assistants, and lab assistants.

Loans
Loans are financial aid that must be paid back. You must complete online entrance loan counseling and a Master Promissory Note through Saint Paul College in order to apply for a loan.

Federal Direct Loans
Students can also receive help to meet their educational expenses by borrowing money from Federal Student Aid. Subsidized and Unsubsidized loans are available based on eligibility. Dependent first year students can borrow up to $5,500 per academic year. Upon completion of 30 credits toward program requirements, eligibility increases to $6,500 per academic year. Independent students are eligible for additional unsubsidized loans. All loans must have two disbursements.

PLUS Loan Program
The Federal Parent Loans for Undergraduate Students (PLUS) Loan Program for undergraduate students can be used by parents of dependent students who are in need of additional funds. The program allows parents to borrow up to the cost of attendance minus other aid. Parents must successfully pass a credit check to be eligible for a PLUS loan.

Private Loans
You are strongly encouraged to pursue the availability of free or lower-cost financial aid with the College's financial aid office; however, private educational loans can bridge the gap between government programs and the cost of attendance. Eligibility is typically based on your credit score. You can only apply for these loans by contacting banks or other lenders.

Other Sources of Financial Assistance
Several government and private agencies provide financial assistance to eligible students. Contact the local office of any of the following agencies for consideration. The agency determines who is eligible for assistance.

• Division of Rehabilitation Services (DRS/DVR): www.deed.state.mn.us/rehab
• Minnesota Indian Scholarship Program: www.ohe.state.mn.us
• Veteran Benefits (VA): www.vba.va.gov/VBA
• Services for the Blind (SSB): www.mnssb.org

Private Scholarships - check with your high school counselor or the public library, and the following websites:
• www.fastweb.com

How to Apply for Financial Aid
1. Apply for admission to the College. Students must declare a major and be enrolled in a program leading towards a degree, diploma or eligible certificates to be qualified for financial aid. Awards vary based on your enrollment level (full-time, part-time). Financial aid will be based on the number of enrolled credits by the drop/add deadline.
2. Fill out the Free Application for Federal Student Aid (FAFSA). You must apply electronically through the Federal Department of Education website at www.fafsa.gov. During the application, enter the Saint Paul College school code, 005533. The Financial Aid Office will receive an electronic copy of the results within two weeks.

3. If you have attended any post-secondary schools prior to Saint Paul College and want to be considered for the Minnesota State Grant, submit academic transcripts to the Financial Aid Office from all previously attended schools.

4. After the Financial Aid Office receives the FAFSA results from Student Federal Aid, your application will be reviewed. Quickly respond to any and all requests for additional information. When your file is complete, financial aid eligibility will be calculated and you will be notified by email that an award letter has been created on your College e-services account.

5. Carefully read your award letter and follow the instructions for receiving awards. All loans and the Minnesota Child Care grant require additional application requirements.

Students Selected for Financial Aid Verification

The College verifies Free Application for Federal Student Aid (FAFSA) information of students selected by the Federal Student Aid or selected by the College. Students selected for verification will be notified by email that the Aid Application Status Letter, explaining the required documentation to complete the verification process, is available on their e-services account. The Aid Application Status Letter will request specific information and/or documents required for verification. Self-reported information including household size or number attending college may be requested or documents including proof of citizenship or child support paid may be needed. The documentation requested will depend on the verification group the student is placed in, as chosen by Federal Student Aid or the College.

Students should submit all required documentation within 30 days of the request. The financial aid process will not continue until the required documentation is received. Not submitting the requested documentation in a timely manner may result in loss of eligibility for the current academic year.

Once all required documentation has been received, students should allow a minimum of 14 business days for the verification process to be completed. If the FAFSA data matches the verification process, the Financial Aid process will continue toward a complete and accurate file at which time the student Award Letter can be viewed on-line at saintpaul.edu under the student's eServices account. Any FAFSA discrepancies found as a result of the verification process will be corrected by the Financial Aid Office and electronically submitted to the central processor. Upon receiving a corrected FAFSA report from the central processor, an Award Letter will be available to the student. Any cases of suspected fraud or misreported information or altered documentation to fraudulently obtain federal funds will be discussed with the College administration and referred to the Office of Inspector General of the Department of Education via Minnesota State.

Applying Financial Aid to Your Account

Financial Aid and other awards start applying to your student account during the third week of each semester. If you are using financial aid to pay your tuition and fees, you will have a balance on your account until the third week of classes. Students interested in charging books and supplies to their student accounts can do this through their Financial Aid award notification process. Any charges made through book charging will be added to your account and then paid when aid is applied.

Any remaining excess funds will be sent to the student with BankMobile Disbursements, a technology solution, powered by BMTX, Inc. Visit www.bankmobiledisbursements.com/refundchoices for details.

After the first disbursement of the semester, aid applies weekly to student accounts on Wednesdays.

Financial Aid Policies & Procedures

Withdrawals

If you withdraw from the College before the add/drop date for a semester, you will not receive financial aid funds because there will be no class registration. If you withdraw from attendance at the College for any reason after the add/drop date for the semester, you will be placed on financial aid probation the following academic semester.

Students who receive financial aid and withdraw from all classes are subject to a Federal Return of Title IV Funds policy. The policy states that if you withdraw up through 60% of the semester, a proportional amount of financial aid either received or that was applied to your student account must be refunded to the Federal government.

Any institution refund calculated within the first four weeks of school semester will be applied to the student's account to reduce the student's share of the Return of Title IV Funds. Funds returned to the federal government are used to reduce the federal program amount from which funds were disbursed. Funds are returned in the following order:

- Unsubsidized Federal Direct Loan
- Subsidized Federal Direct Loan
- Federal PLUS Loan
- Federal Pell Grant
- Federal SEOG Grant

Other assistance under Title IV for which a Return of Funds is required

After the institution's share of any required refund to Title IV programs has been refunded, a proportional share of any remaining institutional refund (not to exceed the amount of the State grant payment the student initially received for the semester), must be returned to the State Grant Program.

Consortium Agreements for Financial Aid

If you are taking classes at another college which are required for your program at the College, you must complete a consortium agreement if you would like those courses considered for financial aid eligibility. The Consortium Agreement form is available online on the Financial Aid Forms page and also in One Stop, and must be completed with an attached registration form from the host institution and submitted to One Stop by the
add/drop deadline. If a consortium agreement is not submitted, financial aid calculations cannot consider courses taken at the host school, as you cannot receive financial aid at two different schools during the same semester of enrollment.

**Tuition & Fee Deferments**

Tuition and fees will be deferred provided the following has been met by the posted tuition deadline for the semester:

1. Student has received an Award Letter with financial aid eligibility equal to or greater than the tuition/fee charge. (Loan eligibility requires a submitted Promissory Note).
2. An electronic Institutional Student Information Record (ISIR) is received resulting from submission of a FAFSA.
3. Any tuition/fee balance not covered by Financial Aid is the student’s payment responsibility.

**Financial Aid Book Charging Process**

An amount of $300 is provided to each student at the start of the semester to charge their course materials and supplies in the bookstore. To use this amount a student must be registered for courses and not have a hold on their account. By using the $300 credit amount the student becomes responsible for any book charges if Financial Aid or Third Party funding sources do not cover the cost of the course materials.

You may charge the cost of your books beyond the $300 credit prior to financial aid being disbursed if you meet all the following criteria:

1. You are registered for current semester classes.
2. You have received your Financial Aid Award Letter and have completed the loan acceptance, if you will be using loan funds to pay for books and supplies.
3. The total financial aid you will be receiving, at your registered credit level, exceeds your current account balance.

Students using Third Party funding may have funds available beyond the $300 credit if the Third Party Authorization has been received and processed and the award is authorized to cover books and/or supplies. Please consult with the Third Party Coordinator to determine if your third party funds are eligible for charging in the Bookstore.

Financial Aid Book Charging allows students to charge books and supplies at the Saint Paul College Bookstore.

**Special Circumstances/Income Review Adjustment**

Federal laws governing financial aid allow the College Financial Aid Office to recalculate financial need in cases of special circumstances not taken into consideration by the Free Application of Federal Student Aid (FAFSA). To ensure fairness and compliance with federal regulations, there are limits to which circumstances can be considered. Special circumstances are considered on a case by case basis.

For more detailed information on types of special circumstances and requirements for submitting an “Income Adjustment Appeal Form” go to saintpaul.edu/financialaidforms.

**Dependency Override Appeal**

Federal Student Aid determines a student’s status as dependent or independent by the answers the student provides on the thirteen questions listed in Step 3 of the Free Application for Federal Student Aid (FAFSA). Students are classified as dependent or independent because federal student aid programs are based on the principle that students (and their parents or spouse) are considered the primary source of support for postsecondary education. The Dependency Override process is used to address on a case-by-case basis a student who claims to be independent but does not meet the federal criteria. The student must demonstrate unique and extenuating circumstance.

For more detailed information on types of extenuating circumstances given consideration and requirements for submitting a “Dependency Override Appeal: Student Information/Recourse Statement” form go to saintpaul.edu/financialaidforms.

**Audited Courses and Credit for Prior Learning**

Audited courses and Credit for Prior Learning are not eligible for Financial Aid.

**Consortium Credits**

Credits for which financial aid is disbursed under a consortium agreement will be recorded as consortium agreement credits and will be included in the calculation of Satisfactory Academic Progress for financial aid.

**Developmental Education Courses & English for Academic Purposes (EAP) Courses**

Developmental Education courses and English for Academic Purposes (EAP) courses will be included in the cumulative GPA. English for Academic Purposes (EAP) courses and up to 30 credits of Developmental Education coursework will be excluded from the 150% maximum time frame calculation.

**Repeated Courses**

Courses may be repeated for financial aid eligibility for “F,” “W,” “FN” or “FW” grades or if program requirements require a higher grade. The cumulative GPA will use the highest grade achieved. To request the opportunity to repeat a course for the third time, students should meet with their Pathway Advisor. Courses repeated a third time require registration permission. The cumulative completion rate includes all repeated courses.

**Tax Benefits for Education**

Tax credits, deductions and savings plans can help taxpayers with their expenses for higher education.

- A tax credit reduces the amount of income tax you may have to pay. Education credits include the American Opportunity Credit and the Lifetime Learning Credit.
- 1098-T Tuition statements are issued in January.
- Please visit for additional information: www.minnstate.edu/system/finance/taxoninformation
- A deduction reduces the amount of your income that is subject to tax, thus generally reducing the amount of tax you may have to pay.
- Certain savings plans allow the accumulated interest to grow tax-free until money is taken out (known as a distribution), or allow the distribution to be tax-free, or both.
- An exclusion from income means that you won’t have to pay income tax on the benefit you’re receiving, but you also won’t be able to use that same tax-free benefit for a deduction or credit.
EDUCATIONAL PROGRAMS

Liberal Arts and Sciences Associate of Arts (AA) Degree

Program Overview
The Associate of Arts (AA) degree is awarded for successful completion of 60 semester credits in liberal arts and sciences and is designed to constitute the first two years of a baccalaureate degree. It is also intended primarily for students who plan to transfer to another college or university to complete a bachelor’s degree. No specific major is listed in conjunction with the degree; however, students may choose electives in a particular field of study in preparation for a planned major or professional emphasis at a four year college or university. An AA degree must include the entire Minnesota Transfer Curriculum (MnTC) 40 semester credits which, pursuant of Minnesota statute, must transfer to any institution in the Minnesota State Colleges and University system or to the University of Minnesota. Students are to develop an educational plan with a Pathway Advisor to verify degree requirements are fulfilled, as requirements may vary depending upon the major and transfer college.

The AA degree can be completed through a variety of course delivery methods including face to face, hybrid and/or online. The Science, Technology, Engineering and Math (STEM), and Liberal and Fine Arts departments offer online classes to satisfy the MnTC requirements. A student may choose to complete the entire AA degree online.

Program Outcomes:
1. Knowledge of the important concepts and principles of the natural sciences, mathematics, history, social and behavioral sciences, arts, and humanities
2. Skills necessary for life roles, including skills in thinking, communication and methods of inquiry and applications of knowledge
3. Critical examination of, and an appreciation for, diverse people, cultures and life roles

General Requirements
- At least 60 earned college-level credits (40 MnTC credits and 20 additional MnTC and/or pre-major elective credits)
- A grade of “C” or better in ENGL 1711
- Cumulative GPA of 2.0
- MnTC GPA of 2.0
- Meet Saint Paul College residency requirement of 20 credits. This requirement shall be reduced to 12 credits for students transferring with at least 12 college-level credits from another Minnesota State Colleges and Universities institution or the University of Minnesota.

Total Credits Required for the AA Degree

<table>
<thead>

</tr>
</tbody>
</table>

Note: Refer to the MnTC Course List. Some courses may be applied to more than one goal area. If you meet the MnTC goal requirements with fewer than 40 semester credits, select additional MnTC courses to complete the minimum requirement of 40 semester credits.
Associate of Fine Arts (AFA) Degree

The Associate in Fine Arts (AFA) is designed for students who plan to transfer to a four-year college to pursue a Bachelor in Fine Arts Degree. It provides an exposure to the general education courses required by four-year Bachelor of Fine Arts Programs.

AFA Degree Programs

- Associate of Fine Arts - Music Degree

General Requirements for the AFA Degree:

- 60 earned college-level credits (a minimum of 30 credits from MnTC courses)
- Cumulative GPA of 2.0
- Meet Saint Paul College residency requirement of 20 credits. This requirement shall be reduced to 12 credits for students transferring with at least 12 college-level credits from another Minnesota State Colleges and Universities institution or the University of Minnesota. For specific course requirements, see the individual program descriptions, located in One Stop, or speak with your Pathway Advisor.

Associate of Science (AS) Degree

The Associate of Science (AS) degree is awarded for successful completion of a program of 60 semester credits in a designated field or area which transfers to a baccalaureate major in a related scientific or technical field. The AS degree provides a balance of liberal arts education and career-oriented classes. The AS degree may prepare students for direct employment; however, articulation agreements must exist between the institution awarding the Associate of Science degree and an institution awarding a related baccalaureate degree. An Associate of Science degree shall include a minimum of 30 semester credits in general education as described in the MnTC distribution requirements for the AS degree.

Transfer Note: While the AS degree has more limited transferability than the AA degree, specific transfer articulation agreements exist with designated four-year colleges and universities for each AS degree. Minnesota Transfer Curriculum courses within the AS degree transfer to institutions in the Minnesota State Colleges and Universities system and other colleges. Please see a Pathway Advisor and refer to the Transfer Articulation Agreements Table for specific information.

AS Degree Programs

- Biology Transfer Pathway
- Business Transfer Pathway
- Chemistry Transfer Pathway
- Child Development Careers ASL
- Computer Graphics and Visualization
- Computer Science Transfer Pathway
- Criminal Justice Transfer Pathway
- Data Science
- Early Childhood Education Transfer Pathway
- Engineering Broad Field
- Finance
- Health Care Administration
- Health Sciences Broad Field
- Management Information Systems
- Public Health
- Science and Engineering Technology

General Requirements for the AS Degree:

- 60 earned college-level credits (a minimum of 30 credits from MnTC courses)
- Cumulative GPA of 2.0
- Meet Saint Paul College residency requirement of 20 credits. This requirement shall be reduced to 12 credits for students transferring with at least 12 college-level credits from another Minnesota State Colleges and Universities institution or the University of Minnesota. For specific course requirements, see the individual program descriptions, located in One Stop, or speak with your Pathway Advisor.

MnTC Distribution Requirements for the AS Degree

The minimum Minnesota Transfer Curriculum (MnTC) distribution requirements for the AS degree are listed below. Credit and course requirements are specific for each program. Refer to the curriculum requirements listed in the Programs of Study for each AS degree program.

Note: Specific course recommendations or requirements for some AS degree programs may apply.

AS Degree General Education Requirements

Refer to the Minnesota Transfer Curriculum Course List for each Goal Area

Goal 1: Communication
ENGL 1711 Composition 1 – 4 cr
COMM 17XX (Goal 1 only) – 3 cr

Goal 3 or Goal 4
Goal 3: Natural Sciences
Goal 4: Mathematical/Logical Reasoning

Goal 5: History, Social Sciences and Behavioral Sciences

Goal 6: Humanities and Fine Arts

Goals 1–10 of the Minnesota Transfer Curriculum
Select a minimum of 14 additional credits
Students must select courses from at least six (6) Goal Areas of the Minnesota Transfer Curriculum.

Total General Education Requirements 30
**Associate of Applied Science (AAS) Degree**

The Associate of Applied Science degree (AAS) is awarded for successful completion of a program of 60–72 semester credits and is intended for students who desire immediate employment upon graduation. At Saint Paul College, the AAS program shall include a minimum of 16 semester credits of liberal arts and sciences courses as described in the MnTC distribution requirements for the AAS degree.

**Transfer Note:** The AAS degree is not intended to transfer to an upper-division college; however, some articulation agreements exist with designated four-year colleges and universities for several of the AAS degree programs. Minnesota Transfer Curriculum (MnTC) courses within the AAS degree transfer to institutions in the Minnesota State Colleges and Universities system and other colleges. Please see a Pathway Advisor for specific information and refer to the Transfer Articulation Agreements Table.

**AAS Programs**

- Accounting
- Advanced Practice Esthetics
- Automotive Service Technician
- Child Development Careers
- Clinical Sports Massage
- Computer Network Engineering
- Computer Programming
- Cosmetology
- Culinary Arts
- CyberSecurity
- Electromechanical Automation Systems
- Geographic Information Science
- Global Trade Specialist
- Health Information Technology
- Healthcare Informatics
- Human Resources
- Management
- Marketing
- Medical Laboratory Technician
- Medical Office Professional
- Office Management Professional
- Pharmacy Technician
- Project Management
- Respiratory Therapist
- Sheet Metal-HVAC Ducts and Fittings
- Sign Language Interpreter/Transliterator
- Sport and Exercise Sciences
- Supply Chain Logistics
- Surgical Technology
- Visualization Technology

**General Requirements for the AAS Degree:**

- 60–72 earned college-level credits (a minimum of 16 credits from MnTC courses)
- Cumulative GPA of 2.0 or higher
- Meet Saint Paul College residency requirement of 20 credits. This requirement shall be reduced to 12 credits for students transferring with at least 12 college-level credits from another Minnesota State Colleges and Universities institution or the University of Minnesota. For specific course requirements, see the individual program descriptions, located in One Stop, or speak with your Pathway Advisor.

**MnTC Distribution Requirements for the AAS Degree**

The minimum Minnesota Transfer Curriculum (MnTC) distribution requirements for the AAS degree are listed below. Credit and course requirements are specific for each program. Refer to the curriculum requirements listed in the Programs of Study section for each AAS degree program.

**Total General Education Requirements**

16

**Diploma Programs**

Diplomas are awarded for successful completion of 30–72 semester college-level credits and are intended for students who desire entry-level employment skills or career advancement. Students in diploma programs are required to complete technical courses as well as general education courses. One third of the credits required for a diploma must be earned at the College.

**Certificate Programs**

Certificates are awarded for successful completion of 9–30 semester college-level credits. Certificates are awarded for successful completion of a program intended to provide students with entry-level employment skills or to enhance a student’s technical skills. One third of the credits required for a certificate must be earned at the College.

**Developmental Coursework**

Developmental coursework has assisted thousands of students in getting started in College programs. The goal of developmental coursework is for students to acquire the necessary knowledge and skills that will help them succeed in programs. Developmental courses are not considered college-level credit and will not apply towards any certificate, diploma, or degree completion requirements.

**English for Academic Purposes (EAP)**

The purpose of English for Academic Purposes (EAP) coursework is to assist limited-English speakers from different ethnic and cultural backgrounds to learn English and increase their chances of success at Saint Paul College. These classes are tailored to meet these unique needs.
Internships
Some major program areas require an internship. For other areas, an internship is optional. When students are ready to complete this phase of their training, they should consult with their faculty advisor to coordinate the internship.

While completing the internship, the student remains registered at Saint Paul College. Students are not excused from tuition payment and must continue to meet course requirements for all courses in which they are enrolled.

Saint Paul Joint Apprenticeship
Saint Paul College has worked with the building trades for many years. In cooperation with Advisory and Joint Apprenticeship committees, Saint Paul College works to give trade apprentices the most up-to-date education and training available in the United States. Most applicants are accepted into an apprenticeship program by either a) working in the occupation, b) being referred by an employer, or c) having completed a pre-apprenticeship training program. To enroll in one of the trade programs, please contact One Stop for the next available opening date and application. Entrance exams, and in some cases interviews, are required. To enroll in a program without a program completion requirement, students must contact that apprenticeship coordinator. Students may obtain their name or number by calling the Career and Technical Division, 651.846.1609.

MINNESOTA TRANSFER CURRICULUM
The Saint Paul College mission endorses the centrality of general education in its programming and its commitment to offer breadth, as well as depth, of study in its curriculum. The Minnesota Transfer Curriculum (MnTC) is a coherent requirement of Saint Paul College programs and is clearly identifiable as an integral part of the curriculum. The College is committed to, and strives toward, outcomes that impart common knowledge, intellectual concepts and attitudes every person ought to possess.

Minnesota Transfer Curriculum Goals
The Minnesota State Colleges and Universities system has developed a common general education curriculum called the Minnesota Transfer Curriculum (MnTC). Completion of this defined transfer curriculum at one institution enables a student to receive credit for all lower division general education upon admission to any other Minnesota public institution.

The MnTC is intended to achieve the following ten goals:

1. Written and Oral Communication
   To develop writers and speakers who use the English language effectively and who read, write, speak and listen critically. As a base, all students should complete introductory communication requirements early in their collegiate studies. Writing competency is an ongoing process to be reinforced through writing-intensive courses and writing across the curriculum. Speaking and listening skills need reinforcement through multiple opportunities for interpersonal communication, public speaking and discussion.

   a. understand/demonstrate the writing and speaking processes through invention, organization, drafting, revision, editing and presentation.

   b. participate effectively in groups with emphasis on listening, critical and reflective thinking, and responding.

   c. locate, evaluate, and synthesize in a responsible manner material from diverse sources and points of view.

   d. select appropriate communication choices for specific audiences.

   e. construct logical and coherent arguments.

   f. use authority, point-of-view, and individual voice and style in their writing and speaking.

   g. employ syntax and usage appropriate to academic disciplines and the professional world.

2. Critical Thinking
   To develop thinkers who are able to unify factual, creative, rational and value-sensitive modes of thought. Critical thinking will be taught and used throughout the general education curriculum in order to develop students’ awareness of their own thinking and problem-solving procedures. To integrate new skills into their customary ways of thinking, students must be actively engaged in practicing thinking skills and applying them to open-ended problems.

3. Natural Sciences
   To improve students’ understanding of natural science principles and of the methods of scientific inquiry, i.e., the ways in which scientists investigate natural science phenomena. As a basis for lifelong learning, students need to know the vocabulary of science and to realize that, while a set of principles has been developed through the work of previous scientists, ongoing scientific inquiry and new knowledge will bring changes in some of the ways scientists view the world. By studying the problems that engage today’s scientists, students learn to appreciate the importance of science in their lives and to understand the value of a scientific perspective. Students should be encouraged to study both the biological and physical sciences.

   a. demonstrate understanding of scientific theories

   b. formulate and test hypotheses by performing laboratory, simulation, or field experiments in at least two of the natural science disciplines. One of these experimental components should develop, in greater depth, students’ laboratory experience in the collection of data, its statistical and graphical analysis, and an appreciation of its sources of error and uncertainty.

   c. communicate their experimental findings, analyses, and interpretations both orally and in writing.

   d. evaluate societal issues from a natural science perspective, ask questions about the evidence presented, and make informed judgments about science-related topics and policies.
4. Mathematical/Logical Reasoning
To increase students’ knowledge about mathematical and logical modes of thinking. This will enable students to appreciate the breadth of applications of mathematics, evaluate arguments and detect fallacious reasoning. Students will learn to apply mathematics, logic and/or statistics to help them make decisions in their lives and careers. Minnesota’s public higher education systems have agreed that developmental mathematics includes the first three years of a high school mathematics sequence, through intermediate algebra.

a. illustrate historical and contemporary applications of mathematical/logical systems.
b. clearly express mathematical/logical ideas in writing.
c. explain what constitutes a valid mathematical/logical argument (proof).
d. apply higher-order problem-solving and/or modeling strategies.

5. History, Social and Behavioral Sciences
To increase students’ knowledge of how historians and social and behavioral scientists discover, describe and explain the behaviors and interactions among individuals, groups, institutions, events and ideas. Such knowledge will better equip students to understand themselves and the roles they play in addressing the issues facing humanity.

a. employ the methods and data that historians and social and behavioral scientists use to investigate the human condition.
b. examine social institutions and processes across a range of historical periods and cultures.
c. use and critique alternative explanatory systems or theories.
d. develop and communicate alternative explanations or solutions for contemporary social issues.

6. Humanities and Fine Arts
To expand students’ knowledge of the human condition and human cultures, especially in relation to behavior, ideas and values expressed in works of human imagination and thought. Through study in disciplines such as literature, philosophy and the fine arts, students will engage in critical analysis, form aesthetic judgments and develop an appreciation of the arts and humanities as fundamental to the health and survival of any society. Students should have experiences in both the arts and humanities.

a. demonstrate awareness of the scope and variety of works in the arts and humanities.
b. understand those works as expressions of individual and human values within an historical and social context.
c. respond critically to works in the arts and humanities.
d. engage in the creative process or interpretive performance.
e. articulate an informed personal reaction to works in the arts and humanities.

7. Human Diversity
To increase students’ understanding of individual and group differences (e.g., race, gender, class) and their knowledge of the traditions and values of various groups in the United States. Students should be able to evaluate the United States’ historical and contemporary responses to group differences.

a. understand the development of and the changing meanings of group identities in the United States, history and culture.
b. demonstrate an awareness of the individual and institutional dynamics of unequal power relations between groups in contemporary society.
c. analyze their own attitudes, behaviors, concepts and beliefs regarding diversity, racism, and bigotry.
d. describe and discuss the experience and contributions (political, social, economic, etc.) of the many groups that shape American society and culture, in particular those groups that have suffered discrimination and exclusion.
e. demonstrate communication skills necessary for living and working effectively in a society with great population diversity.

8. Global Perspective
To increase students’ understanding of the growing interdependence of nations and peoples and develop their ability to apply a comparative perspective to cross-cultural social, economic and political experiences.

a. describe and analyze political, economic, and cultural elements which influence relations of states and societies in their historical and contemporary dimensions.
b. demonstrate knowledge of cultural, social, religious and linguistic differences.
c. analyze specific international problems, illustrating the cultural, economic, and political differences that affect their solution.
d. understand the role of a world citizen and the responsibility world citizens share for their common global future.

c. analyze and reflect on the ethical dimensions of
d. recognize the diversity of political motivations and interests of others.

e. identify ways to exercise the rights and responsibilities of citizenship.

10. People and the Environment

To improve students’ understanding of today’s complex environmental challenges. Students will examine the interrelatedness of human society and the natural environment. Knowledge of both bio-physical principles and socio-cultural systems is the foundation for integrative and critical thinking about environmental issues.

a. explain the basic structure and function of various natural ecosystems and of human adaptive strategies within those systems.

b. discern patterns and interrelationships of bio-physical and socio-cultural systems.

c. describe the basic institutional arrangements (social, legal, political, economic, religious) that are evolving to deal with environmental and natural resource challenges.

d. evaluate critically environmental and natural resource issues in light of understandings about interrelationships, ecosystems, and institutions.

e. propose and assess alternative solutions to environmental problems.

f. articulate and defend the actions they would take on various environmental issues.

---

**Minnesota Transfer Curriculum (MnTC) Course List**

To earn the full Minnesota Transfer Curriculum, all ten goal areas listed below must be completed. A total of at least 40 semester credits must be earned. Courses designated with a superscript (e.g., BIOL 1710\(^6\)) satisfy more than one goal area; however, credits are counted only once toward the 40-credit minimum requirement. A (p) indicates a prerequisite is required for that course. Completion of the MnTC meets the lower division general education requirements at Minnesota State Colleges and Universities and the University of Minnesota. Contact the Pathway Advisor for more information.

To follow the Associate of Science or Associate of Applied Science requirements for general education courses, choose from the MnTC courses in the next column, according to the distribution requirements for your degree. The Associate of Science degree requires 30 MnTC credits; the Associate of Applied Science degree requires 16 MnTC credits.

For any additions or changes in the MnTC Course List, contact a College Pathway Advisor in Advising & Counseling.

Transfer to Other Institutions

To ensure a smooth transfer from Saint Paul College to a four-year college or university, it is important to understand the types of degrees offered at the College:

An Associate of Fine Arts (AFA) degree is designed for students who plan to transfer to a four-year college to pursue a Bachelor in Fine Arts Degree. It provides an exposure to the general education courses required by four-year Bachelor of Fine Arts Programs.

The Associate of Arts (AA) degree is designed for transfer and offers flexibility in terms of the variety of colleges to which a student can transfer and in the variety of majors that can be chosen. The AA degree requires mostly general education courses (40 credits), which is what gives it more transferability. The AA degree consists of the Minnesota Transfer Curriculum (MnTC). Completion of the MnTC with a 2.0 GPA meets the general education requirements at any of the public Minnesota State Colleges and Universities and the University of Minnesota. Several private colleges also honor the AA degree. Some four-year majors require specific general education courses referred to as premajor requirements.

**Note:** Course requirements may vary depending on the major and transfer college, so it is important to talk to a Pathway Advisor at Saint Paul College and to the appropriate person at the transfer college. Refer to the General Transfer Table.

An Associate of Science (AS) degree is intended to prepare students for immediate employment; however, students can transfer to complete a Bachelor’s degree when they transfer to colleges with which Saint Paul College has articulation agreements. In addition to technical requirements, the AS degree requires 30 credits of general education (MnTC) courses. Additional general education courses may be required to complete a Bachelor’s degree, particularly if students transfer to a college where an articulation agreement does not exist.

An Associate of Applied Science (AAS) degree is intended mainly to prepare students for direct employment. Students who are following an AAS degree and who are interested in transfer are strongly advised to talk to a Saint Paul College Pathway Advisor in the Advising & Counseling Center as transfer options are more limited. In addition to technical requirements, the AAS degree requires 20 credits of general education (MnTC) courses. Additional general education courses typically would be required to complete a Bachelor’s degree for students who transfer, particularly to colleges with which articulation agreements do not exist. Refer to the Transfer Articulation Agreements Table.

**Understanding Transfer of Credits**

The receiving college or university decides which credits transfer and if those credits meet its degree requirements; however, a course that meets a Minnesota Transfer Curriculum (MnTC) goal at Saint Paul College will meet the same goal at a Minnesota State Colleges and Universities institution.

**Note:** A course can meet a Minnesota Transfer Goal at the sending institution and yet may or may not be considered equivalent to a course at the receiving institution. The accreditation of both the sending and receiving institution can affect the transfer of credits earned, but it is not the only factor in determining transfer of credits. Institutions accept credits from courses and programs like those they offer. They look for similarity in course goals, content and level: “like” transfers to “like.” The name of a course is not sufficient to determine equivalency. Not everything that transfers counts toward graduation. Bachelor’s degree programs usually count credits in three categories: general education, major/minor courses and prerequisites/electives. The key question is, “Will your credits fulfill requirements of the degree or program you choose?”

A change in career goal or major might make it difficult to complete all degree requirements within the usual number of graduation credits. Colleges and universities differ in how they accept courses and other types of college credits (CLEP, AP, IB, international credits, etc.).

Since requirements and acceptance of Saint Paul College credits differ from one college to another, it is important to talk to a Saint Paul College Pathway Advisor, consult college catalogs and websites and talk to advisors at the four-year institution. Pathway Advisors and other transfer resources are available in Advising and Counseling. Transfer guides to four-year institutions may be available to provide guidance in selecting the courses intended to transfer from Saint Paul College. Also access the Saint Paul College website (saintpaul.edu) or the Minnesota Transfer website (www.mntransfer.org) for more information.

Obtain the following materials and information from the four-year institution: college catalog, transfer brochure, information on financial aid (how to apply and by what date), information about admissions criteria and materials required for admission (e.g., transcripts, test scores, portfolio, etc.). Note that some majors have limited enrollment and/or special admission requirements such as specific grade point averages.

**Note:** Minnesota State Colleges and Universities and the University of Minnesota have high school preparation requirements for admission. Consult an advisor at your intended transfer school for more information.

After reviewing this information, contact the Pathway Advisor or someone in the division or program of interest. Be sure to ask about course transfer and admissions criteria.
Applying for Transfer Admission at Other Institutions

Application for admission is the first step in transferring. Fill out the application early, prior to the deadline and enclose the required application fee. Request official transcripts be sent from all previously attended institutions. The student may also be required to provide a high school transcript or GED test scores.

Make certain the college or university has been supplied with all the necessary paperwork. Most colleges make no decisions until all required documents are filed. If nothing has been heard from the intended college of transfer after one month, call to check on application status.

After receiving notification of acceptance, transcripted credits will be evaluated for transfer. A written evaluation should explain which courses transfer and which do not. How courses specifically meet degree requirements may not be decided until orientation or selection of a major.

Contact the college of transfer with questions or to find out why judgments were made about specific courses. Each student has the right to an appeal. See Your Rights as a Transfer Student.

Your Rights as a Transfer Student

Students are entitled to:

- A clear, understandable statement of an institution’s transfer policy.
- A fair credit review and an explanation of why credits were or were not accepted.
- A copy of the formal appeals process.
- A review of eligibility for financial aid or scholarships.

Steps in the Appeals Process:

1. The student fills out an appeals form. Supplemental information provided to reviewers can include: a syllabus, course description, or reading list, depending upon the type of appeal.
2. A review by the appropriate department or committee will be conducted.
3. The decision is conveyed in writing to the student.
4. The student may appeal the decision.

For help with transfer questions or concerns, contact the Pathway Advisor or your advisor at the transfer college.

Transfer Articulation Agreements

Saint Paul College has formed articulation agreements with a number of public and private institutions to assist students following some AS, AAS, diploma or certificate programs with their transfer goals. Please see a Pathway Advisor for further information.

General Transfer Table 2022-2023

For students following the Associate of Arts (AA) or other general transfer

The following table summarizes transfer to many colleges. Students who are planning to transfer to other institutions should work with Pathway Advisor at Saint Paul College and the college to which they are transferring. Certain majors require specialized coursework, so the following provides a guide for general transfer; it is not intended to cover specific requirements for all majors. Admission requirements may vary depending on the major the student is pursuing. Students should consult with the transfer college and use transfer guides to find out admission deadlines and requirements.

Note: Students are free to explore transfer to any college, including colleges not listed in the following table.

Transfer guides are also available at saintpaul.edu/transferguides.

References to the Minnesota Transfer Curriculum (MnTC)

Throughout the following program pages, the Minnesota Transfer Curriculum (MnTC) will be referenced regarding General Education requirements. The MnTC has specific credit requirements and ten goal areas. Some program areas will have specific general education course numbers listed as required or recommended for MnTC goal areas. Notations such as “Goal 4: Mathematics/Logical Reasoning” will be listed instead of specific course numbers, which means that students may select specific courses from that MnTC goal area to fulfill the requirements of the program.

For example, if a program requires a non-specified, four-credit course in social or behavioral sciences, the program requirement would be listed as “Goal 5 – History, Social Science & Behavioral Sciences: 4 credits.” This means that any four-credit course listed under Goal 5 of the Minnesota General Education Transfer Curriculum could be used to fulfill that requirement.

It may be necessary for students to select additional MnTC credits beyond the minimum number required in each goal area in order to reach the total MnTC/General Education credits required for their degree or program.

The specific courses for each MnTC Goal Area are listed in this Catalog and on our website.

Program Requirement Guides

Program Requirement Guides for each individual program are available in One Stop and Advising & Counseling.

The guides are also available on our website at saintpaul.edu/ProgramGuides.
### Business Programs

The mission of the Business Department at Saint Paul College is to sustain the College mission by providing quality, lifelong business education supported by technology for a diverse, metropolitan student population.

Accounting  AAS DEGREE

Program Overview
An accountant examines, analyzes, and interprets accounting data for the purpose of giving advice and preparing financial statements. Duties may include performing such activities as recording receipts and disbursements, and preparing state and federal reports. The accountant may prepare reports and statements on a computer or manually.

Excellent reading skills and a combination of interest and ability to concentrate on detail, an analytical mind, good judgment and absolute integrity are necessary for success in the field of accounting.

Career Opportunities
With more and more emphasis being placed on computer usage for accounting careers, opportunities for employment in this field are excellent. Rate of advancement may be swift and the rewards generous.

The accounting profession offers a vast arena of employment potential. Typical places of employment include accounting departments in governmental agencies, financial institutions, private business and industry, and public accounting firms. Other job titles may be tax accountant, cost accountant, staff accountant, government accountant, auditor or junior accountant. The financial accounting technician positions are found in the areas of public accounting, private accounting, non-profit accounting, auditing, taxation, cost accounting and managerial positions.

Program Outcomes
1. Complete accounting processing according to GAAP both manually and using accounting software.
2. Analyze the effects of basic income and payroll tax rules on individuals and entities.
3. Demonstrate proficiency in using computer software including spreadsheet, account and tax to solve complex business issues.

Accounting Technician DIPLOMA

Program Overview
The Accounting Technician monitors and controls various types of electronic data processing equipment used to process accounting data. Applications would include automated general ledger and other accounting subsystems, spreadsheet applications and database management. The Accounting Technician may also assist in the planning and implementation of automated accounting systems.

Excellent reading skills and a combination of interest and ability to concentrate on detail, an analytical mind, good judgment and absolute integrity are necessary for success in the field of accounting.

Career Opportunities
With more and more emphasis being placed on computer usage for accounting careers, opportunities for employment in this field are excellent. Rate of advancement may be swift and the rewards generous.

The Accounting profession offers a vast arena of employment potential. Typical places of employment include accounting departments in governmental agencies, financial institutions, private business and industry, and public accounting firms. Other job titles may be tax accountant, cost accountant, staff accountant, government accountant, auditor or junior accountant. The financial accounting technician positions are found in the areas of public accounting, private accounting, non-profit accounting, auditing, taxation, cost accounting and managerial positions.

Program Outcomes
1. Graduates will possess the knowledge and skills for immediate employment in related business support areas.
2. Graduates will be proficient in computer software and its application to financial accounting, taxation, and financial analysis.
3. Graduates will have knowledge of financial accounting theory and financial statement analysis.
4. Graduates will serve their employers and clients in all phases of accounting, including financial accounting, managerial accounting and tax accounting.

Minimum Program Entry Requirements
Students entering this program must meet the following minimum program entry requirements:

Reading: Score of 250+ or grade of “C” or better in READ 0722 or READ 0724 or EAPP 0900

Writing: Score of 250+ or grade of “C” or better in ENGL 0922 or EAPP 0900

Arithmetic: Score of 250+

Assessment Results and Prerequisites:
Students admitted into Saint Paul College programs may need to complete additional courses based on assessment results and course prerequisite requirements. Certain MATH, READ, and ENGL courses have additional prerequisites.

Information is subject to change.  
This Program Requirements Guide is not a contract.
Program Overview
An accountant examines, analyzes, and interprets accounting data for the purpose of giving advice and preparing financial statements. Duties may include performing such activities as recording receipts and disbursements, and preparing state and federal reports. The accountant may prepare reports and statements on a computer or manually.

This program targets Finance and Business students with an interest in accounting and a desire to add an Accounting Certificate to their resume and enhance their career path and potential. Finance students pursuing an AS degree from Saint Paul College can obtain this Certificate by taking four additional courses.

Excellent reading skills and a combination of interest and ability to concentrate on detail, an analytical mind, good judgment and absolute integrity are necessary for success in the field of accounting.

Career Opportunities
With more and more emphasis placed on computer usage for accounting careers, opportunities for employment in this field are excellent. Rate of advancement may be swift and the rewards generous.

The accounting profession offers a vast arena of employment potential. Typical places of employment include accounting departments in governmental agencies, financial institutions, private business and industry, and public accounting firms. Other job titles may be tax accountant, cost accountant, staff accountant, government accountant, auditor or junior accountant. The financial accounting technician position is found in the areas of public accounting, private accounting, non-profit accounting, auditing, taxation, cost accounting and managerial positions.

Program Outcomes
1. Complete accounting processing according to GAAP both manually and using accounting software.
2. Analyze the effects of basic income and payroll tax rules on individuals and entities.
3. Demonstrate proficiency in using computer software including spreadsheet, account and tax to solve complex business issues.

Assessment Results and Prerequisites:
Students admitted into Saint Paul College programs may need to complete additional courses based on assessment results and course prerequisite requirements. Certain MATH, READ, and ENGL courses have additional prerequisites.
Program Overview
This degree is designed for students to continue their education in business towards a bachelor’s degree at four-year institutions. Bachelor degree majors include Management, Marketing, Accounting, Human Resources, and International Business. The Business Transfer Pathway AS degree prepares students for general management responsibilities. Students learn about the functions of business, including accounting, management, marketing, and human resources. Students study a broad background of business and liberal arts subjects that prepare them for entry-level positions in business. This program is also available completely online.

Career Opportunities
Employment opportunities are very good for skilled, capable, and dependable business professionals. Employers are looking for business professionals with excellent communication skills, organizational skills, human relation skills and enthusiasm for the job and organization. Graduates should continue their education towards a bachelor's degree or begin work in a variety of settings. Graduates can explore opportunities that match their interests and education in a variety of industries.

Program Outcomes
1. Apply accounting or finance concepts and principles in making business decisions.
2. Create business documents using computer application programs.
3. Explain the major functional areas of the business organization including management, marketing, finance, information technology, human resources, and accounting.
4. Integrate management principles in relationship to finance, human resources, products, services and information.

Transfer Opportunities
Saint Paul College has transfer agreements & partnerships between many post-secondary institutions. For more information please go to saintpaul.edu/Transfer.
Program Overview
The Nonprofit Certificate program is designed for students who are currently working in the nonprofit sector or for those who desire an introductory perspective on the unique issues facing a nonprofit organization. This certificate program consists of 12 courses geared to provide the essential information of nonprofit business. These courses are delivered in a timely manner designed to fit your busy work and family schedules. Students will examine the fundamental principles of nonprofit, the roles and responsibilities of a nonprofit board of directors and management team, the essential aspects of fundraising, and the fundamentals of the budgeting process.

Nonprofit organizations face new challenges: government funding cutbacks, growing numbers of clients, and the expanding need to acquire and manage financial resources. Nonprofit organizations must find ways to meet these challenges.

Enrolling in this certificate program will provide you with knowledge designed to empower the nonprofit organization employee with the skills necessary to succeed. For those who work in, or desire to work in, a nonprofit organization or business environment, this is the program for you!

Program Outcomes
1. Graduates will examine the fundamental principles of the nonprofit organization, as well as roles and responsibilities of nonprofit board of directors, volunteers, and the management team.
2. Graduates will develop practical and managerial skills necessary to plan operational success.
3. Graduates will understand financial and accounting terms.
4. Graduates will develop the skills of the marketing process.
5. Graduates will learn the basics of employment law, compliance and regulatory requirements.
6. Graduates will examine the foundational aspects of fundraising and grant writing and how to maximize those opportunities.
7. Graduates will develop a successful leadership style.
8. Graduates will gain confidence and improve communication skills.
9. Graduates will explore the process of negotiating and evaluate negotiation styles.

Program Overview
Small businesses drive the economy, account for two-thirds of new jobs, and drive innovation and competition. Many people dream of owning their own business for financial and professional independence as well as the pride of ownership. The entrepreneurship certificate provides the knowledge and fundamental skills necessary for those interested in owning their own business. Learn how to use your skills and knowledge of your industry to help make the dream of owning your own business one step closer to reality by gaining the knowledge to successfully evaluate business concepts. Students will learn the marketing and promotion of small businesses, sales, project management; the tools necessary to launch and maintain their own business with an innovative focus and entrepreneurial spirit.

Career Opportunities
Employment opportunities are excellent for starting your own business.

Program Outcomes
1. Describe the functions of small business in society including the major concepts related to business ownership and the factors that influence them.
2. Apply accounting data entries in generally accepted formats.
3. Examine the entrepreneurial risks and challenges inherent in each major component of the entrepreneurial business.
4. Distinguish the characteristics of a successful entrepreneur.
5. Design a business plan that includes a concept statement and a business model.

**Finance CERTIFICATE**

**Program Overview**
The Finance Certificate program is designed for students who have a desire to learn or enhance specific finance skills. These skills include summarizing and analyzing specific financial data, personal finance and money and banking. The graduate will help prepare spreadsheet analysis, database entries and provide other application software support.

This program is targeted at accounting and business students who have an interest in finance and would like to add a certificate in finance to their resume to enhance their career path and potential. This certificate program covers the fundamental areas of family and personal financial planning, basic financial theory and issues related to banking and the financial industry. Basic financial theory includes the time value of money concepts and the theory of pricing various types of financial instruments.

Business managers in all different roles face financial challenges in today's complex business environment. Enrolling in this certificate program will give students the financial tools they need to become better rounded financial managers and also will allow professionals in any field to improve their performance by understanding the financial functions within their area and company.

Excellent reading skills and a combination of interest and ability to concentrate on detail, an analytical mind, good judgment and absolute integrity are necessary for success in the field of finance.

**Program Outcomes**
1. Graduates will communicate effectively and identify finance career options.
2. Graduates will be able to apply finance theory to their personal financial situation.
3. Graduates will be able to apply finance theory to financial decisions within the banking and financial industries.
4. Graduates will develop characteristics and finance intelligence that will allow them to make prudent financial decisions in whatever function they occupy within an organization.

Program Overview
The global trade area is especially suited for persons who are self-reliant, imaginative, adaptable, and who possess an interest in working with people from other cultures.

Career Opportunities
More than four million people in the United States work in jobs related to global trade. In Minnesota, many businesses engage in global trade, with a dramatic increase in trade activity expected within five years.

A career in global trade offers you the opportunity to work in the global marketplace. The Global Trade Specialist Program will provide you with knowledge and skills that will prepare you for employment in the export and import departments of businesses. You will be working with people from foreign countries, handling foreign orders, filling overseas orders, handling customer matters and determining tariff rates for the entry of foreign goods through U.S. Customs. Job titles include: Global Sales/Marketing Assistant, Global Marketing Communication Coordinator, Global Documentation Specialist, Global Customer Service Coordinator, Export-Import Coordinator, Global Banker and Global Transportation Coordinator.

This program also provides an excellent foundation for individuals wanting to be entrepreneurs in the import/export business. The import/export field is growing! You can grow with it.

Program Outcomes
1. Analyze international business situations in keeping with professional standards and recommend appropriate courses of action.
2. Identify custom clearing processes to bring goods into the US and the methods of entry into foreign markets.
3. Prepare export and import documentation and follow procedures to support the movement of products and services in the organization’s global supply chain.
4. Evaluate the impact of statutory and regulatory compliance on an organization’s integrative trade initiatives.
5. Apply basic concepts and terminology needed to independently perform basic logistics and trade operations services.

Global Trade Professional CERTIFICATE

Program Overview
This certificate is transferable to the Global Trade Specialist AAS program.

This certificate program is designed for an individual who is currently working in the Global Trade/Logistics field, or has a prior degree. It is not for entry level to the global trade field, but is designed as an add-on certificate to enhance and build on prior knowledge.

Career Opportunities
More than four million people in the United States work in jobs related to global trade. In Minnesota, many businesses engage in global trade, with a dramatic increase in trade activity expected within five years.

A career in global trade offers you the opportunity to work in the global marketplace. The Global Trade Specialist Program will provide you with knowledge and skills that will prepare you for employment in the export and import departments of businesses. You will be working with people from foreign countries, handling foreign orders, filling overseas orders, handling customer matters and determining tariff rates for the entry of foreign goods through U.S. Customs. The program also provides an excellent foundation for individuals wanting to be entrepreneurs in the import/export business. The import/export field is growing! You can grow with it.

Program Outcomes
1. Graduates will have knowledge and skills in domestic and global transportation management and logistics.
2. Graduates will have knowledge of U.S. Custom regulations and classifications.
3. Graduates will demonstrate the ability to successfully perform as Global Trade Specialists via internships.
4. Graduates will be prepared for employment as Global Trade Specialists.
5. Graduates will have knowledge and skills in customer service.

Program Overview
The Hospitality Management curriculum focuses on the management of today’s exciting hospitality and entertainment industries. Students will receive a solid foundation of business practices related to this growing service industry. Courses will examine organizations and careers in lodging, tourism, sports, entertainment, event, and meeting management.

Career Opportunities
According to the U.S. Bureau of Labor Statistics the job Outlook projects a job growth for Hospitality Managers 9-15% thru 2030. MN Deed projects Employment growth in Leisure and Hospitality of 4.8%.

Employment opportunities including hotel/lodging operations, restaurant, and catering management, travel and tourism, sports, recreation and entertainment management, gaming, and casino operations, meeting, conference, and special event management.

Skills and abilities developed in this certificate include communication, leadership, decision making, problem solving, team, interpersonal and innovation.

The hospitality industry provides ample opportunity for students to gain valuable management experience that is transferable to other businesses and industries.

Program Outcomes
1. Apply management principles to create effective and efficient practice in managing a hospitality team.
2. Resolve personal and service conflicts using best resolution and recovery practices.
3. Identify the interrelated nature of hospitality including lodging, food and beverage, travel, recreation, and entertainment.

Event and Meeting Management  CERTIFICATE

Program Overview
The Event and Meeting Management curriculum focuses on the management of special events planning, organizing activities and timelines, operational effectiveness and customer satisfaction. Students will receive a solid foundation of business practices related to this growing service industry.

This certificate is intended for those seeking to expand their career paths with the skills necessary to plan unique and effective events and meetings.

Career Opportunities
According to the Minnesota Department of Revenue and the Minnesota Department of Employment and Economic Development, there are 245,000 full and part-time jobs, and 4.3 billion dollars in wages in the Leisure and Hospitality sector.

There are a wide variety of employment opportunities including hotel/ lodging operations, restaurant and catering management, travel and tourism, sports, recreation and facilities management, gaming and casino operations, meeting, convention and special event management.

According to the U.S. Bureau of Labor Statistics, the occupational outlook for meeting, convention and event planners is projected to grow 11% from 2016 – 2026.

Program Outcomes
1. Design an event plan utilizing event and planning tools such as checklists, banquet event orders, event software and production schedule.
2. Organize project needs regarding scope, resources, cost, schedules, procurement and risks.
3. Create and manage an event plan meeting the event's objectives and providing a positive experience for attendees and other stakeholders.

Program Overview
The Human Resources Associate of Applied Science Degree is intended for students who desire immediate employment upon graduation, or who plan to transfer to another institution of higher education.

The human resource professional plays a strategic role in the success of the organization. A human resource professional needs to be competent in human resource knowledge, able to facilitate change, have personal credibility which includes trust and confidentiality and the understanding of how a business operates. Specific duties may involve facilitating employee communication, managing human resource record keeping, administering employee compensation and benefit plans, recruiting, hiring and orienting new employees, writing policies and applying federal, state and local employment laws and regulations.

Qualifications include excellent communication and human relation skills, computer skills, flexibility and the ability to work under pressure.

Career Opportunities
Employment opportunities are strong for skilled, capable, and dependable Human Resource program graduates. Human Resource program graduates may be employed in positions such as: Human Resource Representative, Human Resource Coordinator, HR Assistant, Human Resource Specialist, Human Resource Generalist, Compensation or Benefits Specialist, Staffing Coordinator, Employment Specialist, Payroll Specialist, or Training and Development Assistant.

Program Outcomes
1. Execute Human Resources initiatives as a business partner to help accomplish HR goals.
2. Demonstrate behaviors that effectively build and manage professional relationships.
3. Apply business acumen to make effective decisions.
4. Demonstrate personal and professional integrity, acting as an ethical agent who promotes core values and accountability.
5. Demonstrate interpersonal skills that consider diverse backgrounds and promote an inclusive workplace.

Marketing  AAS DEGREE

Program Overview
This program provides students with the fundamentals of marketing and business management. Practices and concepts will be explored relating to sales, promotions, public relations, retail sales and event planning. Students will develop marketing and communication plans that create value and develop long term customer relationships.

Career Opportunities
According to the U.S. Bureau of Labor Statistics, U.S. Department of Labor, Occupational Outlook Handbook, marketing, sales, and customer service positions are projected to grow 5% from 2016-2026.

Program Outcomes
1. Identify and communicate successful customer service practices.
2. Identify the value of long-term customer relationship and practices to create value for customers.
3. Demonstrate Personal Sales Techniques in traditional and nontraditional sales situations.
4. Evaluate market information through market research to make effective decisions.
5. Create specific promotional and communication strategies for products, services, ideas and images.
6. Analyze and select best digital, online and technology tools to connect and communicate with customers.

Transfer Opportunities
Saint Paul College has transfer agreements & partnerships between many post-secondary institutions. For more information please go to saintpaul.edu/Transfer.

Social Media Marketing CERTIFICATE

Program Overview
Facebook, Twitter, YouTube and other social media platforms are opportunities for organizations to inform, communicate and connect with customers. Social media provides both a listening and outreach tool for promoting organizations, products, services and ideas. This program provides a foundation of social media and Internet marketing. Students will learn and analyze techniques, tactics and tools used to engage customers and deliver superior value. Jobs and careers in this fast changing field of marketing will be explored.

Career Opportunities
All organizations, including for-profit business or non-profit organizations, have the need for communicating with customers and stakeholders. This program is designed for those who want to expand their knowledge and skills of social media and internet marketing strategies. Many employers require some education or experience in marketing even for “non-marketing” positions. Employment opportunities are excellent for marketers who can engage, delight and develop meaningful relationships with customers. Opportunities and positions include marketing specialist, marketing research analyst, and customer service representative.

Program Outcomes
1. Develop an understanding of social media and e-marketing and the fundamental shifts on how organizations communicate with its customers.
2. Students will have skills and abilities to analyze internet marketing and communications strategies to serve and deliver value that attract new customers and develop relationships with existing customers.
3. Create e-marketing and social media marketing plans that are integrated with an organization’s overall marketing strategy and goals.

Business CERTIFICATE

Program Overview
The business certificate consists of five business core classes that are required for all business degree majors. After completion, students may decide at that time which business degree program they would like to complete. This certificate provides a basic understanding of business.

Career Opportunities
There are many opportunities in the business area based on the individual's strengths and interests. Employment for entry level positions is expected to grow in the service and professional business industries. Students completing the Business Certificate can provide support for businesses.

Program Outcomes
1. Explain the major functional areas of the business organization including management, marketing, finance, information technology, human resources, and accounting.
3. Apply accounting or finance concepts and principles in making business decisions.
4. Create business documents using computer application programs.

Program Requirements Guide 2022-2023

Project Management AAS DEGREE

Program Overview
Project Managers oversee the planning, implementing, quality control, and status reporting for a given project. Projects exist in all industries including construction, information technology, healthcare and business. Project Managers are needed to manage teams, plan, coordinate, and budget projects from initiation to completion. If you are skilled in a specific industry there are opportunities to use your technical expertise to lead industry-related projects. Construction, IT, Healthcare and Real Estate Project Managers are in especially high demand. Projects can vary greatly in size, specialty and complexity, creating opportunities for Project Managers with varying expertise and experience.

This program provides students with the skills and knowledge to effectively initiate, plan, and implement projects. In addition, the program provides a transferrable skill set in the areas of management, human resources, finance, negotiation, decision making, and leadership.

Career Opportunities
Employment opportunities are very good for skilled, capable, and dependable business professionals. Graduates may choose to continue their education towards a bachelor’s degree or begin work in a variety of settings. Possible roles might include: Project Manager, Cost Estimator, Project Coordinator, Project Scheduler, or Assistant Project Manager.

Program Outcomes
1. Describe the fundamentals of PMBOK (Project Management Body of Knowledge), process groups and tools in projects to meet the needs of global, regional and local businesses.
2. Prioritize project needs regarding scope, resources, cost, schedules, procurement and risks.
3. Integrate the fundamentals of effective communication, team management and leadership skills with a project team and stakeholder.
4. Apply project management standards in organizations.
5. Assess appropriate legal and ethical standards for managing projects.

Project Management CERTIFICATE

Program Overview
Project Management is used throughout business to make sure an organization achieves its objectives. A project management certificate prepares students with the tools, skills, and knowledge necessary to initiate, plan, and implement projects successfully. Project planning topics include various types of business projects with special focus on information technology projects to help provide an overview of project management. Techniques such as work breakdown structures, network diagrams, critical path method, earned value analysis, various financial analysis templates and others are covered in the courses.

Career Opportunities
Employment opportunities are very good for skilled, capable, and dependable business professionals. Employers are looking for business professionals with excellent communication skills, organizational skills, human relation skills and enthusiasm for the job and organization. Graduates may choose to continue their education towards a bachelor's degree or begin work in a variety of settings. Graduates can explore opportunities that match their interests and education in a variety of industries.

Program Outcomes
1. Describe the fundamentals of PMBOK (Project Management Body of Knowledge), process groups and tools in projects to meet the needs of global, regional and local businesses.
2. Integrate the fundamentals of effective communication, team management and leadership skills with a project team and stakeholder.
3. Apply project management standards in organizations.

Supply Chain Logistics AAS DEGREE

Program Overview
Logistics management is concerned with the procurement, movement, storage and processing of materials and information across the whole of the supply chain, from acquisition of raw materials and components, through manufacturing, to delivery of finished products to end users.

This program provides students the opportunity to understand modern supply chain management. Supply Chain management demands a multidisciplinary and cross-functional approach to business that transcends the traditional functional boundaries and management disciplines that characterize many organizations.

Career Opportunities
Supply Chain Logistics offers a wide variety of employment opportunities. Some of these are purchasing and supplier management, manufacturing logistics, inventory management, transport management, distribution, warehousing management, customer service management, information management and logistics and supply chain strategy. Because of the wide range of jobs open to graduates, prospective students are asked to consult with the program instructor for specific job forecasts.

Program Outcomes
1. Apply logistics and purchasing concepts to improve supply chain operations.
2. Analyze and improve supply chain processes.
3. Align the management of a supply chain with corporate goals and strategies.
4. Apply logistics to transportation and warehousing processes.
5. Apply fundamental supply chain management concepts to evaluate an effective supply chain.

Program Requirements Guide 2022-2023

Supply Chain Logistics CERTIFICATE

Program Overview
In order to be admitted to the Supply Chain Logistics certificate program, the student must have previous related work experience or a business degree (minimum – AAS). Program Faculty approval is required for admission. This certificate is not designed for entry level to the logistics field, but as an add-on certificate to enhance and build on prior knowledge.

Logistics management is concerned with the procurement, movement, storage and processing of materials and information across the whole of the supply chain, from acquisition of raw materials and components, through manufacturing, to delivery of finished products to end users.

This program provides students the opportunity of understanding modern supply chain management. Supply chain management demands a multidisciplinary and cross-functional approach to business which transcends the traditional functional boundaries and management disciplines that characterize many organizations.

This certificate program is transferable to the Supply Chain Logistics AAS Degree.

Career Opportunities
Supply Chain Logistics offers a wide variety of employment opportunities. Some of these are purchasing and supplier management, manufacturing logistics, inventory management, transport management, distribution, warehousing management, customer service management, information management and logistics and supply chain strategy. Because of the wide range of jobs open to graduates, prospective students are asked to consult with the program instructor for specific job forecasts.

Program Outcomes
1. Graduates will have knowledge and skills in distribution planning, transportation management, and logistics.
2. Graduates will have knowledge and skills in customer service.
3. Graduates will be prepared for positions in transportation, distribution, and supply chain management.
4. Graduates will have knowledge and skills to provide foresight of potential opportunities in the management of the supply chain.

Program Overview

Automotive repair requires trained technicians skilled in the use of testing equipment, special tools, and the latest information and specifications to service the many types of automobiles. Technicians diagnose trouble in any one of thousands of automotive components. They work with many new systems each year that require new service techniques and training. Some of these include air conditioning units, emission control devices, alternators, electronic ignition, and electronic fuel injection.

Students are prepared to take the ASE certification tests when they have completed the program. ASE certifies technicians nationwide.

Students should have good mechanical aptitude, be in good physical condition and have the ability to get along with others. Students also need to be able to read and process technical information.

Career Opportunities

Opportunities are expected to be plentiful for automotive technicians with technical training according to the U.S. Department of Labor. The department also states that the growing complexity of automotive technology, such as the use of electronic and emissions control equipment increasingly necessitates that cars be serviced by professionals.

The auto technician may work in a dealership garage, an independent garage, or as a specialist. Opportunities exist for a technician to become a shop service sales person, new car dealership service manager, or shop owner.

Program Outcomes

1. Graduates will be prepared to pass all 8 ASE tests.
2. Graduates will have knowledge and skills in use of testing equipment, special tools, and specifications for servicing automobiles.
3. Graduates will have the knowledge and skills to diagnose problems in automotive systems.
4. Graduates will be prepared for employment as Automotive Service Technicians.
5. Graduates will have proficient communication skills for customer service.
6. Graduates will have business and management skills required of an automotive service technician.

Cabinetmaking

Program Overview
Cabinetmakers are skilled in the phases of cabinet construction from the initial drafting and layout, to material cutting, assembly, finishing and installation. The principles used in building kitchen cabinets are also used in building store fixtures, furniture and all other types of woodworking. The program prepares students to work for cabinet manufacturers and custom cabinet shops.

Career Opportunities
New construction in housing and industry, and the renovation and modernization of existing structures are expected to increase the demand for cabinetmakers.

Cabinetmaking graduates find positions in kitchen cabinet shops, lumber companies, sash and door factories, store fixture manufacturers, display shops, wood specialty shops, and furniture repair shops. Some graduates operate their own business.

Program Outcomes
1. Practice safe use of woodworking tools and equipment.
2. Build both framed and frameless cabinets to industry standards.
3. Design parts using CAD/CAM software and generate the part using the cnc router.
4. Fabricate laminate products.
5. Explain project details specified through plans.

Program Faculty
Thomas Hillstead
thomas.hillstead@saintpaul.edu

Full-time enrollment is required
This is a full-time day program. Students should plan for a full day of classes.

Textbook, tool, and supply costs
Additional program costs total approximately $1,250 for the following:
- Tools: $500.00
- Books & Supplies: $350.00
- Projects (costs vary) about: $400.00

Additional Requirements/Recommendations
Mathematics and drawing skills are helpful.
Students need to be alert, physically fit and have good vision.
Students are expected to attend all classes and be prompt.
It is necessary to have good hand and eye coordination. Safety will be a major factor in operating all equipment. Safety is taught and students must pass all safety tests before operating equipment.

Course Sequence
The following sequence is recommended for a full-time student; however, this sequence is not required. Not all courses are offered each semester.

Fall Semester

Carpentry DIPLOMA

Program Overview
Construction is the largest industry in terms of investment and manpower expended. Carpenters make up the largest trade group in the construction industry. They erect the wood framework in buildings; they install wood paneling, cabinets, doors and window frames, and hardware; and they build stairs and frame roofs. Carpenters work under a wide variety of conditions, indoors and out, in all types of weather. They use many different hand and power tools working with wood, concrete, metals, plastics, and other construction materials.

Good work habits, mechanical aptitude, and strong communication and math skills are necessary to become a successful carpenter. Carpenters must be able to climb, lift, carry, measure, calculate, and plan their work. They often work at considerable heights.

Career Opportunities
Construction activity continues to be strong. Demand for quality carpenters exists in residential, commercial, and heavy construction. Increased activity in infrastructure and building renovation has provided additional opportunities for carpenters.

Carpenters can be involved in the many different phases of a building project or choose to specialize in areas such as framing, drywall, acoustic ceilings, concrete form building, hardware, and millwork. Many graduates continue their training by entering a formal apprentice program. Carpenter apprentices advance to journeyperson by working on the job and attending classes related to their work. Advancement can continue to lead carpenter, carpenter foreman, and job superintendent.

Carpenters are employed by a wide variety of construction contractors, or they may choose to become self-employed in their own business.

Program Outcomes
1. Graduates will have the knowledge and skills to safely use hand and portable power tools used by carpenters in the construction industry.
2. Graduates will be able to work with wood, plastics, concrete, metals, gypsum, and various fiber composite products used by carpenters in the construction industry.
3. Graduates will have practiced procedures used by carpenters in framing layout, stair construction, wood and steel framing, and installation of doors, windows, and cabinets.
4. Graduates will be familiar with forming systems and types of scaffold used in concrete construction.
5. Graduates will be familiar with and have practiced job site safety requirements.
6. Graduates will be able to operate instruments and demonstrate procedures used in building layout.
7. Graduates will display effective work habits deemed necessary by employers.
8. Graduates will be prepared for entry level employment as carpenters and admission to the Carpenters Apprentice Training Program.

Full-time enrollment is required
This is a full-time day program. Students should plan for a full day of classes.

Special supplies and tool costs
Students should expect to spend approximately $1,100, beyond the cost of tuition, fees, and books, for special supplies and tools. A list is available from the advisor.

Minimum Program Entry Requirements
Students entering this program must meet the following minimum program entry requirements:

Reading: Score of 240+ or grade of “C” or better in READ 0721 or READ 0724 or EAPP 0860
Writing: Score of 225+
Arithmetic: Score of 250+

Assessment Results and Prerequisites:
Students admitted into Saint Paul College programs may need to complete additional courses based on assessment results and course prerequisite requirements. Certain MATH, READ, and ENGL courses have additional prerequisites.
CNC Toolmaking

Program Overview
This area produces skilled craftsmen who make precision metal parts that are highly specialized and not mass produced. Machinists produce parts from metal castings, forgings, stampings, or from solid metal stock. They make parts to exact specifications by removing excess metal with the aid of machine tools, numerically controlled machines, computer assisted machinery, and precise measuring and gauging equipment.

Career Opportunities
As the economy expands, so will the demand for manufactured goods that need machine parts. CNC Toolmaking graduates are hired by industries that manufacture automobiles, industrial machinery, military equipment, and other metal products. At many places of employment, graduates can apply training received at the College towards the completion of apprenticeship requirements.

Program Outcomes
1. Graduates will have the knowledge and skills to make precision-machined parts and tooling.
2. Graduates will have the knowledge and skills to program and operate CNC equipment using CAD and CAM.
3. Graduates will have the knowledge and skills to operate and set-up inspection and gauging equipment.
4. Graduates will have the knowledge and skills to meet national entry-level skills standards.
5. Graduates will have acquired shop communication skills such as blueprint reading, practical geometric dimensioning, and shop CAD/CAM skills.
6. Graduates will have successfully mastered the general education program requirements for work and life skills.
7. Graduates will use SolidWorks, design parts and collaborate with engineers.

Program Requirements Guide 2022-2023

Machine Operator CERTIFICATE
Right Skills Now for Manufacturing

Program Overview
The Right Skills Now (for Manufacturing) certificate is designed to provide training in the following areas: Job planning, benchwork, materials, manual milling, manual turning, blue print reading, CNC milling and CNC turning. This program was designed to address the current shortage of CNC operators. Graduates from this program are prepared to enter the industry as entry-level manual and CNC machine tool production operators with minimum skills.

The Right Skills Now (for Manufacturing) certificate will introduce manufacturing workplace safety, blueprint reading, general manufacturing processes, basic production manual machining skills, and introduction to operations.

The curriculum closely aligns with standards set forth by the National Institute of Metalworking Skills (NIMS). Students may choose to apply these credits towards a CNC Toolmaking Diploma. The additional coursework will enhance the students’ communication, mathematics, machining, CAD/CAM, and critical thinking skills.

Career Opportunities
Right Skills Now is a pathway of the National Association of Manufacturers (NAM)–Endorsed Manufacturing Skills Certification System, which includes nationally portable, industry-recognized certifications that are combined with for-credit education programs. These education pathways are directly aligned to career pathways in manufacturing, so students progressing through the programs earn college credit towards a degree, have an opportunity to earn a national certification with labor market value, and the hands-on technical experience to be successful on the job.

Program Outcomes
1. Students will have skills to operate computer-controlled machine tools; lathes, drills, and milling machines.
2. Graduates will acquire knowledge of workplace safety.
3. Graduates will have on the job learning opportunities through an internship.

Electrical Technology DIPLOMA

Program Overview
An electrician is employed to install electrical wiring and equipment for lighting, heating, cooling and other power requirements in residential, commercial and industrial buildings. Using blueprints, diagrams and specifications, students perform installations in accordance with national, state and local safety codes. Considerable physical exertion is often required and the work may be performed outdoors or under such hazardous conditions as heights, unfinished construction or high voltages.

Students should have an interest and aptitude in applied algebra, trigonometry, drawing and science. Good eyesight and color vision are important.

Career Opportunities
According to the U.S. Department of Labor, “As the population and the economy grow... more electricians will be needed to maintain the electrical systems used by industry and to install electrical devices and wiring in new homes, factories, offices and other structures.”

Graduates are employed as apprentices by electrical construction firms. Upon completion of apprenticeship and the obtaining of a journeyperson’s license, students are open to opportunities as master electricians, inspectors, journeyperson’s license, students are open to opportunities as master electricians, inspectors, contractors, estimators and repair persons.

Program Outcomes
1. Graduates will have the ability to communicate and conduct themselves in a professional manner with the customers and co-workers.
2. Graduates will have the skills for performing entry level tasks required of an apprentice electrician in residential, commercial and industrial construction.
3. Graduates will have knowledge of the National Electric Code, enabling them to legally and safely install electrical services with supervision.
4. Graduates will have the ability to apply electrical theory to practical applications.
5. Graduates will meet the MN Department of Labor and Industry’s electrical program requirement of specific curriculum and 95% course attendance policy.

Apprenticeship opportunity
Completion of the Electrical Technology Diploma program meets the Minnesota Department of Labor and Industry requirements. 95% attendance in each course and completion of the diploma may qualify for one year of apprenticeship credit.

Electromechanical Automation Systems AAS DEGREE

Program Overview
Electromechanical systems, also referred to as mechatronics, is a high demand field that integrates electronics, mechanics, hydraulics, pneumatics, and computer control systems to create new and improved automated manufacturing production systems. This program is designed for people who are interested in industrial maintenance, process set up, installation, and upgrades.

Electromechanical Systems moves beyond simply cross-training employees, as the discipline recognizes that individuals need to be trained in five areas: mechanical, electrical, fluid power, process control, and industrial programming.

Students should have an interest and aptitude in math, science, and problem solving. Good eyesight and color vision are important.

Career Opportunities
The Electromechanical Systems program prepares students for careers requiring specialized skills in electricity, electronics, instrumentation, programmable logic controllers, microprocessors, automation and robotics. Students will become multi-skilled technicians capable of solving the many complex problems of manufacturing automation. Students will be prepared for a wide variety of careers including: Instrument Technician, Electrical Technician, Electromechanical Technician, Robotics Technician, Electronics Mechanic, Machine Repair & Maintenance, Motor Installer, Instrumentation Calibration Technician, Industrial Programmer, PLC Programmer, and Field Service.

These jobs are found in a wide range of fields including: electrical utilities, oil refineries, water treatment, waste water treatment, manufacturing plants, chemical, medical, electronics, agriculture, biotechnology and automotive industries.

Program Outcomes
1. Demonstrate business and management skills necessary to move into a lead technician position.
2. Build various systems that will harness mechanical, electrical, pneumatic, and hydraulic power.
3. Program using multiple, industry specific, languages.
4. Build various electric, pneumatic, and hydraulic circuits.

Electromechanical Automation Systems DIPLOMA

Program Overview
Electromechanical systems, also referred to as mechatronics, is a new and rapidly growing field that integrates electronics, mechanics, pneumatics, hydraulics, and computer control systems to create new and improved automated manufacturing production systems. This program is designed for people who are interested in plant maintenance (troubleshooting & repair), process set up, installation, and commissioning.

Electromechanical Systems move beyond simply cross-training employees, as the discipline recognizes that individuals need to be trained in five areas: mechanical, electrical, fluid power, process control, and industrial programming.

Students/electricians that previously acquired a diploma/AAS degree in the study of electricity may transfer in credits toward the Electromechanical Systems diploma. Students should have an interest and aptitude in applied algebra, trigonometry, drawing and science. Good eyesight and color vision are important.

Career Opportunities
The Electromechanical Systems program prepares students for careers requiring specialized skills in electricity, electronics, instrumentation, programmable logic controllers, microprocessors, automation and robotics. Students will become multi-skilled technicians capable of solving the many complex problems of manufacturing automation. Students will be prepared for a wide variety of careers including: Instrument Technician, Electrical Technician, Electromechanical Technician, Robotics Technician, Electronics Mechanic, Machine Repair & Maintenance, Motor Installer, Instrumentation Calibration Technician, Industrial Programmer, PLC Programmer, and Field Service.

These jobs are found in a wide range of fields including: oil refineries, water treatment, wastewater treatment, manufacturing plants, chemical, medical, electronics, agriculture, biotechnology and automotive industries.

Program Outcomes
1. Graduates will have the ability to communicate and conduct themselves in a professional manner with the customers and co-workers.
2. Graduates will be able to work on various styles of drives and pumps.
3. Graduates will be able to program using specialized industrial languages.
4. Graduates will have an understanding of machine logic and how electric, pneumatic, and hydraulic circuits interact with it.
5. Graduates will be able to work with various process control systems.

Pipefitting DIPLOMA

Program Overview
Pipefitters install, maintain, and repair high and low pressure steam systems, snow melting systems, refrigeration systems, heating, gas and oil piping, pneumatic, electronic controls, air conditioning and also provide instrumentation and valve repair. These skills are used working in residential, commercial, and industrial installations. These systems are installed in all types of weather conditions.

Applicants must be high school graduates or the equivalent and should enjoy working in a demanding trade that requires both mental alertness and physical stamina. Pipefitters do heavy lifting and are required to work both indoors and outside, often times in confined spaces.

Career Opportunities
Pipefitters, Steamfitters, and HVACR Technicians work in all aspects of the heating, air conditioning, refrigeration, and temperature control fields. They are also employed at oil refineries, chemical plants, food processing facilities, manufacturing plants, retail and wholesale food stores, and ice rinks. Maintenance pipefitters work in a variety of environments such as universities, schools, government agencies and utility companies.

Program Outcomes
1. Apply math and science skills to designing and operating process piping systems.
2. Install, maintain, and repair heating and cooling systems under supervision of a licensed pipefitter.
3. Install and repair process piping systems under supervision of a licensed pipefitter.

Restricted Enrollment
The Pipefitting Diploma is a restricted enrollment joint program offered through the St. Paul Pipefitters Local 455 and Saint Paul College. Admission to the Pipefitters Apprenticeship program is required for enrollment in this program.

Contact Wyatt Carlson at wyatt.carlson@saintpaul.edu for application information.

Information is subject to change. This Program Requirements Guide is not a contract.
Program Requirements Guide 2022-2023

Plumbing DIPLOMA

Program Overview
The Plumbing program trains apprentices in commercial, residential and industrial plumbing.

Plumbers install and maintain the water, waste disposal, soil and vent, drainage and gas systems in homes and in commercial and industrial buildings. Plumbers also install faucets, bathtubs, sinks and toilets, and such appliances as dishwashers and water heaters. Plumbers often work from blueprints and specifications and are knowledgeable about building and plumbing codes which govern installations.

Applicants must be high school graduates or equivalent. High school courses in mathematics, science, mechanical drawing and wood or metal shop will be helpful.

Career Opportunities
According to the U.S. Department of Labor, employment of plumbers is expected to grow as fast as the average for all occupations.

Before becoming a journeyplumber plumber, the apprentice must pass the Minnesota State Plumbing Examination. Licensing is by the State Board of Health.

Program Outcomes
1. Apply math and science skills in the plumbing field.
2. Apply code knowledge to install piping in commercial, residential, and industrial buildings.
3. Assemble fittings, fixtures, and piping used in multiple piping systems.

Program Faculty
Adjoint faculty members, who are experienced in plumbing and represent private practice, local government, and industry sectors.

Program Requirements

Total Program Credits .................. 44

Program Start Dates
The Plumbing Diploma program is a part-time, evening program that starts each spring.

Contact the One Stop at 651.846.1555 or admissions@saintpaul.edu for questions about the application, deadlines and the enrollment process.

Call Rick Gale, Program Coordinator, St. Paul Plumbers JATC, at 651.846.1389 for questions about the program.

Restricted Enrollment
The Plumbing Diploma program is a restricted enrollment program offered through the Plumbers and Gasfitters Local 34 and Saint Paul College. Admission to the Plumbing Apprenticeship program is required for enrollment in this diploma program. Those enrolled in the Plumbing Diploma program are subject to the St. Paul Plumbers & Gasfitters Apprenticeship Standards, as well as the Saint Paul College Student Code of Conduct and Academic Integrity Policy. Violations of these standards or policies may result in removal from both the apprenticeship program and the plumbing diploma classes. Concurrent enrollment in both the apprenticeship program and plumbing classes is required.

Course Sequence

Spring Semester
Students must complete the Pre-Apprenticeship classes (PLMB 2610 and PLMB 2612) prior to work eligibility.

Minimum Program Entry Requirements
Students entering this program must meet the following minimum program entry requirements:

Reading: Score of 248+
Writing: Any
Arithmetic: Score of 250+

Assessment Results and Prerequisites:
Students admitted into Saint Paul College programs may need to complete additional courses based on assessment results and course prerequisite requirements. Certain MATH, READ, and ENGL courses have additional prerequisites.

Information is subject to change.
This Program Requirements Guide is not a contract.
Program Overview
The sheet metal worker reads blueprints, prepares layouts and operates fabricating devices such as special hand tools, power shears, nibbler, brake, bar folder, turning machines, spot and arc welders, soldering equipment and plasma cutting systems. The skilled sheet metal worker gathers general information and specifications from blueprints for the fabrication and installation of ducts for heating, cooling, filtering and humidifying air. Also, sheet metal workers fabricate and install metal roofing and siding, stainless steel equipment for homes and industry, chutes for material transfer, signs and rain dispersal equipment. Satisfactory preparation for the sheet metal program may include high school courses in algebra and geometry. Other helpful courses are mechanical drafting and metal shop. Much of the sheet metal work starts with two-dimensional objects and ends with a three-dimensional product. Sheet metal work requires good spatial perception.

Career Opportunities
According to the U.S. Department of Labor, employment of sheet metal workers in construction is expected to increase about as fast as the average for all occupations. Graduates may go to work for firms that fabricate sheet metal products and become skilled production, precision, or construction sheet metal workers.

Program Outcomes
1. Graduates will have the knowledge and skills to layout, fabricate, and assemble all types of sheet metal products.
2. Graduates will have the ability to safely operate all types of sheet metal fabricating equipment.
3. Graduates will have the knowledge and skills to complete sheet metal welding and soldering processes.
4. Graduates will have the knowledge and skills to use computer-aided drafting for the design and fabrication of sheet metal products.
5. Graduates will have the knowledge and skills to use drafting and blueprint reading to design HVAC duct systems.

Transfer Opportunities
Saint Paul College has transfer agreements & partnerships between many post-secondary institutions. For more information please go to saintpaul.edu/transfer.

The following sequence is recommended.

First Semester
SMET 1410 Sheet Metal Fitting Layout and Design .......... 4
SMET 1415 OSHA 30 HR Training ..................................... 2
SMET 1420 Sheet Metal Fitting Fabrication ...................... 4
SMET 1430 Sheet Metal Drafting & Blueprint Reading .......... 2
SMET 1440 Sheet Metal Welding ....................................... 5
SMET 1450 Sheet Metal Practical Problem Solving ............ 2
Goal 1: COMM 17XX .......................................................... 3
**Total Semester Credits** .................................................. 22

Second Semester
SMET 1510 Duct System Layout & Design ......................... 4
SMET 1520 Duct System Fabrication ................................. 4
SMET 1530 Architectural Sheet Metal ................................. 4
SMET 1540 Power Machine Operation ............................... 3
SMET 1550 Sheet Metal CAD/CAM Systems .......................... 3
**Total Semester Credits** .................................................. 18

General Education Requirements (20 additional credits)

Total Program Credits .......................................................... 60

Minimum Program Entry Requirements
Students entering this program must meet the following minimum program entry requirements:

Reading: Score of 240+ or grade of “C” or better in READ 0721 or READ 0724 or EAPP 0860

Writing: Score of 240+ or grade of “C” or better in ENGL 0921 or EAPP 0870

Arithmetic: Score of 237+

Assessment Results and Prerequisites:
Students admitted into Saint Paul College programs may need to complete additional courses based on assessment results and course prerequisite requirements. Certain MATH, READ, and ENGL courses have additional prerequisites.

Information is subject to change. This Program Requirements Guide is not a contract.
Program Overview
The sheet metal worker reads blueprints, prepares layouts, and operates fabricating devices such as special hand tools, power shears, nibbler, brake, bar folder, turning machines, spot and arc welders, soldering equipment, and plasma cutting systems. The skilled sheet metal worker gathers general information and specifications from blueprints for the fabrication and installation of ducts for heating, cooling, filtering, and humidifying air. Also, sheet metal workers fabricate and install metal roofing and siding, stainless steel equipment for homes and industry, chutes for material transfer, signs, and rain dispersal equipment.

Satisfactory preparation for the sheet metal program may include high school courses in algebra and geometry. Other helpful courses are mechanical drafting and metal shop. Much of the sheet metal work starts with two-dimensional objects and ends with a three-dimensional product. Sheet metal work requires good spatial perception.

Career Opportunities
According to the U.S. Department of Labor, employment of sheet metal workers in construction is expected to increase about as fast as the average for all occupations. Graduates may go to work for firms that fabricate sheet metal products and become skilled production, precision, or construction sheet metal workers.

Program Outcomes
1. Graduates will have the knowledge and skills to layout, fabricate, and assemble all types of sheet metal products.
2. Graduates will have the ability to safely operate all types of sheet metal fabricating equipment.
3. Graduates will have the knowledge and skills to complete sheet metal welding and soldering processes.
4. Graduates will have the knowledge and skills to use computer-aided drafting for the design and fabrication of sheet metal products.
5. Graduates will have the knowledge and skills to use drafting and blueprint reading to design HVAC duct systems.

Program Requirements Guide 2022-2023

Truck Technician DIPLOMA

Program Overview
Truck Technicians diagnose trouble accurately with the use of modern testing equipment. They repair and service the entire truck and trailer including gas and diesel engines. They also work on air brakes, multi-speed transmissions, differentials, electrical systems, chassis and engine electronics, cooling systems, air conditioning and refrigeration, and many more components of today’s modern truck.

Career Opportunities
Maintenance departments, which have the responsibility for the repair and the maintenance of the entire truck, need skilled graduates to fill truck technician positions. Many technicians find employment with companies that own a fleet of vehicles such as truck lines, bus lines, and construction companies. Other technicians work for small repair shops, truck dealerships, heavy equipment dealers and the government. Employment of truck technicians is expected to increase faster than average according to the U.S. Department of Labor.

Program Outcomes
1. Graduates will diagnose problems that occur in all major truck systems.
2. Graduates will service and repair medium/heavy duty trucks and trailers.
3. Graduates will communicate effectively with customers, supervisors, colleagues, and industry professionals.
4. Graduates will inspect commercial vehicles based upon MN DOT Standards.

Minimum Program Entry Requirements
Students entering this program must meet the following minimum program entry requirements:

Reading: Score of 240+ or grade of “C” or better in READ 0721 or READ 0724 or EAPP 0860
Writing: Score of 225+
Arithmetic: Score of 237+

Assessment Results and Prerequisites:

Fall

Full-time enrollment is required
This is a two-year, full-time day program.

• Introduction and Safety must be taken concurrently with the other truck technician classes at the start of the program.
• It is recommended that the general education requirements be taken in the summer term before the first year or between the first and second years.

Course Sequence
The course sequence listed on the back of this guide is recommended for a full-time student; however, this sequence is not required. Contact Program Faculty with questions.

First Semester
TRKM 1400 Introduction and Safety            .1
TRKM 1445 Truck Welding 1                    .2

Total Semester Credits                        .15

General Education Requirement (any)          .3
May be taken any semester, but Summer Term is recommended.

Total Program Credits                        .67

Information is subject to change.
This Program Requirements Guide is not a contract.
Program Overview
Welding and fabrication operations require skilled workers who are well-trained in the use of advanced arc welding process, layout fabrication techniques, blueprint reading and measuring devices. Skilled welding fabricators are thoroughly familiar with both welding and shop equipment, understanding the breakdown and setup procedures, test standards, and knowledge of the various types of metals. Physical requirements include good eyesight, good hand and eye coordination and the ability to perform heavy, physical work.

Career Opportunities
According to the U.S. Department of Labor, it is projected within the next 10 years to see a 15% growth rate, adding 50,000 new jobs. Welders and fabricators work in manufacturing plants both in structural and non-structural settings as production welders, maintenance welders, specialty welders, layout fabricators, press brake operators, CNC plasma/laser cutting operators, and robotic welding operators. Welding fabrication is widely used in the aircraft, automobile, trucking, shipbuilding, pipefitting, plumbing, sheetmetal, ironworking and other trades that use metals. Skilled welders may become layout specialists, engineers, technicians, supervisors, Certified Welding Inspectors or private shop owners.

Program Outcomes
1. Identify correct welding techniques for multiple processes.
2. Follow safety requirements in the set-up, operation, and break down of metal shop equipment.
4. Analyze the quality of welds to determine if proper techniques/settings are being used.
5. Use blueprints and measuring devices to aid in welding.
6. Distinguish between the characteristics of commonly used metal types.
7. Apply mathematical tools to metalworking techniques.
8. Construct projects using metalworking fabrication techniques.

Minimum Program Entry Requirements
Students entering this program must meet the following minimum program entry requirements:

Reading: Score of 240+ or grade of “C” or better in READ 0721 or READ 0724 or EAPP 0860
Writing: Score of 225+
Arithmetic: Score of 237+

Assessment Results and Prerequisites:
Students admitted into Saint Paul College programs may need to complete additional courses based on assessment results and course prerequisite requirements. Certain MATH, READ, and ENGL courses have additional prerequisites.
Program Overview
Professional fabricators and CNC operators are highly skilled individuals who excel in math, geometry, formulations, programming, critical thinking and blueprint reading. Physical requirements include good eyesight, good hand and eye coordination, standing for long periods of time and the ability to perform heavy, physical work.

Robotic welding is an exciting and growing part of the welding profession. Robotic tools can automate some high production applications, such as resistance spot welding and arc welding.

Students must be a graduate of the Welding Technology Diploma (WLDG) or have instructor approval.

Career Opportunities
Fabricators and CNC operators work in manufacturing plants as production welders, specialist welders, layout engineers, press brake and CNC operators both in structural and non-structural settings. Welding/fabricating is widely used in the aircraft, automotive, heavy equipment, sheet metal, and other trades that use fabrication and CNC equipment.

Program Outcomes
1. Graduates will have the knowledge and skills in setup and break-down procedures of CNC equipment including press brake, CNC plasma cutting and robotic welding.
2. Graduates will have knowledge and skills in sheet metal bend deduction formulation.
3. Graduates will have acquired supervised hands-on experience in using various welding and finishing processes and fabrication equipment.
4. Graduates will be prepared for employment in the welding industry and related fabrication fields.

Program Requirements Guide 2022-2023

Production Technologies CERTIFICATE
An eTECH 360° Program

Program Overview
This certificate will provide students with the training, education, and skills to build a base knowledge of manufacturing processes and plant operations, generally for entry-level positions. Graduates can use the knowledge gained in this Certificate to build upon a manufacturing career path leading to higher-level careers like Automation, Machining, and Welding. Students will engage in coursework topics of career success skills, technical mathematics, introductory computer skills, print interpretation, manufacturing processes, quality control, maintenance, and safety.

Career Opportunities
The nationwide Manufacturing Skills Standards Council (MSSC) System, based upon industry-defined and federally-endorsed national standards, offers both entry-level and incumbent workers the opportunity to demonstrate that they have acquired the skills increasingly needed in the high-growth, technology-intensive jobs of the 21st century. The MSSC System awards certificates to individuals who pass any of its four Production modules: Safety; Quality Practices & Measurement; Manufacturing Processes & Production; and Maintenance Awareness and a full Certified Production Technician (CPT) Certification to those who pass all four. Students completing the Production Technologies Certificate will have gained the knowledge required to pass the MSSC full-certified Production Technician Certification.

According to the Manufacturing Career Network, manufacturing is the second largest industry in Minnesota, second only to educational services, healthcare and social assistance. Minnesota manufacturers employ 390,435 people, which represents 14.4 percent of total employment. Further, manufacturing jobs in the state pay wages that are approximately 8 percent higher than those paid to the rest of the workforce. These numbers are evidence that a thriving manufacturing sector is critical to the state economy.

Program Outcomes
Graduates will be able to:
1. Identify and apply appropriate safety procedures.
2. Use technical mathematics to solve problems.
3. Demonstrate use of common computer software.
4. Analyze and apply specific manufacturing process procedures.
5. Identify and apply specific quality procedures.
6. Interpret symbols and blueprints accurately for a variety of projects.
7. Identify appropriate and inappropriate professional behavior.

Program Faculty
This program is taught by a variety of faculty from consortium schools.

361C
Welding Technology CERTIFICATE
An eTECH 360° Program

Program Overview
This certificate will provide students with knowledge of manufacturing processes and plant operations, along with an advanced skill set in welding technology and processes. Students will engage in topics of technical mathematics, introductory computer skills, print interpretation, manufacturing processes, quality control, maintenance, and safety. Also included in coursework, students will engage in topics of welding symbols, metallurgy, Plasma Arc Cutting and Air Carbon Arc Cutting (OxyFuel), Shielded Metal Arc Welding (SMAW), Gas Metal Arc Welding (GMAW) and Flux Cord Arc Welding (FCAW), and Gas Tungsten Arc Welding (GTAW).

Career Opportunities
The nationwide Manufacturing Skills Standards Council (MSSC) System, based upon industry-defined and federally-endorsed national standards, offers both entry-level and incumbent workers the opportunity to demonstrate that they have acquired the skills increasingly needed in the high-growth, technology-intensive jobs of the 21st century. The MSSC System awards credentials to individuals who pass any of its four Production modules: Safety; Quality Practices & Measurement; Manufacturing Processes & Production; and Maintenance Awareness and a full Certified Production Technician (CPT) Certification to those who pass all four. Students completing this Certificate will have gained the knowledge required to pass the MSSC full-certified Production Technician Certification. According to the Manufacturing Career Network, manufacturing is the second largest industry in Minnesota, second only to educational services, healthcare and social assistance. Program Outcomes
Graduates will be able to:
1. Identify and apply appropriate safety procedures.
2. Analyze and apply specific manufacturing process procedures.
3. Identify and apply specific quality procedures.
4. Identify and select the proper filler metal dependent on base metal to be welded.
5. Troubleshoot and solve common problems involved with everyday use of a welding machine.
6. Fabricate several different welding projects to demonstrate expected skills required by industry standards.
7. Interpret symbols and blueprints accurately for a variety of projects.

Program Overview
Health Information Technicians play a vital role in the health care industry by participating in the creation, completion, distribution and retention of medical record documentation according to policies and procedures outlined by several regulating bodies such as the Joint Commission on Accreditation of Healthcare Organization (JCAHO) and Medicare.

Individuals enrolled in the program will obtain a broad body of knowledge that will allow them to become employed in many capacities within a health information department. Some of the positions include such tasks as: release of information, various registries, incomplete chart room, processing of medical documentation, coding and abstracting, and may include supervisory or leadership roles based on skill and ability. Students who successfully complete the Health Information Technology degree may apply to write the national certification examination given by the American Health Information Management Association. Upon successful completion of the certification examination, the credential of Registered Health Information Technician is awarded.

Career Opportunities
Graduates of the Health Information Technology degree will find positions in various health care settings such as private physician offices, clinics, specialty clinics, hospitals, long-term care facilities, and rehabilitation facilities. Employment can also be found in government offices, the insurance industry, dental and chiropractic clinics, and information technology suppliers.

Program Outcomes
1. Graduates will apply basic medical sciences in accordance to the profession.
2. Graduates will demonstrate use of office and healthcare-based software applications.
3. Graduates will demonstrate the use of health information management practice standards.
4. Graduates will perform accurate medical coding in accordance with official guidelines for coding and reporting.
5. Graduates will perform health information data analysis.
6. Graduates will model professional and ethical behavior consistent with the American Health Information Management Association (AHIMA) Code of Ethics.
7. Graduates will interpret and apply federal regulatory standards as applied to healthcare.

Minimum Program Entry Requirements
Students entering this program must meet the following minimum program entry requirements:

Reading: Score of 250+ or grade of “C” or better in READ 0722 or READ 0724 or EAPP 0900
Writing: Score of 250+ or grade of “C” or better in ENGL 0922 or EAPP 0900
Arithmetic: Score of 250+

Assessment Results and Prerequisites:
Students admitted into Saint Paul College programs may need to complete additional courses based on assessment results and course prerequisite requirements. Certain MATH, READ, and ENGL courses have additional prerequisites.

Computer Skills: Basic computer skills such as word processing, spreadsheets, and Internet usage or a grade of “C” or better in BTEC 1418.

Students must have successfully completed the following required courses with a “C” grade or better:

General Education Courses
• Goal 1: ENGL 1711: Composition 1
• Goal 1: COMM 17XX

Technical Education Courses
• MEDS 1420: Health Information Foundations
• MEDS 1470: Anatomy/Physiology for the Medical Office
• MEDS 1480: Medical Terminology
• Minimum Cumulative GPA of 2.8 on all completed college courses.
• Students transferring courses to Saint Paul College from another institution must have an Official Transcript on file in the Student Records Office.

Information is subject to change.
This Program Requirements Guide is not a contract.
## Health Information Technology - AAS DEGREE (continued)

### Admission into the Program

Being admitted to Saint Paul College does not imply admission into the Health Information Technology Program.

All Health Information Technology students are required to complete an online orientation seminar to complete documentation prior to beginning any courses within the program of study.

Students admitted into the Health Information Technology Program are required to work with a faculty program advisor to arrange an educational program plan leading to graduation from the program.

Health Information Technology students are encouraged to communicate with their faculty program advisor prior to the start of each semester regarding their educational program plan. *Failure to communicate with a faculty program advisor may lead to increased time to complete the degree.*

### Transfer Opportunities

Saint Paul College has transfer agreements & partnerships between many post-secondary institutions. For more information please go to saintpaul.edu/Transfer.

## Program Requirements Guide 2022-2023

### Course Sequence for Full-Time Schedule

The following course sequence is recommended for full-time students. Students must consult with a program advisor to develop an educational program plan before registration.

Healthcare Administration AS DEGREE

Program Overview

The healthcare administration program is an interdisciplinary program that incorporates business and health information management education and practices designed to create a comprehensive healthcare leader. Learners will participate in focused instruction within management, health information management, legal and ethical aspects, statistics, and technology; which will afford employment opportunities in various healthcare leadership capacities.

Students will acquire knowledge and skills in communicative strategy, critical thinking, transformative management, and collaborative team-building propensities throughout various course(s) within the healthcare administration program.

Candidates considering this field should prepare for high-level decision-making, comprehensive analysis, complex communications, and the ability to lead and manage others.

Career Opportunities

Healthcare administrators and leaders enjoy salaries in the top bracket of healthcare professionals. Graduates may anticipate supervisory and management roles. **Graduates of this program may choose to continue their education at a four-year institution in Healthcare Administration or a related field.

The healthcare administrator or leader may work in a physician’s office, surgery center, specialty clinic, hospital, insurance company, government agency, community health setting, research foundation, long-term care facility, dental office, consulting firm, rehabilitation center or other health care facility.

According to the Bureau of Labor Statistics, Medical and Health Services Managers are anticipated to increase by +/- 32% between 2019 to 2029 (www.bls.gov).

Program Outcomes

1. Graduates will apply basic medical sciences in accordance to the profession.
2. Graduates will demonstrate documentation and health information practices.
3. Graduates will demonstrate use of office and healthcare-based software applications.
4. Graduates will apply administrative and management-based practices.
5. Graduates will comply with healthcare regulatory guidelines.

Healthcare Documentation Specialist CERTIFICATE

Program Overview
Graduates of a certificate program in healthcare documentation are proficient in transcribing medical documents, creating and processing correspondence, assisting with release of information, meeting medical provider documentation needs, and other duties. Courses from the certificate are applicable toward the Medical Office Professional AAS degree.

Applicants should possess excellent communication skills, meticulous attention to detail, good spelling, finger dexterity, and extreme accuracy in their work. Candidates considering this field should be comfortable listening to dictated material for an extended periods, editing documents created through the use of voice recognition software, and possess knowledge of patient confidentiality regarding health information.

Career Opportunities
Healthcare documentation specialists may work in a physician’s office, surgery center, specialty clinic, hospital, insurance company, government agency, research foundation, long-term care facility, dental office, consulting firm, rehabilitation center or other health care facility.

Program Outcomes
1. Graduates will apply basic medical sciences in accordance to the profession.
2. Graduates will demonstrate use of office and healthcare-based software applications.
3. Graduates will demonstrate entry-level data collection, documentation, and healthcare regulatory practices.
4. Graduates will transcribe and edit medical reports and related office correspondence.

390C
Healthcare Informatics AAS DEGREE

Program Overview
The Healthcare Informatics program integrates education from health information, computer science and information technology.

Healthcare informaticists work and support healthcare organizations in a multifaceted methodology by providing support directly related to industry practices and procedures regarding complex electronic health record systems.

Responsibilities may include supporting tasks and roles related to data analysis, database design and administration, support of numerous software applications, implementation of data standards, knowledge of interoperability, and maintenance of clinical decision support protocols supported by evidence based medicine, routine system upgrades and preservation, system architecture, hardware, system networking, and legal knowledge to support information privacy and security.

Career Opportunities
Individuals enrolled in the program will obtain a broad body of knowledge of health information, computer science, and information technology that will allow them to become employed in many capacities within a healthcare system. Employment opportunities may include: data and information technology support personnel, analytics staff, data standards personnel, documentation integrity specialists, health information privacy and security personnel, electronic health record trainer or educator, implementation and data systems upgrade specialist and may include supervisory or leadership roles based on skill and ability.

Graduates of the Healthcare Informatics degree will find positions in various health care settings such as private physician offices, clinics, specialty clinics, hospitals, long-term care facilities, and rehabilitation facilities. Employment can also be found in government offices, the insurance industry, dental and chiropractic clinics, and information technology suppliers/vendors.

According to the Bureau of Labor Statistics, Computer User Support Specialists Occupations are anticipated to increase by +/- 10% between 2018-2028.

Program Goals
1. Graduates will apply basic medical sciences in accordance to the profession.
2. Graduates will demonstrate documentation and health information practices.
3. Graduates will demonstrate skilled use of specialized software applications in the completion of information management processes that apply to healthcare.
4. Graduates will support information systems applicable to healthcare.
5. Graduates will comply with healthcare regulatory guidelines.

Program Requirements
☐ Check off when completed
☐ All classes must be successfully completed with grade “C” or better.

Total Program Credits | 60

Minimum Program Entry Requirements
Students entering this program must meet the following minimum program entry requirements:

Reading: Score of 250+ or grade of “C” or better in READ 0722 or READ 0724 or EAPP 0900

Writing: Score of 250+ or grade of “C” or better in ENGL 0922 or EAPP 0900

Quant. Reasoning, Algebra & Stats: Score of 270+ or Adv. Algebra & Functions: Score of 250+ or grade of “C” or better in MATH 0920

Keyboarding Skills: Minimum of 40 WPM with 3 errors or less or a grade of “C” or better in BTEC 1400.

Computer Skills: Basic computer skills such as word processing, spreadsheets, and Internet usage or a grade of “C” or better in BTEC 1418.

Assessment Results and Prerequisites: Students admitted into Saint Paul College programs may need to complete additional courses based on assessment results and course prerequisite requirements. Certain MATH, READ, and ENGL courses have additional prerequisites.
### Course Sequence for Full-Time Schedule

The following sequence is recommended for full-time students. Students should consult with the program advisor to develop an appropriate educational plan.

All classes must be successfully completed with a grade of "C" or better.

**First Semester (Year 1)**
- CSCI 1410 Computer Science and Information Systems .......................... 4
- MEDS 1420 Health Information Foundations ......................................... 3
- MEDS 1470 Anatomy and Physiology of the Medical Office .................. 3
- MEDS 1480 Medical Terminology ...................................................... 3
- Goal 1: COMM 17XX ........................................................................... 3
**Total Semester Credits ................................................................. 16**

**Second Semester (Year 1)**
- CSCI 1523 Introduction to Computing and Programming Concepts 4
- CSCI 1550 Database Management Fundamentals .................................. 4
- MEDS 1560 Computerized Health Information ...................................... 3
- Goal 1: ENGL 1711 Composition 1 .................................................. 4
**Total Semester Credits ................................................................. 15**

**Third Semester (Year 2)**
- CSCI 2410 Management Information Systems ..................................... 3
- CSCI 2570 Machine Architecture and Organization ................................ 4
- MEDS 2432 Alternative Health Record Systems .................................. 2
- MEDS 2434 Legal and Ethical Aspects of Health Information ................. 2
- Goal 4: MATH 1730 College Algebra or higher .................................. 3
**Total Semester Credits ................................................................. 14**

**Fourth Semester (Year 2)**
- CSCI 1440 Networking Fundamentals ................................................. 4
- MEDS 2440 Supervision of Health Information ..................................... 2
- MEDS 2510 Quality Management and Health Statistics ....................... 3
- Goal 5: History, Social Sciences, and Behavioral Sciences .................. 3
- Goal 6: Humanities and Fine Arts .................................................... 3
**Total Semester Credits ................................................................. 15**

**Total Program Credits ................................................................. 60**

### Course Sequence for Part-Time Schedule

The following sequence is recommended for part-time students. Students should consult with the program advisor to develop an appropriate educational plan.

All classes must be successfully completed with a grade of "C" or better.

**First Semester (Year 1)**
- CSCI 1410 Computer Science and Information Systems ..................... 4
- MEDS 1470 Anatomy and Physiology of the Medical Office .............. 3
- MEDS 1480 Medical Terminology .................................................... 3
- Goal 1: COMM 17XX ........................................................................... 3
**Total Semester Credits ................................................................. 10**

**Second Semester (Year 1)**
- CSCI 1523 Introduction to Computing and Programming Concepts 4
- MEDS 1420 Health Information Foundations ...................................... 3
- Goal 1: ENGL 1711 Composition 1 .................................................. 4
**Total Semester Credits ................................................................. 10**

**Third Semester (Year 2)**
- MEDS 1560 Computerized Health Information .................................... 3
- MEDS 2432 Alternative Health Record Systems .................................. 2
- Goal 1: ENGL 1711 Composition 1 .................................................. 4
**Total Semester Credits ................................................................. 9**

**Fourth Semester (Year 2)**
- CSCI 1550 Database Management Fundamentals ............................ 4
- MEDS 2440 Supervision of Health Information .................................. 2
- Goal 4: MATH 1730 College Algebra or higher .................................. 3
**Total Semester Credits ................................................................. 9**

**Fifth Semester (Year 3)**
- CSCI 2410 Management Information Systems ..................................... 3
- CSCI 2570 Machine Architecture and Organization ........................... 4
- MEDS 2434 Legal and Ethical Aspects of Health Information ............... 2
- Goal 5: History, Social Sciences, and Behavioral Sciences .................. 3
**Total Semester Credits ................................................................. 12**

**Sixth Semester (Year 3)**
- CSCI 1440 Networking Fundamentals ................................................. 4
- MEDS 2510 Quality Management and Health Statistics ....................... 3
- Goal 6: Humanities and Fine Arts .................................................... 3
**Total Semester Credits ................................................................. 10**

**Total Program Credits ................................................................. 60**

### Transfer Opportunities

Saint Paul College has transfer agreements & partnerships between many post-secondary institutions. For more information please go to saintpaul.edu/Transfer.
Program Overview
Graduates of the Medical Coding Diploma program are proficient in coding diagnoses and procedures, abstracting medical data, meeting physician documentation needs, and other related duties. Coders work closely with billing personnel at healthcare facilities, and proficiency in billing and reimbursement procedures is included in the Medical Coding Diploma program. Courses taken to meet requirements for the Medical Coding Diploma also prepare a student to continue into the Health Information Technology AAS degree program.

Applicants should possess excellent communication skills, meticulous attention to detail, good spelling, finger dexterity, and extreme accuracy in their work. Candidates considering this field should be comfortable reading and analyzing data for long periods of time, abstracting information from patient health records, assisting billers and other reimbursement personnel, and using critical thinking skills.

Career Opportunities
Graduates of the Medical Coding Diploma program may work in a physician’s office, surgery center, specialty clinic, hospital, insurance company, government agency, research foundation, long-term care facility, dental office, consulting firm, rehabilitation center or other health care facility. Medical coding may be done at home through use of a secure Internet connection. Working from one’s home is generally for employees who have completed training in an office setting for a period of time.

According to the Bureau of Labor Statistics, the Job Outlook for Medical Record and Health Information Technology careers is projected to increase 11% between 2018 and 2028, which is much faster than average (www.bls.gov).

Program Outcomes
1. Graduates will apply basic medical sciences in accordance to the profession.
2. Graduates will demonstrate use of office and coding based software applications.
3. Graduates will perform accurate medical coding in accordance with official guidelines for coding and reporting.
4. Graduates will model professional and ethical behavior consistent with the American Health Information Management Association (AHIMA) Code of Ethics.

Part-time/Full-time Options
This program can be completed by using a combination of online, day, evening, and Saturday courses. Part-time and full-time options are available.

Minimum Program Entry Requirements
Students entering this program must meet the following minimum program entry requirements:

Reading: Score of 250+ or grade of “C” or better in READ 0722 or READ 0724 or EAPP 0900
Writing: Score of 250+ or grade of “C” or better in ENGL 0922 or EAPP 0900
Arithmetic: Score of 250+
Keyboarding Skills: Minimum of 40 WPM with 3 errors or less or a grade of “C” or better in BTEC 1400.
Computer Skills: Basic computer skills such as word processing, spreadsheets, and Internet usage or a grade of “C” or better in BTEC 1418.

Assessment Results and Prerequisites:
Students admitted into Saint Paul College programs may need to complete additional courses based on assessment results and course prerequisite requirements. Certain MATH, READ, and ENGL courses have additional prerequisites.
Medical Office Professional AAS DEGREE

Program Overview
Medical Office Professionals are critical to the support of clinical staff in the health care industry. Physicians, nurses and other direct patient-contact personnel rely on well-trained medical office professionals to assist them in the creation, maintenance, and retention of quality medical documentation based on patient care. The medical office professional's job may include transcribing medical documents, creating and processing correspondence, scheduling patient appointments, scanning documents into digital health records, releasing patient information, collecting or abstracting medical data, understanding reimbursement methodologies, meeting physician documentation needs, and other related duties.

Applicants should possess excellent communication skills, meticulous attention to detail, good spelling, finger dexterity, and extreme accuracy in their work. Candidates considering this field should be comfortable reading and analyzing data for long periods of time, listening to dictated material for extended periods, assisting the patient documentation needs, and working on an independent basis.

Career Opportunities
Medical Office Professionals enjoy salaries in the top bracket of office professionals. Some may advance to office supervisors or managers with further education; and some may develop their own business based on their medical office specialty, such as transcription.

The Medical Office Professional may work in a physician's office, surgery center, specialty clinic, hospital, insurance company, government agency, research foundation, long-term care facility, dental office, consulting firm, rehabilitation center or other health care facility.

According to the Bureau of Labor Statistics, Medical Secretarial Occupations are anticipated to increase by +/- 16% between 2018 and 2028 (www.bls.gov).

Program Outcomes
1. Graduates will apply basic medical sciences in accordance to the profession.
2. Graduates will demonstrate use of office and healthcare-based software applications.
3. Graduates will demonstrate entry-level data collection, documentation, and healthcare regulatory practices.
4. Graduates will apply business procedures in accordance with the medical office profession.
5. Graduates will transcribe and edit medical reports and related office correspondence.

Transfer Opportunities

Saint Paul College has transfer agreements & partnerships between many post-secondary institutions. For more information please go to saintpaul.edu/Transfer.
Program Overview
Graduates of the Medical Office certificate assist with scanning information into electronic health records, releasing patient information, meeting physician documentation needs, scheduling patients, and other related duties.

High school graduation or equivalent is required. Applicants should possess excellent communication skills, meticulous attention to detail, good spelling, finger dexterity, and extreme accuracy in their work. Candidates considering this field should be comfortable reading and analyzing data, assisting with patient concerns, and working with computer programs.

Career Opportunities
Graduates of the Medical Office Certificate program may work in physician offices, surgery centers, specialty clinics, hospital, insurance companies, government agencies, research foundations, long-term care facilities, dental offices, consulting firms, rehabilitation centers or other health care facilities. Other places of employment include working for vendors of computer software.

According to the Bureau of Labor Statistics, Medical Secretarial Occupations are anticipated to increase by +/- 16% between 2018 and 2028 (www.bls.gov).

Program Outcomes
1. Graduates will apply basic medical sciences in accordance to the profession.
2. Graduate will demonstrate use of office and healthcare-based software applications.
3. Graduates will demonstrate entry-level data collection, documentation, and healthcare regulatory practices.

# Health Sciences Broad Field AS Degree

## Program Overview
The Health Sciences Broad Field AS Degree is designed to provide general education courses for students interested in health sciences, but have not yet decided which specific health care field they intend to pursue.

## Career Opportunities
Students enrolled in the Health Sciences Broad Field AS degree will acquire all of the skills and knowledge needed to provide a smooth transition into baccalaureate health-related programs such as:

- Community Health
- Nursing
- Dental Hygiene
- Health Education
- Food and Nutrition
- Exercise Science

## Program Outcomes
1. Utilize the English language effectively to read, write, speak, and listen critically.
2. Develop the capacity to identify, discuss, and reflect upon social and behavioral issues.
3. Demonstrate comprehension of human and biological systems.
4. Enhance mathematical and logical thinking techniques.
5. Improve their awareness and understanding of health, wellness, and liberal arts.

## Transfer Opportunities
Saint Paul College has transfer agreements & partnerships between many post-secondary institutions. For more information please go to saintpaul.edu/Transfer.

Program Overview
The Medical Laboratory Technician program is a combination of classroom, laboratory, and applied experiences that will provide students with training needed for employment in Medical Laboratory careers. Following the didactic coursework, which includes hands-on training in campus student laboratories, students are assigned to a clinical affiliate for the clinical experience. This required portion of the curriculum provides realistic experiences and an opportunity for further learning and demonstration of technical and affective skill competency. The Associate of Applied Science Degree prepares graduates to enter employment as a Medical Laboratory Technician. Medical Laboratory Technicians use sophisticated automated equipment and instruments, microscopes and cell counters to perform testing that helps physicians diagnose illness and disease, and treat and monitor patient health and wellness. They collect and prepare specimens; count cells and look for abnormal cells; analyze the chemical content of fluids; look for bacteria, parasites or other microorganisms; and match blood for transfusions. As a critical member of the healthcare team, Medical Laboratory Technicians evaluate data to determine its accuracy and relay the test results to the physician to provide quality services that contribute to patient safety. They then analyze the results and relay them to physicians. Qualifications include an interest and aptitude in science and mathematics, accuracy and attention to detail, strong communication skills, moral and intellectual integrity, self-discipline, an ability to multitask and prioritize workload, and desire to contribute to quality patient care. Laboratory workers must have the cognitive and technical skills to perform and master a variety of tasks and the professional/affective skills to work efficiently and interact effectively with patients and other members of the health care team.

Career Opportunities
Laboratory tests are of vital importance to modern medical practice. The need for clinical laboratory workers is expected to remain strong. Increased job openings are expected due to the increased need for laboratory testing in an aging population and also due to vacancies created through retirements of current employees. Employment of medical laboratory professionals is projected to grow 11% from 2018-2028 (according to the U.S. Bureau of Labor Statistics). Medical Laboratory Technicians are employed in hospital laboratories, clinics, doctor’s offices, public health agencies and pharmaceutical, industrial, and medical research laboratories.

Program Outcomes
The graduate will:
1. Demonstrate proper use, calibration, adjustment, and operation of laboratory precision instrumentation.
2. Demonstrate standard safety practices in the medical laboratory designed to prevent injury, illness, or loss of life to those working in and/or around the medical laboratory equipment with particular emphasis on the skills required for collection and testing of numerous body fluids and specimens using Standard Precautions (including the use of personal protective equipment).
3. Correlate pathological conditions of the human body, including cause and symptoms, to the laboratory’s role in diagnosis and treatment.
4. Demonstrate organized and efficient clinical laboratory work skills.
5. Perform a wide variety of testing procedures employed in a medical laboratory and relate the principles of quality assurance and importance of these procedures to patient safety and the diagnosis and treatment of disease processes in the following areas: clinical chemistry, hematology and hemostasis, urinalysis, microbiology, transfusion medicine, and immunology.
6. Be prepared to take the examination administered by the Board of Certification under the direction of the American Society for Clinical Pathology (ASCP).
7. Demonstrate effective interpersonal/ professional/self-management skills in interactions with patients, colleagues and other members of the health care team.

National Certification Exam
Upon completion of the program, the student is eligible to take an examination administered by the Board of Certification under the direction of the American Society for Clinical Pathology (ASCP).

Textbook and Supply Costs
Students should expect to spend approximately $2,400.00, beyond the cost of tuition and fees, for books, supplies, certification exam, and liability insurance.

Program Progression
Once admitted to the MLT Major, students must take all of the required MDLT courses in sequence as prescribed. Technical courses are offered only during the day. Students completing the required General Education, developmental or EAPP courses and who have not been officially admitted to the MLT program are considered Pre-Medical Laboratory Technician.

Application Process
After completing the Saint Paul College application and admission process, students interested in the Medical Laboratory Technician program must submit a completed Application to the Medical Laboratory Technician Program form to One Stop. This form is available on the Medical Laboratory Technician Web page (saintpaul.edu/MLT) on the second Wednesday of fall semester through the last day in January or later until there are sufficient applicants to fill the open seats. This application window is for the subsequent fall semester start in the MLT Major. Applicants must meet the following criteria to submit the form:

- Completion of MDLT 1600 Medical Laboratory Math and CHEM 1711 Principles of Chemistry 1 (“C” grade or higher)
- Documented readiness for, or completion of, ENGL 1711 English Composition
- Achieve a cumulative GPA of 2.8 or better with a minimum grade of “C” in all required courses

Admission into the Program
Applying by the priority application deadline (listed on the application) does not guarantee admission to the Medical Laboratory Technician Program. Being admitted to Saint Paul College does not imply admission into the Medical Laboratory Technician Program. After the priority review deadline indicated on the Application to the Medical Laboratory Technician Major, each application is reviewed in the order submitted on the basis of completion of prerequisite courses, overall academic ability, GPA of college level courses, and assessment scores.

Applicants are admitted on a first-qualified, first-served basis according to the order of application submission. Notification of acceptance into the Medical Laboratory Technician Major will be sent by email 6 weeks after the deadline date listed on the Application to the Medical Laboratory Technician Major form. Students admitted into the Medical Laboratory Technician program must attend a mandatory orientation meeting (MLT Seminar) to complete documentation to enter the program.

See back of this guide for Additional Program Requirements, Program Faculty, Program Requirements and Start Dates, Course Sequence & Transfer Opportunities

Minimum Program Entry Requirements
Students entering this program must meet the following minimum program entry requirements:

- Reading: Score of 250+ or grade of “C” or better in READ 0722 or READ 0724 or EAPP 0900
- Writing: Score of 250+ or grade of “C” or better in ENGL 0922 or EAPP 0900
- Quant. Reasoning, Algebra & Stats: Score of 270+ or Adv. Algebra & Functions: Score of 250+ or grade of “C” or better in MATH 0920

Assessment Results and Prerequisites
Students admitted into Saint Paul College programs may need to complete additional courses based on assessment results and course prerequisite requirements. Certain MATH, READ, and ENGL courses have additional prerequisites.
Medical Laboratory Technician AAS DEGREE (continued)

Additional Program Requirements
- Evidence of immunity to specific diseases prior to clinical experience placement
- Evidence of a cleared criminal background study prior to clinical experience placement

Program Faculty
Michelle Briski
michelle.briski@saintpaul.edu
Nicole Schroeder
nicole.schroeder@saintpaul.edu

Students should consult with the program advisor to develop an appropriate educational plan.

Program Requirements
☐ Check off when completed
☐ All classes must be successfully completed with a grade of “C” or better.

Program Start Dates

Fall

Course Sequence

The following Course Sequence is required for full-time students. With the exception of the prerequisite MDLT 1600 Medical Laboratory Math, MDLT Core Courses can only be taken by students who have been officially accepted and admitted into the Medical Laboratory Technician program and who have attended the Mandatory Medical Lab Technician Seminar.

Accepted students progress through the major as a cohort and must take MDLT courses in sequence in the semester indicated. Non-MDLT coursework can be taken prior to acceptance into the MLT Major or during the semester indicated in the presented course sequence. Non-MDLT coursework cannot be delayed and taken after the semester indicated in the presented course sequence.

Students should consult with the program advisor to develop an appropriate educational plan. HLTH 1410 Medical Terminology must be completed by the end of the first semester in the MLT Major.

Not all courses are offered each semester. MDLT coursework can be started only Fall semester.

Transfer Opportunities

Saint Paul College has transfer agreements & partnerships between many post-secondary institutions. For more information please go to saintpaul.edu/Transfer.

This program is accredited by the National Accrediting Agency for Clinical Laboratory Sciences (NAACLS):
5600 N River RD, Suite 720
Rosemont, IL 60018-5119
Telephone: 773.714.8880
Fax: 773.714.8886
info@naacls.org | www.naacls.org

Information is subject to change.
This Program Requirements Guide is not a contract.
Phlebotomy Technician CERTIFICATE

Program Overview
The Phlebotomy Technician program is a combination of classroom, laboratory, and applied experiences that will provide students with the training needed for employment in phlebotomy careers. Following the on-campus phlebotomy didactic coursework, students are assigned to a clinical affiliate for the clinical experience. This required portion of the curriculum provides an opportunity for demonstration of technical and affective skill competency. Students spend 100 hours at the affiliate where they must perform a minimum of 100 successful blood collection procedures, under the supervision of affiliate staff.

After program completion, graduates are eligible to take the Phlebotomy Technician Certification examination administered through the American Society of Clinical Pathology (ASCP) Board of Certification.

Phlebotomy technicians serve an integral role as members of the healthcare team. Phlebotomy is an entry level position in healthcare. Trained to collect blood specimens from patients, Phlebotomy technicians are skilled professionals who assist physicians in diagnosis and treatment of disease by ensuring the high quality of the specimen they provide for laboratory analysis. They practice safety to protect themselves and the patients they serve. Additionally, because phlebotomy involves significant direct patient contact, these laboratory professionals become the face of the laboratory and must adhere to standards of professional behavior and appearance.

Qualifications include an ability to work accurately under pressure, and to communicate effectively. Phlebotomy technicians like challenge and responsibility and are committed to providing high quality care to patients.

Employment growth in this field is faster than average and is expected to increase by 27% from 2012 – 2022 according to the National Bureau of Labor Statistics.

Career Opportunities
Phlebotomy technicians are employed in a variety of settings including hospitals, clinics, blood donation centers and other outpatient care centers.

Program Outcomes
1. The graduate will demonstrate proper selection and use of phlebotomy equipment for safe specimen procurement that maintains optimal specimen integrity.
2. The graduate will demonstrate awareness of and ability to respond to complications or special considerations.
3. The graduate will demonstrate standard safety practices designed to prevent injury or illness using Standard Precautions (including the use of Personal Protective Equipment).
4. The graduate will demonstrate effective interpersonal/professional/self-management skills to fulfill his/her job responsibilities in interactions with patients, colleagues and other members of the health care team.
5. The graduate will be prepared to take the examination administered by the Board of Certification under the direction of the American Society for Clinical Pathology (ASCP).
6. The graduate will demonstrate preparedness for entry level employment as a phlebotomy technician.

Additional Program Requirements
- Grade of “C” (2.0) or higher in all courses with A/F grading criteria
- Pass (P) grade demonstrating satisfactory performance in meeting skill competencies in the PHLB clinical experience course
- Evidence of immunity to specified diseases
- Evidence of a cleared criminal background prior to clinical experience placement. For more information about the background study process and disqualifying crimes, contact the Minnesota Department of Human Services at 651.296.3802.

Textbook and Supply Costs
Students should expect to spend approximately $680.00 beyond the cost of tuition and fees, for books, supplies, certification exam and liability insurance. Students are responsible for parking and transportation costs for the clinical experience portion of the program.

Required Phlebotomy Technician Certificate Seminar
Students must attend a mandatory Phlebotomy Seminar to complete required documentation during the first week of the second semester PHLB courses.

Program Faculty
Kelsey Dodson
kelsey.dodson@saintpaul.edu

Program Requirements
☐ Check off when completed
☐ All courses must be successfully completed with a grade of “C” or better.
☐ Individuals must be at least 18 years of age
☐ Students must attend a mandatory Phlebotomy Seminar to complete required documentation during the first week of the second semester PHLB courses.

Total Program Credits .................. 22

Minimum Program Entry Requirements
Students entering this program must meet the following minimum program entry requirements:
Reading: Score of 250+ or grade of “C” or better in READ 0722 or READ 0724 or EAPP 0900
Writing: Score of 250+ or grade of “C” or better in ENGL 0922 or EAPP 0900
Arithmetic: Score of 225+

Assessment Results and Prerequisites:
Students admitted into Saint Paul College programs may need to complete additional courses based on assessment results and course prerequisite requirements. Certain MATH, READ, and ENGL courses have additional prerequisites.

Information is subject to change.
This Program Requirements Guide is not a contract.
Phlebotomy Technician CERTIFICATE (continued)

Program Start Dates
Fall, Spring

Course Sequence
This certificate must be completed in two semesters as shown in the following sequence. All prerequisite/first semester courses must be completed before PHLB 1405 and PHLB 1410. HLTH 1575 can be taken with PHLB courses or before.

Students must enroll in PHLB 1405 Phlebotomy and PHLB 1410 Phlebotomy Clinical Experience within the same semester to allow immediate progression to the Phlebotomy Clinical Experience following completion of on campus training. PHLB courses must be taken following successful completion of all prerequisite/first semester course requirements with a grade of “C” or better.

The clinical experience is Monday-Friday and typically occurs during daytime operational hours of our affiliated clinical sites. Students must schedule any courses being taken concurrently with PHLB 1410 accordingly with evening, weekend, or online courses offerings. Once enrolled in PHLB 1405 and PHLB 1410, students are required to attend a mandatory seminar session prior to starting PHLB 1405. Information about seminar scheduling will be provided by the program director.

First Semester:
BIOL 1730 Human Body Systems ................ 3
COMM 1710 Fundamentals of Public Speaking
OR
COMM 1720 Interpersonal Communication ....... 3
HLTH 1410 Medical Terminology ................ 1
PHIL 1722 Health Care Ethics ................... 3
Total Semester Credits ......................... 10

All First Semester courses must be successfully completed with a grade of “C” or better before proceeding to PHLB courses.

Must attend a mandatory Phlebotomy Seminar to complete required documentation during the first week of the second semester PHLB courses.

Second Semester:
HLTH 1575 EKG & Telemetry ..................... 6
PHLB 1405 Phlebotomy ........................ 4
PHLB 1410 Phlebotomy Clinical Experience ...... 2
Total Semester Credits ......................... 12

Total Program Credits ....................... 22

Readmission to the Program
Students who intend to be readmitted to the program, after leaving before completing all requirements, must schedule an appointment to meet with the PHLB Program Director before registering for the phlebotomy classes. Readmit applicants are considered on a space available basis. Being readmitted to Saint Paul College does not imply readmission to the Phlebotomy Technician Certificate program.
Program Overview
Nursing assistants and Home Health Aides provide direct client care under the direction of a nurse or doctor in a variety of health care settings. Using technical skills learned in both the classroom and clinical setting, nursing assistants and home health aides perform such tasks as feeding, bathing, positioning, ambulating and comfort measures for the client. Students explore and discuss legal, ethical and safety issues in client care. Students are prepared to take the Headmaster: National Nursing Assistant Assessment Test to be placed on the Minnesota State Nursing Assistant Registry.

Qualifications include achieving appropriate assessment scores as indicated in Minimum Program Entry Requirements.

Licensing certification or registry status are independent of graduation requirements.

Career Opportunities
Graduates of the Nursing Assistant/Home Health Aide Program must successfully take and complete the nursing assistant test exam administered through the designated State testing service to be placed on the Minnesota State Nursing Assistant Registry. Nursing assistants must be on the registry to be employed in the long term care setting.

In Minnesota, employment for nursing assistants is expected to grow at an average rate. Nationally, the number of jobs is expected to grow faster than average.

Upon completion of this course, certified nursing homes or certified boarding care homes are required to reimburse for training and testing expenses paid by the student. This is to be done 90 days from the date of employment. Note: reimbursement is not paid to third parties.

Licensing or certification exams are independent of graduation requirements.

Program Outcomes
1. Graduates will be prepared to provide direct client care in a long term care facility or home health care setting.
2. Graduates will be prepared to meet the requirements to be placed on the Minnesota State Nursing Assistant Registry.

Program Faculty
Linda Meyer
linda.meyer@saintpaul.edu

Additional Program Material Costs
Students should expect to spend approximately $327.00 beyond the cost of tuition and fees for Minnesota registry test, books, supplies or uniforms.

Program Start Dates
Fall, Spring, Summer

Program is not eligible for financial aid.

Minimum Program Entry Requirements
Students entering this program must meet the following minimum program entry requirements:

Reading: Score of 225+ or grade of “C” or better in READ 0721 or READ 0724 or EAPP 0860
OR
ESL Reading: Score of 81 or better

Assessment Results and Prerequisites:
Students admitted into Saint Paul College programs may need to complete additional courses based on assessment results and course prerequisite requirements. Certain MATH, READ, and ENGL courses have additional prerequisites.
Practical Nursing DIPLOMA

Program Overview
Under the supervision of registered nurses and physicians, licensed practical nurses provide bedside care, monitor patients, gather information, evaluate patient needs and contribute to the patient’s care. Licensed practical nurses administer medications and perform treatments. Licensed practical nurses utilize observation, critical thinking, decision-making and communication skills in caring for patients.

The Practical Nursing Diploma is designed to meet the requirements to become licensed as a Practical Nurse.

Career Opportunities
Employment of LPNs is expected to increase faster than the average for all occupations. The best opportunities will occur in nursing care facilities and home health care services. This is in response to the long-term care needs of an increasing elderly population.

Graduates may be employed in long-term care centers, clinics, home care agencies, hospice, hospitals and transitional care units. Upon completion of the program, the graduate will be prepared to take the National Council Licensure Examination for Practical Nurses (NCLEX-PN).

Licensing or certification exams are independent of graduation requirements.

Program Outcomes
1. Licensure Examination. The program’s most recent annual NCLEX licensure examination pass rate will be at least 80% for all first-time test-takers.
2. Program Completion. 60% of the students who begin the first nursing course will graduate from the nursing program within 150% of the timeframe allotted for the program.
3. Job Placement. 70% of students will be employed within one (1) year of graduation.

Program Faculty
Lynn Perkins

Joy Seymour
joy.seymour@saintpaul.edu
Yewondwosen Tsegaw
yewondwosen.tsegaw@saintpaul.edu
Biniam Weldearegay
biniam.weldearegay@saintpaul.edu

Application Process
Prior to submitting the Application to Practical Nursing Major form, an applicant must:
1. Complete the ACCUPLACER assessment and meet Minimum Program Entry Requirements (see below).
2. Complete all pre-requisites prior to PRNS courses with a cumulative GPA of 2.75 or higher and a minimum “C” grade in each course. Final acceptance/enrollment in the program is conditional upon successful completion.
3. Complete all college level courses with a cumulative GPA of 2.5 or higher.
4. Submit official transcripts from ALL colleges attended outside of Saint Paul College (if applicable).
5. Complete the Test of Essential Academic Skills (TEAS VI) with minimum score of 53% or higher and a Reading minimum of 45% and English minimum of 45%.
6. Have obtained a Nursing Assistant certificate (NAST 1111 & NAST 1112) within the last five years or have an active Minnesota Nursing Assistant Registry.
7. Submit a record of the required immunizations prior to the semester in which the student registers for clinical courses.
8. Final acceptance/enrollment in the program is conditional upon successful completion of all pre-requisites and good academic standing.
9. If accepted, attend the required Practical Nursing Seminar, which includes an overview of admissions requirements, program expectations, and a schedule of classes/clinical.

Minimum Program Entry Requirements
Students entering this program must meet the following minimum program entry requirements:

Reading: Score of 250+ or grade of “C” or better in READ 0722 or READ 0724 or EAPP 0900
Writing: Score of 250+ or grade of “C” or better in ENGL 0922 or EAPP 0900
Arithmetic: Score of 225+ or grade of “C” or better in MATH 0745

Assessment Results and Prerequisites:
Students admitted into Saint Paul College programs may need to complete additional courses based on assessment results and course prerequisite requirements. Certain MATH, READ, and ENGL courses have additional prerequisites.
Program Requirements

- All classes must be successfully completed with a grade of “C” or higher.

Preliminary courses and requirements:
The following must be completed prior to submitting your Application to Practical Nursing Major form.

- Check off when completed

- HLTH 1310 Communications in Healthcare ...... 1
- HLTH 1410 Medical Terminology .............. 1
- Health Core Credits .......................... 2
- Goal 1: ENGL 1711 Composition 1 ............ 4
- Goal 3: BIOL 1730 Human Body Systems ...... 3
- Goal 5: PSYC 1720 Lifespan Development ...... 3

General Education Requirements .......... 10

- Nursing Assistant Certification (NAST 1111 & NAST 1112) completed within the last five years or active Minnesota Nursing Assistant Registry.
- TEAS Test: Complete Test of Essential Academic Skills (TEAS) with minimum score of 53% or higher and a Reading minimum of 45% and English minimum of 45%.
- Evidence of current CPR certification (HLTH 1432) must be presented prior to taking PRNS 1481 Clinical 1.

PRNS Core Courses Cr

- PRNS 1425 Essentials of Clinical Pharmacology ........ 2
- PRNS 1436 Foundations of Nursing .............. 4
- PRNS 1481 Clinical 1 .......................... 3
- PRNS 1484 Clinical 2 .......................... 2
- PRNS 1483 Clinical 3 .......................... 3
- PRNS 1521 Medical Surgical Nursing 1 ........... 4

- PRNS 2410 Psycho/Social Nursing .............. 2
- PRNS 2492 Transition to Practice .............. 3

PRNS Core Credits ............................ 28
Health Core Credits ........................... 2
General Education Requirements .......... 10

Total Program Credits ........................ 40

Program Start Dates

Fall, Spring, or Summer - Preliminary courses only

Course Sequence

The following sequence is recommended; however, this sequence is not required.

First Semester
- HLTH 1310 Communications in Healthcare ...... 1
- HLTH 1410 Medical Terminology .............. 1
- Goal 1: ENGL 1711 Composition 1 ............ 4
- Goal 3: BIOL 1730 Human Body Systems ...... 3
- Goal 5: PSYC 1720 Lifespan Development ...... 3

Pre-Nursing Credits ....................... 12
- Complete the TEAS Test, Nursing Assistant Certification requirement, and apply to the program.
- Evidence of current CPR certification (HLTH 1432) must be presented prior to taking PRNS 1481 Clinical 1.

Second Semester (Fall/Spring only)

Practical Nursing Courses
- PRNS 1425 Essentials of Clinical Pharmacology ........ 2
- PRNS 1436 Foundations of Nursing .............. 4
- PRNS 1481 Clinical 1 .......................... 3
- PRNS 1521 Medical Surgical Nursing 1 ........... 4
- PRNS 2410 Psycho/Social Nursing .............. 2
- PRNS Core Credits ............................ 15

Total Program Credits ........................ 40

End of Program Outcomes

1. Provide safe, quality care that promotes the health of individual patients across the lifespan.
2. Recognize the patient or designee as the source of control and full partner in providing compassionate and coordinated care based on respect for patient’s preferences, values, and needs.
3. Demonstrate competency within Practical Nurse scope of practice to provide, safe, quality care for diverse patients in a caring environment.
4. Function effectively within nursing and inter-professional teams, fostering open communication, mutual respect, and shared decision-making to achieve quality patient care.
5. Demonstrate responsibility for own personal and professional growth as a self-motivated, self-directed person who utilizes self-reflection and feedback from team members.
6. Utilize critical thinking and nursing judgment when prioritizing care, implementing evidence based interventions, and promoting the health of individual patients across the lifespan.
Program Overview
Pharmacy technicians play an integral role in assisting pharmacists with medication dispensing. Pharmacy technicians work in hospitals, drug stores, and other medical settings. Pharmacy technicians perform a variety of duties that require strong attention to detail. Pharmacy Technicians perform duties such as, entering prescription orders into the computer, preparing medications for pharmacist verification (including measuring and sometimes mixing the medication), maintaining accurate patient records, performing calculations, and providing customer service.

This program prepares students to take the Pharmacy Technician Certification Exam.

Career Opportunities
Pharmacy technicians work in hospitals, drug stores, specialty pharmacies, and insurance company settings. Employment projections indicate an increase of 32% from 2010 to 2020, according to the U.S. Bureau of Labor Statistics.

Program Outcomes
1. Graduates will have skills to provide medications to patients including ordering stocking and packaging.
2. Graduates will understand and apply skills in institutional setting in sterile product processing.
3. Graduates will have mastered the general education requirements for work and life.
4. Graduates will be able to perform administrative duties in a variety of pharmacy related workplace settings.
5. Graduates will apply appropriate customer service skills in a hospital or retail based pharmacy.
6. Graduates will be prepared to take the Pharmacy Technician Certification Exam.
7. Graduates will demonstrate an understanding of all regulations that govern pharmacy technicians.
8. Graduates will perform duties as a pharmacy technician in retail and hospital environments.
9. Graduates will demonstrate the ability to prepare and interpret pharmacy orders accurately.
10. Graduates will exhibit work ethic characteristics of professionalism, responsibility and dependability.
11. Graduates will apply knowledge of basic sciences to the practice of pharmacy technology.
12. Graduates will demonstrate ability to communicate with patients, health care providers and colleagues.

Program Faculty
Sabrina Hemmerling
sabrina.hemmerling@saintpaul.edu

Additional Program Material Costs
Students should expect to spend approximately $750.00 beyond the cost of tuition and fees for books, supplies, uniforms, parking at internship site, and professional fees. There are additional fees for the certification exam and board of pharmacy registration (see below).

Licenses/Testing
• Certification Exam $129.00
• Minnesota Board of Pharmacy Registration $50

Program Guidelines
1. Attend required orientation session after program acceptance.
2. Must complete vaccination requirements directed by faculty at required program orientation session.
3. Must pass MN Department of Health and Human Services Background study.
4. Complete Basic Life Support for Healthcare provider (BLS) or CPR/First Aid before the end first semester pharmacy courses.

Program Start Dates
Fall - General Education credits can be taken any term

Course Sequence
The following course sequence is recommended for a full-time student; however, the sequence is not required. Not all courses are offered each semester, a selection of courses is offered summer term. Students should consult with Program Advisor each semester.

Program Start Dates
2022-2023 Catalog
Saint Paul College—A Community & Technical College

Minimum Program Entry Requirements
Students entering this program must meet the following minimum program entry requirements:

Reading: Score of 250+ or grade of “C” or better in READ 0722 or READ 0724 or EAPP 0900

Writing: Score of 250+ or grade of “C” or better in ENGL 0922 or ENGL 0924 or EAPP 0900

Quant. Reasoning, Algebra & Stats:
Score of 250+ or Adv. Algebra & Functions: Score of 215+ or grade of “C” or better in MATH 0910

Assessment Results and Prerequisites:
Students admitted into Saint Paul College programs may need to complete additional courses based on assessment results and course prerequisite requirements. Certain MATH, READ, and ENGL courses have additional prerequisites.

Program Start Dates
Fall - General Education credits can be taken any term

Course Sequence
The following course sequence is recommended for a full-time student; however, the sequence is not required. Not all courses are offered each semester, a selection of courses is offered summer term. Students should consult with Program Advisor each semester.
Program Requirements

- All courses must be successfully completed with a grade of “C” or better.

Transfer Opportunities

Saint Paul College has transfer agreements & partnerships between many post-secondary institutions. For more information please go to saintpaul.edu/Transfer.

Recommended Supplemental Courses:

The following optional courses reinforce the basic skills required for attaining proficiency in performing pharmacy technician procedures.

- PHAR 1700 Success Skills for the Pharmacy Technician 1 (First Semester) .... 2
- PHAR 1740 Success Skills for the Pharmacy Technician 2 (Second Semester) .... 2
- PHAR 2700 Success Skills for the Pharmacy Technician 3 (Third Semester) .... 1
- PHAR 1800 Pharmacy Technician Certification Exam Prep (Summer) .......... 1
## Program Overview
Pharmacy technicians play an integral role in assisting pharmacists with medication dispensing. Pharmacy technicians work in hospitals, drug stores, and other medical settings. Pharmacy technicians perform a variety of duties that require strong attention to detail. Pharmacy Technicians perform duties such as, entering prescription orders into the computer, preparing medications for pharmacist verification (including measuring and sometimes mixing the medication), maintaining accurate patient records, performing calculations, and providing customer service.

This program prepares students to take the Pharmacy Technician Certification Exam.

### Career Opportunities
Pharmacy technicians work in hospitals, drug stores, specialty pharmacies, and insurance company settings. Employment projections indicate an increase of 32% from 2010 to 2020, according to the U.S. Bureau of Labor Statistics.

### Program Outcomes
1. Graduates will have skills to provide medications to patients including ordering stocking and packaging.
2. Graduates will understand and apply skills in institutional setting in sterile product processing.
3. Graduates will have mastered the general education requirements for work and life.
4. Graduates will be able to perform administrative duties in a variety of pharmacy related workplace settings.
5. Graduates will apply appropriate customer service skills in a hospital or retail based pharmacy.
6. Graduates will be prepared to take the Pharmacy Technician Certification Exam.
7. Graduates will demonstrate an understanding of all regulations that govern pharmacy technicians.
8. Graduates will perform duties as a pharmacy technician in retail and other practice settings.
9. Graduates will demonstrate the ability to prepare and interpret pharmacy orders accurately.
10. Graduates will exhibit work ethic characteristics of professionalism, responsibility and dependability.
11. Graduates will apply knowledge of basic sciences to the practice of pharmacy technology.
12. Graduates will demonstrate ability to communicate with patients, health care providers and colleagues.

See back of this guide for Program Start Dates & Course Sequence

## Minimum Program Entry Requirements
Students entering this program must meet the following minimum program entry requirements:

- Reading: Score of 250+ or grade of “C” or better in READ 0722 or READ 0724 or EAPP 0900
- Writing: Score of 250+ or grade of “C” or better in ENGL 0922 or EAPP 0900
- Quant. Reasoning, Algebra & Stats: Score of 250+ or Adv. Algebra & Functions: Score of 215+ or grade of "C" or better in MATH 0910

Assessment Results and Prerequisites:
Students admitted into Saint Paul College programs may need to complete additional courses based on assessment results and course prerequisite requirements. Certain MATH, READ, and ENGL courses have additional prerequisites.
Specifically, the curriculum is designed to encompass a comprehensive understanding of pharmacy practice, including the theoretical and practical aspects necessary for a successful career as a pharmacy technician. Below is a detailed outline of the course sequence recommended for full-time students.

### Program Start Dates
Fall - General Education credits can be taken any term.

### Course Sequence
The following course sequence is recommended for a full-time student; however, the sequence is not required. Not all courses are offered each semester; a selection of courses is offered summer term. Students should consult with Program Advisor each semester.

Public Health AS DEGREE

Program Overview
The Public Health AS degree is designed for students who plan to pursue a bachelor’s degree in public health, health education, community health, epidemiology, health administration, or environmental health. The program builds upon foundational knowledge of the biological sciences and emphasizes communication, cultural competency, and the ability to interpret qualitative and quantitative research. Students admitted to the program will explore the public health system, population health challenges, biometric and social determinants of health, and public health preparedness through a variety of applied learning and community service opportunities.

Career Opportunities
Want to help change lives? Public Health professionals work in federal, state, and non-profit agencies, as well as in academic institutions, hospitals, and clinics. They influence change through education, health promotion, research, and policy. Specific job titles may include: health educator, healthcare administrator, emergency preparedness specialist, field investigator, food-safety inspector, epidemiologist, public health nurse, WIC nutrition specialist, or refugee coordinator. Employment Outlook for Health Educators in the seven county Minneapolis-Saint Paul, MN area is expected to increase by 8.8 percent between 2014-2024.

Program Outcomes
1. Identify concepts of personal and population health and disease, including evidence-based interventions that address health-related needs.
2. Discuss concepts of marketing, analysis, selection, and decision-making regarding health care, products, services, and health providers.
3. Describe key concepts of public health, including the history, core values, and practice.
4. Explain the key concepts, purpose and theories of public health education and promotion.
5. Define major components in health care management and administration, including the characteristics and organizational structure of the public health systems.
6. Discuss the historical development of environmental health, focusing on the basic relationships between the physical environment and human health.
7. Describe key concepts of global health, including demographic and epidemiological transitions, measures of health status, and the burden of disease.
8. Explain the ways in which public health core competencies are used in public health work.

Minimum Program Entry Requirements
Students entering this program must meet the following minimum program entry requirements:

- **Reading**: Score of 250+ or grade of “C” or better in READ 0722 or READ 0724 or EAPP 0900
- **Writing**: Score of 250+ or grade of “C” or better in ENGL 0922 or EAPP 0900
- **Quant. Reasoning, Algebra & Stats**: Score of 270+ or Adv. Algebra & Functions: Score of 250+ or grade of “C” or better in MATH 0920
- **Assessment Results and Prerequisites**: Students admitted into Saint Paul College programs may need to complete additional courses based on assessment results and course prerequisite requirements. Certain MATH, READ, and ENGL courses have additional prerequisites.

Transfer Opportunities
Saint Paul College has transfer agreements & partnerships between many post-secondary institutions. For more information please go to saintpaul.edu/Transfer.
Respiratory Therapist • AAS DEGREE

Program Overview
Respiratory Therapists (RTs) provide care and treatment for cardiac and pulmonary issues. Practitioners perform diagnostic tests, administer medical gas therapy, access and record patient emulations and implement care for acute and chronically ill patients. They provide mechanical ventilation, therapeutic procedures, and cardiopulmonary resuscitation. Laboratory procedures include pulmonary function testing; sleep study, arterial blood gas draw and analysis, hemodynamic measurements and radiologic evaluation.

Preparation best suited for this program includes excellent reading skills, biology, chemistry and physics. The goal of the program is to prepare graduates with demonstrated competence in the cognitive (knowledge), psychomotor (skills), and affective (behavior) learning domains of respiratory care practice as performed by registered respiratory therapists (RRT). Upon completion of the program the student is eligible to take the National Board for Respiratory Care Technician Multiple Choice Examination (TMCE). Students who pass at the low-cut score earn the credential of Certified Respiratory Therapist (CRT) and are eligible for licensure in the state of Minnesota. Students who pass at the high-cut score are eligible to take the Clinical Simulation Examination (CSE). Upon successful completion of the CSE, the graduate will be awarded the credentials of Registered Respiratory Therapist (RRT).

Technical Standards
All Respiratory Care students are required to meet definite standards for the profession and for clinical performance. The following are specific requirements of all students:

1. Ability to stand, sit, walk, push and squat.
2. Ability to lift and/or carry 25 pounds.
3. Ability to reach in forward, lateral, and overhead motions.
4. Ability to climb stairs.
5. Ability to distinguish distance, colors, objects, and persons.
6. Demonstrate depth perception.
7. Ability to hear conversations, monitor equipment, perform auscultation, use telephone and distinguish background noise.
8. Ability to distinguish sharp/dull and hot/cold.
9. Perform fine and gross motor skills with both hands.

Career Opportunities
Employment of respiratory therapists is expected to increase much faster than the average for all occupations because of substantial growth of the middle-aged and elderly population, a development that will heighten the incidence of cardiopulmonary disease. Respiratory Therapists are employed by hospitals, clinics or laboratories and home care agencies. Graduates may find employment through contacts made during the clinical training experiences and employment requests received by the instructional staff.

Program Outcomes
1. Graduates demonstrated knowledge and skills in Respiratory Therapy clinical experiences.
2. Graduates demonstrated knowledge and skills in Respiratory Therapy clinical simulations.
3. Graduates prepared to take the National Certification Exam.
4. Graduates prepared for employment as Respiratory Therapists.
5. Graduates communicate effectively with the Health Care Team.

Program Faculty
Debra Kasel  debra.kasel@saintpaul.edu

Full-Time Only
Students in this program must be enrolled full-time with a cohort of students. Technical courses are offered only during the day.

Textbook and Supply Costs
Students should expect to spend approximately $2,000, beyond the cost of tuition and fees, for textbooks, lab coat and other supplies. Additional costs include an ACLS, PALS, BLS course.

Application Process
In addition to completing the regular Saint Paul College application and admission process, students interested in the Respiratory Therapist program must submit a completed Application to Respiratory Therapist Major form and meet the following criteria:

- Completion of the following required General Education courses:
  - BIOL 1730 Human Body Systems
  - ENGL 1711 English Composition
- Documented readiness for, or completion of, the following required General Education course:
  - CHEM 1711 Principles of Chemistry I
  - Prerequisite for Chemistry 1 is MATH 0920 Intermediate Algebra or appropriate assessment score or CHEM 1700 Chemistry Concepts
- GPA of 3.0 or above in programmatic required prerequisite courses.

The Respiratory Therapist Admissions Committee will review each application on the basis of overall academic ability, GPA of college level courses, assessment scores, and meeting the above criteria. Notification of acceptance into the Respiratory Therapist Major will be sent by mail 6-weeks after the deadline date stated on the Application to Respiratory Therapist Major form.

The Application to Respiratory Therapist Major form is available online: saintpaul.edu/programs/Pages/respiratory-therapist.aspx

See back of this guide for Program Requirements, Start Dates, Course Sequence & Transfer Opportunities

Minimum Program Entry Requirements
Students entering this program must meet the following minimum program entry requirements:

- **Reading**: Score of 250+ or grade of “C” or better in READ 0722 or READ 0724 or EAPP 0900
- **Writing**: Score of 250+ or grade of “C” or better in ENGL 0922 or EAPP 0900
- **Quant. Reasoning, Algebra & Stats**: Score of 250+ or Adv. Algebra & Functions: Score of 215+ or grade of “C” or better in MATH 0910

Assessment Results and Prerequisites:
Students admitted into Saint Paul College programs may need to complete additional courses based on assessment results and course prerequisite requirements. Certain MATH, READ, and ENGL courses have additional prerequisites.

Information is subject to change. This Program Requirements Guide is not a contract.

Program Requirements Guide 2022-2023

Surgical Technology AAS DEGREE

Program Overview
The Surgical Technologist is a critical member of the patient care team during surgery. They are responsible for a wide variety of duties, including preparing and maintaining the sterile field and all instruments and supplies used during surgery. Surgical Technologists responsibilities include anticipating the next steps during the surgical procedure and assisting if needed. The Surgical Technology AAS degree is designed to provide students with the knowledge, skills, and professionalism in order to participate safely, and effectively in the perioperative environment.

Career Opportunities
Most Surgical Technologists work in a wide variety of hospital settings; from community hospitals to trauma centers, as well as standalone day surgery outpatient facilities. Employment of Surgical Technologists is projected to grow 15 percent from 2014 to 2024, much faster than the average for all occupations. The immediate need for Surgical technologists is vast, with a multitude of opportunities for properly trained Surgical Technologists.

Program Outcomes
1. To prepare competent entry level Surgical Technologists in the cognitive (knowledge) psycho-motor (skills), and affective (behavior) learning domains.
2. Communicate effectively and professionally with all members of a diverse sterile processing and surgical team.
3. Apply logical and critical thinking skills as it relates to Surgical Technology job duties.
4. Demonstrate safe handling of surgical instrumentation, equipment and supplies used in surgical patient care.
5. Identify surgical instrumentation, supplies, and equipment used in surgical patient care.
6. Use appropriate medical terminology related to the role of Surgical Technology.
7. Apply computer skills required in Surgical Technology.
8. Describe the cycle of sterilization as it relates to the Surgical Technologists role.
9. Demonstrate proficiency in establishing and maintaining the sterile field using aseptic technique.
10. Identify appropriate contraindications and usage of drugs as it relates to the role of the Surgical Technologist.

Total Program Credits .......................... 60

Program Start Dates
Fall, Spring
Day cohort classes offered as well as afternoon/evening cohorts. Day and afternoon/evening cohort start dates alternate every other semester. For more information, please consult with an academic advisor.

Prerequisites/Admission Guidelines:
1. Successful completion of the Sterile Processing Certificate with a minimum cumulative 2.85 GPA and a grade of C or better in all Sterile Processing courses. See Sterile Processing Program Requirement Guide for admissions requirements.
2. Must complete vaccination requirements directed by faculty at required program orientation session.
3. Attend required orientation session after program acceptance.
4. Complete Basic Life Support for Healthcare provider (BLS) CPR prior to starting SURG 24XX courses.
5. Must pass MN Department of Health and Human Services Background study.

See back of this guide for Course Sequence & Transfer Opportunities

Minimum Program Entry Requirements
Students entering this program must meet the following minimum program entry requirements:

Reading: Score of 250+ or grade of “C” or better in READ 0722 or READ 0724 or EAPP 0900
Writing: Score of 250+ or grade of “C” or better in ENGL 0922 or EAPP 0900
Arithmetic: Score of 250+ or grade of “C” or better in MATH 0745

Assessment Results and Prerequisites:
Students admitted into Saint Paul College programs may need to complete additional courses based on assessment results and course prerequisite requirements. Certain MATH, READ, and ENGL courses have additional prerequisites.

Program accredited by the Commission on Accreditation of Allied Health Education Programs (CAAHEP)

Information is subject to change.
This Program Requirements Guide is not a contract.
Course sequence

The following course sequence is recommended. Not all courses are offered each semester; a selection of courses is offered summer term. Students should consult with an academic advisor each semester.

Transfer Opportunities
Saint Paul College has transfer agreements & partnerships between many post-secondary institutions. For more information please go to saintpaul.edu/Transfer.
Program Overview
The Saint Paul College Sterile Processing certificate is a 30-credit program that prepares graduates to work in medical facilities that prepare surgical instruments, supplies and equipment necessary for healthcare. This program includes a broad introduction to health sciences, as well as medical terminology, communication, and computers. The program curriculum includes instruction in decontamination processes, preparation, packaging, sterilization and sterile storage of surgical instrumentation and supplies.

Students who successfully complete the certificate program are prepared for entry-level employment in a sterile processing position. Graduates are eligible to take the certification examination following 400 hours of professional employment, and are eligible to apply to the AAS Surgical Technology Program at Saint Paul College.

Career Opportunities
The work environment is dynamic and fast-paced. The work is challenging, highly technical, and complex. The performance of this vital role has a major impact on the smooth operation of the many departments to which it provides products and services. Employment opportunities may be within hospitals, outpatient centers, and instrument processing centers. Wage information is available from the Minnesota Department of Employment and Economic Development.

Program Outcomes
1. To prepare competent entry-level sterile processors in the cognitive (knowledge) psycho motor (skills), and affective (behavior) learning domains.
2. Communicate effectively and professionally with all members of a diverse sterile processing team.
3. Apply logical and critical thinking skills as it relates to sterile processing job duties.
4. Demonstrate safe handling of surgical instrumentation, equipment and supplies used in surgical patient care.
5. Identify surgical instrumentation, supplies, and equipment used in surgical patient care.
6. Use appropriate medical technology knowledge related to the role of the sterile processor.
7. Apply computer skills required in sterile processing.
8. Describe the cycle of sterilization, as it relates to sterile processing.
9. Demonstrate proficiency with aseptic technique as it relates to sterile processing.

Program Faculty
Jolianne Mohler  jolianne.mohler@saintpaul.edu
Viki Viertel  viki.viertel@saintpaul.edu

Additional Program Materials
Students should expect to spend approximately $135 for supplies. This cost is beyond the cost of tuition and fees and subject to change.

Program Requirements

*Successful completion of the Sterile Processing Certificate with a minimum 2.85 GPA is required for admission to the Surgical Technology AAS degree at Saint Paul College.

Prerequisites/Admission Guidelines:
1. An application is required to register for SURG 14XX courses.
2. A cumulative 2.5 GPA or above is required in general/prerequisite Sterile Processing program courses in order to register for SURG 14XX courses.
3. Students with all prerequisites completed at the time of the application will be given priority.
4. Remaining spots in the Sterile Processing courses will be granted based on remaining prerequisites to be completed at the time of application.
5. The Sterile Processing Admissions Committee will review each application on the basis of overall academic ability, GPA of course prerequisites, completion of minimum entry requirements and meeting the above requirements. Students will be notified by their Saint Paul College emails as indicated on the Sterile Processing Course Application.
6. Must complete vaccination requirements directed by faculty at required program orientation session.
7. Attend required orientation session after program acceptance.
8. Complete Basic Life Support for Healthcare provider (BLS) CPR prior to starting SURG 24XX courses.
9. Must pass MN Department of Health and Human Services Background study.

Program Requirements Guide

Clinical Sports Massage AAS DEGREE

Program Overview
The AAS in Clinical Sports Massage builds upon the existing Massage Therapy Certificate Program. Graduates perform thorough patient assessments and develop care plans based on assessments. Students implement care plans using carefully selected techniques for the given disorders, including recommended exercises to the client. Clinical Sports Massage techniques include, but are not limited to, friction therapy, trigger point therapy, active and passive engagement techniques, scraping techniques, fascial release techniques, manual lymphatic drainage and advanced stretching modalities.

Career Opportunities
Huge growth in age group sports such as triathlon, running, skiing, soccer, rugby and hockey, have led to more people returning to a sporting lifestyle than ever before. The direct correlation is an increase in injuries and/or need for prevention of injury. With increased proven results utilizing various soft tissue manual therapies, more people are relying on well trained Clinical Sports Massage Therapists to alleviate and/or prevent injury. There is a large demand for Clinical Sports Massage Therapists in rehabilitation facilities, sports chiropractic offices, onsite sports events, health clubs, and with self-employment. The Clinical Sports Massage Advanced Certificate qualifies graduates to apply for board certification. All classes within this curriculum qualify as continuing education for massage therapy.

Program Outcomes
1. Graduates will provide application of manual techniques to positively contribute to the well-being of the client in a safe and skillful manner.
2. Graduates will be prepared to take the national certification exam in massage therapy.
3. Graduates will be prepared for employment in an entry-level capacity.
4. Graduates will be prepared to take the Board Certification through the National Certification Board for Therapeutic Massage & Bodywork (NCTMB).
5. Graduates will be prepared for employment in a sports and rehabilitation environment.

Clinical Sports Massage CERTIFICATE

Program Overview
Designed for Massage Therapists who have graduated from a 600 hour or more program, the Clinical Sports Massage Advanced Certificate builds on basic foundational massage therapy skills. Graduates of the Clinical Sports Massage Advanced Certificate perform thorough patient assessments and develop care plans based on assessments. Students implement care plans utilizing carefully selected techniques for the given disorders, including recommended exercises for the client. Clinical Sports Massage techniques include, but are not limited to, friction therapy, trigger point therapy, active and passive engagement techniques, scraping technique, cupping with drag, fascial release techniques, manual lymphatic drainage and advanced stretching modalities.

Career Opportunities
Huge growth in age group sports such as triathlon, running, skiing, soccer, rugby and hockey, have lead to more people returning to a sporting lifestyle than ever before. The direct correlation is an increase in injuries and/or need for prevention of injury. With increased proven results utilizing various soft tissue manual therapies, more people are relying on well-trained Clinical Sports Massage Therapists to alleviate and/or prevent injury. There is a large demand for Clinical Sports Massage Therapists in rehabilitation facilities, sports chiropractic offices, onsite sports events, health clubs, and with self-employment. The Clinical Sports Massage Certificate qualifies graduates to apply for the National Certification for Advanced Practice (NCAP) exam. All classes within this curriculum qualify as continuing education for massage therapy.

Program Outcomes
1. Graduates will provide application of manual techniques to positively contribute to the well-being of the client in a safe and skillful manner.
2. Graduates will be prepared to take the national certification exam in massage therapy.
3. Graduates will be prepared for employment in an entry-level capacity.
4. Graduates will be prepared to take the Board Certification through the National Certification Board for Therapeutic Massage and Bodywork (NCTMB).
5. Graduates will be prepared for employment in a sports and rehabilitation environment.

Total Program Credits ............................... 23

Minimum Program Entry Requirements
Completion of a minimum 600 hour massage therapy program that is recognized by the National Certification Board for Therapeutic Massage and Bodywork (NCTMB), Faculty instructor permission required. Contact Jeremy Sartain at 651.846.1619 or email jeremy.sartain@saintpaul.edu. Note that admitted students do not need to be nationally certified but the program previously completed must qualify for national certification.

Degree option may have a greater requirement than this certificate.
Program Requirements Guide 2022-2023

Massage Therapy CERTIFICATE

Program Overview
The Massage Therapy Certificate program meets requirements for National Certification as well as professional membership in American Massage Therapy Association and Associated Bodywork and Massage Professionals.

Massage Therapists manipulate soft tissue structures of the body to prevent and alleviate pain, using techniques such as Swedish Massage, Reflexology, Sports Massage, Neuromuscular Therapy, Myofascial Release, Lymphatic Drainage, Proprioceptive Neuromuscular Facilitation (PNF) and Active Isolated Stretching (AIS) techniques, and Travel Trigger Point Therapy. Graduates of the certificate program integrate manual massage techniques to positively contribute to the well-being of the client in a safe and skillful manner.

Career Opportunities
The employment outlook for massage therapists is projected to be better than average in the upcoming years. The increasing population, increasing personal incomes, longer life spans, and an increasing recognition that massage is beneficial to reduce stress, relieve pain, and improve overall health all contribute to an increased demand for these workers. Factors affecting long term growth include economic well-being and the degree to which insurance companies and HMOs will reimburse for this service. Graduates perform massage therapy in health spas, resorts, health clubs, retirement residences, country clubs, hospitals, chiropractic offices, long-term care facilities, and clinics, or may be self-employed.

Licensing or certification exams are independent of graduation requirements.

Program Outcomes
1. Plan and organize an effective massage and bodywork session.
2. Perform massage therapy and bodywork for therapeutic benefit.
3. Develop and implement a self-care strategy
4. Develop successful and ethical therapeutic relationships with clients.
5. Develop a strategy for a successful practice, business, or employment situation.
6. Identify strategies for professional development.

Program Faculty
Nick Bohrer

Minimum Program Entry Requirements
Students entering this program must meet the following minimum program entry requirements:

Reading: Score of 250+ or grade of “C” or better in READ 0722 or READ 0724 or EAPP 0900
Arithmetic: Score of 200+

Assessment Results and Prerequisites:
Students admitted into Saint Paul College programs may need to complete additional courses based on assessment results and course prerequisite requirements. Certain MATH, READ, and ENGL courses have additional prerequisites.

Degree option may have a greater requirement than this certificate.

Certified by the National Certification Board for Therapeutic Massage & Bodywork (NCBTMB).

Information is subject to change. This Program Requirements Guide is not a contract.

197C
Program Overview
Yoga is recognized by health professionals worldwide as an effective way to increase flexibility, develop strength and reduce stress. This program focuses on four key aspects of yoga: alignment and form of the yoga postures, history and philosophy of yoga, relaxation and meditation, and teaching techniques. This program is recognized by the Yoga Alliance and upon completion qualifies graduates to be 200 hour Registered Yoga Teachers.

Career Opportunities
Yoga instructors are listed under the main category of fitness workers with the Department of Labor. Training for yoga instructors is ever changing. According to the U.S. Department of Labor Statistics, demand for teachers of yoga has grown faster than the ability to train them properly as the interest in yoga exercise has exploded in recent years. Saint Paul College’s program is designed to meet the Yoga Alliance 200 hour standards.

As health clubs strive to provide more personalized service to keep their members motivated, they continue to offer a wide variety of group exercise classes. The aging population, in particular, demand low-impact forms of exercise which yoga provides.

Yoga instructors work in: HMOs in the areas of heart health and pregnancy, wellness centers, studios with massage therapists, fitness centers, educational institutions, conference centers, chiropractic offices, spas, community education, yoga studios and cruise ships.

Program Outcomes
1. Graduates will demonstrate a clear understanding of alignment within the standing poses, seated poses, inversions, backbends, forward bends, twists and arm-balances covered in this class.
2. Graduates will demonstrate coordination of breath and movement and the correct use of the diaphragm in yogic breathing.
3. Graduates will demonstrate an understanding of the scientific evidence behind the effects of stress and relaxation.
4. Graduates will identify the mental, emotional, and physical benefits of a consistent mindfulness/meditation practice.
5. Graduates will demonstrate the ability to plan a sequence of postures to lengthen the spine and open the major joints of the body to support relaxation and healing.
6. Graduates will meet the Yoga Alliance Standards of Yoga Teacher Training.

Program Faculty
Jeremy Sartain
jeremy.sartain@saintpaul.edu

Equipment Needed
Students should expect to bring to class a yoga mat and blanket, yoga strap and blocks if necessary. The blanket is used to sit on and should be a woven serape or a wool yoga blanket.

Program Length
Full-time students can complete the program in one semester.

Part-time Options
For part-time options, discuss with program faculty.

Students admitted into Saint Paul College programs may need to complete additional courses based on assessment results and course prerequisite requirements. Certain MATH, READ, and ENGL courses have additional prerequisites.

373C
Program Overview
Sport and Exercise Sciences Professionals instruct clientele in the betterment of their health through an integrated approach using sound knowledge of appropriate sciences. Functional training techniques, aerobic exercise and advanced stretching modalities (such as Proprioceptive Neuromuscular Facilitation (PNF) and Active Isolated Stretching (AIS)) are implemented appropriately based on initial and continuous feedback and testing. Graduates from the program perform patient assessments and build customized fitness, wellness and nutrition plans for individuals.

Career Opportunities
The US Bureau of Labor and Statistics listed Sport, Exercise and Fitness as one of the top overall job openings requiring Post-Secondary training. Employment is expected to grow by 21 percent from 2014-2024 much faster than average for all occupations. As businesses and insurance organizations continue to recognize the benefits of health and fitness programs for their employees, corporate wellness programs and Sport and Exercise Sciences Professionals instruct clientele in the betterment of their health through an integrated approach using sound knowledge of appropriate sciences. Functional training techniques, aerobic exercise and advanced stretching modalities (such as Proprioceptive Neuromuscular Facilitation (PNF) and Active Isolated Stretching (AIS)) are implemented appropriately based on initial and continuous feedback and testing. Graduates from the program perform patient assessments and build customized fitness, wellness and nutrition plans for individuals.

Program Outcomes
1. Graduates will provide application of Fitness Coaching techniques to positively contribute to the well-being of the client in a safe and skillful manner.
2. Graduates will be prepared to take a national exam for Certification in Personal Training/ Fitness Coaching.
3. Graduates will be prepared to take the National Academy of Sports Medicine (NASM) exam for Corrective Exercise Specialist (CES).
4. Graduates may obtain membership with the National Association of Nutrition Professionals (NANP).
5. Graduates will be prepared to perform Health & Wellness Coaching Services.
6. Graduates will be prepared to take the American Council on Exercise (ACE) exam for Health Coach Certification.

Licensing or certification exams are independent of graduation requirements.

Program Overview

The Associate of Arts (AA) degree is awarded for successful completion of 60 semester credits in liberal arts and sciences and is designed to constitute the first two years of a bachelor’s degree. The AA degree is a liberal arts degree intended primarily for students who plan to transfer to another college or university to complete a bachelor’s degree.

No specific major is listed in conjunction with the degree; however, students may choose to concentrate in a particular field of study in preparation for a planned major or professional emphasis at a four-year college or university.

An AA degree must include the entire Minnesota Transfer Curriculum (40 semester credits), which, pursuant to Minnesota statute, must transfer to any institution in the Minnesota State Colleges and Universities system or the University of Minnesota.

Students are to develop an educational plan in consultation with a Saint Paul College Pathway Advisor to assure that degree requirements are fulfilled. Requirements may vary depending upon the major and transfer college.

The AA degree can be completed through a variety of course delivery methods including face to face, hybrid and/or online. A student may choose to complete the entire AA degree online.

Program Advisors

Pathway Advisors are the Academic Advisors for the Associate of Arts degree and are located in the Advising Center, Room 1340, Main Floor.

For assistance or additional information, please call our Advising Center at 651.846.1739 or email: advising@saintpaul.edu.

Additional Requirements

- At least 60 earned college-level credits (40 MnTC credits and 20 additional MnTC, pre-major or elective credits)
- A grade of “C” or better in ENGL 1711
- Associate of Arts (AA) cumulative GPA of 2.0
- Minnesota Transfer Curriculum (MnTC) cumulative GPA of 2.0
- Meet Saint Paul College residency requirement: 20 credits. This requirement may be reduced to 12 credits with transfer of at least 12 college-level credits from another Minnesota State College and University or the University of Minnesota

Minnesota Transfer Curriculum

Students completing the Minnesota Transfer Curriculum (MnTC) must take courses that satisfy the requirements for each of the 10 Goal Areas.

- A minimum of 40 credits is required.
- Credits are counted only once toward the MnTC 40-credit minimum even though a course may be listed in more than one goal area. Courses designated with a superscript satisfy more than one goal area, i.e., BIOL 172510.
- A discipline is a subject, e.g., “Biology,” “Chemistry,” and “Physics” are three different disciplines.

Check www.transferology.com to determine whether courses transfer as direct equivalents at the institution you plan to attend.

Using the MnTC Curriculum Guide

The MnTC Curriculum Guide is available online at saintpaul.edu/MnTC or you can pick one up in the Advising Center or in Enrollment Services.

On the guide, pay special attention to the following:

- A (p) listed after the course title indicates that a prerequisite is required before the course can be taken.
- An asterisk (*) after the course number indicates the course contains a lab.

Minimum Program Entry Requirements

Students entering this program must meet the following minimum program entry requirements:

- Reading: Score of 250+ or grade of “C” or better in READ 0722 or READ 0724 or EAPP 0900
- Writing: Score of 250+ on Reading Comprehension or grade of “C” or better in ENGL 0922 or EAPP 0900
- Arithmetic: Score of 200+; Visit the Advising Center to determine if transfer programs require college-level math.

Assessment Results and Prerequisites:

Students admitted into Saint Paul College programs may need to complete additional courses based on assessment results and course prerequisite requirements. Certain MATH, READ, and ENGL courses have additional prerequisites.

Information is subject to change. This Program Requirements Guide is not a contract.
Communications Studies Transfer Pathway

Program Overview
The Communication Studies Transfer Pathway provides students with the opportunity to learn how to write strong messages and speak persuasively. Students will also build skills in networking, team building, and conflict management.

Career Opportunities
Students who successfully complete the Communication Studies Transfer Pathway will be prepared to transfer to a baccalaureate program in Professional Communications. With a degree in Communications you can work in a number of fields within the Arts, Audio-Video Technology and Communications sectors such as Communications Director, Customer Relations, Media Relations, Journalism and Sales.

Program Outcomes
1. Apply key concepts and principles of the communication discipline.
2. Apply learned skills in active listening, perception, disclosure and critical thinking.
3. Describe how gender and cultural identity influence communication.
4. Analyze spoken messages and provide feedback.
5. Demonstrate ethical written and oral communication skills.

Transfer Opportunities
Saint Paul College has transfer agreements & partnerships between many post-secondary institutions. For more information please go to saintpaul.edu/transfer.

**Associate of Arts DEGREE**

**History Transfer Pathway**

**Program Overview**

The History Transfer Pathway provides students with the opportunity to study the narrative of past events as they relate to the human race. They use this knowledge to discuss, write, and educate others regarding the interpretation of the past.

**Career Opportunities**

Students who successfully complete the History Transfer Pathway will be prepared to transfer to a baccalaureate program in History. With a degree in History you can work in a number of fields within the government and education systems such as special collections librarians, archivists, museum work, and faculty at secondary and post-secondary institutions. A History degree is also useful preparation for careers in policy studies or the practice of law.

**Program Outcomes**

1. Students will demonstrate a broad understanding of U.S. history and at least one period of world history.
2. Students will make use of historical thinking.
3. Students will analyze historical sources, distinguishing primary from secondary sources.
4. Students will communicate effectively using historical evidence and methods.
5. Students will analyze and understand the diversity of peoples within their distinctive historical contexts.

**Transfer Opportunities**

Saint Paul College has transfer agreements & partnerships between many post-secondary institutions. For more information please go to saintpaul.edu/transfer.

Associate of Arts DEGREE
Political Science Transfer Pathway

Program Overview
The Associate of Arts Degree - Political Science Transfer Pathway provides students with the opportunity to learn both the political science-based interpretation of public policy as well as the integration of other disciplines and fields that directly contribute to the management of public interest.

Career Opportunities
Students who successfully complete the Associate of Arts Degree – Political Science Transfer Pathway will be prepared to transfer to a baccalaureate program in Social Science or Political Science. With a degree in political science you can work in a number of fields within the Government and Public Administration system such as compliance officers, operations managers, political scientists, and public relations specialists.

Program Outcomes
1. Students will describe the methods and concepts used in the field of political science.
2. Students will describe political institutions, theories, and processes.
3. Students will critically analyze political issues.
4. Students will reflect on their own moral and political values.

Transfer Opportunities
Saint Paul College has transfer agreements & partnerships between many post-secondary institutions. For more information please go to saintpaul.edu/Transfer.

Minimum Program Entry Requirements
Students entering this program must meet the following minimum program entry requirements:

Reading: Score of 250+ or grade of “C” or better in READ 0722 or READ 0724 or EAPP 0900
Writing: Score of 250+ on Reading Comprehension or grade of “C” or better in ENGL 0922 or EAPP 0900
Arithmetic: Score of 200+

Assessment Results and Prerequisites:
Students admitted into Saint Paul College programs may need to complete additional courses based on assessment results and course prerequisite requirements. Certain MATH, READ, and ENGL courses have additional prerequisites.
Program Overview
The Sociology Transfer Pathway focuses on the systematic study of human social institutions and social relationships. It includes instruction in social theory, sociological research methods, social organization and structure, social stratification and hierarchies, dynamics of social change, family structures, social deviance and control, and applications to the study of specific social groups, social institutions, and social problems.

Career Opportunities
Students who successfully complete the Sociology Transfer Pathway AA Degree will be prepared to transfer to a baccalaureate program in Sociology. With a degree in Sociology you can work in a number of fields within the government and education systems.

Program Outcomes
1. Identify core sociological concepts.
2. Apply major sociological theories.
3. Use social scientific research methods.
4. Discuss the components of social structure.
5. Communicate sociological concepts orally and in writing.

Transfer Opportunities
Saint Paul College has transfer agreements & partnerships between many post-secondary institutions. For more information please go to saintpaul.edu/Transfer.

Refer to the Minnesota Transfer Curriculum Course List for each Goal Area
☐ Goal 1: Communication ............................. 9
☐ ENGL 1711 Composition 1 – 4 cr
☐ ENGL 1712 Composition 2 – 2 cr
☐ COMM 17XX – 3 cr
☐ Goal 2: Critical Thinking
Fulfilled when 10 goal areas (40 credits) are completed.
☐ Goal 3: Natural Science .......................... 7
☐ Two courses from two different disciplines, one of which must be a lab course.
☐ Goal 4: Mathematical/Logical Reasoning ......... 3
☐ One course numbered between 1700-1799 or 2700-2799.
☐ Goal 5: History, Social Sciences and Behavioral Sciences ............................ 9
☐ Three courses from two different disciplines.
☐ Emphasis courses SOCI 1710 - 4 cr and SOCI 1730 - 3 cr will count toward Goal 5.
☐ One additional non-SOCl course is required.
☐ Goal 6: Humanities & Fine Arts .................... 9
☐ Three courses from two different disciplines.
☐ Select courses to meet all 10 Goal Areas
MnTC Requirements Total ......................... 40

Total Program Credits .............................. 60

If courses are counted in both the Pathway Requirements and the MnTC Requirements students may need to complete additional classes to reach the 60 credit total.

Program Advisors
Pathway Advisors are the Academic Advisors for the Associate of Arts degree and are located in the Advising Center, Room 1340, Main Floor. For assistance or additional information, please call our Advising Center at 651.846.1739 or email: advising@saintpaul.edu

Additional Requirements
• At least 60 earned college-level credits (40 MnTC credits and 20 additional MnTC, pre-major or elective credits)
• A grade of “C” or better in ENGL 1711
• Associate of Arts (AA) cumulative GPA of 2.0
• Minnesota Transfer Curriculum (MnTC) cumulative GPA of 2.0
• Meet Saint Paul College residency requirement: 20 credits. This requirement may be reduced to 12 credits with transfer of at least 12 college-level credits from another Minnesota State College and University or the University of Minnesota.

Program Start Dates
Fall, Spring, Summer

Course Sequence
Students are allowed to take the courses in any sequence. However, all course prerequisites need to be followed. For specific suggestions, please speak with a Pathway Advisor or one of the program faculty. Students should consult with the Program Advisor each semester. Not all courses are offered each semester; a selection of courses is offered summer term.
Program Requirements Guide 2022-2023

Associate of Arts DEGREE
Spanish Transfer Pathway

Program Overview
The Spanish Transfer Pathway focuses on the Spanish language and related dialects. It includes instruction in philology, Modern Castillian, Latin American and regional Spanish dialects, and applications in business, science/technology, and other settings.

Career Opportunities
After completing four Spanish course semesters at Saint Paul College students will be well prepared to continue with a major or minor in Spanish at the college level and/or a certification program. With a degree in Spanish one can work in a number of fields within the government and education systems.

Program Outcomes
1. Demonstrate intermediate-level writing proficiency including grammar structure, tense, mood and syntax as defined by the American Council on the Teaching of Foreign Languages guidelines.
2. Demonstrate intermediate-level reading comprehension in the Spanish language as defined by the American Council on the Teaching of Foreign Languages guidelines.
4. Compare and contrast U.S. culture and that of the Spanish speaking world.
5. Demonstrate culturally appropriate behavior in specific situations.

Transfer Opportunities
Saint Paul College has transfer agreements & partnerships between many post-secondary institutions. For more information please go to saintpaul.edu/Transfer.

Saint Paul College—A Community & Technical College • 2022–2023 Catalog 135
Program Requirements Guide 2022-2023

Associate of Fine Arts DEGREE
Music

Program Overview
The Associate of Fine Arts in Music provides students with the educational foundation needed to transfer to a four-year music program. The program will offer music theory and music history as well as develop performance skills.

Career Opportunities
Students who successfully complete the Associate of Fine Arts in Music Degree will be prepared to transfer to a baccalaureate program in Music. With a degree in music you can pursue careers as college or high school music teachers, music directors and composers, or musicians and singers.

Program Outcomes
1. Graduates will perform in solo and ensemble settings on a primary instrument or voice.
2. Graduates will analyze elements of music theory.
3. Graduates will apply music theory skills via sight-singing and aural skills.
4. Graduates will demonstrate proficiency in keyboard skills.
5. Graduates will distinguish music by time periods, historical figures, styles, and genres in the Western Art tradition.
6. Graduates will apply technology-based skills on platforms currently used in the music industry.

Transfer Opportunities
Saint Paul College has transfer agreements & partnerships between many post-secondary institutions. For more information please go to saintpaul.edu/Transfer.

Associate of Science  
Criminal Justice Transfer Pathway

**Program Overview**
The Criminal Justice Transfer Pathway provides students the opportunity to study specific types of crime, the theories of crime and punishment, the psychological and social origins of criminal behavior, and social value systems. Students will also examine criminal law and criminal justice systems, penology, rehabilitation, recidivism, social attitudes concerning crime and the justice system, and criminal justice policy.

**Career Opportunities**
Students who successfully complete the Criminal Justice Transfer Pathway will be prepared to transfer to a baccalaureate program in Criminal Justice. With a degree in criminal justice, you can work in a number of careers fields within the justice system such as court administrators, social workers, parole officers, correctional officers and management positions.

**Program Outcomes**
1. Differentiate law enforcement, courts, and corrections components of the U.S. criminal justice system.
2. Apply criminological theory to contemporary problems and issues.
3. Analyze the importance of diversity with regard to people, cultures, and roles in the criminal justice system.
4. Use a variety of criminological sources.
5. Communicate about diverse issues in the criminal justice system.

**Transfer Opportunities**
Saint Paul College has transfer agreements & partnerships between many post-secondary institutions. For more information please go to saintpaul.edu/Transfer.

- At least 60 earned college-level credits (40 MnTC credits and 20 additional MnTC, pre-major or elective credits)
- A grade of “C” or better in ENGL 1711
- Associate of Science (AS) cumulative GPA of 2.0
- Minnesota Transfer Curriculum (MnTC) cumulative GPA of 2.0
- Meet Saint Paul College residency requirement: 20 credits. This requirement may be reduced to 12 credits with transfer of at least 12 college-level credits from another Minnesota State College and University or the University of Minnesota.

**Program Start Dates**
Fall, Spring, Summer
Program Overview
The American Sign Language Studies Certificate Program provides students with the knowledge and skills of American Sign Language (ASL), focusing on the uniqueness of ASL as a language, Deaf Culture and Deaf History. The program encourages students to become involved in the social and cultural activities of the Deaf Community. The curriculum provides a solid and basic foundation for entry into a career in a deafness-related field and prepares students for continued educational studies in a variety of disciplines. It is a pathway to entering the Sign Language Interpreter/Transliterator Program at Saint Paul College or similar programs at other institutions. Individuals who intend to, or currently work with Deaf and/or Hard-of-Hearing individuals in fields such as education, human/ social services, community service agencies, and vocational rehabilitation benefit from the opportunity to learn and develop stronger skills in American Sign Language.

It is necessary for students in the American Sign Language Studies Program to be able to process auditory and visual information.

Career Opportunities
Completion of the American Sign Language Studies Certificate:

- Enhances the ability to work and communicate more effectively with Deaf and Hard-of-Hearing people in academic, agency, and business settings.
- Provides opportunities to enhance ASL fluency and acquire Deaf Culture knowledge which is applicable to a variety of educational disciplines.
- Prepares students to meet the ASL prerequisites for the Sign Language Interpreter/Transliterator Program.
- Enhances American Sign Language fluency for potential or current teachers of Deaf and Hard-of-Hearing students.

Program Outcomes
1. Graduates will be prepared to meet the ASL prerequisites for the Sign Language Interpreter/Transliterator Program.
2. Graduates will develop ASL skills and Deaf Culture awareness to more effectively communicate with Deaf and Hard-of-Hearing people in a variety of settings.
3. Graduates will meet world language requirements at the high school and college/university level.
4. Graduates will be prepared to take an American Sign Language Proficiency Interview and to meet K-12 Skill Levels.
5. Graduates will meet entrance requirements for undergraduate or graduate programs in ASL Studies, Linguistics, and Deaf Education.

Program Faculty
Rania Johnson
rania.johnson@saintpaul.edu
Molly Peters
molly.peters@saintpaul.edu

Part-time/Full-time Options
Part-time and full-time options are available.

Sign Language Interpreter/Transliterator Program
Students planning to enroll in the Sign Language Interpreter/Transliterator Program after completing this certificate program must meet the program standards and complete the Application to Sign Language Interpreter/Transliterator AAS Degree Major form to apply for admission.

In the Sign Language Interpreter/Transliterator Program, it is necessary for students to be able to process auditory and visual information.

College Credit by Exam/Test-out
If a student has successfully completed a Saint Paul College Credit by Exam/Test-Out of ASLS 1411 American Sign Language 1 and/or ASLS 1412 American Sign Language 2, then ASLS 1415 American Sign Language 5 is strongly recommended. Students who have not had recent ASL courses (within the past 24 months) at date of application will need to refresh their skills by repeating their last ASL course.

Credits by Exam/Test-Outs are not transferable from other educational institutions.

Guidelines for Placement in ASL

Courses at Saint Paul College

Students with no or little background in ASL
If you have little or no background in ASL you should register for ASLS 1411 American Sign Language 1, which is the first course in our ASL language sequence.

Students with college-level study of ASL
If you have taken ASL courses at another higher education institution, you should have your transcripts evaluated in order to determine appropriate placement.

Students with high school study of ASL
If you have studied ASL for one year or less in high school, enroll in ASLS 1411 American Sign Language 1.

If you have studied ASL for two or more years in high school and can answer “yes” to three or more of the following questions, then you may take a test out on SPC campus.

1. Did you study ASL during your junior AND senior years of high school?
2. Did you graduate from high school during the past two years?
3. Did your teacher use ASL without voice in class?
4. Is ASL your primary language?

For-credit course placement Test Out:
Students may take a test out at their own expense to determine whether they have the linguistic proficiency necessary to enroll in our second, third, or fourth semester ASL courses. Students passing this test out will receive college-level credit, but will not receive a letter grade. For more information about this test, see the American Sign Language Studies page on the college website.

Students passing this test out will receive college-level credit, but will not receive a letter grade. For more information about this test, see the American Sign Language Studies page on the college website.

Non-credit course placement
Sign Language Proficiency Interview (SLPI):
This exam has a fee and a documentation of SLPI rating will be required for non-credit placement. Students scoring advanced/advanced plus on the SLPI evaluation will be allowed to register for ASLS 1414 (ASL 4).

Students scoring intermediate plus on the SLPI evaluation will be allowed to register for ASLS 1413 (ASL 3).

For more information on how to take SLPI go to http://www.msad.state.mn.us/Staff/SLPI%20Registration%20Form%202014-2015.pdf.
This is not associated with Saint Paul College.

These guidelines are subject to change. Please, make sure you are following the most current version.
Overview
The English for Academic Purposes (EAP) Program is designed to help English learners enter and succeed in the community and technical college system as well as in the transfer curriculum.

EAPP courses focus on speaking and listening, reading and vocabulary, writing and grammar, and pronunciation.

Depending on their intended major, students completing the EAPP courses may begin one of the career and technical programs or enroll in general education courses.

Outcomes
1. Apply the rules of English grammar and pronunciation to college communication.
2. Read college level texts.
3. Comprehend college level lectures.

Communications

English Overview

The English and Communications faculty are dedicated to helping students apply the knowledge and skills gained through the study of writing and literature to successfully communicate in work and life roles. Two levels of developmental writing courses are available. The department offers a wide selection of transferable general education courses including Composition 1 and 2 and literature courses including the Survey of American Literature, The English Novel, Native American and African American Literature, an Introduction to Poetry and others. Students planning to transfer to a four-year degree generally enroll in Composition courses and one or two related electives as they fulfill requirements for the Associate of Arts, Associate of Science and Associate of Applied Science degrees.

Reading Overview

The Reading faculty are dedicated to helping students become proficient and successful readers so they may apply this knowledge to meet the demands of their content-area and program specific reading assignments and their future careers. College reading involves a variety of skills and strategies used together to gain meaning from academic or technical text; it requires critical thinking, draws on background knowledge of a variety of topics, and makes use of a large vocabulary.

Communication Overview

Rhetoric is where the study of Communication began. By definition, rhetoric refers to oratory or persuasive speaking. The Communication faculty promotes the study and application of human communication and mass communication concepts and skills for work and life roles. Students enroll in Communication courses to fulfill Minnesota Transfer Curriculum requirements and graduation requirements.

English for Academic Purposes (EAP) Overview

The English for Academic Purposes (EAP) Program is designed to help English learners enter and succeed in the community and technical college system as well as in the transfer curriculum. Courses in the EAP Program focus on speaking and listening, reading and vocabulary, writing and grammar, and pronunciation. Students must complete or test out of High Intermediate and Advanced level courses in the EAP Program. Third semester options depend on a student’s major and language ability. Some students may enroll in an English-EAPP Learning Community (LOCM), others may take READ 0722: Reading 2 and ENGL 0922: Fundamentals of Writing 2, and some may begin a career or technical program. Students will work with EAP Program Faculty and Advisors to choose the courses that best fit their needs and major requirements.

Fine Arts/Humanities

Art Overview

Art courses are designed to provide the highest quality coursework for students majoring in art as well as students who are interested in exploring their creative expression through the creation of artwork in a studio class or the study of art in a historical context. Our art coursework provides students with a richer understanding of the world and themselves. The instructors are committed to excellence in teaching and scholarship. The fine arts department offers a large variety of studio and art history coursework that transfers towards a major in art or art history at a four-year institution. Students who plan on majoring in art at a four-year institution should include art history, studio art and humanities coursework in order to be prepared for upper division work in whatever area of art they may choose to pursue. Art and art history classes fulfill requirements for the Minnesota Transfer Curriculum, as well as graduation requirements.

Humanities Overview

Humanities courses promote the study of cultural developments. Students gain an increased understanding of the world they live in, how it came to be as it is, and what their place is in it. Students will be asked to consider how they can apply what they have learned about what has come before to what might occur in the future. Humanities is an interdisciplinary subject in that it is an exploration of the influence particular fields have on each other; for example, the influence of political movements on visual art, or the influence of religion on poetry of the same period. Fields included in the Humanities are: art, architecture, history, literature, philosophy, religion, politics, law, music, drama and language. Students are encouraged to make comparisons between different fields and different time periods and to consider the significance of similarities and differences. Humanities courses fulfill Minnesota Transfer Curriculum requirements and graduation requirements.

Philosophy Overview

Philosophy, literally, is the love of wisdom. It is the search for truth and the asking of fundamental questions about our existence and relationship with the world and interaction with others. Philosophy includes the study of arguments, and the providing of evidence and reasons for making particular claims. The practice of philosophy teaches critical thinking and careful reflection; all courses encourage students to formulate pertinent questions and examine and create arguments. It is hoped that students will continue to use careful reasoning skills honed in philosophy classes as they continue in their education and in life. Areas of concentration within philosophy include logic, ethics, religion and the theory of knowledge. Philosophy is helpful for careers in law, teaching, business, medicine and many other fields. Philosophy courses fulfill a number of requirements for the Minnesota Transfer Curriculum and graduation requirements.

Global Languages

American Sign Language (ASL) Overview

The American Sign Language (ASL) courses are central to the 30-credit American Sign Language Studies Certificate program which provides students with the knowledge and skills of American Sign Language (ASL), focusing on the uniqueness of ASL as a language, Deaf Culture and Deaf History. If you are interested in the American Sign Language Studies Certificate program, please see the Program Requirements Guide in the Liberal Arts Program section.

Not all ASL courses meet the MnTC goals. Students may reference the course descriptions to see if a course meets Minnesota Transfer Curriculum goals.

Course Cr
ASLS 1411 American Sign Language 1  3
ASLS 1412 American Sign Language 2    3
ASLS 1413* American Sign Language 3 3

Chinese Overview

Chinese language courses are designed to develop a basic competency in Chinese speaking, listening, reading, and writing; an appreciation for cultural diversity; and the application of conversational Chinese to work and life roles. Students with two-years of high school Chinese are generally prepared for beginning courses while students with three to four years of high school Chinese are generally ready to enter intermediate courses. Students who enroll in Chinese courses fulfill the Minnesota Transfer Curriculum requirements as well as graduation requirements.

Guidelines for Placement in Chinese Courses

Students with little or no background in Chinese

If you have little or no background in Chinese, you should register for CHIN 1710 Beginning Chinese 1, which is the first course in our Chinese language sequence.

Students with college-level study of Chinese

If you have taken Chinese courses at another higher education institution, you should have your transcripts evaluated in order to determine appropriate placement.

Students with high school level study of Chinese

If you have studied Chinese for one year or less in high school, enroll in CHIN 1710 Beginning Chinese 1.

If you have studied Chinese for two or more years in high school and can answer “yes” to three or more of the following questions, then you should make an appointment with the Chinese language instructor to determine your placement.

1. Did you study Chinese during your junior AND senior years of high school?
2. Did you graduate from high school during the past two years?
3. Did your teacher speak Chinese to you in class?
4. Did you complete written homework and written compositions in Chinese on a regular basis?

Somali Overview

Somali language courses are designed to develop a basic competency in Somali speaking, listening, reading, and writing; an appreciation for cultural diversity; and the application of conversational Somali to work and life roles. Students who enroll in Somali courses fulfill the Minnesota Transfer Curriculum requirements as well as graduation requirements.

Spanish Overview

Spanish courses are designed to develop proficiency in Spanish speaking, listening, reading, and writing; an appreciation for cultural diversity; and the application of conversational Spanish to work and life roles. Beginning and Intermediate-level courses are offered. Students with two-years of high school Spanish are generally prepared for beginning courses while students with three to four years of high school Spanish are generally ready to enter intermediate courses. Students who enroll in Spanish courses fulfill the Minnesota Transfer Curriculum requirements as well as graduation requirements.

Guidelines for Placement in Spanish Courses

Students with little or no background in Spanish

If you have little or no background in Spanish, you should register for SPAN 1710 Beginning Spanish 1, which is the first course in our Spanish language sequence.

Students with college-level study of Spanish

If you have taken Spanish courses at another higher education institution, you should have your transcripts evaluated in order to determine appropriate placement.

Students with high school level study of Spanish

If you have studied Spanish for one year or less in high school, enroll in SPAN 1710 Beginning Spanish 1.

If you have studied Spanish for two or more years in high school and can answer “yes” to three or more of the following questions, then you may take a placement exam.

1. Did you study Spanish during your junior AND senior years of high school?
2. Did you graduate from high school during the past two years?
3. Did your teacher speak Spanish to you in class?
4. Did you complete written homework and written compositions in Spanish on a regular basis?

Non-credit placement:

Students can determine whether they have the linguistic proficiency to enroll in our second, third, or fourth semester Spanish courses by contacting the instructor of the course in which they wish to enroll. Instructors at Saint Paul College have several years of experience to determine a beneficial level for the student.
For-credit placement: College-Level Examination Program (CLEP):
This exam has a fee and you can earn college-level credit provided you achieve a certain level of proficiency. Students scoring 50 or above on the CLEP can get 6 credits of electives. Students scoring 66 or above can get credit for SPAN 1710 and SPAN 1720. For more information on how to take the CLEP exam go to saintpaul.edu/CLEP.

Placement and credit recommendation based on CLEP scores:

### Economics Overview

Economics is a social science that studies how our society can achieve economic goals. These goals are divided into two main areas of macroeconomics and microeconomics. Goals in macroeconomics are full employment, price stability, and economic growth. Macroeconomics uses theoretical tools, historical perspective, and modeling to understand the development and functioning of macroeconomic policy. Macroeconomics explores how policy advocated by economists and political advisors is implemented and with what degrees of success. Microeconomics analyzes the economic decisions made by individual firms, organizations, and people. Microeconomic goals are maximizing individual and societies benefits using limited resources. Microeconomics uses modeling to understand how and why our resource markets work and provides insights into policies that make them more efficient. Studying economics helps students in many fields by providing a framework on which to analyze changes that are affecting our collective future.

### Geography Overview

Geography studies places and human activities across the earth. Geographers often ask where? and why? The field focuses on the distribution and changes in the location of ethnicities, resources, transportation, land use, industries, climate, physical land formations, etc. Many geography courses have both physical environment and human/cultural components. The geography faculty often have a global and interdisciplinary approach. Geography courses fulfill a number of requirements for the Minnesota Transfer Curriculum, Education majors, Social Science disciplines, and government and international careers. Special topics and field study courses are added occasionally.

### Anthropology Overview

The Anthropology department offers courses that cover human nature and society in a global context. Students are exposed to the biological and cultural evolution of our species and the cultural worlds past, present and future. Forces that have shaped us and that we continuously shape are discussed within local, national and global perspectives. Students are encouraged to critically assess as well as celebrate the cultural diversity of our world. Anthropology courses fulfill Minnesota Transfer Curriculum requirements and graduation requirements.

History Overview

The History department promotes the study, teaching and analysis of historical developments which have created our present world. The historical past is studied so that students can better fulfill their work and life roles. The department offers survey courses in American history and the history of world civilizations; however, students are not required to take these survey courses in chronological order. Students who plan to major in History at a four-year institution are encouraged to take both the American and world history survey courses in order to be well-prepared for upper division coursework. History courses fulfill a number of requirements for the Minnesota Transfer Curriculum, as well as graduation requirements.

Psychology Overview

Psychology is the scientific inquiry into human behavior and mental processes explaining the complexity of issues from both an environmental and biological perspective. Courses are offered that provide a foundation in core psychological areas. Students enroll in psychology to obtain a better understanding of human behavior in a variety of settings as well as for relevant preparation for nursing, business and other fields. Psychology courses fulfill the Minnesota Transfer Curriculum requirements and graduation requirements.

Sociology Overview

Sociology faculty strive to promote social awareness, active citizenship and critical thinking within and beyond our own culture. Courses are designed to emphasize the importance of the sociological perspective in work and life roles in a global world. Many students take sociology courses to develop personal skills and to learn about other cultures and societies, and to fulfill Minnesota Transfer Curriculum requirements and graduation requirements.

Political Science Overview

Political science is one of the most popular undergraduate majors preparing students for a wide variety of careers. It is also one of the most popular majors for those planning to attend law school. The political science faculty seeks to prepare students for advanced study by providing introductions to major areas of the discipline. Additionally, the faculty aims to prepare students for active and thoughtful citizenship.

Women’s and Gender Studies Overview

The Women’s and Gender Studies course and related coursework emphasizes collaborative learning across academic disciplines with a focus on women and gender relationships. Several courses in the Liberal Arts and Sciences include an emphasis on gender analysis that links the content. Students are encouraged to contact the Pathway Advisor for information on four-year colleges and universities that offer a major or minor in Women’s and Gender Studies. Students enroll in Women’s and Gender Studies and related courses to fulfill Minnesota Transfer Curriculum requirements as well as graduation requirements.

**Program Overview**
This program is designed to prepare individuals for employment as a teacher in a variety of early childhood settings. Students will learn how to promote and communicate knowledge of child development; create healthy, respectful and challenging learning environments; create and maintain respectful and supportive relationships with children, families, staff, and community members; use observation skills to enhance teaching; and design and implement developmentally and culturally appropriate activities and curriculum. Lab and Practicum opportunities are provided which allow students to apply their skills and knowledge in a practical experience. All students must meet all reading and writing program entry requirements prior to entering courses beyond the Certificate.

Students must have a high school diploma, or GED, and pass a criminal background study. Respect for cultural differences is essential. Good judgment and absolute integrity are also necessary for success in the field of child development.

**Career Opportunities**
Graduates of the Child Development AAS program will qualify to teach at a child care center, preschool program, before/after-school program, a family child care home or nanny, as well as a Lead Teacher in a Head Start program, a teacher assistant or education assistant (paraprofessional) in the public schools, Early Childhood Family Education, Early Childhood Special Education, or Child Life Assistant (in a hospital setting). The AAS degree meets Minnesota Department of Human Services educational requirements for Child Life Assistant (in a hospital setting). The demand for trained child care providers. The demand for trained child development professionals continues to increase as more parents seek quality care and educational programs for their children. Our job placement rate is well over 95% and the Bureau of Labor Statistics estimates that the employment outlook will grow faster than average through 2026.

**Program Outcomes**
1. Graduates will demonstrate knowledge of child safety, health, and nutrition.
2. Graduates will demonstrate knowledge on the principles of child development and developmentally appropriate practices.
3. Graduates will demonstrate knowledge and skills in positive child guidance techniques.
4. Graduates will demonstrate knowledge and skills in positive family, community, and staff relations.
5. Graduates will demonstrate the knowledge and skills in developing and implementing early childhood curriculum.
6. Graduates will have hands-on training in a variety of Child Development settings.
7. Graduates will possess the knowledge and skills for immediate employment in the Child Development field.

**Program Faculty**
Students should consult with the Program Faculty each semester.

## Transfer Opportunities

Saint Paul College has transfer agreements & partnerships between many post-secondary institutions. For more information please go to saintpaul.edu/Transfer.
Program Overview
This program is intended primarily for students who plan to transfer to another college or university to complete a bachelor's degree in Early Childhood or related field. Students will learn about child development, guidance, health and safety, cultural sensitivity, and professional relations, as well as liberal arts education. Lab and Practicum opportunities are provided which allow students to apply their skills and knowledge in a practical experience. All students must meet all reading and writing program entry requirements prior to entering courses beyond the Certificate.

Students must have a high school diploma, or GED, and pass a criminal background study. Respect for cultural differences is essential. Good judgment and absolute integrity are also necessary for success in the field of child development.

Career Opportunities
Graduates of the Child Development Careers ASL AS Degree program may seek further education to earn a degree in early childhood education, early childhood special education, child development and family studies, psychology, or social work, but will also qualify to work at a child care center or preschool program, a family child care home or nanny, as well as a teacher in a Head Start program, a teacher assistant or education assistant in the public schools, Early Childhood Family Education, Early Childhood Special Education, or Child Life Assistant (working with children in a hospital setting).

Since this degree has a focus on using ASL in an early childhood setting, it increases employability for our graduates. If students go on for more education, the career opportunities (and pay scale) also increase. The demand for trained child development professionals continues to increase as more parents seek quality care and educational programs for their children. Our job placement rate is well over 95% and the Bureau of Labor Statistics estimates that the employment outlook will grow faster than average through 2026.

Program Outcomes
1. Graduates will demonstrate knowledge of child safety, health and nutrition.
2. Graduates will demonstrate knowledge in the fundamental principles of child development and developmentally appropriate practices.
3. Graduates will demonstrate knowledge and skills in positive child guidance techniques.
4. Graduates will demonstrate the knowledge and skills in positive family, community, and staff relations.
5. Graduates will demonstrate the knowledge and skills in developing and implementing early childhood curriculum.
6. Graduates will have hands-on training in a variety of Child Development settings.
7. Graduates will possess the knowledge and skills for immediate employment in the Child Development field.
8. Graduates will have successfully mastered the general education program requirements for work and life roles.

Program Faculty
Students should consult with the Program Faculty each semester.

Transfer Opportunities
Saint Paul College has transfer agreements & partnerships between many post-secondary institutions. For more information please go to saintpaul.edu/Transfer.
This program is designed to prepare individuals for employment in entry-level early childhood education positions. Students will learn about child development, guidance, health and safety, professional relations, and strategies for promoting learning in young children. Lab and practicum opportunities are provided which allow students to apply their skills and knowledge in a practical experience. All students must meet all reading and writing program entry requirements prior to entering courses beyond the Certificate.

Students must have a high school diploma or GED and pass a criminal background study. Respect for cultural differences is essential. Good judgment and absolute integrity are also necessary for success in the field of child development.

Career Opportunities
Graduates of the Child Development Diploma program will qualify to work at a child care center, preschool program, before/after-school program, a family child care home or nanny. This diploma meets Minnesota Department of Human Services educational requirements for child care providers. The demand for trained child development professionals continues to increase as more and more parents seek quality care and educational programs for their children. Our job placement rate is well over 95% and the Bureau of Labor Statistics estimates that the employment outlook will grow faster than average through 2026.

Program Outcomes
1. Graduates will demonstrate knowledge of child safety, health and nutrition.
2. Graduates will demonstrate knowledge in the fundamental principles of child development and developmentally appropriate practices.
3. Graduates will demonstrate knowledge and skills in positive child guidance techniques.
4. Graduates will demonstrate the knowledge and skills in positive family, community, and staff relations.
5. Graduates will demonstrate the knowledge and skills in developing and implementing early childhood curriculum.

Program Faculty
Students should consult with the Program Faculty each semester.

Child Development Careers CERTIFICATE

Program Overview
This program is designed to give students an introduction to the field of Early Childhood Education and the variety of possible career opportunities. Each of our other programs begin with the Certificate-level courses. Students will learn about child development, guidance, health and safety, professional relations, and strategies for promoting learning in young children.

Students must have a high school diploma, or GED, and pass a criminal background study. Respect for cultural differences is essential. Good judgment and absolute integrity are also necessary for success in the field of child development.

Career Opportunities
Graduates of the Child Development Certificate program will qualify to work at a child care center, preschool program, before/after-school program, a family child care home or nanny. This certificate meets Minnesota Department of Human Services educational requirements for child care provider. The demand for trained child development professionals continues to increase as more and more parents seek quality care and educational programs for their children. Our job placement rate is well over 95% and the Bureau of Labor Statistics estimates that the employment outlook will grow faster than average through 2026.

Program Outcomes
1. Graduates will demonstrate knowledge of child safety, health and nutrition.
2. Graduates will demonstrate knowledge in the fundamental principles of child development and developmentally appropriate practices.
3. Graduates will demonstrate knowledge and skills in positive child guidance techniques.
4. Graduates will demonstrate the knowledge and skills in positive family, community, and staff relations.

Program Faculty
Students should consult with the Program Faculty each semester.

Minimum Program Entry Requirements
Students entering this program must meet the following minimum program entry requirements:

Reading: Score of 240+ on Reading Comprehension or grade of “C” or better in READ 0721 or READ 0724 or EAPP 0860

Arithmetic: Score of 225+

Assessment Results and Prerequisites:
Students admitted into Saint Paul College programs may need to complete additional courses based on assessment results and course prerequisite requirements. Certain MATH, READ, and ENGL courses have additional prerequisites.
Program Overview
This program is intended primarily for students who plan to transfer to another college or university to complete a bachelor’s degree in Early Childhood or related field. It also prepares individuals for employment as a Teacher in a variety of early childhood settings. Students will learn about child development, guidance, health and safety, cultural sensitivity, professional relations, and curriculum planning, as well as liberal arts education. Internship opportunities are provided which allow students to apply their skills and knowledge in a practical experience. All students must meet all reading and writing program entry requirements prior to entering courses beyond the Certificate. Students must have a high school diploma, or GED, and pass a criminal background study. Respect for cultural differences is essential. Good judgment and absolute integrity are also necessary for success in the field of child development.

Career Opportunities
Graduates of the Child Development AS program may seek further education to earn a degree in early childhood education, early childhood special education, child development and family studies, psychology, or social work, but will also qualify to work at a child care center or preschool program, a family child care home or nanny, as well as a teacher in a Head Start program, a teacher assistant or education assistant in the public schools, Early Childhood Family Education, Early Childhood Special Education, or Child Life Assistant (hospital setting). If students go on for more education, the career opportunities (and pay scale) continue to increase.

The demand for trained child development professionals is increasing as more parents seek quality care and educational programs for their children. Our job placement rate is well over 95% and the Bureau of Labor Statistics estimates that the employment outlook will grow faster than average through 2026.

Program Outcomes
1. Create appropriate learning environments for each child.
2. Demonstrate effective collaboration to support families.
3. Utilize authentic assessment tools and approaches to support young children, families and inform practice.
4. Apply evidence-based, developmentally effective strategies to positively influence children’s behavior and learning.
5. Plan and implement developmentally effective curriculum to address developmental and learning outcomes of young children.
6. Comply with professional standards related to early childhood education.
7. Teach effectively in a variety of early care and education settings.

Transfer Opportunities
Saint Paul College has transfer agreements & partnerships between many post-secondary institutions. For more information please go to saintpaul.edu/Transfer.
Program Overview
The Cosmetology AAS degree meets the requirements for licensure by the Minnesota Board of Cosmetologist Examiners and provides transferrable credits towards a two- or four-year degree in liberal arts and sciences.

Cosmetology services include the cleaning, conditioning, shaping, reinforcing, coloring and enhancing of the body surface in the areas of head, scalp, face, arms, hands, legs and feet. Science courses provide a good background for the skills taught in hair analysis and treatment. Physical requirements include finger dexterity, negative allergic reaction to cosmetic preparations and artistic flair for creative design. The professional cosmetologist should enjoy working with the public and in a team atmosphere. People skills and time management skills are essential.

Licensing or certification exams are independent of graduation requirements.

Career Opportunities
The job outlook is good for cosmetologists, estheticians and nail technicians. Increasing population, incomes, and demand for cosmetology services will stimulate job growth. In addition, numerous job openings will stem from rapid turnover in salons and the large size of the occupation. The rapid growth of nail salons and full-service spas will generate numerous job openings for cosmetologists skilled in hair, skin, and nails.

After cosmetology students complete 1550 hours of skills and theory training and pass the written exam given through the State designated testing service and skills certification, they are eligible for licensure through the Minnesota Board of Cosmetologist Examiners. Cosmetologists work in a variety of settings including beauty salons and full-service spas.

Program Outcomes
1. Graduates will perform basic skin services including skin analysis, facials, makeup application, and hair removal.
2. Graduates will perform haircare services on all hair types including hair analysis, cutting, styling, coloring and lightening, permanent waving, and chemical relaxing.
3. Graduates will perform natural and artificial nail services including manicuring, pedicuring, acrylic, and sculptured nails.
4. Graduates will demonstrate customer service skills, self-growth and personal development.

Program Faculty
Marcie Smith-Fields
marcie.smith-fields@saintpaul.edu

Full-time
Students attend full-time and can complete the program in four semesters.

Licensure
This program meets Minnesota Board of Cosmetologist Examiners requirements.

Textbook and Supply Costs
Students should expect to spend approximately $3,700.00 for cosmetology kits, supplies, and books. This cost is in addition to tuition and fees.

Program Requirements
☐ Check off when completed
☐ Required Program Orientation. All Cosmetology, Esthetics and Nail Technician applicants must attend a program orientation prior to enrollment as a full-time student. Please call the Clinic receptionist at 651.846.1329 to reserve your space at a orientation.

Additional Requirements
Be prepared to purchase student cosmetology kits the first day of class from the book store. Financial aid must have been completed.

All books MUST be purchased before classes begin.

Cosmetology Student Handbook/Agreement Form
All new and returning students will need to access D2L Brightspace PRIOR to the first day of classes to read the Cosmetology student handbook. After you have read the handbook, you must print and sign Student Agreement Form, Hepatitis B Vaccination/Declination Form and Rollabout Form and return them to your instructor on the first day of class before you will be admitted to class. You will need to perform this task prior to the first day of each semester.

Please direct questions to the assigned instructor of your first class.

Course Sequence
The course sequence listed on the back of this guide is recommended for a full-time student; however, this sequence is not required. Contact Program Faculty with questions.

See back of this guide for Program Start Dates, Course Sequence & Transfer Opportunities

Nail Care and Eyelash Extensions Technician CERTIFICATE

Program Overview
Nail Technician services include the cleaning, shaping, conditioning and care for the fingers, hands, toes and feet as well as the preparation and application of artificial nails.

Eyelash extensions will cover theoretical instruction and the practical application of eyelash extensions.

Physical requirements include finger dexterity, negative allergic reaction to cosmetic preparations, and artistic flair for creative design. The nail technician should enjoy working with the public and in a team atmosphere. People skills and time management skills are essential.

Licensing or certification exams are independent of graduation requirements.

Career Opportunities
The job outlook is very good for nail technicians. Increasing population, incomes, and demand for cosmetology services will stimulate job growth. In addition, numerous job openings will stem from rapid turnover in salons and the large size of the occupation. The rapid growth of nail salons and full service spas will generate numerous job openings for nail technicians.

After Nail Care Technician students complete 350 hours of skill training and pass the written exam given through the State designated testing service, and skills certification they are eligible for licensure from the Minnesota Board of Cosmetologist Examiners. Nail technicians work in beauty salons, nail salons and spas.

Program Outcomes
1. Graduates will be prepared to perform natural nail services including manicuring and pedicuring.
2. Graduates will be prepared to perform the application and removal of eyelash extensions.
3. Graduates will be prepared to perform touch-up eyelash extensions applications.
4. Graduates will have knowledge of decontamination and sanitation procedures used for the protection of the client and the operator.
5. Graduates will be prepared to perform artificial services including tips, acrylic and free-forms.

Program Faculty

for Cosmetology/Nail Technician Majors ............ 2

Total Semester Credits .................................. 16

Total Program Credits .................................. 16

Additional Requirements
Be prepared to purchase kits the first day of class from the book store with the instructor.

Program is not eligible for financial aid.

All books MUST be purchased before classes begin.

Cosmetology Student Handbook/ Agreement Form
All new and returning students will need to access D2L Brightspace PRIOR to the first day of classes to read the Cosmetology student handbook. After you have read the handbook, you must print and sign: Student Agreement Form, Hepatitis B Vaccination/Declination Form and Rollabout Form and return them to your instructor on the first day of class before you will be admitted to class. You will need to perform this task prior to the first day of each semester. Please direct questions to the assigned instructor of your first class.

Minimum Program Entry Requirements
Students entering this program must meet the following minimum program entry requirements:

Reading: Score of 225+
Arithmetic: Score of 225+
Assessment Results and Prerequisites:
Students admitted into Saint Paul College programs may need to complete additional courses based on assessment results and course prerequisite requirements. Certain MATH, READ, and ENGL courses have additional prerequisites.

Information is subject to change. This Program Requirements Guide is not a contract.
Nail Care Technician CERTIFICATE

Program Overview
Nail Technician services include the cleaning, shaping, conditioning and care for the fingers, hands, toes and feet as well as the preparation and application of artificial nails.

Physical requirements include finger dexterity, negative allergic reaction to cosmetic preparations, and artistic flair for creative design. The nail technician should enjoy working with the public and in a team atmosphere. People skills and time management skills are essential.

Licensing or certification exams are independent of graduation requirements.

Career Opportunities
The job outlook is very good for nail technicians. Increasing population, incomes, and demand for cosmetology services will stimulate job growth. In addition, numerous job openings will stem from rapid turnover in salons and the large size of the occupation. The rapid growth of nail salons and full service spas will generate numerous job openings for nail technicians.

After Nail Care Technician students complete 350 hours of skills and theory training and pass the written exam given through the State designated Cosmetologist Examiners. Nail technicians work in beauty salons, nail salons and spas.

Program Outcomes
1. Graduates will perform natural nail services including manicuring and pedicuring.
2. Graduates will perform artificial nail care services including tips, acrylic, and free-form.
3. Graduates will use decontamination and sanitation procedures.

Culinary Arts  AAS DEGREE

Program Overview
The Culinary Arts AAS degree prepares individuals for career opportunities in hotels, restaurants, clubs and institutional food service facilities. Responsibilities may include menu planning, purchasing food, equipment, and supplies, selecting, and developing recipes, selecting and using various food preparation methods and techniques. Management duties may include, but are not limited to financial planning, hiring, training and supervising employees. Graduates will be eligible for Certified Culinarian award from the American Culinary Federation as well as more advanced certificates with requisite culinary industry work experience.

Career Opportunities
According to the U.S. Bureau of Labor Statistics and the National Restaurant Association, meal preparation continues to shift out of the home, providing plentiful opportunities for chefs, cooks, and other food service workers. Americans spend more than $300 billion each year on meals eaten outside the home. The service industry currently employs 9,631,900 individuals and is projected to swell by 7.7% by 2018.

Opportunities are available in hotels, restaurants, resorts, clubs, catering and corporate dining, government and school kitchens. Institutional opportunities include health care, schools, corporations, and government facilities. Culinary Arts careers can lead in many different directions such as hospitality management, sales, product development, or owning your own business.

**Exemplary Status**

Saint Paul College’s Culinary Arts AAS degree and Culinary Arts Diploma programs are the only exemplary culinary programs in public education in Minnesota.

Exemplary Programs symbolize the highest educational standards recognized by the American Culinary Federation Education Foundation Accrediting Commission (ACFEFAC). The award is presented to programs that have proven full compliance with all ACFEFAC accreditation requirements in the last visiting team report along with excellent management of the program.
Program Overview
The Culinary Arts Diploma prepares individuals for career opportunities in hotels, restaurants, clubs and institutional food service facilities. Responsibilities may include menu planning, purchasing food, equipment, and supplies, selecting, and developing recipes, selecting and using various food preparation methods and techniques. Management duties may include, but are not limited to financial planning, hiring, training and supervising employees.

Career Opportunities
According to the U.S. Bureau of Labor Statistics and the National Restaurant Association, meal preparation continues to shift out of the home, providing plentiful opportunities for chefs, cooks, and other food service workers. Americans spend more than $300 billion each year on meals eaten outside the home. The service industry currently employs 9,631,900 individuals and is projected to swell by 7.7% by 2018.

Opportunities are available in hotels, restaurants, resorts, clubs, catering and corporate dining, government and school kitchens. Institutional opportunities include health care, schools, corporations, and government facilities. Culinary Arts careers can lead in many different directions such as hospitality management, sales, product development, or owning your own business.

Program Outcomes
1. Graduates will assess employment opportunities within the food service industry.
2. Graduates will apply culinary fundamentals in a professional setting.
3. Graduates will apply management styles in a working restaurant.
4. Graduates will apply food service safety and sanitation methods.
5. Graduates will create professional relationships, networking, and mentoring opportunities throughout the Twin Cities food service community.
6. Graduates will apply nutritional, sustainable and green best practices according to food service industry standards
7. Graduates will create menus according to food service industry standards.

**EXEMPLARY STATUS**

Saint Paul College’s Culinary Arts AAS degree and Culinary Arts Diploma programs are the only exemplary culinary programs in public education in Minnesota. Exemplary Programs symbolize the highest educational standards recognized by the American Culinary Federation Education Foundation Accrediting Commission (ACFEFAC). The award is presented to programs that have proven full compliance with all ACFEFAC accreditation requirements in the last visiting team report along with excellent management of the program.
Program Overview
Chefs and cooks prepare a variety of foods in many different environments, from preparation of a la carte (prepared to order) to banquets for hundreds of people. Responsibilities include sanitation, maintaining an accounting and Inventory control system, estimating the amount of food needed, purchasing food supplies, and planning menus. Nutritional aspects of healthy cooking are increasingly incorporated into the chefs menu.

This certificate will allow the student to gain sufficient knowledge and skill to become employable in a commercial baking and cake decorating environment. Bakeries, pastry shops and candy shops are potential employers. Many large department stores, grocery stores, hotels and private clubs also hire our graduates. Entrepreneurs that are interested in having these skills to support their own plan are also welcome.

A good general education, good reading ability, and a working knowledge of mathematics is important so that students can interpret weights and measures, calculate recipes, and understand cost control, inventory control and forecasting.

Career Opportunities
According to the 2020 Bakery Industry Analysis - American Bakers Association, North America and Europe lead the world bakery industry. Bakery products make up 2.1% of the gross domestic product of the United States. Over 30 billion in revenues and nearly 800,000 individuals working in commercial or retail bakeries/pastry shops in the United States. Experts project the market to grow at a rate of 2.5% annually for the next 5 years with the production and consumption of goods being influenced mostly by food trends.

Opportunities are available in hotels, restaurants, resorts, clubs, catering and corporate dining, government and school kitchens. Institutional opportunities include health care, schools, corporations, and government facilities. Culinary Arts careers can lead in many different directions such as hospitality management, sales, product development, or owning your own business.

Program Outcomes
1. Graduates will demonstrate professional skills of a Certified Pastry Culinarian.
2. Graduates will apply learned pastry skills to any working pastry shops or commercial bakery settings.
3. Graduates will demonstrate the best practices in baking production in accordance with the National Food Safety and Sanitation guidelines.
4. Graduates will create, write and cost pastry recipes.
5. Graduates will compose a post-graduation career trajectory plan in food & hospitality industry (choice content goal).

Fall

Course Sequence
Culinary Training at Saint Paul College is cohort based and requires full time attendance. Students can expect to spend time on campus about 4 days a week from 2:30pm to 8:30pm. This schedule may vary. Classes are offered in a sequential manner that allows students to build on their skills. For this reason, part-time attendance is not possible.

This certificate can only be started in the first (fall) semester and completed in the second (spring) semester.

Minimum Program Entry Requirements
Students entering this program must meet the following minimum program entry requirements:

Reading: Score of 240+ on Reading Comprehension or grade of “C” or better in READ 0721 or READ 0724 or EAPP 0860

Writing: Any

Arithmetic: Score of 250+ or grade of “C” or better in MATH 0745

Assessment Results and Prerequisites:
Students admitted into Saint Paul College programs may need to complete additional courses based on assessment results and course prerequisite requirements. Certain MATH, READ, and ENGL courses have additional prerequisites.
Wine Professional CERTIFICATE

Program Overview
The Wine Professional Certificate provides the graduate with a strong knowledge of wine, wine service skills, and wine marketing strategies.

Career Opportunities
The wine industry is rapidly expanding within the United States, where wine sales represent the largest wine consumer market in the world. A new report published by Allied Market Research, titled, “Luxury Wines and Spirits Market by Product Type, Distribution Channel and Geography: Global Opportunity Analysis and Industry Forecast, 2014 - 2022,” projects that the global luxury wines and spirits market was valued at $812,108 million in 2015, and is expected to reach $1,122,578 million by 2022, growing at a CAGR of 4.8 percent from 2016 to 2022. Wine sales have now surpassed beer sales, with millennials rapidly adapting to wine over beer. Wine sales are an important profit center for the restaurant/hospitality industry, and thus a comprehensive knowledge of wine is critical for maximizing outcomes.

Opportunities are available in hotels, restaurants, resorts, clubs, and corporate dining.

Graduates of the Wine Professional Certificate will be prepared for careers in the restaurant/hospitality industry, wine distribution, and wholesale/retail wine trade.

Minimum Program Entry Requirements
Students entering this program must meet the following minimum program entry requirements:
Must be 21 years of age.
Program Overview
The Advanced Practice Esthetics (AP) AAS degree includes the complete basic esthetics certification program, the complete AP esthetics certificate program, and the general education requirements required for completion of a two year AAS degree. AP Esthetics service include specialized training and clinical practice in four AP esthetics categories: chemical exfoliation of the skin, exfoliation of the skin using a machine or device, advanced skin care techniques, and skin needling.

The Advanced Practice Esthetics (AP) AAS degree is designed to be the next level of training for the esthetician or cosmetologist that wishes to specialize in the afore mentioned categories including: advanced understanding of skin anatomy and physiology, skin histology, skin care products and ingredients, pre and post treatment regimens, client consultation including skin analysis and skin typing, and risk management. Students learn to perform chemical peels, hydromembrasions, microdermabrasion, dermaplaning, skin needling, facials utilizing machines, electrical devices, facial lymphatic drainage massage, and advanced extractions using needles and lancets.

Career Opportunities
After AP Esthetics students complete all theory, practical training and state testing as defined in Rule by the State of Minnesota and the Minnesota Board of Cosmetology, they are eligible for licensing through the Minnesota Board of Cosmetology. AP estheticians work in a variety of settings including salons, spas, fitness centers, medi-spa's, and skin clinics. AP estheticians may also have their own Advanced Practice Esthetics business.

Final licensing and/or state testing are independent of graduation requirements.

Program Outcomes
1. Graduates will be able to perform advanced exfoliation using chemicals.
2. Graduates will be able to perform advanced exfoliation using machine or device.
3. Graduates will be able to perform advanced extractions using lancets and needles.
4. Graduates will be able to perform electrical energy treatments.
5. Graduates will be able to perform skin needling.
6. Graduates will be able to perform facial lymphatic drainage massage.
7. Graduates will be able to perform advanced client consultations

Program Requirements
☐ Check off when completed

☐ Required Program Orientation
All Cosmetology, Esthetics, Advanced Practice Esthetician, and Nail Technician applicants must attend a program orientation prior to enrollment as a full-time student. Please call the Clinic Receptionist at 651.846.1329 to reserve your space at an orientation.

Course Sequence & Transfer Opportunities

Advanced Practice Esthetics  AAS DEGREE (continued)

Course Sequence

Two possible options for course sequence with General education classes at beginning of program or at the end.

OPTION ONE

First Semester
CHSN 1698 Body Systems and Disease  (online) 3
This course is a prerequisite to or must be taken concurrently with CHSN 1699, ESTH 1645, ESTH 1650, ESTH 1651 and ESTH 1652.
May be taken the semester prior to FIRST SEMESTER, including summer.
CHSN 1699 Preclinic Introduction (online) 3
This course is a prerequisite to or must be taken concurrently with CHSN 1698, ESTH 1645, ESTH 1650, ESTH 1651 and ESTH 1652.
May be taken the semester prior to FIRST SEMESTER, including summer.
ESTH 1645 Cosmetic Chemistry & Makeup Applications 4
This course is a prerequisite to ESTH 1650
ESTH 1650 Skin Analysis & Massage 4
ESTH 1651 Clinic 1 for Estheticians 4
ESTH 1652 Clinic 2 for Estheticians 4
Total Semester Credits 19

Second Semester
All 17XX level classes run concurrently in the same semester. In order to register for Advanced level esthetics classes series ESTH 17XX, students must have verification of: completion of all training and passing results of all state written and practical skills testing for basic esthetics or cosmetology in accordance with Law and Rule of the Minnesota Board of Cosmetology; or current/active Minnesota basic esthetician or Minnesota cosmetology license.
ESTH 1710 Risk Management for Estheticians (online) 2
ESTH 1712 Advanced Exfoliation 4
ESTH 1714 Advanced Skin Care Techniques 5
ESTH 1716 Advanced Clinic 1 for Estheticians 4
ESTH 1718 Advanced Clinic 2 for Estheticians 4
Total Semester Credits 19

Third Semester
Goal 1: ENGL 1711 Composition 1 4
Goal 1: COMM 1720 Interpersonal Communication 3
Goal 3: CHEM 1711 Principles of Chemistry 1 4
Goal 5: History, Social Science, Behavioral Sciences 4
Goal 6: Humanities and Fine Arts 4
Total Semester Credits 19
Total Program Credits 60

OPTION TWO

First Semester
Goal 1: COMM 1720 Interpersonal Communication 3
Goal 1: ENGL 1711 Composition 1 4
Goal 3: CHEM 1711 Principles of Chemistry 1 4
Goal 5: History, Social Science, Behavioral Sciences 4
Goal 6: Humanities and Fine Arts 4
Total Semester Credits 19

Second Semester
CHSN 1698 Body Systems and Disease (online) 3
This course is a prerequisite to or must be taken concurrently with CHSN 1699, ESTH 1645, ESTH 1650, ESTH 1651 and ESTH 1652.
May be taken the semester prior to FIRST SEMESTER, including summer.
CHSN 1699 Preclinic Introduction (online) 3
This course is a prerequisite to or must be taken concurrently with CHSN 1698, ESTH 1645, ESTH 1650, ESTH 1651 and ESTH 1652.
May be taken the semester prior to FIRST SEMESTER, including summer.
ESTH 1645 Cosmetic Chemistry & Makeup Applications 4
This course is a prerequisite to ESTH 1650
ESTH 1650 Skin Analysis & Massage 4
ESTH 1651 Clinic 1 for Estheticians 4
ESTH 1652 Clinic 2 for Estheticians 4
Total Semester Credits 19

Third Semester
All 17XX level classes run concurrently in the same semester. In order to register for Advanced level esthetics classes series ESTH 17XX, students must have verification of: completion of all training and passing results of all state written and practical skills testing for basic esthetics or cosmetology in accordance with Law and Rule of the Minnesota Board of Cosmetology; or current/active Minnesota basic esthetician or Minnesota cosmetology license.
ESTH 1710 Risk Management for Estheticians (online) 2
ESTH 1712 Advanced Exfoliation 4
ESTH 1714 Advanced Skin Care Techniques 5
ESTH 1716 Advanced Clinic 1 for Estheticians 4
ESTH 1718 Advanced Clinic 2 for Estheticians 4
Total Semester Credits 19
Total Program Credits 60

Cosmetology Student Handbook/Agreement Form
All new and returning students will need to access D2L Brightspace PRIOR to the first day of classes to read the Cosmetology student handbook. After you have read the handbook, you MUST print and sign Student Agreement Form, Hepatitis B Vaccination/Declination Form, Property and Equipment Form, and Rollabout Form and return them to your instructor on the FIRST DAY of class before you will be admitted to class. You will need to perform this task prior to the first day of each semester. Please direct questions to the assigned instructor of your first class.

Advanced Esthetics Classes Prerequisite
In order to register for Advanced level esthetics classes series ESTH 17XX, students must have verification of: completion of all training and passing results of all state written and practical skills testing for basic esthetics or cosmetology in accordance with Law and Rule of the Minnesota Board of Cosmetology; or current/active Minnesota basic esthetician or Minnesota cosmetology license.
All necessary documents must be submitted to the program faculty for verification prior to registration.

Transfer Opportunities
Saint Paul College has transfer agreements & partnerships between many post-secondary institutions. For more information please go to saintpaul.edu/Transfer.
Advanced Practice Esthetics CERTIFICATE

Program Overview
Advanced Practice (AP) esthetics services include specialized training and clinical practice in four AP esthetics categories: chemical exfoliation of the skin, exfoliation of the skin using a machine or device, advanced skin care techniques, and skin needling.

The Advanced Practice Esthetics Certificate is designed to be the next level of training for the esthetician or cosmetologist that wishes to specialize in the aforementioned categories including advanced understanding of skin anatomy and physiology, skin histology, skin care products and ingredients, pre and post treatment regimens, client consultation including skin analysis and skin typing, and risk management. Students learn to perform chemical peels, hydrodermabrasion, microdermabrasion, dermaplaning, skin needling, facials utilizing machines, electrical devices, facial lymphatic drainage massage, and advanced extraction using needles and lancets.

This certificate is for the student who has a current/active Minnesota basic esthetician license, Minnesota cosmetology license; or for the student who has completed all theory, practical training and state testing as defined in Rule by the State of Minnesota and the Minnesota Board of Cosmetology and is progressing onto the next level of esthetics licensure.

Career Opportunities
After AP Esthetics students complete all theory, practical training and state testing as defined in Rule by the State of Minnesota and the Minnesota Board of Cosmetology, they are eligible for licensure through the Minnesota Board of Cosmetology. AP estheticians work in a variety of settings including salons, spas, fitness centers, medi-spa’s, and skin clinics. AP estheticians may specialize in the aforementioned categories of facials utilizing machines, electrical devices, facial lymphatic drainage massage, and advanced extraction using needles and lancets.

Program Outcomes
1. Graduates will be able to perform advanced exfoliation of the skin, including chemical peels.
2. Graduates will be able to perform advanced needling techniques.
3. Graduates will be able to perform advanced exfoliation using a machine or device.
4. Graduates will be able to perform facial drainage massage.
5. Graduates will be able to perform lymphatic drainage massage.
6. Graduates will be able to perform advanced client consultations.
7. Graduates will be able to perform advanced skin needling.

Program Faculty
Elizabeth Elshaboury
elizabeth.elshaboury@saintpaul.edu

Textbook and Supply Costs
Students should expect to spend approximately $2,500.00 for Advanced Practice esthetics books and supplies. Tuition, college fees and books for remaining courses are not included in this cost. Books can be purchased from the Online College Bookstore. Be prepared to purchase all esthetics kits with the instructor on the second day of class.

Financial aid must have been completed. In addition, there are required fees to take the Minnesota licensing exams and obtain a Minnesota license.

Cosmetology Student Handbook/Agreement Form
All new and returning students will need to access D2L Brightspace PRIOR to the first day of classes to read the Cosmetology Student Handbook. Course Sequence

Minimum Program Entry Requirements
Students entering this program must meet the following minimum program entry requirements:

Reading: Score of 240 or grade of “C” or better in READ 0721 or READ 0724 or EAPP 0860
Writing: Score of 240 or grade of “C” or better in ENGL 0921 or EAPP 0870
Arithmetic: Score of 250 or grade of “C” or better in MATH 0745

Program Start Dates
Fall, Spring

Course Prerequisites
In order to register for Advanced level esthetics classes series ESTH 17XX, students must have verification of: completion of all training and passing results of all state written and practical skills testing for basic esthetics or cosmetology in accordance with Law and Rule of the Minnesota Board of Cosmetology; or current/active Minnesota basic estheticians or Minnesota cosmetology license.

All necessary documents must be submitted to the program faculty for verification prior to registration.
Advanced Esthetics for Cosmetologists CERTIFICATE

Program Overview
This certificate will provide advanced education for the licensed cosmetologist who would like to expand their knowledge of skin care services. The certificate can be completed within one semester. Program enrollment requires current Minnesota Esthetics or Cosmetology license.

Career Opportunities
The licensed cosmetologist would now be able to seek employment in a setting specializing in skin care. Employment opportunities include: salons, spas and fitness centers.

Program Outcomes
1. Graduates will perform skin care services according to BCE requirements.
2. Graduates will list cosmetic product ingredients.

Program Faculty
Lyubov Babina
lyubov.babina@saintpaul.edu

Textbook and Supply Costs
Students should expect to spend approximately $1,850.00 for books and supplies. This cost is beyond the cost of tuition and fees. Items can be purchased in the College Bookstore.

Program Start Dates
Fall, Spring

Course Sequence
The following sequence is recommended.
Full-time students can complete the program in one semester.

First Semester
ESTH 1645 Cosmetic Chemistry & Makeup Applications ................. 4
ESTH 1650 Skin Analysis & Massage ......................... 4
ESTH 1651 Clinic 1 for Estheticians ....................... 4
Total Program Credits .................. 12

Current Minnesota Esthetics or Cosmetology License:
Students must bring a copy of their license on the first day of class.

Program is not eligible for financial aid.

Minimum Program Entry Requirements
Students entering this program must meet the following minimum program entry requirements:

Reading: Score of 240+ or grade of “C” or better in READ 0721 or READ 0724 or EAPP 0860
Writing: Score of 240+ or grade of “C” or better in ENGL 0921 or EAPP 0870
Arithmetic: Score of 237+

Assessment Results and Prerequisites:
Students admitted into Saint Paul College programs may need to complete additional courses based on assessment results and course prerequisite requirements. Certain MATH, READ, and ENGL courses have additional prerequisites.
Program Requirements Guide

Esthetician International DIPLOMA

Program Overview
Esthetician services include specialized work with skin care products, analysis of skin, massage techniques and facials. Students learn to tint brows and lashes, apply makeup, provide temporary hair removal and to use a steamer.

The Esthetic diploma program prepares the student for the CIDESCO examination.

Career Opportunities
After esthetician students complete 600 hours of skills and theory training and pass the written exam through the State designated testing service and skills certification, they are eligible for licensure through the Minnesota Board of Cosmetologist Examiners. Estheticians work in a variety of settings including salons, spas, and fitness centers.

CIDESCO certification holders are able to license as an esthetician technician, certify as a massage therapist, and license as a nail technician upon completion of clinic nail hours. Cross trained therapists are able to work in Spas, Cruise Ships and 5 Star Resorts.

Licensing or certification exams are independent of graduation requirements.

Program Outcomes
1. Graduates will perform skin care services.
2. Graduates will recommend skin care products to clients.
3. Graduates will perform brow & lash tinting, lash extensions, waxing, and body treatments.
4. Graduates will be able to perform Massage in a professional setting.
5. Graduates will be able to perform nail care services.
6. Graduates will demonstrate the skills necessary for the practical skills test.

Program Faculty
Lyubov Babina
lyubov.babina@saintpaul.edu

Textbook and Supply Costs
Students should expect to spend approximately $2,200.00 for esthetics books and supplies (first semester). Tuition, college fees and books for remaining courses are not included in this cost. Items can be purchased in the College Bookstore. In addition, there is a fee to take the Minnesota licensure exam.

Be prepared to purchase all Esthetics kits with the instructor on the second day of class. Financial aid must have been completed.

CIDESCO Certification Exam
Graduates of this diploma program are eligible to take the CIDESCO certification exam. The cost of this exam is approximately $660.00. After passing the CIDESCO exam a fee of $65.00 is charged for the CIDESCO diploma and pin. ESTH 1671 CIDESCO Exam Preparation and ESTH 1672 CIDESCO Exam is offered summer semester only.

The Esthetician Diploma will meet the criteria for the CIDESCO exam requirement of 1200 hours of training in skin, massage and nail services.

The CIDESCO examination includes:
- a facial examination
- a body examination
- a waxing examination
- a make-up examination
- a tinting examination
- a massage examination
- an additional subject, and
- a written examination.

Program Start Dates
Fall, Spring
Summer – online CHSN 1698 & CHSN 1699 only

Program Overview

Esthetician services include specialized work with skin care products, analysis of skin, skin exfoliation, massage techniques, and facials. Students learn to tint brows and lashes, apply makeup, provide temporary hair removal, and use a steamer and mag-lights.

Career Opportunities

After esthetician students complete 600 hours of skills and theory training and pass the written exam through the State designated testing service and skills certification, they are eligible for licensure through the Minnesota Board of Cosmetologist Examiners. Estheticians work in a variety of settings including salons, spas, and fitness centers.

Licensing or certification exams are independent of graduation requirements.

Program Outcomes

1. Graduates will perform skin care services.
2. Graduates will recommend skin care products to clients.
3. Graduates will perform brow & lash tinting, lash extensions, waxing, and body treatments.
4. Graduates will demonstrate the skills necessary for the practical skills test.

Program Faculty

Lyubov Babina
lyubov.babina@saintpaul.edu

Program Length

Full-time students can complete the program in one semester provided the 3-credit General Education requirement has also been met.

Full-time Options

Full-time students can complete the program in one semester by attending 32 hours per week (Tuesday – Friday, 8:00am–4:30pm).

Textbook and Supply Costs

Students should expect to spend approximately $2,200.00 for books and supplies. This cost is beyond the cost of tuition and fees. In addition, there is a fee to take the Minnesota licensure exam.

Items can be purchased in the College Bookstore. Be prepared to purchase all esthetics kits with the instructor on the second day of class. Financial aid must have been completed.

Program Requirements

☐ Check off when completed
☐ Required Program Orientation

All Cosmetology, Esthetics and Nail Technician applicants must attend a program orientation prior to enrollment as a full-time student. Please call the Clinic receptionist at 651.846.1329 to reserve your space at an orientation.

Minimum Program Entry Requirements

Students entering this program must meet the following minimum program entry requirements:

Reading: Score of 240+ or grade of “C” or better in READ 0721 or READ 0724 or EAPP 0860

Writing: Score of 240+ or grade of “C” or better in ENGL 0921 or EAPP 0870

Arithmetic: Score of 237+

Assessment Results and Prerequisites:

Students admitted into Saint Paul College programs may need to complete additional courses based on assessment results and course prerequisite requirements. Certain MATH, READ, and ENGL courses have additional prerequisites.

Program Start Dates

Fall, Spring, Summer – online CHSN 1698 & CHSN 1699 only

Course Sequence

The following sequence is required. Not all courses are offered during summer session.

1 Semester – Day Full-time

CHSN 1698 Body Systems & Diseases (online) 3
CHSN 1699 Preclinic Introduction (online) 3
This course is a prerequisite to or must be taken concurrently with ESTH 1645, ESTH 1650, ESTH 1651 and ESTH 1652

CHSN 1699 Preclinic Introduction (online) 3
This course is a prerequisite to or must be taken concurrently with ESTH 1645, ESTH 1650, ESTH 1651 and ESTH 1652

Estimated cost for books, supplies, and state exam fee is $2,200.00.

Full-time Options

Full-time students can complete the program in one semester provided the 3-credit General Education requirement has also been met.

Cosmetology Student Handbook/Agreement Form

All new and returning students will need to access D2L Brightspace PRIOR to the first day of classes to read the Cosmetology student handbook. After you have read the handbook, you must print and sign Student Agreement Form, Hepatitis B Vaccination/Declination Form, Property and Equipment Form, and Rollabout Form and return them to your instructor on the first day of class before you will be admitted to class. You will need to perform this task prior to the first day of each semester. Please direct questions to the assigned instructor of your first class.

CIDESCO

Saint Paul College – A Community and Technical College Esthetician Program is a CIDESCO school. This means the program is allowed to prepare candidates for the CIDESCO examination.

Textbook and Supply Costs
Students should expect to spend approximately $1,900.00 for esthetics books and supplies (ESTH 1645, 1650 & 1651). Tuition, college fees, and books required for remaining courses are not included in this cost. Items can be purchased in the College Bookstore. Financial aid must have been completed.

Current Minnesota Esthetics or Cosmetology License:
Students must bring a copy of their license on the first day of class. A copy will be added to the students’ permanent file.

Minimum Program Entry Requirements
Students entering this program must meet the following minimum program entry requirements:

Reading: Score of 240+ or grade of “C” or better in READ 0721 or READ 0724 or EAPP 0860
Writing: Score of 240+ or grade of “C” or better in ENGL 0921 or EAPP 0870
Arithmetic: Score of 237+

Assessment Results and Prerequisites:
Students admitted into Saint Paul College programs may need to complete additional courses based on assessment results and course prerequisite requirements. Certain MATH, READ, and ENGL courses have additional prerequisites.

This advanced certificate is designed for the licensed esthetician or licensed cosmetologist.
Program Overview
The Sign Language Interpreter/Transliterator AAS Degree program prepares individuals to work as interpreter transliterators facilitating and mediating communication between Deaf/Hard of Hearing/Deaf-Blind and hearing people. Interpreters must convey accurate messages, feelings and attitudes of participants, whether those messages are spoken or signed. To accomplish this, competency in English and in American Sign Language are necessary. A strong academic background, traits that demonstrate maturity, responsibility, flexibility, and the ability to work well under pressure, are assets. The curriculum requires both general education courses as well as courses specifically related to the Deaf Community and interpreting. The program covers a variety of subject areas which include: ASL linguistics and language development, interpreting process theory and application, interpreter roles/responsibilities, interpreter’s Code of Professional Conduct, history of deaf people and their culture, and the historical evolvement of the interpreting profession. Interpreting and Transliterating skills courses provide guided practice in developing the skills necessary to effectively interpret/ transliterate. Students will experience a variety of learning environments including classroom work, laboratory practice and field placement. Students will be required to have both in-class and out-of-class experiences with members of the Deaf Community to further develop ASL fluency and cultural awareness.

Career Opportunities
Graduates will be qualified for careers as entry-level sign language interpreters with social service agencies, educational programs, community-based settings, or recreational situations. The employment outlook, due to accessibility legislation, has increased the need for interpreters.

Graduates will have opportunities to further their education and to specialize in their work through professional affiliations or by obtaining national certification. Graduates who plan to work in K-12 educational settings must hold a Provisional Certificate which allows them to become a practitioner for a maximum of two years or until they obtain national certification.

Program Outcomes
1. Graduates will have an understanding and knowledge about the theoretical, ethical, and practical foundations of the interpreting field needed to pass the NAD-RID National Interpreter Certification (NIC) written test.
2. Graduates will have the knowledge and skills to interpret between American Sign Language and English.
3. Graduates will have the knowledge and skills to transliterate between spoken English and a signed form of English.
4. Graduates will have the knowledge and skills to function as cross-cultural mediators in order to transmit and transfer culturally-based linguistic and non-linguistic information.
5. Graduates will be informed of the necessary employment knowledge, and professional behaviors that are requisite for employment as Sign Language Interpreters/Transliterator.
6. Graduates will sit for national certification within two years of graduation.

Program Faculty
Linda Gill
linda.gill@saintpaul.edu

Special Features
The Sign Language Interpreter/Transliterator Program is one of the original six interpreter programs in the United States. It was established in 1972.

Program Requirements
☐ Check off when completed

Program Prerequisites
ASLS 1411 American Sign Language 1 (3 cr) with a grade of “C” or better
ASLS 1412 American Sign Language 2 (3 cr) with a grade of “C” or better
ASLS 1413 American Sign Language 3 (3 cr) with a combined GPA of 3.0 in ASL 3 & ASL 4
ASLS 1414 American Sign Language 4 (3 cr) with a combined GPA of 3.0 in ASL 3 & ASL 4

Pre-Core Program General Education Courses
Prior to Official Acceptance into Program

In addition to completing the Program Prerequisites above, the following two General Education courses must be completed, or in progress with, a “C” or better grade prior to submitting your Program Major Application called the Application to Sign Language Interpreter/Transliterator AAS Degree Major form.

☐ Goal 1: ENGL 1711 Composition 1 ........................ 4
☐ Goal 5: PSYC 1720
Lifespan Development preferred .................................. 3
(PSYC 1710 General Psychology accepted)

Pre-Core General Education Requirements . . . 7

Core Courses

The following Core courses can only be taken after official acceptance into the Sign Language Interpreter/Transliterator program.

☐ ASLS 1420 ASL Linguistics ...................................... 4
☐ ASLS 1430 Classifiers ........................................... 3
☐ ASLS 1435 Deaf Studies/Culture .............................. 3
☐ INTP 1440 Orientation to Interpreting ....................... 3

☐ INTP 1442 English Grammar for Sign Language Interpreters ........................................ 2
☐ INTP 1500 Interpreting Process ................................ 2
☐ INTP 1512 Consecutive Interpreting 1 ......................... 4
☐ INTP 1513 Consecutive Interpreting 2 ......................... 2
☐ INTP 2411 Sign to Voice Interpreting 1 ........................ 4
☐ INTP 2412 Sign to Voice Interpreting 2 ........................ 2
☐ INTP 2421 Voice to Sign Interpreting 1 ......................... 4
☐ INTP 2422 Voice to Sign Interpreting 2 ......................... 2
☐ INTP 2431 Transliterating 1 ...................................... 4
☐ INTP 2432 Translating 2 ........................................... 2
☐ INTP 2585 Internship Orientation ............................. 1
☐ INTP 2592 Interpreter Internship .............................. 5
☐ Technical Electives ................................................. 4

2 credits may be taken from the following electives:
☐ ASLS 1415 American Sign Language 5 ...................... 3
☐ ASLS 1443 ASL Fingerspelling and Numbers ............. 3
☐ ASLS 1446 ASL Non-Manual Markers ....................... 2
☐ ASLS 1450 American Sign Language Semantics .......... 3
☐ INTP 1465 Special Topics: Interpreting ..................... 1-5

2 credits must be taken from the following electives:
☐ INTP 2410 Video Relay/Video Remote
Interpreting .......................................................... 2
OR
☐ INTP 2450 Deaf/Blind Interpreting ............................ 2
Core Credits ......................................................... 51

Remaining General Education/MnTC Requirements

Cr
Must complete at least 9 remaining credits from the Minnesota Transfer Curriculum (MnTC)
☐ Goal 1: Communication ........................................... 3
☐ COMM 17XX – 3 cr
☐ Goal 3 or Goal 4 ..................................................... 3
☐ Goal 3: Natural Sciences
☐ OR Goal 4: Mathematical/Logical Reasoning
☐ Goal 6: Humanities and Fine Arts ........................... 3
☐ Remaining General Education Requirements .......... 9
☐ Core Credits ......................................................... 51
☐ Pre-Core General Education Requirements ............ 7

Total Program Credits ........................................ 67

Program Start Dates

Fall

Information is subject to change.
This Program Requirements Guide is not a contract.
Sign Language Interpreter/Transliterator AAS DEGREE (continued)

Course Sequence
The following sequence is recommended for a full-time student. Students are encouraged to take a portion of their general education requirements in the summer term during their program in order to lessen their academic load during the school year.

Part-time day courses are available during the fall and spring of the first year of the 2-year program. The summer course between first and second year is day programming. The second year of the program must be taken full-time, days. Not all courses are offered each semester; a selection of courses are offered summer term.

Required General Education Courses to be taken prior, or in progress, to submitting Program Major Application:
- Goal 1: ENGL 1711 Composition 1 .................. 4
- Goal 5: PSYC 1720 Lifespan Development preferred .................. 3
- ASLS 1435 Deaf Studies/Culture .................. 3
- can be taken concurrently with ASL 1-4

INTP 1442 English Grammar for Sign Language Interpreters ............ 2
- must be taken concurrently with or
- previous to ASLS 1420 and INTP 1442

INTP 1500 Interpreting Process ............... 2
- must be taken concurrently with or
- previous to ASLS 1420 and INTP 1500

Goal 1: COMM 17XX .................................. 3

Total Semester Credits: .................... 14

Second Semester
ASLS 1430 Classifiers ................................ 3
- INTP 1440 Orientation to Interpreting .................. 3
- INTP 1512 Consecutive Interpreting 1 .................. 4
- Goal 3: Natural Sciences
- OR Goal 4: Mathematical/Logical Reasoning .... 3

Total Semester Credits: .................... 13

Third Term
INTP 1513 Consecutive Interpreting 2 .................. 2
- Technical Electives .................................. 2
- Goal 6: Humanities and Fine Arts .................. 3

Total Semester Credits: .................... 7

Fourth Semester
INTP 2411 Sign to Voice Interpreting 1 .................. 4
- INTP 2421 Voice to Sign Interpreting 1 .................. 4
- INTP 2431 Transliterating 1 .................. 4
- INTP 2585 Internship Orientation .................. 1

Total Semester Credits: .................... 13

Fifth Semester
INTP 2412 Sign to Voice Interpreting 2 .................. 2
- INTP 2422 Voice to Sign Interpreting 2 .................. 2
- INTP 2432 Transliterating 2 .................. 2
- INTP 2592 Interpreter Internship .................. 5
- Technical Electives .......................... 2

Total Semester Credits: .................... 13

Total Program Credits: .................... 67
All INTP core courses as well as ASLS courses require a grade of “C” or better.

Program-Specific Admission Process
The Sign Language Interpreter/Transliterator program has a program-specific admission process.

Admission requirements include completing the following course work before submitting the Program Major Application:
- American Sign Language 1 with a “C” or better
- American Sign Language 2 with a “C” or better
- American Sign Language 3 with a combined GPA of 3.0 in ASL 3 & ASL 4
- American Sign Language 4 with a combined GPA of 3.0 in ASL 3 & ASL 4
- ENGL 1711 Composition 1 (or equivalent) with a “C” or better
- PSYC 1720 Lifespan Development preferred; PSYC 1710 General Psychology accepted. Course must be completed with a “C” or better

Program Major Application Form Submission
The Program Major Application form is called the “Application to Sign Language Interpreter/Transliterator AAS Degree Major” and is available on the program Web page. On the Program Major Application form, students verify satisfactory completion or courses in progress of the above requirements.

Above average skills on college assessment tests for reading and writing English are used to determine entry into the program.

ASL Courses must have been taken within the past five years. The last ASL course must be within the past 18 months of date of application. Applicants must ensure that all technical credits submitted for review have been received within five years of application date. Technical credits are valid for five years. This includes transfer technical credits, which are used for specific technical program requirements.

Students who have not had recent ASL courses (within the past 18 months) at date of application will need to refresh their skills by repeating their last ASL course or by taking ASL 5 during the summer term prior to beginning the Sign Language Interpreter/Transliterator Program.

The Credit by Examination/Test-Out is available for ASL 1 and ASL 2 only. Credit by Examination/Test-Out are not transferable from another educational institution.

Transfer Opportunities
Saint Paul College has transfer agreements & partnerships between many post-secondary institutions. For more information please go to saintpaul.edu/Transfer.

Minimum Program Entry Requirements
Complete prerequisite ASL 1 and ASL 2 with grade of “C” or better, ASL 3 and ASL 4 with a combined GPA of 3.0. Complete prerequisite of Composition 1 (ENGL 1711) and Lifespan Development (PSYC 1720) preferred; General Psychology (PSYC 1710) accepted. Course must be completed with “C” grade or better.

It is necessary for students in the Sign Language Interpreter/Transliterator Program to be able to process auditory and visual information.

Reading: Score of 250+ or grade of “C” or better in READ 0722 or READ 0724 or EAPP 0900
Writing: Score of 250+ on Reading Comprehension or grade of “C” or better in ENGL 0922 or EAPP 0900
Arithmetic: Score of 250+ or grade of “C” or better in MATH 0745

Assessment Results and Prerequisites:
Students admitted into Saint Paul College programs may need to complete additional courses based on assessment results and course prerequisite requirements. Certain MATH, READ, and ENGL courses have additional prerequisites.

STEM: Science, Technology, Engineering, Mathematics Courses

Course delivery methods change on a semester basis. Please check the current course schedule for the most up-to-date information at saintpaul.edu/CourseSchedule.

Science

Biochemistry

Biochemistry is the study of the chemical reactions in living organisms, and it contains aspects of organic and inorganic chemistry as well as biology. Topics covered in biochemistry include protein structure and function, as well as cell metabolic processes that include lipids, carbohydrates, proteins, and nucleic acids. Biochemistry includes fundamental concepts that can be applied to molecular biology, immunochemistry, neurochemistry, and biophysical chemistry. It has a wide range of applications which can be applied to fields such as medicine, agriculture, toxicology, and engineering to name a few. Biochemists often work in modern research laboratories and participate in stimulating, creative work. They interact with scientists from other fields because their research is intertwined. The application of biochemistry to other fields focuses on improving the quality of life. Opportunities for employment in this field are expected to grow in industry, medicine, and genetic research.

Biology

The Biology department provides high quality educational experiences in the biological sciences including: environmental science, general biology for majors and non-majors, nutrition, medical terminology, forensic science, biology of women, human anatomy and physiology for majors and non-majors, and microbiology. The faculty believe biology occupies a central position in the physical sciences and that an understanding of fundamental biological principles enables students to make better-informed decisions for work and life roles. The biology faculty promote active learning in lecture and lab activities, interacting closely with students at various levels of academic development. Biology courses serve the College and students by providing offerings that satisfy requirements for general education, allied health and pre-professional transfer programs. Biology faculty are committed to excellence in teaching and scholarship providing a variety of lab/field experiences and online applications.

Chemistry

The Chemistry department offers courses that provide an understanding of chemical principles across the discipline. The chemistry faculty believe that an understanding of fundamental chemical principles enables students to make better-informed decisions on a wide variety of issues related to work and life roles. The faculty interact closely with students, a diverse population at various levels of academic development, to help them develop capabilities in science and become lifelong learners. Chemistry courses fulfill requirements for general education and various graduation requirements.

Course Cr
CHEM 1700 Chemistry Concepts 4
CHEM 1711 Principles of Chemistry 1 4
CHEM 1712 Principles of Chemistry 2 4
CHEM 1755 Research Fundamentals 3
CHEM 2720 Organic Chemistry 1 5
CHEM 2721 Organic Chemistry 2 5
CHEM 2730 Instrumental Analysis 4
CHEM 2790 Research Project for Science and Engineering Technology 1-4
CHEM 2795 Special Topics in Chemistry 1-6

Physics

The study of Physics involves the study of matter and motion, energy and forces. The Physics department offers Principles of Physics 1 and 2 as well as General Physics 1 and 2 with a calculus base. Students enroll in physics courses to fulfill the Minnesota Transfer Curriculum requirements and various graduation requirements.

Course Cr
PHYS 1720 Principles of Physics 1 4
PHYS 1722 Principles of Physics 2 4
PHYS 1760 Descriptive Astronomy (no lab) 3
PHYS 2700 General Physics 1 (with Calculus) 5

Mathematics

Mathematics

The study of mathematics provides foundational knowledge for understanding other disciplines, as well as logical reasoning and problem solving skills for work and life roles. The department offers a full curriculum to meet the educational needs of our students such as developmental offerings, mathematics courses specific to majors and a range of general education courses including Statistics, College Algebra, Calculus, and Ordinary Differential Equations. Courses fulfill Minnesota Transfer Curriculum requirements and graduation requirements.

Course Cr
MATH 0910* Introductory Algebra 3
MATH 0920* Intermediate Algebra 3
MATH 1411* Applied Mathematics 3
MATH 1420* Trade Algebra and Trigonometry 3
MATH 1710 Liberal Arts Mathematics 3
MATH 1730 College Algebra 3
MATH 1740 Introduction to Statistics 4
MATH 1750 Trigonometry 3
MATH 1762 Pre-Calculus 5
MATH 1790 Special Topics in Mathematics 1-6
MATH 2100 Intermediate Statistics 4
MATH 2240 Statistics for Psychology/Behavioral Sciences 4
MATH 2460 Discrete Mathematics 4
MATH 2749 Calculus 1 4
MATH 2750 Calculus 2 4
MATH 2753 Multivariable Calculus 4
MATH 2760 Differential Equations and Linear Algebra 4

Saint Paul College has transfer agreements & partnerships between many post-secondary institutions. For more information please go to saintpaul.edu/transfer.

---

**Minimum Program Entry Requirements**

Students entering this program must meet the following minimum program entry requirements:

- **Reading:** Score of 250+ or grade of "C" or better in READ 0722 or READ 0724 or EAPP 0900
- **Writing:** Score of 250+ on Reading Comprehension or grade of "C" or better in ENGL 0922 or EAPP 0900
- **Adv. Algebra & Functions:** Score of 250+ or grade of "C" or better in MATH 0920

**Assessment Results and Prerequisites:**

Students admitted into Saint Paul College programs may need to complete additional courses based on assessment results and course prerequisite requirements. Certain MATH, READ, and ENGL courses have additional prerequisites.

TPBI
Chemistry Transfer Pathway AS DEGREE

Program Overview
The Chemistry Transfer Pathway AS degree is awarded for successful completion of 60 credits in science and liberal arts. It is designed to constitute the first two years of a bachelor’s degree in Chemistry.

Career Opportunities
Chemistry majors are curious, analytical and self-starting leaders. Upon completion of the Chemistry AS degree, students will have developed strong communication skills and grown in their scientific and mathematical reasoning skills as well as developed their ability to perform experiments in a hands-on environment. As graduates in Chemistry, students can choose a number of career options from technical scientific laboratory careers to education. Salaries will vary based on the chosen career path.

Transfer Opportunities
Saint Paul College has transfer agreements & partnerships between many post-secondary institutions. For more information please go to saintpaul.edu/Transfer.

Travis Mills
travis.mills@saintpaul.edu

Penny Starkey
penny.starkey@saintpaul.edu

Program Requirements

Program Outcomes
1. Apply fundamentals of experimental chemistry in the laboratory environment
   CRITERIA
   a. Carefully follow written procedures
   b. Make accurate and precise measurements, perform calculations
   c. Operate instrumentation safely and properly
   d. Keep scientific records
   e. Design and execute experiments using scientific method
   f. Follow safety protocols and waste management procedures
   ASSESSMENTS
   a. Formal lab project rubric

2. Apply fundamentals of theoretical chemistry in the classroom and laboratory environment
   CRITERIA
   a. Build portfolio through projects
   b. Analyze data and derive a conclusion from collected data
   c. Present results of lab projects
   ASSESSMENTS
   a. Portfolio rubric

3. Solve chemistry related problems.
   CRITERIA
   a. Identify and analyze a chemistry problem using critical thinking
   b. Propose a problem-solving strategy and utilize it
   ASSESSMENTS
   a. Portfolio rubric

4. Communicate scientific results effectively in oral and written formats.
   CRITERIA
   a. Write clearly and concisely
   b. Speak clearly, loudly, and to the appropriate level of the audience
   a. Address or answer audience questions
   ASSESSMENT TOOLS
   a. Formal lab project rubric

5. Evaluate chemistry related issues in society using scientific literature.
   CRITERIA
   a. Perform literature search relevant to issue(s)
   a. Write a review of the issue(s)
   a. Follow lab safety and waste management protocols
   ASSESSMENT TOOLS
   a. Project in CHEM 1711 rubric

Minimum Program Entry Requirements
Students entering this program must meet the following minimum program entry requirements:

Reading: Score of 250+ or grade of “C” or better in READ 0722 or READ 0724 or EAPP 0900

Writing: Score of 250+ on Reading Comprehension or grade of “C” or better in ENGL 0922 or EAPP 0900

Adv. Algebra & Functions: Score of 250+ or grade of “C” or better in MATH 0920

Assessment Results and Prerequisites:
Students admitted into Saint Paul College programs may need to complete additional courses based on assessment results and course prerequisite requirements. Certain MATH, READ, and ENGL courses have additional prerequisites.

Total Program Credits .......................... 60
Program Overview
The Science and Engineering Technology degree is designed for students who are seeking employment in a science laboratory and/or who are seeking to transfer to a four-year program.

Career Opportunities
Science and Engineering Technicians and Technologists work in many aspects of the laboratory industry from basic research to clean room facilities. They work in a variety of sub-fields, such as biotechnology, microbiology, nanotechnology, pharmaceutical research, chemical technology, science manufacturing, and materials engineering. Technicians operate many kinds of equipment and instrumentation, prepare samples for processing, monitor commercial production, test for product quality, and collect and analyze samples. They conduct a variety of laboratory procedures, from routine laboratory procedures to complex research projects. Students in this program take core courses in research and instrumentation and chose one of the three specialized tracks; biology, chemistry, or engineering. A solid background in science and math along with the skills in using advanced equipment is vital for success as a Science and Engineering Technician or Technologist.

Program Outcomes
1. Design and conduct experiments as well as analyze and interpret the results.
2. Operate and safely use instrumentation in science and engineering laboratories.
3. Act professionally and with ethical responsibility.
4. Communicate the results of experiments using appropriate mathematical, scientific, and engineering principles.
5. Solve science technology problems within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability.

Transfer Opportunities
Saint Paul College has transfer agreements & partnerships between many post-secondary institutions. For more information please go to saintpaul.edu/Transfer.

Program Overview

This program is an excellent resume-building program, and gives students skills they can use for immediate employment in scientific industries or as a requirement for professional schools. Students in this program take core courses in research and obtain a solid background in science. Students do a semester long undergraduate research project with a faculty and/or industry mentor to gain unique hands-on experience.

Career Opportunities

Science and Engineering Technicians and technologists work in many aspects of the laboratory industry. They work in a variety of sub-fields, such as biotechnology, microbiology, nanotechnology, pharmaceutical research, chemical technology, science manufacturing, and materials engineering.

Technicians and technologists operate equipment and instrumentation, prepare samples for processing, monitor commercial production, test for product quality, and collect and analyze samples. They conduct a variety of laboratory procedures, from routine laboratory procedures to complex research projects.

Program Outcomes

1. Use appropriate scientific tools to design and conduct experiments and analyze results.
2. Communicate the results of experiments using appropriate scientific principles.
3. Solve science technology problems within real industrial constraints.
4. Act professionally and with ethical responsibility.

Engineering Broad Field AS DEGREE

Program Overview
Engineering is a profession that uses basic knowledge from the mathematical and natural sciences and utilizes the materials and forces of nature to develop systems that will perform optimally and economically for the benefit of mankind. The Engineering Broad Field program is designed to provide for a student's first two years of a four-year Engineering degree. The curriculum is designed to meet the needs of those students who have not yet decided on a specific engineering field. The program focuses on developing a fundamental knowledge of physics, chemistry, and mathematics.

Career Opportunities
Engineering occupations are expected to grow by more than 10% through 2020 according to the Bureau of Labor Statistics. Engineering includes careers with branches in civil, agricultural, chemical, electrical, mechanical, and aerospace sciences to name a few. This degree is part of a state-wide articulation program and designed to transfer easily.

Program Outcomes
1. Apply knowledge of mathematics and science in the solution of problems.
2. Conduct experiments as well as analyze and interpret results from experiments.
3. Apply iterative engineering design process to formulate, test and revise solutions to open-ended problems.

Transfer Opportunities
Saint Paul College has transfer agreements & partnerships between many post-secondary institutions. For more information please go to saintpaul.edu/Transfer.

## Program Requirements Guide 2022-2023

### Associate of Arts Degree

#### Mathematics Transfer Pathway

**Program Overview**

The Mathematics Transfer Pathway AA degree will prepare students for transfer to a baccalaureate program of study in a variety of mathematics fields. It lays a solid foundation for programs that include: applied mathematics, actuarial science, biomathematics, computer science, data science, engineering, pure/theoretical mathematics, statistics, and mathematics education.

**Career Opportunities**

Upon completion of the Math Transfer Pathway AA degree, students will have developed strong critical thinking, quantitative reasoning, computational, and analytical skills. They will be prepared to major or minor in a variety of fields that include: applied mathematics, actuarial science, biomathematics, computer science, data science, engineering, pure/theoretical mathematics, statistics, and mathematics education. With a degree in any of the areas mentioned above, they will have a variety of employment opportunities in government, private industry, and education.

**Program Outcomes**

1. Develop and analyze mathematical models.
2. Apply logical reasoning to solve a variety of problems.
3. Construct and verify simple mathematical proofs.
4. Navigate multiple perspectives through an attitude of respectful interest and curiosity by engaging in problem solving and discussion with a diverse group of students in mathematics.

**Transfer Opportunities**

Saint Paul College has transfer agreements & partnerships between many post-secondary institutions. For more information please go to saintpaul.edu/Transfer.

---

**Program Advisors**

Pathway Advisors are the Academic Advisors for the Associate of Arts degree and are located in the Advising Center, Room 1340, Main Floor. For assistance or additional information, please call our Advising Center at 651.846.1739 or email: advising@saintpaul.edu

**Additional Requirements**

- At least 60 earned college-level credits (40 MnTC credits and 20 additional MnTC, pre-major or elective credits)
- A grade of “C” or better in ENGL1711
- Associate of Arts (AA) cumulative GPA of 2.0
- Minnesota Transfer Curriculum (MnTC) cumulative GPA of 2.0
- Meet Saint Paul College residency requirement: 20 credits. This requirement may be reduced to 12 credits with transfer of at least 12 college-level credits from another Minnesota State College and University or the University of Minnesota.

**Program Start Dates**

Fall, Spring, Summer

**Course Sequence**

Students are allowed to take the courses in any sequence. However, all course prerequisites need to be followed. For specific suggestions, please speak with a Pathway Advisor or the program faculty. Students should consult with the Program Advisor each semester. Not all courses are offered each semester, a selection of courses is offered summer term.

**Minimum Program Entry Requirements**

Students entering this program must meet the following minimum program entry requirements:

**Reading:** Score of 250+ or grade of “C” or better in READ 0724 or READ 0722 or EAPP 0900

**Writing:** Score of 250+ on Reading Comprehension or grade of “C” or better in ENGL 0922 or EAPP 0900

**Adv. Algebra & Functions:** Score of 250+ or grade of “C” or better in MATH 0920

**Assessment Results and Prerequisites:**

Students admitted into Saint Paul College programs may need to complete additional courses based on assessment results and course prerequisite requirements. Certain MATH, READ, and ENGL courses have additional prerequisites.

---

Information is subject to change. This Program Requirements Guide is not a contract.
Program Overview
This program prepares students for jobs in the exciting computer graphics and animation field. Students will learn how to take an idea from concept through production including computer graphics, computer animation, sound and video.

Computer Graphics Specialists can work in a wide variety of creative jobs including web design, film and animation production, CD ROM production and any organization that can benefit from these special talents. With more and more animation moving to the desktop, the computer graphics specialist is becoming a high demand career.

The student should be creative and have excellent communication skills. Students should exhibit qualities of patience, and preciseness, and should enjoy working independently and on team projects.

Career Opportunities
The computer graphics field relates to many jobs in the multimedia area including but not limited to:
- Web Designer
- Computer Animator
- Computer Game Designer and Developer
- Multimedia Developer

Program Outcomes
1. Graduates will design multiple visual emphasis projects using industry standard software in both print and web formats.
2. Graduates will develop multiple websites using various HTML tools for both standard and mobile platforms.
3. Graduates will demonstrate fundamental animation techniques in both 2D and 3D environments.

Transfer Opportunities
Saint Paul College has transfer agreements & partnerships between many post-secondary institutions. For more information please go to saintpaul.edu/Transfer.

Students admitted into Saint Paul College programs may need to complete additional courses based on assessment results and course prerequisite requirements. Certain MATH, READ, and ENGL courses have additional prerequisites.
Visualization Technology CERTIFICATE

Program Overview
This certificate program is a series of entry level courses that are part of the Visualization Technology AAS degree at Saint Paul College.

This certificate option is available for students who may choose not to complete the entire AAS degree and gain some experience with courses used in computer graphics, particularly courses in the Adobe software suite.

Career Opportunities
The computer graphics field relates to many jobs in the multimedia area including but not limited to:
• Web Designer
• Computer Animator
• Computer Game Designer and Developer
• Multimedia Developer

Program Outcomes
1. Graduates will design multiple visual graphic projects using industry standard software in both print and web formats.
2. Graduates will demonstrate fundamental animation techniques in 2D animation.
3. Graduates will develop web based student portfolios to promote employment opportunities.

Program Faculty

Students entering this program must meet the following minimum program entry requirements:

Reading: Score of 225+
Arithmetic: Score of 200+

Assessment Results and Prerequisites:
Students admitted into Saint Paul College programs may need to complete additional courses based on assessment results and course prerequisite requirements. Certain MATH, READ, and ENGL courses have additional prerequisites.

Information is subject to change. This Program Requirements Guide is not a contract.
Program Overview
The Computer Animation Certificate is intended to give students the skills needed to work as a digital animator. The classes required for this certificate will have students learning the most up-to-date animation and video software packages including Blender, Flash, Premiere Pro, After Effects and other applications. Intensive hands-on participation will be stressed in creating 3D models, animations, and scenes. Emphasis is placed on practical, real-world application of their skills. Upon certificate completion, students will have multiple short animation projects suitable for a portfolio or demo reel.

Career Opportunities
Many career opportunities exist in the computer animation field, particularly for individuals with extensive portfolios. Jobs exist in the video game industry, web design and advertising focused on emerging technologies. Many computer animators begin their career as self-employed, freelancers, in order to expand their personal portfolio.

Program Outcomes
1. Graduates will design multiple mesh models within a 3D environment.
2. Graduates will apply industry standard techniques of lighting, texturing and animation to mesh models within a 3D environment.
3. Graduates will animate characters utilizing lip sync, forward kinematics, inverse kinematics and other industry standard practices.

Program Faculty
Darren Pearson
darren.pearson@saintpaul.edu

Students entering this program must meet the following minimum program entry requirements:

- Reading: Score of 250+ or grade of “C” or better in READ 0722 or READ 0724 or EAPP 0900
- Writing: Score of 250+ on Reading Comprehension or grade of “C” or better in ENGL 0922 or EAPP 0900
- Quant. Reasoning, Algebra & Stats: Score of 250+ or Adv. Algebra & Functions: Score of 215+ or grade of "C" or better in MATH 0910

Assessment Results and Prerequisites:
Students admitted into Saint Paul College programs may need to complete additional courses based on assessment results and course prerequisite requirements. Certain MATH, READ, and ENGL courses have additional prerequisites.

Degree option may have a greater requirement than this certificate.
Program Overview
CyberSecurity professionals work in a wide variety of information technology positions, but have a focus on information assurance, cyber ethics, and incident detection, investigation and response. Students completing this degree will be able to investigate and defend computer systems against cyber-attacks, unauthorized use or modification, and exploitation.

Students entering into this program of study should have excellent communication, reading and math skills. Throughout the program students will experience coursework that will help them develop skills such as critical thinking, performance monitoring, decision making and evaluating systems and organizations.

The CyberSecurity program at Saint Paul College is 60 credits in length. The program provides 16 credits specifically related to CyberSecurity which will aid students in the field and in potential certifications.

Career Opportunities
CyberSecurity professionals will find a growing need in both public and private employment sectors. Graduates will find excellent opportunities as systems administrators, network engineers, system programmers, and systems specialists.

Program Outcomes
1. Analyze multiple sources of network data to identify a security incident.
2. Troubleshoot hardware and software problems in a network environment.
3. Determine whether a computer system complies with national security standards.
4. Describe and identify password policies.
5. Install and configure basic host and network security.

Transfer Opportunities
Saint Paul College has transfer agreements & partnerships between many post-secondary institutions. For more information please go to saintpaul.edu/Transfer.

CyberSecurity CERTIFICATE

Program Overview
Note: Students must have completed the Computer Network Engineering AAS degree or have instructor approval.

CyberSecurity professionals work in a wide variety of information technology positions, but have a focus on information assurance, cyber ethics, and incident detection, investigation and response. Students completing this degree will be able to investigate and defend computer systems against cyber-attacks, unauthorized use or modification, and exploitation.

Students entering into this program of study should have excellent communication, reading and math skills. Throughout the program students will experience coursework that will help them develop critical skills such as critical thinking, performance monitoring, decision making and evaluating systems and organizations.

The CyberSecurity certificate program at Saint Paul College is 24 credits in length. The program provides 16 credits specifically related to CyberSecurity which will aid students in the field and in potential certifications.

Career Opportunities
CyberSecurity professionals will find a growing need in both the public and private employment sectors. Graduates will find excellent opportunities as systems administrators, network engineers, system programmers, and systems specialists.

Program Outcomes
1. Analyze multiple sources of network data to identify a security incident.
2. Determine if a computer system complies with national security standards.
3. Troubleshoot hardware and software problems in a network environment.
4. Describe and identify password policies.
5. Install and configure basic host and network security.

Total Program Credits | 24 |

Program Start Dates
Fall, Spring

Course Sequence
This course sequence is recommended for a full-time student; however, this sequence is not required. Not all courses are offered each semester; a selection of courses is offered every summer term. Students should consult with the Program Faculty each semester.

First Semester
CSCI 1440 Networking Fundamentals | 4
CSCI 2420 Computer Security | 4
CSCI 2482 Security Incident Handling, Response and Disaster Recovery (fall only) | 4
Total Semester Credits | 12

Second Semester
CSCI 2451 Computer Networking 2 - Server | 4
CSCI 2480 Network Security and Penetration Prevention (spring only) | 4
CSCI 2484 Ethical Hacking & Countermeasures (spring only) | 4
Total Semester Credits | 12

Total Program Credits | 24

Minimum Program Entry Requirements
Students entering this program must meet the following minimum program entry requirements:

Reading: Score of 250+ or grade of “C” or better in READ 0722 or READ 0724 or EAPP 0900
Writing: Score of 250+ on Reading Comprehension or grade of “C” or better in ENGL 0922 or EAPP 0900
Quant. Reasoning, Algebra & Stats: Score of 250+ or Adv. Algebra & Functions: Score of 215+ or grade of “C” or better in MATH 0910

Assessment Results and Prerequisites:
Students admitted into Saint Paul College programs may need to complete additional courses based on assessment results and course prerequisite requirements. Certain MATH, READ, and ENGL courses have additional prerequisites.

Information is subject to change. This Program Requirements Guide is not a contract.
Program Requirements Guide 2022-2023

Computer Science Transfer Pathway AS DEGREE

Program Overview
The Computer Science Transfer Pathway AS Degree is designed to provide students with opportunities for immediate employment or for transfer to four-year institutions. The College has developed articulation agreements with four-year institutions to assist students with their transfer goals. See a Pathway Advisor for further information. Students planning a career in this area should have above average mathematical reasoning and communication skills. Students should exhibit qualities of patience, and preciseness and enjoy working in a team environment.

Career Opportunities
Graduates of this program may choose to continue their education at a four-year institution in a Computer Science or related field. Others may elect to enter the workforce following graduation. Graduates will find opportunities in the computer science field in the areas of programming or database management in business, manufacturing, government and education. With additional education and experience, students may advance to positions such as Database Analyst, Systems Analyst, Software Developer or Programmer-Analyst.

Program Outcomes
1. Graduates develop and implement complex algorithms in computer-programming languages.
2. Graduates implement complex data structures to insure efficient program execution.
3. Graduates utilize sound mathematical principles to solve complex programming problems.
4. Graduates implement algorithms in programming languages utilizing proper coding conventions and appropriate documentation standards.
5. Graduates apply effective technical communication skills.

Management Information Systems  AS DEGREE

Program Overview
The Associate of Science Degree in Management Information Systems is designed to provide students with opportunities for immediate employment or for transfer to four-year institutions. The College has developed articulation agreements with four-year institutions to assist students with their transfer goals. See a Transfer Specialist for further information.

Students planning a career in this area should have above average mathematic reasoning and communication skills. Students should exhibit qualities of patience, perseverance, and preciseness, and should enjoy working in a team environment.

Career Opportunities
A management information system degree prepares the student for a career that combines business techniques and computer systems capability. Students study how to provide reporting and analysis using best practices in information technology.

Graduates will find opportunities in the information systems field in business, manufacturing, government and education.

With additional education and experience, students may advance to positions such as Systems Analyst, Software Architect and Business Analyst. Graduates of this program may choose to continue their education at a four-year institution in Management Information Systems or a related field. Others may elect to enter the workforce following graduation.

Program Outcomes
1. Analyze complex business processes to develop process improvements and comprehensive information system requirements specifications to support them.
2. Build and test information systems.
3. Utilize accounting and business systems information to develop recommendations for operating cost reduction and improved use of capital investment.
4. Demonstrate understanding of business systems, current technologies, organizational structures, communication tools, and critical thinking skills to help guide Management Information Systems success.
5. Apply effective technical communication skills.
6. Develop database applications using an industry standard database management system.
7. Demonstrate an understanding of computing and programming concepts.

Minimum Program Entry Requirements
Students entering this program must meet the following minimum program entry requirements:

- **Reading**: Score of 250+ or grade of “C” or better in READ 0722 or READ 0724 or EAPP 0900
- **Writing**: Score of 250+ on Reading Comprehension or grade of “C” or better in ENGL 0922 or EAPP 0900
- **Adv. Algebra & Functions**: Score of 250+ or grade of “C” or better in MATH 0920

Assessment Results and Prerequisites:
Students admitted into Saint Paul College programs may need to complete additional courses based on assessment results and course prerequisite requirements. Certain MATH, READ, and ENGL courses have additional prerequisites.
Program Overview
Networking Specialists can work in a wide variety of jobs. The work could include purchasing, installing, configuring, administering and/or supporting. Some jobs in networking could include computer network support, user training, installing and maintaining local and/or wide area networks.

The student should have excellent communication and math skills. For the certificate programs, the student is expected to have prior microcomputer and/or networking experience. He/she should exhibit qualities of patience, perseverance and preciseness and be a logical thinker. The student should enjoy working in a team environment and be able to work independently.

Career Opportunities
With almost every size company connected to some type of network, the jobs in networking have become the fastest growing jobs in the computer field. With companies networking to share resources and reduce expenses the networking specialist is an invaluable part of the new company structure. There is a wide variety of jobs in networking including installation, maintenance, training, managing and user support.

Graduates find excellent opportunities as Network Administrators, Network Support, and Certified Network Engineers in business, manufacturing, government and education. Jobs for Networking Specialists for all types of installations are found throughout the country with opportunities for excellent earnings and rapid advancement. Jobs include the following:
• Networking Engineer
• Network Help Desk Support
• Data Communications Specialist
• PC Network Administrator
• Information Specialist
• WAN Manager Network Administrator
• LAN Specialist
• Telecommunications Specialist
• Certified Network Engineer
• LAN Manager

Program Outcomes
2. Install, configure and maintain workstation and server based operating systems.
3. Explain the OSI model.
4. Develop programs and scripts needed to support network administration.
5. Troubleshoot hardware and software problems in a network environment.

  - COMM 17XX – 3 cr
  - Goal 3 or Goal 4: 3
  - Goal 3: Natural Sciences
  - OR Goal 4: Mathematical/Logical Reasoning (MATH 1730 or proficiency required)
  - Goal 5: History, Social Science and Behavioral Sciences: 3
  - Goal 6: Humanities and Fine Arts: 3
  - **Total Education Requirements:** 16

**Total Program Credits:** 60

**The following courses are not offered every semester.**

### Fall Semester Only
- CSCI 1452 Java Programming 2
- CSCI 2442 Server Side Programming
- CSCI 2622 Client Side Programming 2
- DGIM 1490 3D Animation Fundamentals
- DGIM 2530 Web Based Game Design 1
- DGIM 2560 Illustrator
- DGIM 2586 Digital Sound

### Spring Semester Only
- CSCI 2440 Client Side Programming 1
- CSCI 2466 J2EE-JSP and Servlets
- DGIM 2521 2D Web Animation
- DGIM 2531 Web Based Game Design 2

All other courses are offered both fall and spring semester pending course enrollment.

**CSCI 1410, CSCI 1550, and General Education requirements are offered in the fall, spring, and summer.**

*See back of this guide for Course Sequence, Transfer Opportunities & Course Chart*

**Minimum Program Entry Requirements**

Students entering this program must meet the following minimum program entry requirements:

### Reading
- Score of 250+ or grade of “C” or better in READ 0722 or READ 0724 or EAPP 0900

### Writing
- Score of 250+ on Reading Comprehension or grade of “C” or better in ENGL 0922 or EAPP 0900

### Adv. Algebra & Functions
- Score of 250+ or grade of “C” or better in MATH 0920

**Assessment Results and Prerequisites:**

Students admitted into Saint Paul College programs may need to complete additional courses based on assessment results and course prerequisite requirements. Certain MATH, READ, and ENGL courses have additional prerequisites.
## Computer Programming  AAS DEGREE (continued)

(44 credits + 16 GenEd credits)

### Program Start Dates
Fall, Spring, Summer

### Course Sequence
The following sequence is recommended for a full-time student; however, this sequence is not required. Not all courses are offered each semester.

#### First Semester

- **CSCI 1410** Computer Science & Information Systems .......................... 4
- **CSCI 1423** Computer Networking – Client ........................................... 4
- **CSCI 1450** Web Fundamentals/HTML .................................................. 4
- Goal 3: Natural Sciences OR
  - Goal 4: Mathematical/Logical Reasoning ........................ 3
  - (MATH 1730 or proficiency required)
- **Total Semester Credits** ................................................................. 15

#### Second Semester

- **CSCI 1523** Intro to Computing and Programming Concepts ................. 4
- Goal 1: ENGL 1711 Composition ......................................................... 4
- Emphasis Course ............................................................................... 4
- **CSCI 1541** Java Programming I .......................................................... 4
- **Total Semester Credits** ................................................................. 16

#### Third Semester

- **CSCI 1524** Intro to Algorithms and Data Structures ...................... 4
- Goal 1: COMM 17XX ........................................................................... 3
- Emphasis Course(s) ........................................................................... 8
- **Total Semester Credits** ................................................................. 15

#### Fourth Semester

- **CSCI 2570** Machine Architecture and Organization .................. 4
- Goal 5: History, Social and Behavioral Sciences ......................... 3
- Goal 6: Humanities and Fine Arts .................................................. 3
- Emphasis Course(s) ........................................................................... 4
- **Total Semester Credits** ................................................................. 14
- **Total Program Credits** ............................................................... 60

### Transfer Opportunities
Saint Paul College has transfer agreements & partnerships between many post-secondary institutions. For more information please go to saintpaul.edu/Transfer.

The below chart illustrates the courses required for completion of this degree.

#### Introductory

- **CSCI 1410** Computer Science & Information Systems
- **CSCI 1423** Computer Networking 1 - Client
- **CSCI 1450** Web Fundamentals/HTML

#### Intermediate

- **CSCI 1523** Intro to Computing and Programming Concepts
- **CSCI 1541** Java Programming I
- **MATH 1730** College Algebra (or proficiency)
- **CSCI 1524** Intro to Algorithms and Data Structures

#### Advanced

- **CSCI 2570** Machine Architecture & Organization
- **CSCI XXXX** Intermediate Programming Course
- **CSCI XXXX** Advanced Programming Course
- **CSCI XXXX** Intermediate Programming Course
- **CSCI XXXX** Advanced Programming Course
- **CSCI XXXX** Advanced Programming Course
Program Requirements Guide 2022-2023

Network Administration CERTIFICATE

Program Overview
The Network Administration Certificate is designed for individuals who already have acquired at least a minimum level of technical computer skills, either through previous education, training, and/or experience. It is designed to enhance one's current computer knowledge and skills.

Networking Specialists can work in a wide variety of jobs. The work could include purchasing, installing, configuring, administering, and/or supporting. Some jobs in networking could include help desk support, user training, installing and maintaining local and/or wide area networks.

The student should have excellent communications and math skills. For the certificate programs the student is expected to have prior microcomputer and/or networking experience. He/she should exhibit qualities of patience, perseverance, and preciseness and be a logical thinker. The student should enjoy working in a team environment, and be able to work independently. All networking programs emphasize preparation for either the Microsoft Certified System Administration or Linux Professional Institute (LPI) Certification.

Career Opportunities
With almost every size company connected to some type of network, the jobs in networking have become the fastest growing jobs in the computer field. With companies networking to share resources and reduce expenses the networking specialist is an invaluable part of the new company structure. There is a wide variety of jobs in networking including installation, maintenance, training, managing and user support.

Graduates find excellent opportunities as Network Administrators, Network Support, and Certified Network Engineers in business, manufacturing, government and education. Jobs for Networking Specialists for all types of installations are found throughout the country with opportunities for excellent earnings and rapid advancement. Jobs include the following:

- Networking Engineer
- Network Help Desk Support
- Data Communications Specialist
- PC Network Administrator
- Information Specialist
- WAN Manager
- Network Administrator
- LAN Specialist
- Telecommunications Specialist
- Certified Network Engineer
- LAN Manager

Program Outcomes
1. Design, construct, and maintain computer networks.
2. Install, configure, and maintain workstation based operating systems.
3. Explain the OSI model.
4. Troubleshoot hardware and software problems in a network environment.
5. Install and configure basic host and network security.

Java Programming CERTIFICATE

Program Overview
This is a 24 credit certificate program exploring the Java programming language and computing platform. The certificate includes a foundation course in computer science, a web fundamentals course, and an in-depth study of databases. It then features a two-course sequence in Java programming and a course in Java for web development. This certificate may be completed apart from a degree program or may be selected as an emphasis in the Computer Programming AAS degree.

The student should have above average communications and math skills. He/she should exhibit qualities of patience, perseverance, and preciseness, and should enjoy working in a team environment and also be able to work independently. All programs emphasize training for industry certification.

Career Opportunities
Graduates find excellent opportunities as computer programmers in business, manufacturing, government, and education. Jobs for computer programmers for all types of computer systems are found throughout the country with opportunities for good earning and rapid advancement.

Program Outcomes
1. Design and code computer programs in the Java programming language.
2. Develop database applications using an industry standard database management system.
3. Develop a Java program to create, modify, and manipulate a relational database.
4. Apply effective technical communication skills.
5. Develop static web pages.

Program Requirements Guide 2022-2023

Web Based 2D Game Development CERTIFICATE

Program Overview
This is a 24 credit certificate program exploring video game creation. The certificate is ideal for students who want to acquire skills needed for game design and programming. The certificate will utilize HTML5, Javascript, Tumult Hype and Phonegap to recreate classic video games for both the Desktop and mobile platforms. The capstone class will introduce students to some of the concepts of mobile app development for both the iPhone and Android platforms. This certificate may be completed apart from a degree program or may be selected as an emphasis in the Computer Programming AAS degree.

The student should have above average communications and math skills. He/she should exhibit qualities of patience, perseverance, and preciseness, and should enjoy working in a team environment and also be able to work independently. All programs emphasize training for industry certification.

Career Opportunities
Graduates find excellent opportunities as computer programmers in business, manufacturing, government and education. Jobs for computer programmers for all types of computer systems are found throughout the country with opportunities for good earning and rapid advancement.

Program Outcomes
1. Graduates will design and code gaming software applications.
2. Graduates will apply industry standard design skills to support their applications.
3. Graduates will apply design and programming skills to non-game web projects.
4. Graduates will apply best practices for performing effective web usability tests.

Web Development CERTIFICATE

Program Overview
This is a 24 credit certificate program providing a foundation in current web technologies. It features a two course sequence in client side programming including AJAX, and also coverage of at least two current server side technologies for database driven development. It includes popular technologies like Ruby on Rails and JSP/Servlets. This certificate may be completed apart from a degree program or may be selected as an emphasis in the Computer Programming AAS degree.

Career Opportunities
Graduates find excellent opportunities as computer programmers in business, manufacturing, government and education. Jobs for computer programmers for all types of computer systems are found throughout the country with opportunities for good earning and rapid advancement.

Program Outcomes
1. Graduates will code production web applications based on standard client and server side technologies.
2. Graduates will employ industry standard database management systems to support their applications.
3. Graduates will create responsive, mobile friendly web applications using standard industry practices.

Data Science AS DEGREE

Program Overview
Data Science uses the techniques and theories from many different fields of study including mathematics, statistics, computer science, and information theory. Data scientists sort through great amounts of unstructured data such as emails, videos, social media, and other user-generated content and write algorithms to extract insights from the data. In essence, they turn data into knowledge.

Students entering into this program of study will learn to collect, manage, interpret and analyze data in order to assist in making data-informed decisions for the benefit of a company or organization.

Career Opportunities
There is a growing need for individuals who have the skills to effectively collect and analyze data to make informed, data-driven decisions. Jobs for data scientists, business intelligence analysts, data mining analysts and other data science professions have emerged across all industries that use data extensively, including government, business, healthcare, online commerce and more.

Program Outcomes
1. Gather, cleanse and store large data sets for future analysis.
2. Manage large scale databases in specialized data management systems.
3. Analyze large data sets using specialized software.
4. Utilize sound mathematical and statistical principles to give meaning to data found in large data sets.
5. Apply effective technical communication skills.
6. Develop database applications using an industry standard database management system.
7. Design and code computer programs in a variety of computer-programming languages.

Transfer Opportunities
Saint Paul College has transfer agreements & partnerships between many post-secondary institutions. For more information please go to saintpaul.edu/Transfer.

Minimum Program Entry Requirements
Students entering this program must meet the following minimum program entry requirements:

Reading: Score of 250+ or grade of “C” or better in READ 0722 or READ 0724 or EAPP 0900
Writing: Score of 250+ on Reading Comprehension or grade of “C” or better in ENGL 0922 or EAPP 0900
Quant. Reasoning, Algebra & Stats: Score of 270+ or Adv. Algebra & Functions: Score of 250+ or grade of “C” or better in MATH 0920

Assessment Results and Prerequisites:
Students admitted into Saint Paul College programs may need to complete additional courses based on assessment results and course prerequisite requirements. Certain MATH, READ, and ENGL courses have additional prerequisites.

Information is subject to change. This Program Requirements Guide is not a contract.
Program Overview
GIS is an acronym for Geographic Information Science. The GIS Associate of Applied Science degree will prepare students for entry level positions in various industries that require geospatial skills and thinking or for transitioning to four-year baccalaureate programs. Students completing this degree will be able to create and import digital special data representing real-world features from the surface of the Earth with the goal of viewing, manipulating, and analyzing the data to be distributed and used in decision making.

Duties for many positions requiring GIS skills typically involve a combination of outside field work and indoor computer work. While outside, raw spatial data is often collected with GPS devices for a variety of features. Some examples include the location of trees, fountains, utility poles, underground pipelines, soil sample sites, endangered species, and more. The working environment may be in a dense urban area or remote national park, depending on the employer. While inside, digital special data are imported from your GPS devices into a computer where the data is assessed for quality and revised/manipulated if necessary. Remotely sensed data from various sensors and online archives may also be used to generate additional information. GIS employees typically coordinate with other experts (e.g. geologists, business operations specialists, hydrologists, farmers, and urban planners) to discuss the scientific and managerial implications of their work.

Career Opportunities
There are abundant opportunities for employment as a GIS Analyst, GIS Technician, or GIS Specialist in a wide variety of businesses, universities, government agencies, and non-profit organizations. Employees with strong GIS skills are highly coveted in the oil and gas industry, biological and environmental sciences research, natural resource management, government agencies focus on mapping and analyzing infrastructure, intelligence collection by federal agencies, and various business groups. GIS professionals also have ample opportunity to advance into more highly-skilled positions or managerial and leadership positions.

Program Outcomes
1. Graduates will possess fundamental and applied skills in GIS such as making maps, working with rasters and vectors, geometric accuracy, georeferencing, map projections, spatial analysis, Boolean logic, scripting, remote sensing, air photo interpretation, etc.
2. Graduates will develop a working knowledge of the most popular GIS software, ArcGIS from ESRI.
3. Graduates will develop a working knowledge of GPS devices used by a multitude of businesses and government agencies.

Transfer Opportunities
Saint Paul College has transfer agreements & partnerships between many post-secondary institutions. For more information please go to saintpaul.edu/Transfer.

Minimum Program Entry Requirements
Students entering this program must meet the following minimum program entry requirements:
Reading: Score of 250+ or grade of “C” or better in READ 0722 or READ 0724 or EAPP 0900
Writing: Score of 250+ on Reading Comprehension or grade of “C” or better in ENGL 0922 or EAPP 0900
Quant. Reasoning, Algebra & Stats: Score of 270+ or Adv. Algebra & Functions: Score of 250+ or grade of “C” or better in MATH 0920

Assessment Results and Prerequisites:
Students admitted into Saint Paul College programs may need to complete additional courses based on assessment results and course prerequisite requirements. Certain MATH, READ, and ENGL courses have additional prerequisites.

Program Start Dates
Fall, Spring, Summer
– only General Education courses & GISC 1785

Course Sequence
Not all courses are offered each semester; a selection of courses is offered summer term
Students should consult with the Program Faculty each semester.

First Semester
GISC 1760 Introduction to GIS ..................... 4
GISC 1765 Cartography .................................. 3
GISC 1770 Spatial Thinking ........................... 3

Geographic Information Science CERTIFICATE

Program Overview
In order to be admitted to the Geographic Information Science certificate program, the student must have completed an associate degree or baccalaureate degree, or receive instructor approval if currently pursuing an associate degree in another discipline.

The Geographic Information Science certificate program is designed to introduce students to fundamental concepts in GIS and prepare them for entry level positions in various industries that require some knowledge and understanding of GIS. Students completing the GIS certificate program will learn how to solve problems and support the decision making process by collecting, viewing, manipulating, and mapping digital spatial data. There will be ample opportunities in the classes for students to pursue independent GIS projects related to their interests.

Career Opportunities
Duties for most positions requiring skills obtained from the GIS Certificate program are highly variable. Some employees spend much of their time working in an office with cutting-edge GIS software, but others are outside in the field most of the time providing support for data collection activities. For instance, in a retail setting, employees may provide technical insight for modeling the most appropriate location of new stores based on a variety of variables such as distance to existing stores, population density, and demographics. In an environmental science setting, employees may identify and map locations of invasive species or provide support in developing a watershed analysis geared to improve water quality.

Most employment opportunities relevant to the GIS Certificate will be listed under a wide range of specialties in various sectors (e.g., environment field technician, business support analyst, computer programmer, etc.) where GIS is not mentioned in the title, but is a preferred skill. The opportunity you are best suited for will be shaped by your previous and ongoing education and work experience.

Program Outcomes
1. Basic skills for working with digital spatial data in a GIS environment. This includes a fundamental understanding of rasters, vectors, map projections, coordinate systems, and cartography.
2. Solid understanding of ArcGIS from ESRI.
3. Working knowledge of Trimble GPS units.

Course descriptions are subject to change. The most current course descriptions are available at: saintpaul.edu/CourseSchedule.
The following course descriptions are alphabetized by academic program area. Each course description includes a course number and title, description of the course, a listing of any required prerequisites and the number of credits. The credit listing includes the lecture, lab and/or on-the-job breakout. For example, 4C/3/1/0 shows that the course is 4 credits with 3 credits of lecture, 1 credit of lab and 0 credits of on-the-job training. Minnesota Transfer Goals are indicated by (MnTC: Goal(s) “goal number”).

**Accounting**

**ACCT 1410 Introduction to Accounting**
Introduces the fundamental accounting concepts and principles used to analyze and record business transactions. Topics include transaction analysis, double-entry accounting, and the accounting cycle process. Examples are drawn from service and merchandising organizations. 2C/2/0/0

**ACCT 1511 Federal Taxation 1**
Introduces students to the basic issues and concepts of taxation principles. Students observe federal tax laws as applied to the preparation of the Form 1040 and related schedules. Tax preparation software is utilized for case projects. (Prerequisite(s): ACCT 1411 or ACCT 2410) 4C/4/0/0

**ACCT 1512 Federal Taxation 2**
Introduces students to the fundamentals of tax law regarding business federal income taxation. Planning issues of estates and gift taxation are part of this course. Tax preparation software is utilized for case projects. (Prerequisite(s): ACCT 1411 or ACCT 2410) 4C/4/0/0

**ACCT 1515 Payroll Processing**
This course covers Federal and State laws related to compensation calculations, payment of salaries and wages, and related taxes. Also, included are hiring and termination laws. Topics include employment recordkeeping requirements, preparation of the payroll register, individual earnings records, and payroll related forms and reports. 3C/3/0/0

**ACCT 1523 Accounting Computer Applications**
Designed to combine the theory of financial accounting principles with accounting software applications. The course will cover the basic design of accounting software and students will develop an analytical understanding of its properties. Special emphasis will be placed on applying the theory of accounting to the practice of using an accounting software package. 3C/3/0/0

**ACCT 2410 Financial Accounting**
This course in financial accounting acquaints students with the concepts and practices of accounting to be able to interpret and analyze the financial accounting reports of economic entities. Topics include: economic context of accounting; introduction to basic financial statements, measurement fundamentals; analysis of financial statements; cash; receivables; inventories; investments in equity and debt securities; long-lived assets; current and long-term liabilities; stockholders’ equity; and financial performance measurement. 4C/4/0/0

**ACCT 2411 Intermediate Accounting**
Covers financial reporting using generally accepted accounting principles and concepts relating to income determination, revenue recognition and asset valuation. (Prerequisite(s): ACCT 2420 or ACCT 1513) 4C/4/0/0

**ACCT 2420 Managerial Accounting**
This course provides an introduction to the role of financial and managerial information in planning and control decisions, and the role of the management accountant in the organization. It emphasizes the concepts and practices of management accounting including cost behaviors, contribution margins, job, and process costing, budgeting, standard costs and variance analysis, and other managerial accounting best practices. Students analyze the management decision-making process via problem solving and case analysis. Understand the differences between managerial and financial accounting. (Prerequisite(s): ACCT 2410) 4C/4/0/0

**ACCT 2540 Financial Modeling for Spreadsheets**
Designed to unify financial accounting theory with financial functions and formulas. This course covers elements of financial modeling with the time value of money. Present value and future value concepts are defined and utilized in this course. (Prerequisite(s): ACCT 1410 or ACCT 2410) 4C/4/0/0

**ACCT 2591 Accounting Internship**
A cooperative work-student program between Saint Paul College Accounting Program and a business facility to allow the student an employment-like experience. (Prerequisite(s): Instructor approval) Variable credits 2-8

**American Sign Language**

**ASLS 1411 American Sign Language 1**
Introduction to American Sign Language (ASL), a visual/gestural language used by the Deaf Community. Course covers sign vocabulary, sentence structures, dialogue formats through facial expressions and body movements used in signing. (MnTC: Goal 8) 3C/3/0/0

**ASLS 1412 American Sign Language 2**
A continuation of ASLS 1411, designed to expand students’ conversational range from talking about themselves to talking about other people and activities, giving directions, describing people and making requests. (Prerequisite(s): ASLS 1411 with a grade of “C” or better) (MnTC: Goal 8) 3C/3/0/0

**ASLS 1413 American Sign Language 3**
A continuation of ASLS 1412, designed to expand students’ comprehension and sign language production skills. Through meaningful communication contexts, students will use communicative functions which include locating things, asking for solutions, discussing life events and describing objects. Use of appropriate cultural behaviors and strategies for conversational management is stressed. Receptive and expressive fingerspelling and information about the deaf community will further enhance the learning process. (Prerequisite(s): ASLS 1412 with a grade of “C” or better) (MnTC: Goal 8) 3C/3/0/0

**ASLS 1414 American Sign Language 4**
A continuation of ASLS 1413 provides more complex ASL grammatical features, communicative functions and receptive fingerspelling and numbers. Cultural features will be stressed to develop competency and fluency in the language. (Prerequisite(s): ASLS 1413 with a grade of “C” or better) (MnTC: Goal 8) 3C/3/0/0

**ASLS 1415 American Sign Language 5**
This course is an ongoing instruction of American Sign Language covering communicative functions, sign vocabulary, fingerspelling, grammar and cultural aspects of the Deaf Community. At the completion of ASL 5, each student shall be able to use these language functions and conversational behaviors appropriately in ASL. (Prerequisite(s): ASLS 1414 with a grade of “C” or better) 3C/3/0/0

**ASLS 1420 ASL Linguistics**
Introduces students to the linguistics of American Sign Language (ASL). Students study the major features of language structures and the
underlying knowledge for the social uses of American Sign Language. Content includes an examination of the structure of the physical signals of ASL, the customary patterns for combining them and the influence of signs on one another in connected discourse. (Prerequisite(s): ASLS 1414 with a grade of "C" or better) 4C/4/0/0

**ANTH 1720 Introduction to Physical Anthropology**

This course examines human biological evolution and variation from the perspective of morphological and cultural adaptation. Discussion addresses the basis of human biology, including genetics, physiology, population dynamics, and adaptive mechanisms. Primates and human ancestors are explored as a comparative model of contemporary human behavior and social organization. The frameworks and arguments of fossil and archaeological evidence are investigated. Modern human biological diversity and adaptations are analyzed, with attention to disease environments and misconceptions of “race.” (Prerequisite(s): READ 0721 or READ 0724 or EAPP 0860 with a grade of "C" or better, or appropriate assessment score) (MnTC: Goals 5 & 7) 4C/4/0/0

**ANTH 1730 Gender and Culture in Global Perspective**

This course examines how sex, gender, and sexuality are culturally constructed through social structures, and how these influence the biological distinctions of male, female, and intersex individuals. Through a comparative approach, we will survey gender roles, values, and relative rank in various socioeconomic levels, including hunter-gatherer, horticultural, pastoral, agricultural, and industrial. Other material to explore will include the intersection between gender, race, class, and sexuality; the origins and consequences of patriarchy; the impact of the global economy on gender identities and self-perceptions; gender, politics, and social change; and the status of women and men in different kinship systems and families, and the power that accrues to them. (Prerequisite(s): READ 0721 or READ 0724 or EAPP 0860 with a grade of "C" or better, or appropriate assessment score) (MnTC: Goals 5 & 10) 4C/4/0/0

**ANTH 1790 Special Topics in Anthropology**

This course is designed to present additional or unique material and learning experiences within a specified discipline. The course will be based on student need, flexibility, and may be designed to meet various transfer and pre-major course requirements. Please see a current Course Schedule for complete course details. (Prerequisite(s): READ 0721 or READ 0724 or EAPP 0860 with a grade of "C" or better, or appropriate assessment score) (MnTC: Goal 5) Variable credits 1-6

**Arabic**

**ARAB 1310 Beginning Arabic 1**

Beginning Arabic introduces students to the classic, contemporary Arabic language, including the written alphabet and sound system. In this course you will develop basic listening, speaking, reading and writing skills necessary to communicate about self, family and daily life. You will also explore cultural aspects of the Arabic-speaking world, as well as various dialectical variations in the Arabic-speaking world. (Prerequisite(s): READ 0721 or READ 0724 or EAPP 0860 with a grade of "C" or better, or appropriate assessment score) (MnTC: Goal 8) 5C/5/0/0

**ARAB 1320 Beginning Arabic 2**

This course is a continuation of Arabic 1. You will learn the use of past tense structures and pronoun usage. You will continue to develop listening, speaking, reading, and writing skills necessary to communicate about self, family, and daily life, as well as abstract concepts such as feelings and emotions: You will continue exploring cultural aspects of the Arabic-speaking world. (Prerequisite(s): ARAB 1310 Beginning Arabic 1 with grade of "C" or better) (MnTC: Goal 8) 5C/5/0/0

**Anthropology**

**ANTH 1710 Introduction to Cultural Anthropology**

This course introduces students to the concept of culture, anthropological methods and theories, and the unity and diversity of the human species. Culture is the means by which human beings adapt to their environment, structure their societies, and give meaning to life. The course surveys the similarities and differences of the complex whole of human culture, including: subsistence strategies; economics; marriage, family and kinship; gender; political organization; inequality; religion; colonialism; and globalization. There is a focus on current issues and problems, and their relationship to societal and global matters. (Prerequisite(s): READ 0721 or READ 0724 or EAPP 0860 with a grade of "C" or better) 4C/4/0/0

**ANTH 1715 Classifiers**

Introduces students to the fundamentals of American Sign Language (ASL) classifiers. Students will enhance and expand the use of classifiers in their expressive skills and the recognition of classifiers in their receptive skills. (Prerequisite(s): ASLS 1420 with a grade of “C” or better) 3C/3/0/0

**ANTH 1713 Deaf Studies/Culture**

This course is designed to help students understand and appreciate Deaf Culture and the Deaf Community. Deaf history, historical and modern-day perspectives, deafness and its impact, Deaf Culture/Community characteristics, education, communication modes/ languages used by deaf people and the ramifications and impact of American Sign Language and Deaf Culture upon the lives of deaf and non-deaf Minnesotans. (Prerequisite(s): ASLS 1420 with a grade of “C” or better) 3C/3/0/0

**ANTH 1714 ASL Fingerspelling and Numbers**

This course introduces the students to the fundamentals of fingerspelling/lexicalized fingerspelling and the complex rules and patterns of ASL numbers systems. This course develops expressive and receptive fingerspelling and number skills. Receptive skills focus on whole-word recognition, distinction among different number systems, phrase recognition, and identifying fingerspelled words and numbers in context. Expressive skills focus on the development of speed, clarity, and fluency. (Prerequisite(s): ASLS 1414 American Sign Language 4 with a grade of “C” or better.) 3C/3/0/0

**ANTH 1712 ASL Non-Manual Markers**

This course is designed to expand students’ sign vocabulary by analyzing multiple-meaning words and various sign equivalents. Language learning activities will focus on nouns-verbs, sentence types, classifiers, inflection of verbs with temporal aspect and distributional aspect. (Prerequisite(s): ASLS 1414 with grade of “C” or better) 3C/3/0/0

**ANTH 1716 ASL Non-Manual Markers 2**

This course covers the non-manual aspect of the language. The use of the face, eyes and head to convey grammatical information will be covered. Students will analyze specific features. Other topics include ASL ‘mouthing’, showing emotion and inappropriate facial behaviors. (Prerequisite(s): ASLS 1420 with grade of “C” or better) 2C/2/0/0

**ANTH 1717 ASL Non-Manual Markers 3**

This course is designed to introduce students’ sign vocabulary by analyzing multiple-meaning words and various sign equivalents. Language learning activities will focus on nouns-verbs, sentence types, classifiers, inflection of verbs with temporal aspect and distributional aspect. (Prerequisite(s): ASLS 1414 with grade of “C” or better) 3C/3/0/0

**ANTH 1718 ASL Non-Manual Markers 4**

This course is designed to introduce students’ sign vocabulary by analyzing multiple-meaning words and various sign equivalents. Language learning activities will focus on nouns-verbs, sentence types, classifiers, inflection of verbs with temporal aspect and distributional aspect. (Prerequisite(s): ASLS 1414 with grade of “C” or better) 3C/3/0/0

**ANTH 1719 ASL Non-Manual Markers 5**

This course is designed to introduce students’ sign vocabulary by analyzing multiple-meaning words and various sign equivalents. Language learning activities will focus on nouns-verbs, sentence types, classifiers, inflection of verbs with temporal aspect and distributional aspect. (Prerequisite(s): ASLS 1414 with grade of “C” or better) 3C/3/0/0

**ANTH 1720 Introduction to Physical Anthropology**

This course examines human biological evolution and variation from the perspective of morphological and cultural adaptation. Discussion addresses the basis of human biology, including genetics, physiology, population dynamics, and adaptive mechanisms. Primates and human ancestors are explored as a comparative model of contemporary human behavior and social organization. The frameworks and arguments of fossil and archaeological evidence are investigated. Modern human biological diversity and adaptations are analyzed, with attention to disease environments and misconceptions of “race.” (Prerequisite(s): READ 0721 or READ 0724 or EAPP 0860 with a grade of “C” or better, or appropriate assessment score) (MnTC: Goals 5 & 7) 4C/4/0/0

**ANTH 1730 Gender and Culture in Global Perspective**

This course examines how sex, gender, and sexuality are culturally constructed through social structures, and how these influence the biological distinctions of male, female, and intersex individuals. Through a comparative approach, we will survey gender roles, values, and relative rank in various socioeconomic levels, including hunter-gatherer, horticultural, pastoral, agricultural, and industrial. Other material to explore will include the intersection between gender, race, class, and sexuality; the origins and consequences of patriarchy; the impact of the global economy on gender identities and self-perceptions; gender, politics, and social change; and the status of women and men in different kinship systems and families, and the power that accrues to them. **ARAB 1320 Beginning Arabic 2**

This course is a continuation of Arabic 1. You will learn the use of past tense structures and pronoun usage. You will continue to develop listening, speaking, reading, and writing skills necessary to communicate about self, family, and daily life, as well as abstract concepts such as feelings and emotions: You will continue exploring cultural aspects of the Arabic-speaking world. (Prerequisite(s): ARAB 1310 Beginning Arabic 1 with grade of “C” or better) (MnTC: Goal 8) 5C/5/0/0
ARTS 1713 Photography 1
This is a course devoted to introducing photography as a medium of creative expression and visual communication. Students are introduced to 35mm film cameras and the techniques used in the darkroom to create black and white photographs. Initial assignments address technical proficiency and then the emphasis transitions towards creative exploration, aesthetics, and meaning. Classroom discussion will also establish a fundamental relationship between digital and film photography. A $200 camera deposit will be collected from students who borrow a film SLR camera. The deposit will be refunded at the end of the semester provided the camera is returned undamaged and in suitable working condition. (Prerequisite(s): READ 0722 or READ 0724 or EAPP 0900 with a grade of “C” or better, or appropriate assessment score) (MnTC: Goal 6) 3C/1/2/0

ARTS 1714 Photography 2
This is a course devoted to fostering the skills and proficiency established in Photography 1 and allows students to experience a more meaningful amount of time to produce a body of creative work concentrating on one topic or thematic element. The intention of this course is for each student to produce a unique, high-quality, photographic portfolio that showcases technical and conceptual understanding of the photographic medium with the artwork produced. The accompanying lab section will dictate whether the student continues working in a darkroom or transitions into the digital photography lab. A $200 camera deposit will be collected from students who borrow a camera. The deposit will be refunded at the end of the semester provided the camera is returned undamaged and in suitable working condition. (Prerequisite(s): ARTS 1713 Photography 1 with a grade of “C” or better) (MnTC: Goal 6) 3C/1/2/0

ARTS 1717 Photography 3
Photography 3 will build on the foundational skills of photography as an art form learned in the first two semesters of Photography coursework. We will continue to emphasize composition, exposure, camera work and advanced printing techniques to further enhance the capability of personal expression available in the medium. The class will explore professional practices in photography, complete a collaborative assignment, explore advanced printing techniques and opportunities, and develop skills to produce a portfolio of high quality black and white or color photographs. (Prerequisite(s): ARTS 1714 Photography 2 with a grade of “C” or better) (MnTC: Goal 6) 3C/1/2/0

ARTS 1720 Art Appreciation
This is an introductory “learning to look” course with the objective of developing students’ ability to see, understand and enjoy the visual arts. Examples of painting, sculpture and architecture from around the world will be viewed, discussed and analyzed in class. Students will also learn about the materials and processes of art making. Course includes visits to local art museum(s). (Prerequisite(s): READ 0721 or READ 0724 or EAPP 0860 with a grade of “C” or better, or appropriate assessment score) (MnTC: Goal 6 & 8) 3C/3/0/0

ARTS 1722 American Animation
This course looks at animation as an art form and cultural product. We will consider animation within the contexts of American popular culture, media history and socio-political history. We will explore technical and aesthetic advancements from the early animation devices of the nineteenth century to the current and emerging digital technologies of today. Our studies will take us through the classic cartoons of Winsor McCay, Max Fleischer, The Walt Disney Company and Warner Bros. to the latest creations of Pixar and South Park Studios. (Prerequisite(s): READ 0722 or READ 0724 or EAPP 0900 with a grade of “C” or better, or appropriate assessment score) (MnTC: Goals 6 & 7) 3C/3/0/0

ARTS 1724 The Design of Everyday Life
Design is a powerful cultural force that surrounds us wherever we go. This course provides students with the basic historical and analytical tools to understand the impact of design on our day-to-day lives, objects, communication materials and environments. Lessons will cover the main movements, trends and issues in design, from the end of the nineteenth century through today. Visual examples will range from furniture to advertisements, industrial design to digital media. (Prerequisite(s): READ 0722 or READ 0724 or EAPP 0900 with a grade of “C” or better, or appropriate assessment score) (MnTC: Goals 6 & 7) 3C/3/0/0

ARTS 1726 Art in the Cities
This course takes an experiential approach to learning about the visual arts. Through visits to museums, galleries, studios and historic sites, students will become familiar with some of the cultural resources available in Minneapolis and Saint Paul. We will study art representing various media, artistic philosophies, historical contexts and the multiculturalism of the Twin Cities. Weekly readings, papers and a final project emphasize the development of critical thinking, visual analysis, and writing skills. Students will be responsible for their own transportation. (Prerequisite(s): READ 0722 or READ 0724 or EAPP 0900 with a grade of “C” or better, or appropriate assessment score) (MnTC: Goals 6 & 7) 3C/3/0/0

ARTS 1730 Drawing 1
This course will focus on techniques and strategies for improving observational drawing abilities. Through hands-on drawing exercises, students will learn to depict the world around them and the human form with greater accuracy. (MnTC: Goal 6) 3C/1/2/0

ARTS 1731 Drawing 2
This course continues the development of skills and techniques learned in Drawing 1. This course emphasizes observing relationships, line and value to enhance experimental and personal expression; introduces techniques for drawing in color, incorporates figure drawing, and includes the study of influential artists throughout the history of art, concentrating on contemporary means of expression. Students design art projects and complete a portfolio. (Prerequisite(s): ARTS 1730 Drawing 1 with a grade of “C” or better) (MnTC: Goal 6) 3C/1/2/0

ARTS 1732 Two-Dimensional Design
Learn the foundational principles of two-dimensional design so you can make dynamic visual compositions and communicate ideas through images. Discuss how artists and designers arrange the elements of design to affect how viewers think and feel. Engage in the design process: generate multiple possibilities and then bring the best idea to life. Explore techniques in a variety of hands-on media. (MnTC: Goal 6) 3C/2/1/0

ARTS 1733 Three-Dimensional Design
This course is a foundation level study of the principles and elements of three-dimensional design. Students will use a variety of media and art techniques to explore three-dimensional design, form, line, plane, volume, mass, space, texture, light, and time. Projects emphasize a working creative method for problem solving in three-dimensions as well as a general knowledge of historical and contemporary design issues. (MnTC: Goal 6) 3C/2/1/0

ARTS 1740 Introduction to Painting
This course will introduce students to the materials and techniques of oil painting. Assignments will be geared towards improving one’s ability to paint from direct observation, depicting the natural world and the human form with greater accuracy, and integrating “color theory” into oil paintings. (MnTC: Goal 6) 3C/1/2/0

ARTS 1742 Intermediate Painting
This course will incorporate and further develop skills and techniques learned in Introduction to Painting, but will be more independent in nature. Each student will write a proposal for a cohesive body of work to be completed over the course of the semester, and will work towards developing a personal “style” of painting. Through a series of in-class group critiques, students will learn to analyze and critique works of art. (Prerequisite(s): ARTS 1740 Introduction to Painting with a grade of “C” or better) (MnTC: Goal 6) 3C/1/2/0
ARTS 1744 Introduction to Watercolor Painting
This course will introduce students to the practice of watercolor painting. Students will become familiar with the materials and terminology of the medium. They will learn to synthesize a variety of painting techniques into watercolor paintings of varying genres and styles. Students will develop an understanding of color theory, as it applies to watercolor painting, and will come to understand historical and contemporary issues pertaining to the medium. (MnTC: Goal 6) 3C/1/2/0

ARTS 1746 Introduction to Digital Art
In Introduction to Digital Art students will combine traditional Art media practices with both Raster and Vector based computer graphics software programs. Students will learn to conceptualize, interpret, and develop works of Art for the digital realm. (Prerequisite(s): Appropriate assessment scores) (MnTC: Goal 6) 3C/1/2/0

ARTS 1750 Introduction to Ceramics
This hands-on studio arts course will introduce students to the fundamentals of Ceramic Art. The primary emphasis will be the creation of functional ceramic pottery. Students will learn to make hand-built pottery and learn to “throw” pots on the pottery wheel. In addition to this, students will learn about trimming, glazing, kiln firing, and a variety of decorative techniques. (Prerequisite(s): ARTS 1752 Intermediate Ceramics with a grade of “C” or better.) (MnTC: Goal 6) 3C/1/2/0

ARTS 1752 Intermediate Ceramics
This hands-on studio arts course will continue to introduce students to the fundamentals of Ceramic Art. The course will also introduce contemporary practices in ceramic arts and investigate sculptural aspects of the medium. Half of the semester will include advanced wheel techniques and a continued concentration on throwing functional pots. In addition to this, students will continue learning about trimming, glazing, kiln firing, and become more proficient in decorative techniques. (Prerequisite(s): ARTS 1750 Introduction to Ceramics with a grade of “C” or better.) (MnTC: Goal 6) 3C/1/2/0

ARTS 1756 Metal Arts
This course is an introduction to aesthetics, tools, and techniques of creating 3-d works of art through Tungsten Inert Gas (TIG) welding and other assembly techniques. This course covers safety concerns while working in a metal shop, TIG welds, the correct use of filler rod, preparing, cutting, bending, finishing, and the significant properties of different metals. We will explore the creative uses of welding to convey meaning, composition, space, implied motion, creativity, metaphor, personal exploration, the organic elements of nature and the hard edges of human made objects while building a community of respectful artists. (MnTC: Goal 6) 3C/1/2/0

ARTS 1757 Metal Art 2
This course builds on the skills and techniques developed in Metal Arts 1. Students will use continue to master their use of tungsten inert gas (TIG) welding as well as be introduced to other assembly techniques. Students will be expected to be role models for good shop safety and etiquette as well as act a mentor for novice artist while continuing to explore their own personal meaning. Students will work as self-directed artist exploring composition, space, implied motion, creativity, metaphor, personal exploration, the organic elements of nature and the hard edges of human made objects. (Prerequisites: ARTS 1756 with a grade of “C” or better.) (MnTC: Goal 6) 3C/1/2/0

ARTS 1760 World Art
What would you see if you suddenly found yourself in China, Nigeria, India or Mexico? How would the world look to you? For many of us, it would probably look very strange. One of the many ways to make our world familiar to us, whether we travel or not, is to try to understand a culture’s visual expression in architecture, sculpture, painting and other media. This class will view slides of artwork in a lecture/discussion format. We will then visit the Minneapolis Institute of Arts, twice, where we will be able to immerse ourselves in the cultures studied by examining the original artworks produced by these cultures. (Prerequisite(s): READ 0721 or READ 0724 or EAPP 0860 with a grade of “C” or better, or appropriate assessment score) (MnTC: Goals 6 & 8) 3C/3/0/0

ARTS 1770 Art in America
This course is an introduction to art and architecture in North America from the Colonial period to the present. Art in America is united by common historical events and includes Native American culture and influences outside of America. We will explore patterns of cultural interchange with particular emphasis on colonialism, revolution, and the search for national identities. We will also examine the impact of historic and current social movements and politics on art in America. (Prerequisite(s): READ 0722 or READ 0724 or EAPP 0900 with a grade of “C” or better, or appropriate assessment score) (MnTC: Goal 6) 3C/3/0/0

ARTS 1780 Beginning Printmaking
For centuries artists have used printmaking processes to create beautiful images on paper. This course is an introduction to the fundamentals of fine art printmaking. Students will be instructed in the following printmaking areas: monotype, collograph, dry point linocut, and woodcut. In-class projects will focus on hands-on learning and experimentation as students progress toward assembling a fine art print folio of their work. (MnTC: Goal 6) 3C/1/2/0

ARTS 1790 History of Photography
This survey course will focus on the art of still photography from the 19th century to the present. There is an emphasis on the work of artists, their processes, and the accompanying aesthetic movements occurring between the announcement of the Daguerreotype in 1839 and the beginning of the twenty-first century. As witnesses of popular culture, students will examine the interaction of photography with other visual art forms. The photographic prints, as a means of artistic expression, will be discussed, including historic, social, and artistic movements. (Prerequisite(s): READ 0722 or READ 0724 or EAPP 0900 with a grade of “C” or better, or appropriate assessment score) (MnTC: Goal 6) 3C/3/0/0

ARTS 1795 Special Topics in Art
This course is designed to present additional or unique material and learning experiences within a specified discipline. The course will be based on student need, flexibility, and may be designed to meet various transfer and pre-major course requirements. Please see a current Course Schedule for complete details. (MnTC: Goal 6) Variable credits 1-6

ARTS 2710 Advanced Studio Arts
In the Advanced Studio Arts course students will build upon what they learned in Drawing 1, Introduction to Painting, or Fundamentals of Photography courses. The course will be independent in nature with students focused on developing their own personal artistic “style” in either drawing, painting or photography. Students will propose a idea for a body of work and will spend the semester creating a cohesive portfolio of images and writing an artist’s statement. The semester will culminate with a public exhibition of students work. (MnTC: Goal 6) Variable credits 3-4

ARTS 2754 Advanced Ceramics
This hands-on studio arts course will build on the proficiency that students have achieved in Introductory and Intermediate Ceramics. The Advanced Ceramics course will require a familiarity with the wheel and hand-building techniques with an emphasis placed on a semester-long ceramics project resulting in a sculptural, conceptual, or functional body of ceramic art work. The course will also expand on contemporary practices in ceramic arts and further investigate sculptural aspects of the medium. Students will become familiar with local ceramics artists and the greater Twin Cities ceramics community. (Prerequisite(s): ARTS 1752 Intermediate Ceramics with a grade of “C” or better) (MnTC: Goal 6) 3C/1/2/0
Automotive Service

AUTO 1415 Introduction to Automotive Technology
This course covers industry safety practices, service manuals and technical bulletins, communication skills, and the use of measuring instruments. Also covers automotive terminology and introductory automotive maintenance procedures. (Prerequisite(s): Admission to the Automotive Service Program – Co-requisite(s): AUTO 1430, AUTO 1510, AUTO 1530) 4C/0/4/0

AUTO 1430 Brakes
Covers the basic principles of the brake system. Emphasis will be placed on operation, diagnosis and repair of common types of braking systems. (Prerequisite(s): AUTO 1415) 4C/0/4/0

AUTO 1441 Alignment & Suspension
Covers the study of suspension and steering systems. The student will inspect, repair and adjust the suspension and steering systems on today’s cars and light trucks. (Prerequisite(s): AUTO 1415 & AUTO 1530) 4C/0/4/0

AUTO 1510 Clutch/Driveline Manual Transmission
Standard automotive and light truck clutches are covered. Content includes design, adjustment, overhaul, diagnosis and repair on mechanical and hydraulic clutch systems. This course also covers operation and proper repair procedures of current manual transmissions used in late model vehicles. (Prerequisite(s): AUTO 1415) 3C/0/3/0

AUTO 1523 Four Wheel Drive Differential
Emphasizes the operation and proper repair procedures of current transfer cases, hubs and differentials in four wheel drive vehicles. (Prerequisite(s): AUTO 1415 & AUTO 1530) 3C/0/3/0

AUTO 1530 Basic Electrical & Battery
Covers basic fundamentals of electricity and electronics, circuits, magnetism, resistance, coils, instruments, diodes and solid-state devices. Battery charging and testing is included. (Prerequisite(s): AUTO 1415) 3C/1/2/0

AUTO 1540 Basic Engine Management
Covers instruction on operation of the ignition system and maintenance of the ignition and fuel systems. This course focuses on the replacement of maintenance items such as spark plugs, distributor cap, ignition wire and air, fuel and emission filters. (Prerequisite(s): AUTO 1415 & AUTO 1530) 3C/1/2/0

AUTO 1550 Heating & Air Conditioning
Focuses on the principles of heating and air conditioning. Topics include A/C types, the diagnoses of malfunctions and tests/repairs. Lab work is done on actual systems. During the lab, the student will test and repair vacuum and electrical controls, air flow distribution and heater system controls. (Prerequisite(s): AUTO 1415 & AUTO 1530) 3C/1/2/0

AUTO 2310 Industry Internship
This industry internship will expose students to the equipment and tools needed to service automobiles. Students will work in a shop to learn in and experience an actual shop environment. (Prerequisite(s): AUTO 2410, AUTO 2420, AUTO 2430, AUTO 2440, and AUTO 2450 with a grade of “C” or better) 1C/0/1/0

AUTO 2410 Starting & Charging Systems
Covers overhaul of components such as starters and alternators. Complete system diagnoses and repair are also included. (Prerequisite(s): AUTO 1530) 3C/0/3/0

AUTO 2420 Electrical Accessories
Covers the operation and servicing techniques of chassis wiring, lights, instruments and headlight aiming. How to read and interpret wiring diagrams will also be included. 3C/0/3/0

AUTO 2430 Engine Theory & Repair
Covers disassembly, inspection, repair and reassembly of the internal combustion engine. Repair procedures such as the replacement of piston ring, engine bearings and valve grinding are covered. (Prerequisite(s): AUTO 1530) 4C/0/4/0

AUTO 2440 Engine Installation
Covers the removal and installation of complete engine assemblies, transfer of parts and removal and installation of accessories. 2C/0/2/0

AUTO 2450 Introduction to Auto Computers
Covers the operation of computer systems of engines using feedback carburetors and fuel injection. Sensors and actuators that operate in the system will be studied and tested. 2C/1/1/0

AUTO 2513 Fuel Systems
This course covers the fundamentals of carburetor and intake systems, maintenance and repair of the fuel system and emission controls. It also covers the use of 4 gas and 5 gas analyzers, scanners and other test equipment to troubleshoot and repair problems in computerized fuel systems. (Prerequisite(s): AUTO 2450) 3C/0/3/0

AUTO 2520 Engine Drivability
Covers application of knowledge and skills gained when studying engine, fuel, ignition and computer systems. 3C/0/3/0

AUTO 2530 Automatic Transmission Theory
Covers the basics of torque converters, planetary gear sets, clutches, bands and hydraulics. (Prerequisite(s): AUTO 2450) 2C/1/1/0

AUTO 2542 Automatic Transmission Diagnosis & Repair
Covers automatic transmission and transaxle diagnoses and service. Trouble shooting and repair procedures will also be covered. 4C/0/4/0

AUTO 2550 Specialized Lab 1
Covers the content goals listed or any other goals that the student and the instructor agree upon. The purpose of the course is for students to specialize in an area they prefer. (Prerequisite(s): Completion of all other listed courses) 2C/0/2/0

Biochemistry

BIOC 1790 Special Topics in Biochemistry
This course is designed to present additional or unique material and learning experiences within a specified discipline. The course will be based on student need, flexibility, and may be designed to meet various transfer and pre-major course requirements. Please see a current Course Schedule for complete details. (MnTC: Goal 3) Variable credits 1-6

BIOC 2700 Biochemistry
This course includes structure and function of proteins, carbohydrates, nucleic acids, and lipids. Action and regulation of major metabolic pathways. Synthesis and degradation of biomolecules. Enzyme energetics, kinetics, and chemical basis for transmission of genetic information will also be discussed. Lab work will utilize applied biochemical techniques to reinforce topics covered in the lecture. This includes protein and lipid assays, examinations of metabolism, and analysis of sugars. Lab work will be designed to give the student experience using modern biochemical techniques and equipment. Responsible record keeping and conduct will also be emphasized. (Prerequisite(s): CHEM 2720 and BIOL 1740 with a grade of “C” or better or instructor permission) (MnTC: Goal 3) 4C/3/1/0

BIOC 2790 Biochemistry Internship/Research Project
This course provides students with an opportunity to design and carry out a research project under the supervision of a faculty advisor utilizing biochemistry in a lab setting. The research project will be prepared using literature review, problem identification, procedural documentation, data collection, data analysis, findings, conclusions, and recommendations for future research. The course will also provide an opportunity for field study in an approved internship setting. Evaluation will be carried out by faculty teams and experts in the field. (Prerequisite(s): Instructor approval) (MnTC: Goal 3) Variable credits 1-4
Biology

**BIOL 1471 Medical Terminology**
This online course covers how bio/medical terms are constructed from Greek and Latin word elements including roots, combining forms, prefixes, and suffixes. Definitions, spelling, pronunciation, and applications of these terms will be stressed. Diseases and treatments specific to the body’s organ systems will also be covered. This course is useful for anyone who desires a better understanding of medical language. (Prerequisite(s): READ 0721 or READ 0724 or EAPP 0860 with a grade of “C” or better, or appropriate assessment score) (MnTC: Goals 3 & 10) 3C/3/0/0

**BIOL 1725 Environmental Science**
This course covers basic scientific and ecological principles, including an understanding of how the earth functions, how humans are affecting the earth, and proposed solutions to many of the environmental problems we face. Specific topics include: ecology, human population growth, biotechnology, pollution, human impacts on climate, energy resources, and waste management. Students will be required to take positions on environmental issues and alternative future scenarios. In-class activities will include group discussions and video and the use of internet-based resources. Two hours of lab per week are required and include group experiments, computer simulations, outdoor lab activities, and field trips. Traditional, hybrid, and online sections are available. (Prerequisite(s): READ 0721 or READ 0724 or EAPP 0860 with a grade of “C” or better, or appropriate assessment score) (MnTC: Goals 3 & 10) 4C/3/1/0

**BIOL 1730 Human Body Systems**
This course begins with a study of the structural organization of the human body and then proceeds with the study of cell structure, types of tissues and basic anatomy and physiology of major organ systems of the human body. The course will focus on how the body systems work together to maintain homeostasis and good health. Laboratory activities include the dissection of a preserved animal and animal organs. The course is intended for all interested students and required for programs like Medical Laboratory Technician, Practical Nursing, Respiratory Therapy Technician, and Pharmacy Technician. Traditional and hybrid sections are available. Two hours of lab per week are required. (Prerequisite(s): READ 0721 or READ 0724 or EAPP 0860 with a grade of “C” or better, or appropriate assessment score) (MnTC: Goal 3) 3C/2/1/0

**BIOL 1735 Understanding Biology**
This course is designed for non-science majors or as a preparation for BIOL 1740. A basic introduction to the principles of cell biology and genetics will be covered. The course will also examine the plant and animal kingdoms and general principles of ecology and evolution. One main goal of this course is to provide students with an understanding of biology that will allow them to evaluate and make informed opinions about related current events. Two hours of lab per week are required. (Prerequisite(s): READ 0721 or READ 0724 or EAPP 0860 with a grade of “C” or better, or appropriate assessment score) (MnTC: Goal 3) 4C/3/1/0

**BIOL 1740 General Biology 1: The Living Cell**
This course is a study of biological processes including cell chemistry, metabolism, reproduction, genetics, and complex cell physiology. Three hours of lab per week are required; the lab component covers the application of concepts through observation, experimentation, and problem analysis. This course is intended for biology majors and students requiring a strong biological background for selected majors, including nursing and other allied health fields, and interested non-majors. 3 hours of lab required in a 16-week semester. (Prerequisite(s): READ 0722 or READ 0724 or EAPP 0900 with a grade of “C” or better or appropriate assessment score) (MnTC: Goal 3) 5C/4/1/0

**BIOL 1745 General Biology 2: The Living World**
This course covers biological processes, including a survey of life forms (viruses, bacteria, protists, fungi, plants, and animals), their evolution, and ecology. The laboratory focuses on organism taxonomy, classification, and mammalian systems including comparative anatomy, organism dissections, ecological interrelationships of organisms and their environment. Three hours of lab per week are required and some activities involve the dissection of preserved animals and animal organs. Traditional, hybrid and online sections are available. (Prerequisite(s): BIOL 1740 General Biology 1: The Living Cell with a grade of “C” or better) (MnTC: Goals 3 & 10) 5C/4/1/0

**BIOL 1755 Research Fundamentals**
This course introduces students to procedures and guidelines relating to chemical, biological, physical, and engineering research. Students will conduct a project in three of these areas. Students will utilize literature searches, good laboratory practices, standard operating procedures, clinical research practices, and lab safety related to research. Students will also learn to communicate in a scientific manner. The lab component of the course will provide hands-on experience with the laboratory environment, clean room environment, and instrumentation used in scientific laboratories. 3C/1/2/0

**BIOL 1760 Nutrition**
This course explores the science of nutrition, including healthy diet fundamentals and the roles of carbohydrates, proteins, fats, vitamins, and minerals in health and fitness. Topics such as dietary guidelines, risk factors for illnesses linked to nutrition, and how the media influences personal diet choices will be covered. Hunger and the global environment as it relates to nutrition will also be covered. This course includes hands-on, lab-like activities related to nutrition and health. Traditional, hybrid, and online sections are available. (Prerequisite(s): READ 0721 or READ 0724 or EAPP 0860 with a grade of “C” or better, or appropriate assessment score) (MnTC: Goal 3) 3C/3/0/0

**BIOL 1782 Introduction to Forensic Science**
This course provides an introduction to Forensic Science. General biological concepts and their applications to various scientific principles and techniques used in Forensic Biology will be covered. Specific topics include chromatography, hair and fiber analysis, fingerprinting, blood spatter and typing, DNA typing, and forensic entomology. This course is intended for students in liberal arts and sciences, other related science fields, and interested non-science majors and can be used to fulfill the science lab requirement. Two hours of lab per week are required. Traditional, hybrid and online sections are available. (Prerequisite(s): READ 0721 or READ 0724 or EAPP 0860 with a grade of “C” or better, or appropriate assessment score) (MnTC: Goal 3) 4C/3/1/0

**BIOL 1785 Biology of Women**
This course is designed to allow students to explore significant facets of woman from many different angles across her life span from conception, through puberty, pregnancy, birthing and aging including specific health concerns ranging from osteoporosis, breast cancer, heart disease, mental disorders and other chronic illnesses. Topics that will be covered include reproductive anatomy and physiology of sexes, sexual development and response, genetics, pregnancy, childbirth, contraceptive methods, infertility, impotency and sexually-transmitted diseases. Open to both male and female students, meant for non-science majors. (Prerequisite(s): READ 0721 or READ 0724 or EAPP 0860 with a grade of “C” or better, or appropriate assessment score) (MnTC: Goals 3 & 9) 3C/3/0/0

**BIOL 1790 Special Topics in Biology**
This course is designed to present additional or unique material and learning experiences within a specified discipline. The course will be based on student need, flexibility, and may be designed to meet various transfer and pre-major course requirements. Please see a current Course Schedule for complete details. (MnTC: Goal 3) Variable credits 1-6

**BIOL 2721 Human Anatomy and Physiology 1**
This course covers body organization, tissues, human body systems (integumentary, skeletal, muscular and nervous), and the special senses, integrating both the anatomy and physiology of each organ system. Dysfunctions may be included, but the body in homeostasis is emphasized. Two hours of lab per week are required. Some lab
activities involve the dissection of preserved animal organs. Traditional and hybrid sections are available. (Prerequisite(s): BIOL 1740 General Biology 1: The Living Cell with a grade of “C” or better) (MnTC: Goal 3) 4C/3/1/0

BIOL 2722 Human Anatomy and Physiology 2
This course covers those body systems not included in Human Anatomy & Physiology 1: cardiovascular, respiratory, reproductive, urinary, endocrine, digestive, and lymphatic/immune systems. The anatomy and physiology of each organ system is integrated. Dysfunctions may be included, but the body in homeostasis is emphasized. Two hours of lab per week are required. Many lab activities involve dissection of a preserved animal and animal organs. Human cadavers are also studied for two hours. (Prerequisite(s): BIOL 2721 Human Anatomy and Physiology 1 with a grade of “C” or better) Traditional and hybrid sections are available. (MnTC: Goal 3) 4C/3/1/0

BIOL 2750 General Microbiology
General Microbiology covers bacteria, fungi, protozoa, algae, and viruses. Structure, metabolism, growth requirements, genetics, and replication of these microbes will be compared. Emphasis will be placed on the role of microbes in human disease and the function of the immune system in microbial control and balance. Environment and industrial microbiology will also be discussed. Three hours of lab per week are required and sessions will be structured to provide a hands-on introduction to common laboratory techniques related to topics covered in lecture. Safety and infection control will also be stressed. (Prerequisite(s): BIOL 1740 General Biology 1: The Living Cell with a grade of “C” or better) Traditional and hybrid sections are available. (MnTC: Goal 3) 4C/3/1/0

BIOL 2755 Genetics
Traditional and modern principles of genetics will be investigated through problem solving, molecular modeling and group discussion. The course will include exploration of genetics at the cellular and organismal level with special emphasis on human genetics. Three hours of lab per week are required to learn techniques and perform experiments. As part of the lab, students will have the opportunity to design, conduct, and present research using genetics laboratory techniques. 3 hours of lab required in a 16-week semester. (Prerequisite(s): BIOL 1740 General Biology 1: The Living Cell with a grade of “C” or better) 4C/3/1/0

BIOL 2760 Cell and Molecular Biology
This course is designed for Saint Paul College students interested in Biomedical or Biotechnology sciences as part of their core curriculum. It is also open to any student interested in the fields of cell biology and molecular genetics. Through laboratory investigations, students will learn the current concepts and techniques in molecular biology for a better understanding of the cell. Students will also learn the use of National Center for Biotechnology Information (NCBI) website for the analysis of genetic sequence and applying their findings to the treatments and cure of human disease, agricultural improvement, and molecular genetics. Through laboratory investigations, students will learn the current concepts and techniques in molecular biology for a better understanding of the cell. Students will also learn the use of National Center for Biotechnology Information (NCBI) website for the analysis of genetic sequence and applying their findings to the treatments and cure of human disease, agricultural improvement, forensic science and a better understanding of evolution. Ethical and moral issues posed by molecular biotechnology will be explored and discussed. (Prerequisite(s): BIOL 2750 General Microbiology with a grade of “C” or better) (MnTC: Goal 3) 5C/4/1/0

BIOL 2770 Biology Internship
This course provides students with an opportunity to design and carry out a science research project under the supervision of a faculty advisor. The research report will be prepared using literature review, problem identification, procedural documentation, data collection, data analysis, findings, conclusions, and recommendations. Evaluation will be carried out by faculty teams and experts in the field. The course will also provide an opportunity for field study in an approved internship setting. (Prerequisite(s): Instructor approval) (MnTC: Goal 3) Variable credits 1-4

BIOL 2790 Research Project for Science and Engineering Technology
This course provides students with an opportunity to design and carry out a science research project under the supervision of a faculty advisor and/or industry advisor. The research project will be prepared using literature review, problem identification, procedural documentation, data collection, data analysis, findings, conclusions, and recommendations. Evaluation will be carried out by faculty teams and industry experts. The course will also provide an opportunity for field study in an internship setting. (Prerequisite(s): BIOL 1755 Research Fundamentals or CHEM 1755 Research Fundamentals; Instructor approval) (MnTC: Goal 3) Variable credits 1-4

Business

BUSN 1410 Introduction to Business
Offers an introduction to the United States business system. Students will explore economic principles, international business, business ethics, marketing and financial principles. 3C/3/0/0

BUSN 1441 Consumer Behavior
This course will explore the behavior of consumers as it relates to products and services. The role of the consumer in the marketplace will be examined including the analysis of needs, motivation, attitudes, perceptions, decisions, and behavior. 3C/3/0/0

BUSN 1444 Advertising and Promotional Strategies
This course explores the world of advertising and other mass communications practices. It will examine advertising theory, functions and principles. All types of media will be explored, including television, radio, magazine, newspaper, outdoor and the internet. Various careers in advertising will be examined. 3C/3/0/0

BUSN 1446 Sales and Account Management
In this course we will examine the personal selling process. We will explore the practical and tactical process of how to sell products and services in a complex market. We will also examine sales force training, compensation, territory assignment and quotas. 3C/3/0/0

BUSN 1449 Business Communications
Business Communication provides an introduction to the study of verbal and non-verbal communications in a business setting. The course introduces techniques for business communication including tone, format, inclusion, and delivery and addresses barriers to communication and how to respond to those challenges. Resume and cover letter skills are presented and practiced to prepare students for job search. 3C/3/0/0

BUSN 1475 Project Management 1
This course will further explore project management, moving beyond the introduction of many topics. The course will investigate the concepts of Lean, Six Sigma, Predictive and Adaptive styles of running projects. Microsoft Project will be explored in this course as well. 3C/3/0/0

BUSN 1480 Business Career Resources
This course provides information and guidance in the development of professional job seeking skills. Topics will include: the application, the resume, the cover letter, using the Internet in a job search, locating job opportunities, marketing yourself and company research. 1C/1/0/0

BUSN 1490 E-Marketing
The Internet and other technologies have created many opportunities for businesses and organizations to communicate and create value for their customers. This course is designed to give students an understanding of E-Marketing strategies and how they fit into an overall integrated marketing and communications plan. Topics include direct marketing, internet advertising, performance analytics, search engine optimization and career opportunities in E-Marketing. 3C/3/0/0
BUSN 1492 Social Media Marketing
In this course students will learn successful marketing strategies using social media as an essential part of an integrated marketing strategy. Social media provides both a listening and outreach tool for promoting business, products and ideas. Social media ethics, legal issues and best practices will be covered. Various social media platforms such as Facebook, Twitter, YouTube and LinkedIn will be explored, as well as careers and jobs in Social Media Marketing. Students will analyze contemporary social media cases and strategies and develop a comprehensive social media marketing plan. Other topics include target marketing on the social web and rules of engagement. 3C/3/0/0

BUSN 1520 Customer Service
This course will present effective functioning in a service economy. Students will define and describe the nature, characteristics, and ways services need to be presented using basic customer service terminology. Students will learn skills to create positive customer relations. 3C/3/0/0

BUSN 1760 Principles of Finance
Principles and practices of business finance to help decision makers in a dynamic economy. Focus is placed on reviewing and analyzing financial statements, the time value of money, cash flow management, and risk and return. 4C/4/0/0

BUSN 1762 Money and Banking
This course provides an introduction to money and banking and presents a fundamental treatment of how money functions in the United States and world economies. It introduces the concept of money supply and the role of banks as money creators and as participants in the nation’s payments mechanism. The course explores the working of fiscal and monetary policy, the functions and powers of the Federal Reserve System, and various monetary theories. Also highlighted are major trends and issues in banking and international banking. 4C/4/0/0

BUSN 1782 Investments
This course provides a study of the core concepts of investments for Finance majors. It broadly covers financial instruments, such as equity, fixed income, and derivative securities, as well as key concepts studied in Principles of Finance. (Prerequisite(s): BUSN 1760 Principles of Finance) 3C/3/0/0

BUSN 1784 Principles of Risk Management and Insurance
This course is examines the nature of risk and how it can be managed. Insurance is one of the tools used to respond to risk. It will be examined along with a multitude of other options that are available for risk management. (Prerequisite(s): BUSN 1760 Principles of Finance) 3C/3/0/0

BUSN 2110 Principles of Marketing
Students will develop an understanding of the basic principles of marketing. Students will examine core marketing concepts (needs, wants and demands) and the elements used in developing a marketing plan, including consumer behavior principles, direct and online marketing, pricing strategies, advertising, sales promotion, public relations, personal selling and product distribution. Current marketing trends will be discussed. 3C/3/0/0

BUSN 2410 Critical Thinking for Business Decision Making
This course will cover theory and application of critical thinking. Students explore the various elements of the critical thinking process and understand the importance of effective critical thinking skills in the 21st century workplace. Emphasis is placed on learning how to use critical thinking to challenge assumptions and expand perceptions about situations, as well as applying improved skills to the day-to-day operations of a business. 2C/2/0/0

BUSN 2440 Fundamentals of Nonprofit Management
This course explains the foundation of the nonprofit sector. Students will be introduced to the fundamentals of effective organization mission and vision statements, strategic planning, operations management, board development and budgeting. Students will gain understanding of different aspects of the nonprofit organization. 3C/3/0/0

BUSN 2441 Fundraising Techniques
Learn the role of the board and staff in fundraising, setting fundraising goals, and the cultivation and recognition of donors. This course also covers other components of fundraising for successful generation of revenue. 1C/1/0/0

BUSN 2442 Grant Writing and Research
Learn the tactics of researching and writing effective proposals. Discover the best ways to develop documentation, write compelling inquiry letters and set goals that can be achieved. 1C/1/0/0

BUSN 2443 Dynamics of Board Relations
Develop a better board of directors or become a better board member. Boards of directors of nonprofits are often unclear about their role and relationship with staff and the executive director. This course defines the role of the board and strengthens the working relationship between staff members and board members. 1C/1/0/0

BUSN 2444 Volunteer Program Management
Volunteers make it happen! Successful management of this important asset is critical to an organization. Learn the basic principles and concepts of professional volunteer management and gain a solid foundation on which to build. 1C/1/0/0

BUSN 2445 Nonprofit Law and Ethics
Gain knowledge of the complexities of nonprofit organizations. Learn about the legal aspects of nonprofit and tax exempt organizations under federal and state law. Areas discussed include incorporation, exemption, reporting requirements and various IRS mandates for 501(c)(3) exemptions. Ethical issues and concepts as they relate to nonprofit business will be discussed. 1C/1/0/0

BUSN 2450 Management Fundamentals
The course includes the history of management theory with emphasis on forces of change that have resulted in a changing view of the business world for managers. Principal management functions covered are planning, organizing, leading and the process of control as an information feedback function for increasing productivity. Emphasis is on the integration of all management functions into one effort for visionary, effective and efficient operations. 3C/3/0/0

BUSN 2455 Essentials of Entrepreneurship and Small Business Management
In this course the student will learn the essential skills needed to start and manage a successful new business venture. Topics include: the challenge of entrepreneurship, building a business plan, marketing and financial issues with a start-up company and how to gain a competitive advantage. 3C/3/0/0

BUSN 2459 Family and Personal Financial Planning
This course offers practical methods for managing individual personal and family finances. Tools, software and strategies will be explored to encourage responsible financial well-being. Students will write a financial plan consistent with individual goals and values that incorporate the areas studied in the course. 4C/4/0/0

BUSN 2465 Business Ethics
This course introduces students to ethical issues and concepts as they relate to business and as they impact society, the economy and the environment. Students will analyze various approaches to making ethical decisions through case studies. Topics range from the role of the government to corporate global businesses. Both national and international ethics will be discussed. 3C/3/0/0

BUSN 2466 Managing Change and Conflict
This course helps students to learn and develop the unique set of skills and competencies used to initiate and sustain major organizational change. Students explore techniques for working collaboratively with others to drive organizational culture change. Emphasis is also placed on effectively managing conflict and provides opportunity to develop a list of tools and resources used in conflict management. 2C/2/0/0
BUSN 2470 Legal Environment of Business
This course covers basic information about the various classifications of the law and the rights and responsibilities imposed on the business community by our legal system. The course introduces students to the legal system and its impact on the individual, the business environment and upon society as a whole. Areas of study include basic laws, contracts, negligence, product liability, employment law, alternative dispute resolution and business entities. 3C/3/0/0

BUSN 2472 Business Negotiation Skills
Covers techniques and unique circumstances for the negotiation of prices in the business environment. The course will guide students through the areas of risk negotiations, bargaining concepts, strategy and tactics for successful contract negotiations. 3C/3/0/0

BUSN 2474 Business Analytics
Introduces students to the fundamentals of Business Analytics. Develops students' understanding of analytics in the context of business. Provides a framework for understanding how to frame a business problem, stakeholder analysis, data visualization, descriptive statistics, exploratory data analysis, and data storytelling in business. Enables students to evaluate how data helps make better business decisions based on data analysis. (Prerequisite(s): BUSN 1410 with a grade of "C" or better, and appropriate assessment score) 3C/3/0/0

BUSN 2475 Project Management 2
This course will further explore project management, moving beyond the introduction of many topics. The course will investigate the concepts of Lean, Six Sigma, Predictive and Adaptive styles of running projects. Microsoft Project will be explored in this course as well. (Prerequisite(s): BUSN 1475 Project Management 1) 3C/3/0/0

BUSN 2480 Business Management Internship
A cooperative work-study program between Saint Paul College—A Community & Technical College Business Management degree program and a business facility. This elective course allows the student to experience a closely supervised job situation that is related to the program. (Prerequisite(s): Instructor approval) Variable credits 1-3

BUSN 2482 Entrepreneurship Capstone
Students will complete a business plan. A business plan integrates skills and elements from various disciplines. Because a business plan is a complete and professional document that establishes the viability of your business ideas, students will build both their writing and presentation skills. 3C/3/0/0

Business Technology

BTEC 1121 Introduction to Microsoft Word
This course provides an overview of the most commonly used features of Microsoft Word. Students will examine word processing concepts and use Microsoft Word to create and edit documents for professional, personal, and academic use. 1C/1/0/0

BTEC 1131 Introduction to Microsoft Excel
This course provides an overview of the most commonly used features of Microsoft Excel. Students will identify spreadsheet terminology and concepts, create formulas and functions, and create and edit spreadsheets, charts, and graphs for professional, personal, and academic use. 1C/1/0/0

BTEC 1151 Introduction to Microsoft PowerPoint
This course provides an overview of the most commonly used features of Microsoft PowerPoint. Students will identify presentation terminology and concepts. Students will create and edit presentations for professional, personal, and academic use. 1C/1/0/0

BTEC 1400 Keyboarding
Covers “Touch Keyboarding” skill development on a computer keyboard. A variety of drills will be used to develop speed and accuracy of keyboarding skills. 2C/1/0/0

BTEC 1410 Advanced Keyboarding Applications
Covers continued development of keyboarding speed and accuracy and proofreading skills. Students will develop skill in formatting and production of the following documents: memos, letters, envelopes, tables, and reports. Students will be tested on the first day of class to determine two requirements: 1) Accurate keyboarding speed of 30 wpm, and 2) Using the touch method. 3C/1/2/0

BTEC 1418 Computer Fundamentals
This course covers introductory information about computer hardware and software, working with drives, folders and files, and the use of the microcomputer as a productivity tool. Students will be given introductory training in Microsoft Windows, Microsoft Office (word processing, spreadsheets, graphs, database and presentation applications) and Internet usage. 3C/3/0/0

BTEC 1421 Business Information Applications 1
This is the first course in a series that teaches students how to use Microsoft Office software applications. Software covered includes Word, Excel, Access, and PowerPoint. By the end of this course, students will be skilled in the basic features of Microsoft Office. Students will create common business documents including letters, reports, tables, newsletters, Excel worksheets, Access databases, and PowerPoint graphic presentations. This course, BTEC 1423 Business Information Applications 2 and BTEC 2506 Business Information Applications 3, prepare the student for the Microsoft Office Specialist (MOS) certification exams. (Prerequisite(s): Knowledge of computers) 3C/0/3/0

BTEC 1423 Business Information Applications 2
This is the second course in a series that teaches students how to use Microsoft Office software applications. Software used includes Word, Excel, Access, and PowerPoint. By the end of this course, students will be skilled in the advanced features of Microsoft Office. Students will create advanced business documents including Word form letters, merged documents, and newsletters; Excel financial worksheets, amortization schedules, and data tables; advanced Access queries, multi-table forms, customized reports and switchboards; and advanced PowerPoint presentations. This course, BTEC 1421 Business Information Applications 1 and BTEC 2506 Business Information Applications 3, prepare the student for the Microsoft Office Specialist (MOS) certification exams. (Prerequisite(s): BTEC 1421) 4C/0/4/0

BTEC 1530 Communication Technology
This course offers hands-on instruction in current communication technology software. Topics in this class will cover the fundamentals of Microsoft Outlook, Microsoft Publisher, and creating web pages. In Microsoft Outlook, the students will create messages, contact lists, and manage calendars. In Microsoft Publisher, the student will create and edit a publication, design a newsletter, publish a tri-fold brochure, and create an e-mail letter. Students will also learn how to create a simple website, add text and links, and create tables. 4C/0/4/0

BTEC 2410 Business Procedures
This course covers topics that develop skill in performing typical office tasks: telephoning, mailing, filing, calendaring, meeting arrangements, travel arrangements, office equipment care, time management, document production, reprographics and creating reports and financial records. Through the use of interactive software and projects, the student will experience daily routines, make decisions, set priorities, deal with work pressures, develop interpersonal relationships and become aware of work quality and quantity requirements. 4C/0/4/0

BTEC 2506 Business Information Applications 3
This is the third course in a sequence that explores expert level applications using Microsoft Office software. This course assumes students are familiar with the fundamental and advanced features of Microsoft Word, Excel, Access, and PowerPoint. Students demonstrate proficiency in Microsoft Office in preparation for the Microsoft Certified Applications Specialist certification exams. Students create expert level documents, worksheets, databases, and presentations suitable for the business environment, coursework, and personal use. (Prerequisite(s): BTEC 1423) 4C/0/4/0
BTEC 2590 Business Technology Internship
A cooperative work-study program between Saint Paul College Business Technology programs and a business facility. This course allows the student to experience a closely supervised job situation that is related to the program. (Prerequisite(s): Instructor approval) Variable credits 2-8

Cabinetmaking

CABT 1450 Print Reading
Introduces student to: blueprint reading, building trade drawings, architectural graphics, and symbols used in the trade, as well as an understanding of what a drafting person does. 2C/1/1/0

CABT 1455 Traditional Machining Methods
This course will introduce students to shop safety. The student will study the identification, care and use of hand tools, portable power tools, and machinery. The course offers safety demonstrations on all power equipment and safety tests will be performed on most machines. Basic knowledge of power and hand tools is required. Students will master the machinery through building various projects. 5C/2/3/0

CABT 1460 Wood Technology
This course will introduce students to the materials and finishes used in cabinetmaking. Students will learn to identify hardwoods, softwoods and manufactured panel products, and the grading of these products. Students will also learn about abrasives, adhesives, fasteners, and clamping devices. The second half of this course will cover the types of finishes used in cabinetmaking and how they are applied. 2C/1/1/0

CABT 1465 Furniture & Residential Cabinetry
This course introduces the student to face frame base and upper cabinetry. Students will learn the design, planning, and construction processes of building face frame cabinets. The student will then apply these techniques by building a project. (Co-requisite(s): CABT 1455) 5C/2/3/0

CABT 1470 CAD/CNC
In this course students will learn to use CAD software to design objects. Students will also learn to apply tool paths, choose tooling, save files, and CNC router operations. 2C/0/2/0

CABT 1475 Industrial Machining Methods
This course will reinforce proper machine operation and safety on woodworking machinery. Advanced woodworking machinery will be demonstrated, along with safety tests on these machines. Machine maintenance and tooling is covered. A series of projects will give the students hands-on experience. 4C/1/3/0

CABT 2450 Surface Applications
This course introduces students to laminates/veneers, the tools used for laminating, and laminate counter tops. Students will learn to measure, order material, layout, and fabricate laminate counter tops. Solid surface, stone products, and other types of counter tops are also covered. Various projects will give the students hands-on experience. 4C/1/3/0

CABT 2455 Casework & Millwork
This course introduces the students to frameless cabinetry which is also known as European cabinetry, or 32mm cabinetry. Hardware used in frameless cabinets will be covered and then students will learn design, layout, and build frameless cabinets using the boring machines and edgebanders. Commercial fixtures used in retail will also be covered in this course. (Co-Require(s): CABT 1475) 5C/1/4/0

CABT 2515 CNC Cabinet Design
In this course students will learn to lay out and design cabinets using cabinet design software. Students will learn to edit or modify within program to meet the given cabinet specifications and then convert to CAM files to be cut out on a CNC router. 3C/2/1/0

CABT 2690 Capstone Project/Open Lab
This course is to be taken the last semester the student is registered for Cabinetmaking. In this course students will use all that they have learned in previous courses to design a project, estimate materials and costs, order the materials, and then fabricate the project. 2C/0/2/0

CABT 2695 Internship
Students will go to work in one of our partnering wood industry shops to experience and learn in an actual shop environment. 2C/0/2/0

CABT 2700 Cabinetmaking - Open Lab
This course is for students with prior experience with woodworking terminology and shop safety; students wanting to upgrade their skills and knowledge to help them in the cabinetmaking industry. The student must be able to demonstrate the use of hand tools and portable power equipment. The student must meet with the instructor to see whether the student has the correct criteria in the cabinetmaking area. New students must meet with the instructor prior to registering for the class. Variable credits 1-2

CABT 2790 Cabinetmaking Special Projects
This course is designed to create customized projects for students as needed on an individual basis. Variable credits 1-4

Carpentry

CARP 1410 Project Estimating
Review basic arithmetic, algebra and geometry as it relates to carpentry. Students will learn construction terminology and estimate building costs. 3C/3/0/0

CARP 1420 Construction Blueprint Reading
Covers reading and interpreting blueprints used in the construction industry. Lines, abbreviations, symbols, parts of the blueprints, specifications and isometric drawings will be included in this class. 2C/0/2/0

CARP 1430 Introduction to Carpentry and Hand Tools
Learn to make drawings and sketches used in construction and learn to use basic carpentry hand tools. (Prerequisite(s): Concurrent enrollment in CARP 1420) 3C/1/2/0

CARP 1510 Intermediate Carpenter
Safety, job site working conditions and trade requirements, construction materials, building codes and residential construction concepts are included in this class. 5C/4/1/0

CARP 1521 Building Technology
Covers practice on the safe use of portable power tools and stationary shop equipment. Students gain familiarity with materials used in the construction industry and procedures used in the erection of residential and light commercial buildings. (Prerequisite(s): Concurrent enrollment in CARP 1510) 5C/0/5/0

CARP 1522 Power Tool and Shop Procedures
Continuation of CARP 1521. Includes practice on the safe use of portable power tools and stationary shop equipment. Students gain familiarity with materials used in the construction industry and procedures used in the erection of residential and light commercial buildings. (Prerequisite(s): Concurrent enrollment in CARP 1510) 5C/3/2/0

CARP 2410 Advanced Carpentry
Covers the methods and features of the instruments used by carpenters in laying out buildings. Cabinet installation, job seeking, soil types and excavations, properties of concrete and equipment and procedures used in the erection of commercial construction projects are included in this class. (Prerequisite(s): CARP 1510, CARP 1521, CARP 1522) 6C/4/2/0

CARP 2421 Fieldwork and Carpentry Procedures
Provides hands-on experience with the optic and electronic instruments used in laying our buildings. Erect scaffold systems and concrete
forming systems used on commercial building projects. (Prerequisite(s): Concurrent enrollment in CARP 2410) 5C/1/4/0

CARP 2422 Carpentry Concrete Technology and Installation
Continuation of CARP 2421. Get hands-on experience with the optic and electronic instruments used in laying out buildings. Erect scaffold systems and concrete forming systems used on commercial building projects. (Prerequisite(s): Concurrent enrollment in CARP 2421) 5C/1/4/0

CARP 2495 Special Topics in Carpentry
This course is designed to present additional or unique material and learning experiences within a specified discipline. The course will be based on student need, flexibility, and may be designed to meet various program and pre-major course requirements. Please see a current Course Schedule for complete course details. Variable credits 1-6

Center for Manufacturing and Applied Engineering

(The following courses are restricted to the 360o Program – see an advisor for more information)

CMAE 1510 Print Reading
This course will orient the student in the basic skills and abilities required for understanding prints utilized in a manufacturing/industrial environment. Emphasis will be on interpretation of Geometric Dimensioning and Tolerancing symbols/principles; Alphabet of lines; Multi-view drawing (including Orthographic Projection, Isometric Views and Perspective Drawing); Title blocks; Revision systems; Identification of general/local notes; Dimensions and tolerances; Basic principles of math/geometry in relation to mechanical print reading; Interpretation of basic weld symbols; Techniques of basic shop sketching and interpretation of three-dimensional drawings, will be also discussed. Each student will have the opportunity to apply the knowledge acquired through a variety of in-class activities and external assignments. 2C/2/0/0

CMAE 1514 Safety Awareness
This course aligns with the Manufacturing Skill Standards Council’s (MSSC) assessment and certification system for Safety. The curriculum is based upon federally endorsed national standards for production workers including Occupational Safety Health Administration (OSHA) standards relating to Personal Protective Equipment (PPE), lockout/tagout (LOTO), Hazardous Material (HAZMAT), tool safety, and confined spaces. 2C/2/0/0

CMAE 1518 Manufacturing Processes and Production
This course is designed to align with the Manufacturing Skill Standards Council’s (MSSC) assessment and certification system for Manufacturing Processes. The course curriculum is based upon federally-endorsed national standards for production workers including Occupational Safety Health Administration (OSHA) standards relating to Personal Protective Equipment (PPE), lockout/tagout (LOTO), Hazardous Material (HAZMAT), tool safety, and confined spaces. 2C/2/0/0

CMAE 1522 Quality Practices
This course is designed to align with the Manufacturing Skill Standards Council’s (MSSC) assessment and certification system for Quality Practices. The course curriculum is based upon federally-endorsed national standards for production workers. Emphasis is placed on Continuous Improvement concepts and how they relate to a quality management system. Students will be introduced to a quality management system and its components. These include corrective actions, preventative actions, control of documents, control of quality records, internal auditing of processes, and control of nonconforming product. 2C/2/0/0

CMAE 1526 Maintenance Awareness
This course aligns with the Manufacturing Skill Standards Council’s (MSSC) assessment and certification system for Maintenance Awareness. The curriculum is based upon federally endorsed national standards for production workers. The course introduces the concepts of predictive and Total Productive Maintenance (TPM) with the fundamental principles of lubrication, electricity, hydraulics, pneumatics, and power transmission systems. 2C/2/0/0

CMAE 1566 Gas Metal Arc Welding (GMAW) / Flux Cored Arc Welding (FCAW)
This course will study and demonstrate safety practices with Gas Metal Arc Welding (GMAW) and Flux Cored Arc Welding (FCAW). The GMAW and FCAW processes will be discussed in depth including the different type of modes of transfer available, shielding gases, and the different types of materials that can be welded. The differences in the electrode types of gas-shielded wires and self-shielded wires will be discussed, along with the types of shielding gases that are used. There will be discussions on the importance of how the welding process intersects with the arc welding symbols and codes. There will also be a review of procedures used in visual inspections of welds. Time will be spent in the lab developing skills using the GMAW and FCAW processes. Welds will be made in the flat, horizontal, vertical, and overhead positions. Written and fundamental tests will be completed in accordance with the American Welding Society (AWS) codes and standards. 3C/1.5/1.5/0

CMAE 1568 Gas Tungsten Arc Welding (GTAW)
This course covers the safety hazards and applications for Gas Tungsten Arc Welding (GTAW) in the welding industry. Material covered will be power sources, setup, types of current, current selection, shielding gases and torch types. Procedures and potential problems welding different metals (Aluminum, Stainless Steel, and Mild Steel) will be addressed in this course. Applications for the process in different industries, as well as the use of back purging will be discussed. Welds will be made in the flat, horizontal, vertical and overhead positions. Written and Fundamental tests will be completed in accordance with the American Welding Society (AWS) codes and standards. 1C/1.5/1.5/0

CMAE 1570 Metallurgy
This course covers the study of metals and the effects of welding and heat treatments on them. Metallurgical terminology will be an important part of the course. Physical and mechanical properties of ferrous and nonferrous metals will be covered along with the classifications of different types of metals. The range of materials and their usefulness in particular applications will be discussed. Written tests will be completed in accordance with the American Welding Society (AWS) codes and standards. 1C/1/0/0

Chemistry

CHEM 1700 Chemistry Concepts
This laboratory science course covers the basic concepts of chemistry. Topics include measurements and calculations used in chemistry; the general properties of chemicals; physical characteristics of matter, atoms and elements; basics of chemical bonding; chemical equations and their uses; gases, liquids and solids; solutions; and acids and bases. The course relates chemistry concepts to applications in everyday life. The course is intended for students who have not had a high school chemistry course. (Prerequisite(s): MATH 0910 Introductory Algebra with a grade of “C” or better, or appropriate assessment score) (MinTC: Goal 3) 4C/3/1/0

CHEM 1711 Principles of Chemistry 1
This course uses the scientific method to study matter; what matter is comprised of and how matter changes. Basic chemical theory and applications are covered with an emphasis on the principles and theories of atomic and molecular structure; periodic properties of elements; thermochemistry; reaction stoichiometry; behavior of gases, liquids, and solids; molecular and ionic structure and bonding; energy sources and environmental issues related to energy use. The lab component includes the application of chemical concepts through observation, data collection, quantitative measurement, and problem analysis. 3 hours of lab required in a 16-week semester. (Prerequisite(s): MATH 0920 Intermediate Algebra or CHEM 1700)
CHEM 1712 Principles of Chemistry 2
This course is a continuation of CHEM 1711 Principles of Chemistry 1 with an emphasis on chemical kinetics; radioactive decay; chemical equilibrium; solutions; acids and bases; solubility; second law of thermodynamics; electrochemistry and corrosion; descriptive chemistry of the elements; coordination chemistry; biochemistry; and applications of chemical principles to environmental problems. The lab component of this course provides students with the opportunity to apply chemical concepts through observation, data collection, quantitative measurement and problem analysis. 3 hours of lab required in a 16-week semester. (Prerequisite(s): CHEM 1711 with a grade of "C" or better) (MnTC: Goal 3) 4C/3/1/0

CHEM 1755 Research Fundamentals
This course introduces students to procedures and guidelines relating to chemical, biological, physical, and engineering research. Students will conduct a project in three of these areas. Students will utilize literature searches, good laboratory practices, standard operating procedures, clinical research practices, and lab safety related to research. Students will also learn to communicate in a scientific manner. The lab component of the course will provide hands-on experience with the laboratory environment, clean room environment, and instrumentation used in scientific laboratories. 3C/1/2/0

CHEM 2720 Organic Chemistry 1
This course is the first semester of a two-semester sequence in organic chemistry. Topics include an overview of covalent bonding, acid-base chemistry, and reaction energetics. The course also covers nomenclature, stereochemistry, organic molecular structures, substitution and elimination reactions and reactions alkanes, alkenes, alkynes, and alcohols. The laboratory activities include an introduction to laboratory techniques used in organic chemical synthesis, and the use of chromatography and spectroscopy in the analysis of organic compounds. Three hours of lab per week are required. (Prerequisite(s): CHEM 1712 with a grade of "C" or better) (MnTC: Goal 3) 5C/4/1/0

CHEM 2721 Organic Chemistry 2
This course is a continuation of CHEM 2720 Organic Chemistry 1. Topics include amines, ketones, aldehydes, carboxylic acids, and their derivatives. Reaction mechanisms studied include electrophilic aromatic substitution, nucleophilic aromatic substitution, nucleophilic addition and substitution at carbonyl groups, and reactions at the alpha carbon of carbonyl compounds. The course also includes application of organic chemistry related to polymers, natural products, and biochemistry. The laboratory activities cover reactions, synthesis, and the chemical and instrumental identification of organic compounds. Three hours of lab per week are required. (Prerequisite(s): CHEM 2720 with a grade of "C" or better) (MnTC: Goal 3) 5C/4/1/0

CHEM 2730 Instrumental Analysis
This course introduces the principles of analytical methods and instrumentation. The theories and applications of various chemical and biochemical methods of analyses will be studied. Instrumentation methods including chromatography, spectrophotometry, microscopy, and others will be applied in laboratory to a variety of chemical and biological systems. Mathematical calculations, statistical analysis of data, and quantitative chemical analysis will also be incorporated. Students will also be introduced to standards important to quality control in regulatory environments, using documentation procedures and validation principles according to regulatory standards. (Prerequisite(s): CHEM 1711 with a grade of "C" or better) (MnTC: Goal 3) 4C/2/2/0

CHEM 2790 Research Project for Science and Engineering Technology
This course provides students with an opportunity to design and carry out a science research project under the supervision of a faculty advisor. The research project will be prepared using literature review, problem identification, procedural documentation, data collection, data analysis, findings, conclusions, and recommendations. Evaluation will be carried out by a faculty member and an expert in the field. The course will also provide an opportunity for field study in an approved internship setting (Prerequisite(s): Instructor approval) (MnTC: Goal 3) Variable credits 1-4

CHEM 2795 Special Topics in Chemistry
This course is designed to present additional or unique material and learning experiences within a specified discipline. The course will be based on student need, flexibility, and may be designed to meet various transfer and pre-major course requirements. Please see a current Course Schedule for complete details. (MnTC: Goal 3) Variable credits 1-6

Child Development

CDEV 1200 Introduction to Early Childhood Education
This course provides an overview of the early childhood field, including philosophies, missions, and regulations. It examines the roles and responsibilities of professionals in a variety of career settings. Examines positive communication and relationships with families. 3C/3/0/0

CDEV 1210 Child Growth and Development
Examines the major developmental milestones for children, both typical and atypical, from conception through adolescence in the areas of physical, psychosocial, and cognitive development. Emphasizes interactions between maturational processes and environmental factors. While studying developmental theory and investigative research methods, students will observe children and analyze characteristics of development at various stages. 3C/2/1/0

CDEV 1220 Health, Safety and Nutrition
An introduction to the regulations, standards, policies, and procedures, prevention techniques, and early childhood curriculum related to health, safety, and nutrition. The key components that ensure physical health, mental health, and safety for both children and staff will be identified, as well as the importance of collaboration with families and health professionals. A focus will be on integrating the concepts into everyday planning and program development. 3C/2/1/0

CDEV 1230 Guiding Children’s Behavior
Examines positive strategies to guide children’s behavior in the early childhood setting. Examines ways to establish supportive relationships with children and guide them in order to enhance learning, development, and well-being. 3C/3/0/0

CDEV 1250 Learning Environments & Experiences
The student will gain knowledge and skills related to providing age-appropriate learning experiences and learning environments for young children. The student will examine the role of the teacher in providing learning experiences to meet each child’s needs, capabilities, interests, and the implementation of developmentally appropriate practice. The student will practice language, literacy, social, emotional, sensory, art, music, math and science learning experiences. 3C/2/1/0

CDEV 1270 Working with Diverse Children and Families
Examines how to work with many types of families. Investigates the importance of the family/school partnership, study methods of effectively communicating with families, and identify community organizations and networks that support families. Various classroom strategies will be explored emphasizing culturally and linguistically appropriate anti-bias approaches supporting all children in becoming competent members of a diverse society. 3C/3/0/0

CDEV 1610 Observation and Assessment
This course focuses on the appropriate use of assessment and observation strategies to document development, growth, play and learning to join with families and professionals in promoting children’s success. Recording strategies, rating systems, multiple assessment tools and portfolios are explored. There will be a focus on increasing objectivity in observing and interpreting children’s behavior, observing developmental characteristics and increasing the awareness of normal patterns of behavior. (Prerequisite(s): Completion of all certificate level coursework or instructor approval) 3C/3/0/0
CDEV 1640 Curriculum Planning
Provides an advanced level of curriculum planning. Emphasis is on organizing, implementing, and evaluating developmentally appropriate curricula. (Prerequisite(s): Completion of certificate level coursework and instructor approval) 3C/3/0/0

CDEV 1910 Practicum 1
Students demonstrate early childhood teaching competencies under guided supervision to make connections between theory and practice and developing professional behaviors. Students apply comprehensive understanding of children and families; developmentally appropriate, child-centered, play-oriented approaches to teaching and learning, and knowledge of curriculum content areas. They design, implement, and evaluate experiences that promote positive development and learning for all young children. (Prerequisite(s) Completion of all other Diploma level courses and instructor approval) 3C/0/0/3

CDEV 2300 Introduction to Language and Literacy
Provides an overview of language learning experiences in early childhood settings and a detailed study of literature/literacy experiences. Students will integrate knowledge of children's language and literacy development, learning environments and teaching strategies to select, plan, present, and evaluate literature experiences to children of different abilities and diverse backgrounds. 3C/2/1/0

CDEV 2340 Working with Exceptional Learners
This course examines the development of children with differing abilities. Students will integrate strategies that support inclusive programs for children, apply legal and ethical requirements including, but not limited to American Disabilities Act and Individuals with Disabilities Education Act. Differentiate between typical and atypical development, analyze the differing abilities of children with physical, cognitive, health/medical, communication, and/or behavioral/emotional disorders. Explore strategies to adapt curriculum to meet the needs of children with developmental differences and cultivate partnerships with families. (Prerequisite(s): Completion of all certificate level or coursework instructor approval) 3C/2/1/0

CDEV 2570 Working with Diverse Children and Families
Examines how to work with many types of families. Investigates the importance of the family/school partnership, study methods of effectively communicating with families, and identify community organizations and networks that support families. Various classroom strategies will be explored emphasizing culturally and linguistically appropriate anti-bias approaches supporting all children in becoming competent members of a diverse society. 3C/3/0/0

CDEV 2620 Practicum 2
Provides an opportunity to apply knowledge and skill in early childhood settings. Students implement a variety of learning experiences that are developmentally appropriate for and culturally sensitive to two different age groups and program settings. (Prerequisite(s): Successful completion of all other required AAS coursework and Instructor approval) 4C/0/0/4

CDEV 2630 Practicum Special Settings/ASL
This course provides an opportunity to apply knowledge and skill in an actual child development setting. Students will observe and assess children’s behavior; facilitate free play; implement adult-directed learning experiences; and maintain professional relationships. (Prerequisite(s): Completion of all certificate level coursework or instructor approval) 3C/3/0/0

CDEV 2650 Organizational Leadership & Management
Prepares students to take an active advocacy role in the child development profession by examining the history, current trends, and future of early childhood care and education. Students will participate in professional development and advocacy activities and practice the Ethical Code of Conduct for early childhood education professionals. (Prerequisite(s): Completion of all certificate level coursework or instructor approval) 3C/3/0/0

Chinese Language

CHIN 1710 Beginning Chinese 1
This course introduces Mandarin Chinese language based on the knowledge of basic skills and strategies in listening, speaking, reading and writing in a general Mandarin speaking environment. Learners will acquire the language through a theme-based and function-based approach, but also by focusing on grammar whenever necessary. China’s culture and history are also important components of the course. At the end of the term, students are expected to be able to communicate some basic personal information, both oral and written. They will read and write simplified Chinese characters and learn some key components of Chinese culture and general knowledge of Chinese history. The course will also prepare students for further studies in Chinese. This course consists of five hours per week of instruction and in-class discussion in addition to homework, tape assignments, and on-line practice. (Prerequisite(s): READ 0722 or READ 0724 or EAPP 0900 with a grade of “C” or better, or appropriate assessment score) (MnTC: Goal 8) 5C/4/1/0

CHIN 1720 Beginning Chinese 2
As the second part of the Accelerated Modern Chinese course series, this course is designed for heritage speakers of Chinese or those who have completed CHIN 1710 at Saint Paul College. The purpose of this course is to help students improve their ability in listening, speaking, reading, and writing Chinese. It particularly aims to help students develop more sophisticated vocabulary and enhance reading and writing ability in Chinese. As with CHIN 1710, the course consists of five hours per week of instruction and in-class discussion, homework, tape assignments and online practice. (Prerequisite(s): CHIN 1710 with a grade of “C” or better or instructor approval) (MnTC: Goal 8) 5C/4/1/0

CHIN 1790 Special Topics in Chinese
This course is designed to present additional or unique material and learning experiences within a specified discipline. The course will be based on student need, flexibility, and may be designed to meet various transfer and pre-major course requirements. Please see a current Course Schedule for complete details. (MnTC: Goal 8) Variable credits 1-6

CNC Toolmaking

CNCT 1410 Introduction to Manufacturing Processes
This course covers a general orientation, an overview of careers, shop safety, measurement, precision tools, band saw theory, lathe theory, drills and vertical milling machines. This course will include additional theory and online assignments. (Co-requisites: CNCT 1430 Materials Process 1 and CNCT 1431 Materials Process 2) 4C/4/0/0

CNCT 1420 Engineering Drawing
This introductory course covers view orientation, section views, surface finish, dimensioning, part tolerance, and machining symbols. This course will include additional theory and online assignments. (Co-requisite: CNCT 2520 CAD) 4C/4/0/0

CNCT 1430 Material Processes 1
This introductory lab covers shop safety, bench work, drill presses, lathe operations, and vertical milling. (Co-requisites: CNCT 1410 Introduction to Manufacturing Processes and CNCT 1431 Materials Process 2) 4C/1/3/0

CNCT 1431 Material Processes 2
This intermediate lab course covers surface grinding, bench work, band saws, lathe operations, drill presses and vertical milling. (Co-requisites: CNCT 1410 Introduction to Manufacturing Processes and CNCT 1430 Materials Process 1). 4C/0/4/0

CNCT 1710 Shop Calculations
The subject matter of this course progresses from the arithmetical operations through measurement systems, basic algebra for shop formula solving skills, practical geometry with shop examples, and
applications and trigonometry, emphasizing its valuable use in the shop and in the trade. (Prerequisite(s): CNCT 1431 with a grade of "C" or better and Co-requisites: CNCT 1720 Geometric Dimensioning and CNCT 1744 Metrology) 2C/2/0/0

**CNCT 1720 Geometric Dimensioning**
This course covers the principles, application, and interpretation of geometric dimensioning and tolerance as per ASME Y14.5M 1994 Standards. (Prerequisite(s): CNCT 1431 with a grade of "C" or better and Co-requisites: CNCT 1710 Shop Calculations and CNCT 1744 Metrology) 2C/2/0/0

**CNCT 1730 CNC 1**
This introductory course covers view orientation, section views, surface finish, dimensioning, part tolerance, and machining symbols. This course will include additional theory and online assignments. (Co-requisite(s): CNCT 1731 CNC 2 and CNCT 2540 Computer Aided Manufacturing) 4C/2/2/0

**CNCT 1731 CNC 2**
This course covers the setup and operation of CNC machine tools. Also includes advanced NC/CNC programming and operation on machining centers. (Co-requisite(s): CNCT 1730 CNC 1 and CNCT 2540 Computer Aided Manufacturing) 4C/2/2/0

**CNCT 1744 Metrology**
This course covers the identification, use and care of precision measuring devices used in manufacturing. Students will learn through lecture and lab how to perform accurate measurements in a repeatable manner. Standard hand devices as well as manual and programmable coordinate measuring machines, vision systems, and optical comparators will be addressed. Theories in quality control principles will be introduced. (Co-requisite(s): CNCT 1710 Shop Calculations and CNCT 1720 Geometric Dimensioning) 4C/3/1/0

**CNCT 2412 Tool Design**
This course covers analysis and design fundamentals required to design production tooling. The course will center around modern mold and die design principles. Content includes types of molds, plastic molding characteristics, metal alloy casting, die types, clearance, tonnage, steel types, steel classification systems, and basics of metallurgy. Course is web-enhanced with assignments, quizzes and exams completed online. (Prerequisite(s): CNCT 1731 and CNCT 1422 with a grade of "C" or better) (Co-requisite(s): CNCT 2421 Mechanical Systems/EMS, CNCT 2441 CNC Applications) 4C/3/1/0

**CNCT 2421 Mechanical Systems/EDM**
The focus of this hybrid course will be on manufacturing design, production processes, and Electrical Discharge Machining. Also included will be production tool design projects, related theory in quality, lean manufacturing, abrasives, mechanical systems, inspection procedures, welding and CNC controls. (Prerequisite(s): CNCT 1744 with a grade of "C" or better) (Co-requisite(s): CNCT 2421 and 2441) 4C/2/2/0

**CNCT 2431 Moldmaking/Plastic Technology**
This introductory, web enhanced course covers the design and construction principles of basic plastic injection molds. Manual mills, lathes, surface grinders, drill presses, as well as 2 and 3 Axis CNC programming and machining, and CAD and CAM are used in a laboratory setting to produce plastic injection molds. (Prerequisite(s): CNCT 1731 and CNCT 1740 and CNCT 1422 or CNCT 2520 with a grade of "C" or better) (Co-requisite(s): CNCT 2530 CNC Lathe). 4C/2/2/0

**CNCT 2441 CNC Applications**
This course covers product development fundamentals including design and research, cost estimating and manufacturing of a metal stamped product, CNC mill and lathe machined parts, and wire and sink EDM machined components. The course will include basic machining processes such as milling, turning, precision surface grinding, form grinding, CNC milling and turning and wire and sink EDM processes. (Prerequisite(s): CNCT 1730 CNC 1 and CNCT 1731 CNC 2 with a grade of "C" or better) (Co-requisites: CNCT 2412 Tool Design and CNCT 2421 Mechanical Systems/EDM) 4C/2/2/0

**CNCT 2520 CAD**
This introductory course will use SolidWorks as the CAD software of instruction and application. Basic construction of solid modeling, engineering drawings, and assemblies will be covered. (Co-requisite: CNCT 1420 Engineering Drawings) 4C/4/0/0

**CNCT 2530 CNC Lathe**
This course covers the programming, set-up, and operation CNC turning centers. This course will include additional theory and online assignments. This is a hybrid course. (Prerequisite(s): CNCT 1430, CNCT 1431 with a grade of "C" or better) (Co-requisite: CNCT 2431 Moldmaking/Plastic Technology) 4C/1/3/0

**CNCT 2540 Computer Aided Manufacturing**
This course covers computer aided manufacturing using Mastercam software. Students will learn to create geometry, toolpaths, and CNC files for a series of projects. The use of PC based CAM software to generate numerical control programs is included. (Co-requisite(s): CNCT 1730 CNC 1 and CNCT 1731 CNC 2) 4C/2/2/0

**CNCT 2550 Industry Internship**
This industry internship will expose the student to manufacturing, and will provide operator training and workplace safety. (Prerequisite(s): A grade of "C" or better in all program courses.) 4C/0/0/4

**Communications**

**COMM 1710 Fundamentals of Public Speaking**
This course covers the basic principles of preparing, researching, and delivering informative, persuasive, impromptu, and extemporaneous speeches. Instructional methodologies instruct students on computer-mediated communication issues as well as international audience analysis and multi-cultural demands of public speaking venues. In addition, this course will include audience analysis and suggestions for overcoming speech anxiety. Students will analyze and evaluate the arguments and rhetorical methods used in public communication. (MnTC: Goals 1 & 8) 3C/3/0/0

**COMM 1720 Interpersonal Communication**
This course focuses on the practical and theoretical concepts of human communications and the styles used in personal, social and professional environments. Students will also acquire skills in critical thinking, perception, listening, verbal and non-verbal expressions and conflict resolution. Students will evaluate their individual strengths and weaknesses in depth and develop techniques to improve interpersonal relations. (MnTC: Goals 1 & 7) 3C/3/0/0

**COMM 1730 Intercultural Communication**
This course will study the influence of cultural differences on communication from both the sender and receiver of information. The course views the human communication process as it is influenced by nationality, ethnicity, linguistic development and gender. The course will explore the ways in which culture can shape the view of “reality” held by its members and influence communication patterns and cross-cultural relationships. Specifically, the United States cultural orientations will be compared to those in other regions of the world. (MnTC: Goals 1 & 8) 3C/3/0/0

**COMM 1740 Mass Media and Communications**
The influence of mass media communications on today’s culture is an important issue in the United States and throughout many parts of the world. Students will research the influence of mass media on society. Topics include: advertising, propaganda, ethics, First Amendment issues, the role of government, literacy requirements of a digital world, and problems and criticisms of media. (Prerequisite(s): READ 0722 or READ 0724 or EAPP 0900 with a grade of “C” or better, or appropriate assessment score) (MnTC: Goals 5 & 9) 3C/3/0/0
COMM 1750 Small Group Communication
In this course students will study communication in small groups. Topics include effective group communication theory and skills; group leadership, cohesion and roles; conflict resolution and decision making; planning and conducting meetings; and parliamentary procedure. The course explores group functioning in a variety of settings, including the workplace. There is an emphasis on the practical application of the content and the practice of oral communication skills. (MnTC: Goals 1 & 7) 3C/3/0/0

COMM 1770 Family Communication
This course centers upon the human communication process from within the contextual dimensions of diverse family units. Elements of study include family patterns and functions, which drive communication, relationship development and its barriers, and family role definitions and functions. The course is designed to provide a sense of understanding of how a family communicates, and the forces which influence the family unit, from both the inside and outside of various family configurations. (MnTC: Goals 1 & 7) 3C/3/0/0

COMM 1780 Gender Communication
This course explores the many interconnected aspects of gender communication, enabling students to experience how gender, within communication and culture, creates, maintains, and changes interpersonal relationships. Communication contexts covered in the course will include family, friendships, education, the media, the workplace, and other markers of identity. (MnTC: Goals 1 & 7) 3C/3/0/0

Computer Science

CSCI 1410 Computer Science and Information Systems
Designed to introduce computer information systems to students in the fields of computer science and information science. The course will cover the basic architecture and design of digital computers and the software that runs on them. Special emphasis will be placed on the technical aspects of the field of computer science and a significant amount of time will be spent developing a sound analytical understanding of the field. Topics such as machine architecture, binary arithmetic, algorithm development, data structures, file organization, database design, systems analysis, data communication and systems software will be covered. Students must have a sound preparation in mathematics through basic algebra. (Prerequisite(s): Grade of “C” or better in MATH 0910 or appropriate assessment score.) 4C/4/0/0

CSCI 1423 Computer Networking 1 - Client
This course introduces students in networking programs to workstation-based operating system design, implementation and administration. The primary components of workstation operating systems such as process management, memory management systems, file systems, security subsystems, I/O control subsystems, etc. are reviewed at the conceptual level. UNIX and Windows based operating systems are used as implementation case studies. Students are expected to become proficient with the ideas inherent in operating system design and how these ideas are implemented in both UNIX and Windows based workstation operating systems. Workstation-based peer-to-peer networking is reviewed in the context of both Windows and UNIX based networking. (Prerequisite(s): Grade of “C” or better in MATH 0910 or appropriate assessment score.) 4C/4/0/0

CSCI 1440 Networking Fundamentals
This course provides an introduction to computer networking. The material in the course follows the OSI networking model as a basis for coverage of the entire field of computer networking. Topics include the physical, data link, network, transport, session, presentation and application layers of the OSI model as they are implemented in current network technologies. Students will use a very hands-on approach learning physical networking as well as logical networking tasks. The course makes extensive use of Cisco networking hardware and software as well as Cisco learning materials. With extensive outside study and review students in this course may become prepared to

CSCI 1450 Web Fundamentals/HTML
This course provides students with a thorough grounding in the World Wide Web, a fundamental knowledge of HTML and a basic understanding of Internet technical architectures. Students learn about search engines, Web servers, scripting, protocols, ISPs and other Internet technologies. Technical architecture topics include the study of networks, Internet protocols, Internet servers, firewalls, security and general issues in conducting commerce. Students will design and program HTML Web pages, tutorials and publish a website project. (Prerequisite(s): Grade of “C” or better in MATH 0910 or appropriate assessment score.) 4C/4/0/0

CSCI 1470 Web Design
This course explores the principles of Web design theory and practice. Concepts related to the look and feel of the client-side of the World Wide Web are emphasized. Topics include the design of a graphical user interface, site content, organization and navigation, with emphasis on the human interface. Also included are Web “usability” issues. Color palettes, font selection and use of animation are discussed. The use of HTML layout concepts and software such as Photoshop and Dreamweaver are introduced. (Prerequisite(s): CSCI 1450) 4C/4/0/0

CSCI 1475 A+ Hardware/Operating System Preparation
The course provides an in-depth review of PC hardware, Operating Systems and the application software that they run. The material encompasses the body of knowledge outlined by CompTIA for their certification as an A+ computer technician. 4C/4/0/0

CSCI 1523 Introduction to Computing & Programming Concepts
This course is focused on computational problem solving. Students must engage in problem-solving tasks such as clarifying any ambiguous aspects of the problem definition, decomposing the problem into subproblems, deciding which computer-related problem solving strategies (such as recursion) might be useful in solving the problem, constructing a solution, implementing the solution as a computer procedure, and verifying that the solution is correct (including modifying it when it is not). (Prerequisite(s): CSCI 1440 and MATH 0920 or appropriate assessment score) 4C/4/0/0

CSCI 1524 Introduction to Algorithms and Data Structures
This course is focused on the use of algorithms and data structures to solve problems. Students will solve various problems using appropriate software design methods and software tools. For example, students need to decide which problem solving strategies (such as divide and conquer) might be useful for a specific problem, construct a solution, design appropriate data types and algorithms, and verify the correctness of the solution. (Prerequisite(s): CSCI 1410, 1523, 1541, and MATH 1730) 4C/4/0/0

CSCI 1533 ANSI C Language Programming
This course is an intermediate introduction to Language C and the tools used to develop executable programs. The course reviews elementary C programming concepts at a rapid pace and continues with Language C development using simple data structures such as arrays and linked lists. This is followed by a detailed review of how memory is managed in Language C, pointers, referencing and dereferencing, C structures and abstract data types. Students should expect that all programming with be done at the command line using command line editors and Linux as the operating system. (Prerequisite(s): CSCI 1523) 2C/2/0/0

CSCI 1541 Java Programming
This course covers the syntax of the Java programming language, and object-oriented programming with the Java programming language. It includes variables, primitive data types, decision structures, loops, file I/O, methods, classes, arrays, text processing, wrapper classes, and inheritance. Students will learn how to develop Java applications using the command line interface. (Prerequisite(s): CSCI 1410 or CSCI 1523) 4C/4/0/0
CSCI 1542 Java Programming 2
This course provides students with first-hand experience creating graphical user interface (GUI) applications using AWT, Swing, and JavaFX classes. Students will learn how to handle exceptions and create Java applets. Students will create Java applications to create connect to, and manipulate an SQL database. Students will learn Java concurrency and a multi-thread application will be created. Students will also have exposure to JUnit testing. (Prerequisite(s): CSCI 1410 and CSCI 1541) 4C/4/0/0

CSCI 1550 Database Management Fundamentals
This course covers information models and systems; database query languages; object-oriented and relational database design; transaction processing; distributed databases; data modeling; normalization; and physical database design. The relational model is studied in-depth and students are expected to develop proficiencies in the design and implementation of databases using it. Students will spend a significant portion of the course studying SQL. Students are expected to become proficient in the use of SQL and the implementation database typically used for this course is MYSQL. This course is based on ACM specifications for a first course in Database Systems. (Prerequisite(s): CSCI 1410) 4C/4/0/0

CSCI 1714 Introduction to Data Science
This is an introductory course in the fundamental topics of data science: data architecture, data acquisition, data analysis and visualization, and data archiving. Practical techniques for working with large-scale data will be presented. Students will learn the use of analysis techniques to include summation of the data, using samples of data to make predictions about the larger context, and visualization techniques for presenting the results of data analysis. A significant portion of the course will focus on the migration of and analysis of the data using the R platform. (Prerequisite(s): MATH 1740 Introduction to Statistics) 4C/4/0/0

CSCI 2410 Management Information Systems
This course provides elementary concepts to the management of information systems. The course is designed to allow the student of management information systems to evaluate, design and implement information processing systems that support the business enterprise. The purpose of the course is to understand the underlying principles of information systems for different management functions from the business perspective. (Prerequisite(s): CSCI 1410 and CSCI 1550) 3C/3/0/0

CSCI 2420 Computer Security
This course is a comprehensive introduction to computer security. The course is an in-depth introduction the concept of cybercrime and security in networks and the internet. It presents the conceptual frameworks of computer security assessment. Topics covered include denial of service attacks, malware, viruses, trojan horses, worms, encryption, industrial espionage, internet fraud, cyber terrorism and information warfare. The course makes extensive use of in class and Internet-based laboratories within which computer security scenarios are implemented and strategies for their design and operation are reviewed. Students taking this course should have a background in computer networking and a thorough understanding of client/server networking. With extensive outside study and review students in this course may become prepared to become certified as Security+ level technicians. (Prerequisite(s): CSCI 1475 or CSCI 1423, and CSCI 1440) 4C/4/0/0

CSCI 2440 Client Side Programming 1
This course introduces JavaScript programming and the skills needed to create dynamic, client-side web pages. The basics of JavaScript programming are covered, including: basic scripting, control statements, functions, arrays, and objects. Students will then explore the DOM (Document Object Model), JavaScript event handling, DHTML (Dynamic HTML) and select advanced topics. Class sessions include hands-on work and lectures. This course assumes a working knowledge of HTML and a previous introduction to CSS (Cascading Style Sheets). (Prerequisite(s): CSCI 1450) 4C/4/0/0

CSCI 2442 Server Side Programming
This course is designed for students interested in developing the server-side skills needed to create dynamic, data-driven websites. This course uses the popular server-side programming language PHP to interact with SQL databases. Fundamental techniques are covered, including: connecting to a database and performing basic database operations to create, read, update, and delete data. HTML form elements are reviewed and then form processing is discussed as well as writing functions for data validation. Server-side scripting is used to generate dynamic web pages. Students will learn how to authenticate users, manage user requests, and maintain user state through sessions and cookies. (Prerequisite(s): CSCI 1450) 4C/4/0/0

CSCI 2451 Computer Networking 2 – Server
This course is designed to give the student of networking an introduction to client/server networking. Students in this course will be expected to install and configure both the server operating system and clients connecting to the server. At the completion of the course students understand the basics specifying, designing, installing, configuring and maintaining a client/server network. Microsoft Client and Server Software is utilized as the teaching platform and students are expected to become proficient in the use to this commercial platform. Specialized topics include network security, name resolution system, DNS, DNSSWINS, network access protection (NAP), file services, print services, Active Directory service, etc. A significant amount of time in the course is dedicated to laboratory exercises and hands-on experience. With extensive outside study and review successful students in this course may become prepared to become certified as Microsoft Systems Administrator. (Prerequisite(s): CSCI 2420) 4C/4/0/0

CSCI 2453 Computer Virtualization
This course introduces software and technologies used to create virtual computers. Proprietary virtualization software such as VMWare and Microsoft Virtualization are covered as well as open source projects such as Xen and virtualbox. Students will work directly with servers and install and configure each of the virtualization systems during the course. This course is conducted in a hands-on manner and classes typically will be dedicated to hands-on exercises. (Prerequisite(s): CSCI 2420 or CSCI 2461) 4C/4/0/0

CSCI 2460 Discrete Structures of Computer Science
This course addresses the foundations of discrete mathematics with application of computer science. Sets, sequences, functions, big-O, propositional/predicate logic, proof methods, counting methods, recursion/recurrences, relations, trees/ graph fundamentals are covered in detail. Credit will not be awarded for both MATH 2460 and CSCI 2460. (Prerequisite(s): CSCI 1410 and MATH 1730 or higher) 4C/4/0/0

CSCI 2461 Computer Networking 3 – Linux
This course provides an in-depth study of Linux based operating systems administration and networking. The installation configuration and management of Linux-based servers is covered in-depth. The course also covers the configuration of Linux-based operating systems in a network environment. Students will spend a significant amount of the classroom meeting time conducting hands-on laboratory exercises. With extensive outside study and review students in this course may become prepared to become certified as Linux systems administrators. (Prerequisite(s): CSCI 1423 or CSCI 1475) 4C/4/0/0

CSCI 2465 Computer Networking 4 – Infrastructure
This course introduces networking students to the core infrastructure components of local, campus and wide area networks. The design, installation and configuration of routers, switches and other networking infrastructure devices is covered in-depth. Routing protocols and concepts are a primary focus of study in the course. The course makes extensive use of Cisco materials and equipment for routing protocols and concepts. This course assumes that the students have a background through experience, or coursework, that encompasses a fundamental understanding of networking. With extensive outside study and review, students in this course may become prepared to become certified Cisco networking technicians. (Prerequisite(s): CSCI 1440) 4C/4/0/0
CSCI 2466 J2EE-JSP and Servlets
This is a first course in using Java technology for the development of applications deployed in a client/server environment. The course introduces the concept of a Java application server and teaches the student how to install and configure an application server for use in developing and deploying distributed Java applications. Students then are introduced to elementary servlet programming, Java server pages [JSP] development and deployment, Java standard template library [JSTL] and an introduction to Java server faces [JSF]. Students will then develop server-based applications which access data stored in a database management system via the Java database connector [JDBC]. Students in this course are expected to have a background in introductory Java programming. (Prerequisite(s): CSCI 1410 and CSCI 1450 and CSCI 1541) 4C/4/0/0

CSCI 2469 Advanced Programming Principles
The class is focused on principles that underlie the structure and analysis of programs. Students will learn different programming styles, such as those based on functional programming, search-based programming, and concurrent programming, and will learn to program over symbolic structures. Applications will allow students to learn about modular development and language principles to support modularity. (Prerequisite(s): CSCI 1410 and CSCI 1523 and CSCI 1524 and CSCI 1541) 4C/4/0/0

CSCI 2480 Network Security and Penetration Prevention
This course examines the critical defensive technologies needed to secure network perimeters. Coverage includes network security threats and goals, advanced TCP/IP concepts, router security, intrusion detection, firewall design and configuration, IPSec and virtual private network (VPN) design, and wireless design and security. (Prerequisite(s): Grade of “C” or better in CSCI 2420, 2461, and 2465) 4C/4/0/0

CSCI 2482 Security Incident Handling, Response and Disaster Recovery
This course provides an overview of the process of creating and implementing policies and procedures for responding to security incidents and for disaster recovery. The student will gain skills in creating policies for responding to security incidents as well as the business continuity and disaster recovery aspects of the incident response plan. (Prerequisite(s): Grade of “C” or better in CSCI 1523, 2420, and 2465) 4C/4/0/0

CSCI 2484 Ethical Hacking and Countermeasures
This course provides an introduction to ethical hacking and security testing. Topics include tools and techniques used to detect system vulnerabilities. Students will learn how to set up defensive systems and countermeasures. (Prerequisite(s): Grade of “C” or better in CSCI 1523 and CSCI 2420) 4C/4/0/0

CSCI 2485 Computer Networking 5 - Cisco Enterprise Networking
The course describes the architectures and considerations related to designing, security, operating, and troubleshooting enterprise networks. This course covers wide area network (WAN) technologies and quality of service (QoS) mechanisms used for secure remote access. ENSA also introduces software-defined networking, virtualization, and automation concepts that support the digitalization of networks. Students gain skills to configure and troubleshoot enterprise networks, and learn to identify and protect against cybersecurity threats. (Prerequisite(s): CSCI 2465 with a grade of “C” or better) 4C/4/0/0

CSCI 2570 Machine Architecture and Organization
This course covers basic hardware and software structure; I/O and main memory organization; internal representation of data; addressing methods; program controls; microprocessor families; multiprocessors; concurrent programming and synchronization; and RISC architectures. Students in this course will become proficient in assembly level programming and will extend this knowledge to higher level languages such as language C. Students are expected to devote a significant amount of time in analyzing designing and implementing low-level software for this platform. The course is designed around the specifications published by the ACM and IEEE for a course on Computer Organization and Architecture. (Prerequisite(s): CSCI 1410, CSCI 1523 and MATH 1730 with a grade of “C” or better.) 4C/4/0/0

CSCI 2597 Special Topics in Computer Science
This course provides learning experiences that meet the needs of students, major programs, and the College in the area of computer science. (Prerequisite(s): Instructor approval) Variable credits 1-6

CSCI 2622 Client Side Programming 2
This course is an advanced course in JavaScript programming for the client and the server. It covers key technologies such as AJAX, Bootstrap and Node.js. The course begins with the elementary aspects of AJAX programming with practical examples. Next, the bootstrap framework is explored, with a focus on Responsive Web Design to accommodate displays for all devices, from small mobile phones, to medium tablets to large desktop environments. Finally, an introduction to the Node.js runtime environment is explored, including server configuration and fundamental Node.js commands. In addition, advanced JavaScript topics and techniques currently used in industry will be covered. The key elements of the course are hands-on exercises utilizing tools and techniques to develop interactive websites. This course assumes a previous introduction to JavaScript. (Prerequisite(s): CSCI 1450 and CSCI 2440) 4C/4/0/0

CSCI 2690 Computer Science Internship
A cooperative work-student program between Saint Paul College Computer Science Program and a business facility to allow the student an employment-like experience. (Prerequisite(s): Instructor approval) Variable 1-8 credits

Cosmetology, Nail Care and Esthetician Courses

COSM 1601 Preclinic Hair Care 1
Provides students with the opportunity to develop basic hair skills with a focus on trichology, shampoo, conditioning, cutting and finishing hair techniques. (Prerequisite(s): Completion of or concurrent with CHSN 1698, CHSN 1699) 3C/0/3/0

COSM 1602 Preclinic Hair Care 2
Provides students with the opportunity to continue to develop hair service skills with a focus on shampooing, conditioning, styling, long hair, wigs and extensions. (Prerequisite(s): Completion of or concurrent enrollment in COSM 1601) 3C/1/2/0

COSM 1603 Preclinic Nail Care
Provides an introduction to nail care including manicuring, pedicuring and artificial nails. (Prerequisite(s): Completion of or concurrent enrollment in CHSN 1698 and CHSN 1699) 3C/1/2/0

COSM 1604 Preclinic Skin Care
This course provides fundamental guidelines for maintaining and enhancing the skin through proper skin care, massage, hair removal and makeup. (Prerequisite: COSM 1601) 3C/1/2/0

COSM 1605 Preclinic Hair Color
Provides an introduction to temporary, semi-permanent, permanent and de-colorization hair color services. (Prerequisite(s): Completion of or concurrent enrollment in COSM 1606) 3C/1/2/0

COSM 1606 Preclinic Chemical Control
Provides an introduction to cosmetology chemicals and their applications. This includes curl reformation, permanent waving, soft curl perming and chemical relaxing. (Prerequisite(s): Completion of or concurrent enrollment in COSM 1601 and COSM 1602) 3C/1/2/0

COSM 1608 Eyelash Extensions
This course provides fundamental guidelines in the practical application of eyelash extensions including client consultation, design, cleansing the eye area, applying eyelash extensions, and removing eyelash extensions. (Prerequisite(s): High School Diploma.) 2C/1/1/0
COSM 1620 Advanced Hair Care
Provides advanced skill training, color and chemical reformation in hair cutting and styling. (Prerequisite(s): Completion of or concurrent enrollment in COSM 1605) 4C/1/3/0

CHSN 1698 Body Systems and Diseases
This course presents cells, tissue and organs as they relate to the histology and physiology of the skin, hair and nails and how they work together to form body systems. Major body systems will be explained, along with their impact on the skin, hair and nails. Students will study skin, hair and nail diseases and disorders in order to differentiate between treatable disorders and those that require referral to a physician. (Prerequisite(s): Enrollment in Cosmetology, Nail Technician or Esthetician Program) 3C/2/1/0

CHSN 1699 Preclinic Introduction
Provides an introduction to cosmetology, nail technology and skin care, including professional image, Minnesota laws and rules, safety and sanitation. (Prerequisite(s): High School Diploma or a GED) 3C/2/1/0

COSM 1901 Clinic 1 for Cosmetology Majors
This course is designed to provide clinical practice and performance of previously learned hair, skin and nail skills. This course provides the necessary hours to complete hair, skin and nail care quotas as mandated by the State of Minnesota and to develop proficiency in hair, skin and nail services. (Prerequisite(s): COSM 1602) 3C/0/3/0

COSM 1902 Clinic 2 for Cosmetology Majors
This course is designed to provide clinical practice and performance of previously learned hair, skin and nail skills. This course provides the necessary hours to complete hair, skin and nail care quotas as mandated by the State of Minnesota and to develop proficiency in hair, skin and nail services. (Prerequisite(s): COSM 1602) 3C/0/3/0

COSM 1903 Clinic 3 for Cosmetology Majors
This course is designed to provide clinical practice and performance of previously learned hair, skin and nail skills. This course provides the necessary hours to complete hair, skin and nail care quotas as mandated by the State of Minnesota and to develop proficiency in hair, skin and nail services. (Prerequisite(s): COSM 1602) 3C/0/3/0

COSM 1904 Clinic 4 for Cosmetology Majors
This course is designed to provide clinical practice and performance of previously learned hair, skin and nail skills. This course provides the necessary hours to complete hair, skin and nail care quotas as mandated by the State of Minnesota and to develop proficiency in hair, skin and nail services. (Prerequisite(s): COSM 1602) 3C/0/3/0

COSM 1905 Clinic 5 for Cosmetology Majors
This course is designed to provide clinical practice and performance of previously learned hair, skin and nail skills. This course provides the necessary hours to complete hair, skin and nail care quotas as mandated by the State of Minnesota and to develop proficiency in hair, skin and nail services. (Prerequisite(s): COSM 1602) 3C/0/3/0

COSM 1906 Clinic 6 for Cosmetology Majors
This course is designed to provide clinical practice and performance of previously learned hair, skin and nail skills. This course provides the necessary hours to complete hair, skin and nail care quotas as mandated by the State of Minnesota and to develop proficiency in hair, skin and nail services. (Prerequisite(s): COSM 1602) 3C/0/3/0

COSM 1907 Clinic 7 for Cosmetology Majors
This course is designed to provide clinical practice and performance of previously learned hair, skin and nail skills. This course provides the necessary hours to complete hair, skin and nail care quotas as mandated by the State of Minnesota and to develop proficiency in hair, skin and nail services. (Prerequisite(s): COSM 1602) 3C/0/3/0

COSM 1908 Clinic 1 for Nail Technicians
This course is designed to provide clinical practice and performance of previously learned hair, skin and nail skills. This course provides the necessary hours to complete hair, skin and nail care quotas as mandated by the State of Minnesota and to develop proficiency in hair, skin and nail services. (Co-requisite(s): COSM 1603) 3C/0/3/0

ESTH 1651 Clinic 1 for Estheticians
This course is designed to provide clinical practice of previously learned skin care skills. (Prerequisite(s): CHSN 1698, CHSN 1699, ESTH 1645 and ESTH 1650 or concurrent enrollment) 4C/0/4/0

ESTH 1652 Clinic 2 for Estheticians
This course is designed to provide clinical practice of previously learned skin care skills. This course provides the necessary hours to complete skin care quotas as mandated by Minnesota Laws and Rules. (Prerequisite(s): Students must have 480 clock hours and have completed all preceding courses in the Esthetics program, ESTH 1651) 4C/0/4/0

ESTH 1645 Cosmetic Chemistry and Makeup Applications
Chemistry is a science that deals with the composition, structure and properties of matter and how matter changes. This course covers the composition of product ingredients, changes produced by cosmetic products, color theory, make up application techniques, lash and brow tinting and temporary hair removal. (Prerequisite(s): CHSN 1698, CHSN 1699, concurrent enrollment or within the same semester) 4C/3/1/0

ESTH 1650 Skin Analysis and Massage
Students will learn to greet customers and to consult in a professional manner. Students will learn to perform draping, skin analysis and proper massage techniques according to client’s skin type. Students will learn, in a supervised setting, care and proper use of esthetic equipment. Emphasis is on maintaining safety. (Prerequisite(s): CHSN 1698, CHSN 1699 and ESTH 1645, concurrent enrollment or within the same semester) 4C/1/3/0

COSM 1951 Salon Operations 1 for Cosmetology/Nail Technician Majors
Provides students with additional time to complete the required services and/or hours for licensure. (Prerequisite(s): Completion or concurrent enrollment in COSM 1905 or COSM 1901 or COSM 1908) 1C/0/1/0

COSM 1952 Salon Operations 2 for Cosmetology/Nail Technician Majors
Provides students with additional time to complete the required services and/or hours for licensure. (Prerequisite(s): Completion or concurrent enrollment in COSM 1905 or COSM 1901 or COSM 1908) 2C/0/2/0

COSM 1953 Salon Operations 3 for Cosmetology/Nail Technician Majors
Provides students with additional time to complete the required services and/or hours for licensure. (Prerequisite(s): Completion or concurrent enrollment in COSM 1905 or COSM 1901 or COSM 1908) 3C/0/3/0

COSM 1954 Salon Operations 4 for Cosmetology/Nail Technician Majors
Provides students with additional time to complete the required services and/or hours for licensure. (Prerequisite(s): Completion or concurrent enrollment in COSM 1905 or COSM 1901 or COSM 1908) 4C/0/4/0

COSM 1955 Salon Operations 5 for Cosmetology/Nail Technician Majors
Provides students with additional time to complete the required services and/or hours for licensure. (Prerequisite(s): Completion or concurrent enrollment in COSM 1905 or COSM 1901 or COSM 1908) 5C/0/5/0

COSM 1956 Salon Operations 6 for Cosmetology/Nail Technician Majors
Provides students with additional time to complete the required services and/or hours for licensure. (Prerequisite(s): Completion or concurrent enrollment in COSM 1905 or COSM 1901 or COSM 1908) 6C/0/6/0

ESTH 1651 Salon Operations 1 for Estheticians
This course gives students additional time to complete the required services and/or hours for licensure. (Prerequisite(s): Completion or concurrent enrollment in ESTH 1652) 1C/0/1/0
ESTH 1652 Salon Operations 2 for Estheticians
This course gives students additional time to complete the required services and/or hours for licensure. (Prerequisite(s): Completion or concurrent enrollment in ESTH 1651) 2C/0/2/0

ESTH 1653 Salon Operations 3 for Estheticians
This course gives students additional time to complete the required services and/or hours for licensure. (Prerequisite(s): Completion or concurrent enrollment in ESTH 1652) 3C/0/3/0

ESTH 1671 CIDESCO Exam Preparation
This course was created to provide the necessary skills needed to successfully complete the CIDESCO exam. (Prerequisite(s): High School Diploma/GED) 4C/1/3/0

ESTH 1672 CIDESCO Exam
This course was created to test the skills the candidate learned in the CIDESCO Prep class. (Prerequisite(s): ESTH 1671) 2C/0/2/0

ESTH 1710 Risk Management for Estheticians
This course will cover risk management, professional liability, infection control, health and safety for advanced practice estheticians. Additional topics will include OSHA, HIPAA, and general theory of common supplements, OTC medications and prescription drugs and their skin effects. (Concurrent enrollment in ESTH 1712, ESTH 1714, ESTH 1716, ESTH 1718 required) 2C/0/2/0

ESTH 1712 Advanced Exfoliation
This course will provide practical knowledge and practice of exfoliation using advanced chemicals and devices including but limited to: peels, dermaplaning and microdermabrasion. Students will learn to recognize and treat skin conditions within scope of practice, use proper classification systems and skin analysis, utilize advanced client consultation techniques, and understand wound healing as it relates to advanced esthetics. This class will also cover advanced training in products and ingredients and proper pre- and post- at home care. (Concurrent enrollment in ESTH 1710, ESTH 1714, ESTH 1716, ESTH 1718 required) 4C/1/3/0

ESTH 1714 Advanced Skin Care Techniques
This course will provide practical knowledge and training in machines and devices used in an advanced practice esthetics setting, including but not limited to: Galvanic, high frequency, skin needling, radio frequency, ultra sonic, micro current, LED. Class will also include training on lymphatic drainage, advanced histology of the skin, client consultation, electrical and light theory and best business practice. (Concurrent enrollment in ESTH 1710, ESTH 1712, ESTH 1716, ESTH 1718 Required) 3C/2/3/0

ESTH 1716 Advanced Clinic 1 for Estheticians
This course is designed to provide clinical practice of previously learned advanced esthetics skills. (Concurrent enrollment in ESTH 1710, ESTH 1712, ESTH 1714, ESTH 1718 required) 4C/0/4/0

ESTH 1718 Advanced Clinic 2 for Estheticians
This course is designed to provide clinical practice for previously learned advanced esthetics skills. (Concurrent enrollment in ESTH 1710, ESTH 1712, ESTH 1714, ESTH 1716 required) 4C/0/4/0

Culinary Arts

CULA 1405 Culinary Arts Foundations 1
This course is made up of two units: “Introduction to Culinary Arts” which is designed to allow the student to become familiar with the hospitality industry, our program and the foundation skills necessary to become a foodservice professional, and “Basic Baking” which is designed to allow the student to develop knowledge and skills necessary to work in a professional baking environment. 2C/0/2/0

CULA 1415 Culinary Arts Foundations 2
This course is made up of two units: “Basic Pantry and Cold Food Production” which is designed to allow the student to develop knowledge and skills necessary to work in the garde manger and pantry areas in a professional foodservice environment, and “Basic Range and Hot Food Production” which is designed to allow the student to develop knowledge and skills necessary to work in a professional foodservice environment. Foundation stocks, sauces and soups are the major component. Must be taken concurrently with Culinary Arts Foundations 1 or have instructor approval. 4C/0/4/0

CULA 1425 Fundamentals of Pastry
This course provides a thorough exploration into the basics of the sweet kitchen. Students prepare and evaluate a number of pastry fundamentals to a marketable level. (Prerequisite(s): CULA 1405 or instructor approval) 1C/0/1/0

CULA 1435 Butchery and Charcuterie
Covers the processing of meat, fish and poultry items. Issues of grading, yield, market forms and standards are discussed. Many types of meat, fish and poultry are processed in the class. (Prerequisite(s): CULA 1405 or concurrently with CULA 1405) 2C/0/2/0

CULA 1445 Food Service Practicum
Students explore various aspects of quantity food production in a fast-paced, high-volume food service setting. Students are introduced to aspects of quantity range, bake shop, short-order and pantry operations. (Prerequisite(s): CULA 1405 and CULA 1415) 2C/0/2/0

CULA 1455 Food Safety and Sanitation
Develops an understanding of the basic principles of sanitation and safety in order to maintain a safe and healthy environment for the consumer. Optional ServSafe exam provided for certification. 2C/2/0/0

CULA 1465 Culinary Nutrition Theory
Covers the fundamentals of nutrition theory taught from the point of view of the chef. Healthy cooking techniques, dietary requirements and current nutritional research topics are explored. 2C/2/0/0

CULA 1505 Contemporary Bake Shop Production
Allows students to develop production baking skills to a marketable level. (Prerequisite(s): CULA 1455, CULA 1460, CULA 1465, CULA 1490) 2C/0/2/0

CULA 1515 Contemporary Pantry Production
Allows the students to develop marketable production skills in the pantry/cold food area. (Prerequisite(s): CULA 1455, CULA 1460, CULA 1465, CULA 1490) 2C/0/2/0

CULA 1525 Contemporary Range Production
Allows students to develop marketable skills in many aspects of hot food production in a production kitchen environment. (Prerequisite(s): CULA 1455, CULA 1460, CULA 1465, CULA 1490) 2C/0/2/0

CULA 1545 Contemporary Quick Fare Production
Allows the student to develop marketable production skills in the Grill/Short Order cooking area. (Prerequisite(s): CULA 1455, CULA 1460, CULA 1465, CULA 1490) 2C/0/2/0

CULA 1555 Culinary Career Portfolio
This course exposes students to the diverse employment opportunities in the food service industry. Students develop an electronic career portfolio and refine employment security techniques. (Prerequisite(s): CULA 1405 or CULA 1620) 1C/1/0/0

CULA 1565 Principles of Culinary Leadership
Allows students to prepare for the transition from employee to supervisor by developing human relations and personnel management skills in a foodservice environment. (Prerequisite(s): CULA 1455, CULA 1460, CULA 1465, CULA 1490 or instructor approval) 2C/1/1/0

CULA 1575 Artisan Baking and Pastry
Introduces students to a variety of upscale scratch cake and pastry items and plated desserts. The course focuses on high quality ingredients, sound production and finishing techniques. (Prerequisite(s): CULA 1425 or instructor approval) 2C/0/2/0
CULA 1585 Introduction to Dining Room Service
The course covers serving techniques and dining room operations through classroom and laboratory experience in the City View Grille Dining Room. (Prerequisite(s): CULA 1405 and CULA 1415) 1C/0/1/0

CULA 1590 Cafe Dining Practicum
Students will develop skills in breakfast cookery and casual lunch fare in the student-run City View Grille. (Prerequisite(s): CULA 1505, CULA 1515, CULA 1525, CULA 1545) 2C/0/2/0

CULA 1601 Pastry Foundations
This course is designed to allow the student to become familiar with the hospitality industry. Students will develop knowledge and skills necessary to work in a professional foodservice environment. Kitchen equipment, products identification, cooking methods and knife skills introduction are the major components of this class. 3C/0/3/0

CULA 1611 Introduction to Baking
This course is introducing students to basic baking in which students will get an introduction to tools, equipment, sanitation, safety, measurement and recipe conversion. The training pivots around the fundamentals of baking and the science behind it. Production will focus on the making of Cookies, Quick breads and Short Doughs. 2C/0/2/0

CULA 1621 Pastry Basics
This course will build on the baking and pastry skills from the previous Introduction to Baking class. Students will produce and evaluate a number of pastry fundamentals to a marketable level. Training follows the highest sanitation and safety standards during any food preparation. 2C/0/2/0

CULA 1631 Introduction to Breads
This course covers leavened and unleavened doughs & to lean and rich doughs. Students develop the knowledge, skills and techniques required in bread production. Recipe costing is introduced in this class. Training follows the highest sanitation and safety standards during any food preparation. 2C/0/2/0

CULA 1641 Baking Externship 1
This course is designed to expose students to the industry in a 32-hour externship. Students reflect on their experiences through assignments and discussions. 1C/0/0/1

CULA 1650 Pastry Externship 1
This course is designed to expose students to the industry in a 32-hour externship. Students reflect on their experiences through assignments and discussions. 1C/0/0/1

CULA 1700 Culinary Externship
This course is designed to expose students to the industry in a 96 hour externship. Students reflect on their experiences through assignments and discussions. (Prerequisite(s): CULA 1445 or instructor approval) 3C/0/0/3

CULA 1705 Sustainable Foods Practicum
Students get an introduction to local and sustainable food systems through working with a local farm to create and serve a farm to table dinner. (Prerequisite(s): CULA 1445) 1C/0/1/0

CULA 2100 Menu Composition and Analysis
Requires students to develop marketable skills in the areas of menu planning, menu analysis, production scheduling and recipe interpretation for different menu settings and operations. Must be taken as a block with CULA 2105-2220. (Prerequisite(s): CULA 1550) 2C/0/2/0

CULA 2105 Applied Restaurant Operations 1
Requires students to develop marketable skills in many aspects of hot and cold food preparation in a fine dining environment. Must be taken as a block with CULA 2105-2220. (Prerequisite(s): CULA 1550) 3C/0/3/0

CULA 2110 Applied Restaurant Operations 2
Requires students to develop marketable skills in many aspects of hot and cold food preparation in a fine dining environment. Must be taken as a block with CULA 2105-2220. (Prerequisite(s): CULA 1550) 3C/0/3/0

CULA 2115 Contemporary Dining Room Service
The course explores and refines advanced aspects of front of the house restaurant operations. Students learn and practice functions of dinner service at the City View Grille. (Prerequisite(s): CULA 1590) 1C/0/1/0

CULA 2220 Sensory Evaluation & Wine Pairing
The advanced culinary student will develop a palate of flavor and aroma profiles, an understanding of food and wine pairing techniques, as well as proper service and wine-making processes. Wine varietals will be professionally sampled and evaluated based upon color, aroma, body and finish in order to cultivate an appreciation for the integral relationship between food and wine. Must be taken as a block with CULA 2105-2220. (Prerequisite(s): CULA 1545 and completion of General Education requirements) 2C/2/0/0

CULA 2225 Garde Manger
The course explores the art of cold food preparation through various mediums. Thorough explorations into cold sauces, pates, terrines, condiments and forcemeats will be highlighted in a contemporary buffet format. (Prerequisite(s): CULA 2220) 1C/0/1/0

CULA 2230 Food/Beverage/Labor Cost Control
Covers the principles of menu pricing and analysis, budgeting and inventory control systems in foodservice operations. (Prerequisite(s): CULA 1490 or Instructor approval) 3C/3/0/0

CULA 2235 Event Based Dining Capstone
The course explores one-off dining experiences in a number of settings. Students learn the process of catering events with a diverse set of standards, expectations and clientele. Students become familiar with all facets of events from the concept and development of the menu through set-up, service and strike of the event. (Prerequisite(s): CULA 2225) 2C/0/2/0

CULA 2300 Viennoiserie
This course covers leavened rich doughs while reviewing laminated doughs. Students develop the knowledge, skills and techniques required in viennoiserie production. Training follows the highest sanitation and safety standards during any food preparation. 2C/0/2/0

CULA 2310 Entremets & Specialty Cakes
This course covers custards, mousses, Bavarians mousses and international cakes. Students will receive additional knowledge and will practice their skills and techniques during the filling, assembly and decoration of classic cakes. Training follows the highest sanitation and safety standards during any food preparation. 2C/0/2/0

CULA 2320 Advanced Decorating and Pastry
This course emphasizes the preparation, making, production and decoration of cakes. The student’s training will focus on learning concepts, procedures and techniques needed to produce market-worthy decorations. 3C/0/3/0

CULA 2330 Showpieces and Confiserie
This course emphasizes the preparation and production of bonbons, candies and confections. The student’s training will focus on learning concepts, procedures and techniques related to chocolate tempering and sugar cooking. 3C/0/3/0

CULA 2340 Baking Externship 2
This course is designed to expose students to the industry in a 32-hour externship. Students reflect on their experiences through assignments and discussions. 1C/0/0/1

CULA 2350 Pastry Externship 2
This course is designed to expose students to the industry in a 32-hour externship. Students reflect on their experiences through assignments and discussions. 1C/0/0/1
Culinary Arts - Wine

WINE 1600 Professional Introduction to Wine
Review the origins and history of the vine, vineyard calendar, soil and climate, natural hazards, growing regions and major grape varietals of the world. Examine considerations for harvest of grapes, techniques for making still wines (red, white and rose), techniques for making sparkling and fortified wines, processing and aging techniques and the blending process. Explore grape varietals, regulations, history, culture and traditions: USA, France, Italy, Spain/Portugal, Germany, Australia, South America and South Africa. (Prerequisite(s): Must be 21 years or older. Must be taken concurrently with WINE 1610-1640.) 2C/2/0/0

WINE 1610 Flavor Dynamics of Wine
Experience professional wine evaluation based on sensory (visual, organoleptic) traits. Comparison and analysis of world wine regions. Includes an emphasis on the development of a wine vocabulary and sensory description techniques. (Prerequisite(s): Must be 21 years or older. Must be taken concurrently with WINE 1600-1640.) 2C/2/0/0

WINE 1620 Professional Wine Service
Allows student to develop professional wine service techniques, wine etiquette, glassware/equipment options, building a relationship with the guest and elements of the guests' aesthetic experience. (Prerequisite(s): Must be 21 years or older. Must be taken concurrently with WINE 1600-1640.) 1C/1/0/0

WINE 1630 Strategies for Pairing Food and Wine
Allows student to analyze the rationale behind successful wine and food pairings and the impact of preparation techniques on wine choice. Learn how to enhance wine and food pairing opportunities and improve menu and wine list compatibility. (Prerequisite(s): Must be 21 years or older. Must be taken concurrently with WINE 1600-1640.) 2C/1/1/0

WINE 1640 Wine Marketing
This course will allow students to review legalities, wine market cycles, wine pricing, developing a wine program, building a wine list and wine storage. An important part of the course is to develop strategies for determining your target market, wine merchandising and promotional opportunities, consumer education and building strong repeat business. (Prerequisite(s): Must be 21 years or older. Must be taken concurrently with WINE 1600-1640.) 2C/2/2/0

Digital Graphics and Interactive Multimedia

DGIM 1400 Introduction to Computer Graphics
Introduction to Computer Graphics will introduce students to a wide variety of software applications used in the Visualization Technology area as well as cover the basic theories and practices regarding still image graphics, file formats, animation and color theory. In addition, the importance of an online portfolio will be discussed and a basic portfolio will be constructed. 4C/4/0/0

DGIM 1443 Graphical Web Design 1
This course explores the basics of Adobe Muse 1. Topics include file organization, the Adobe Muse interface, site control, images, text, linking pages, ordered, unordered and defined lists, color schemes, tables and basic layouts. The focus of this course is to introduce the learner to Adobe Muse and develop a simple website using the techniques learned. 2C/2/0/0

DGIM 1444 Graphical Web Design 2
This course explores the more advanced topics of Adobe Muse including frames, rollovers, cascading style sheets, HTML forms, DHTML, automation, sounds, templates and libraries and troubleshooting. It is recommended that student taking this course have taken DGIM 1443 or its equivalent. 2C/2/0/0

DGIM 1448 Adobe Animate 1
This course introduces the student to Adobe Animate. Topics include common Adobe Animate tasks, the Adobe Animate interface, setting up, modifying, navigating Adobe Animate documents, creating simple graphics, working with text, working with bitmaps and building professional graphics. This is a hands-on course where the students will develop a project using the knowledge gained in class. 2C/2/0/0

DGIM 1449 Adobe Animate 2
This course takes you beyond the basics of DGIM 1448. Topics include adding sounds to Adobe Animate, publishing movies, layer editing, Action Script, importing Quick Time movies into Adobe Animate and creating 3-D effects in Adobe Animate. This is a hands-on course where the students will develop a project using knowledge gained in class. It is recommended that students taking this course have taken DGIM 1448 or its equivalent. 2C/2/0/0

DGIM 1480 InDesign
This course introduces students to Adobe InDesign Creative Cloud. Students will be introduced to Adobe InDesign workspace, basic selection processes and tool operations. In this course, the student will learn fundamental techniques to edit and enhance various desktop publications, both print and web based. Basic operations will include working with inserting graphics and text, typographic design, managing multi-page documents, modify content and style in their page elements and how to use with other Adobe related software. Upon completion of this course, the student will create a final project using techniques from lessons learned. 2C/2/0/0

DGIM 1483 Photoshop 1
This course introduces the student to Adobe Photoshop. Topics include the Photoshop interface, hardware and software requirements, file formats, pixels, vectors, resolution, color theory, Photoshop color management, masks, type and topography, painting tools and brushes, layers and layer styles, filters, extraction, liquify and the pattern maker. This is a hands-on course where the students will develop a project using the knowledge gained in class. 2C/2/0/0

DGIM 1484 Photoshop 2
This course is a continuation of DGIM 1483 Photoshop 1 as a Presentation Media. Topics include image composition, retouching, composting, ImageReady, Web design, print and prepress, actions, and automation. This is a hands-on course where the students will develop a project using knowledge gained in class. (Prerequisite(s): DGIM 1483 Photoshop 1 as a Presentation Media or equivalent knowledge) 2C/2/0/0

DGIM 1490 3D Animation Fundamentals
This course introduces students to the Blender 3D Animation Tool. Topics will include navigating the Blender interface, object creation and editing, Blender modifiers, material & texture application, lighting and camera setup, multi-resolution sculpting, UV texture mapping, particle tools, shape keys and render setups. Students will be expected to develop an individual animation project using techniques from the lessons learned. 4C/4/0/0

DGIM 1540 Blogging Applications
This course introduces various web logging (blogging) applications currently in use today on the World Wide Web, along with common practices used by bloggers. Applications to be covered include Blogger, Tumblr, Twitter, WordPress, plus other newly developed applications. In addition to the general use of these applications, students will be introduced to techniques used for Search Engine Optimization (SEO), web traffic analytics, monetized ad placement, Real Simple Syndication (RSS) support, as well as audio and video blogging options. While there is no prerequisite for this course, students are strongly encouraged to have a basic understanding of the Hyper Text Markup Language (HTML). 2C/2/0/0

DGIM 2520 3D Character Animation
This course continues to explore the features of the Blender 3D Animation Tool. Topics will include rigging and skinning fundamentals, inverse kinematic modeling, 3D sculpting tools, character modeling, re-topology body parts, material application and
character walk cycle creation. Students will be expected to develop an individual animation project using techniques from the lessons learned. (Prerequisite(s): DGIM 1490 3D Animation Fundamentals) 4C/4/0/0

DGIM 2521 2D Web Animation
This course introduces students to the fundamentals of digital animation with specific focus on two dimensional software animation tools. Topics will include the 12 basic principles of animation as applied to both hand drawn and computer animation, support for web animation on multiple platforms with emphasis on mobile devices, layer editing, audio and video support as well as integration of traditional still image graphic tools into the animation process. Software used in this class will include but not limited to Processing, Adobe Edge and Stencyl, as well as other HTML5 compliant web animation software tools. This is a hands-on course where the students will develop a final project using the knowledge gained in class. 2C/2/0/0

DGIM 2530 Web Based Game Design 1
This course introduces standard techniques and strategies used in traditional two dimensional, web-based video games. Browser-based games will be constructed using HTML 5, Javascript and the Tumult Hype web development environment. Projects will include trivia games, pattern matching games, maze games, logic games and simple casino simulations. Students will develop multiple mini-games for an online, web-based portfolio. (Prerequisite or Co-Requisite: DGIM 2521 2D Web Animation or Instructor Permission) 4C/4/0/0

DGIM 2531 Web Based Game Design 2
This course continues to develop traditional two dimensional web-based video games using Javascript, HTML5 and Tumult Hype. Game projects will include spritesheet animations, side scrollers, dungeon crawlers, moving targets, space themed invasions and various pong-style clones. Students will develop multiple mini-games for an online, web-based portfolio. (Prerequisite: DGIM 2530 Web Based Game Design 1) 4C/4/0/0

DGIM 2560 Illustrator
In this course, the student will discover the capabilities of the Adobe Illustrator software tool. This begins with an overview of vector vs raster graphics fundamentals. Specific techniques will involve navigating and customizing the Adobe Illustrator workspace, demonstrating selection and alignment with various tools, using of magic wands, item grouping and working with various open and closed path objects. In addition, various transformation techniques including scaling, reflecting, rotating, distorting, shearing and perspective will be explored along with how filters and symbols are used to enhance vector graphic projects. Detailed proficiency will be acquired using the Pen, Pencil, Brush, Layer, Sprycan tools along with a greater understanding of both print and web color theory. Upon completion of this course, the student will complete a final project using techniques from lessons learned. 4C/4/0/0

DGIM 2569 Digital Portfolio Development
This course teaches the student how to create a portfolio. In this course the students will create a digital (web based) and hard copy (paper) portfolio. Topics will include portfolio definitions, design, types, goals, content, organization, and presentation, showing their creative talents to an audience of peers, instructors, and industry professionals. 2C/2/0/0

DGIM 2586 Digital Sound
This course teaches students how to create and edit digital sound for use in computer animation. Topics include analog and digital sound techniques and equipment, analog to digital conversion, basic sound editing, formats and sound conversion, digital to analog conversion and basic sound effect techniques for use in computer animation. 2C/2/0/0

DGIM 2587 Digital Video 1
This course focuses on digital video editing using the Premiere Pro video editing software. Techniques involving multitrack video editing and digital audio integration will be explored, along with the creation of various title effects, fade/transition effects and other standard industry practices. In addition, the topics of video filetype and codecs, demo reel creation, use of other software tools for footage creation and basic video capture techniques will be explored. 2C/2/0/0

DGIM 2588 Digital Video 2
This course focuses on digital video editing using the Final Cut Pro video editing software. Many of the same general techniques covered in DGIM 2587 will be covered but done from the perspective of the Final Cut Pro interface. In addition, video distribution via the web, live video streaming techniques and video integration into the web using the HTML5 standards will be explored. (Prerequisite(s): DGIM 2587 Digital Video 1) 2C/2/0/0

DGIM 2589 Digital Motion Graphics: After Effects
This course introduces the Adobe tool After Effects and explores its usage in video and film post production. Students will learn to animate, alter and compose media in both 2D and 3D space. Various other non-linear editing methods will be explored. Advanced keyframing techniques will be explored in depth, along with other standard post-production techniques used in modern video editing. Various After Effects plug-in usage will be explored, along with the integration of After Effects with other tools in the Adobe suite. Finally, the features of various competing products to After Effects, such as Blender and Jahshaka will be reviewed and compared. (Prerequisite(s): DGIM 2587 Digital Video 1 or concurrent) 2C/2/0/0

DGIM 2591 Computer Graphics & Digital Multimedia Internship
A cooperative work-student program between Saint Paul College’s Computer Graphics & Digital Multimedia Program and a business facility to allow the student an employment-like experience. (Prerequisite(s): Instructor approval) Variable credits 2–8

DGIM 2597 Special Topics in Computer Graphics & Digital Multimedia
Provides learning experiences that meet the needs of students, major programs and the College. (Prerequisite(s): Instructor approval) Variable credits 1–6

DGIM 2704 3D Animation Capstone
This course is meant to integrate and expand upon the various animation, video editing and image manipulation skills developed in previous classes in this area. In addition, students are expected to explore new and emerging technologies in the area of animation as part of preparing for future changes in this rapidly changing area. Students will be expected to develop both individual and group animation projects for use in their Internet based portfolio. (Prerequisite(s): DGIM 1490 3D Animation Fundamentals) 4C/4/0/0

Economics

ECON 1710 Introduction to the American Economy
This introductory course provides a basic overview of economic principles that are useful in understanding the economic system in the United States. The course explores the free market economic model, which is the basis of the American economy. The role of government and the rationale for government intervention is included in this study. The course also provides an introduction to microeconomic and macroeconomic concepts and tools which are demonstrated in discussions of current economic policies, issues, and problems. (Prerequisite(s): READ 0721 or READ 0724 or EAPP 0860 with a grade of "C" or better, or appropriate assessment score) (MnTC: Goal 5) 3C/3/0/0

ECON 1720 Macroeconomics
Macroeconomics is a social science that studies how our society can achieve economic goals of full employment, price stability, economic growth, and stable balance of trade. International trade and the concept of comparative advantage and restrictive trade policies are explored. From this inquiry, students will be able to demonstrate the effects of trade on a country’s economic performance. In
addition, economic data is used to measure growth and to compare an economy’s growth rates relative to other international growth rates. The United States’ fiscal and monetary policies are defined and examined in terms of the effects those policies have on economic performance. Fiscal and monetary policy is also examined in relation to the business cycle. In addition an inquiry is made of the importance and interrelated nature of social institutions in achieving economic goals. (Prerequisite(s): READ 0721 or READ 0724 or EAPP 0860 with a grade of "C" or better, or appropriate assessment score) (MiTc: Goals 5 & 8) 3C/3/0/0

ECON 1730 Microeconomics
Microeconomics is a social science that studies how our society can maximize its economic welfare by the efficient use of resource and product markets. In order to facilitate this study, microeconomics has developed tools such as market models that simplify the complex real world situations. These tools are abstractions of reality from which basic economic principles can be derived. These principles act as a guide to our private and society’s public choices. Fundamental issues covered are supply and demand, elasticity, competitive and non-competitive markets. The text has numerous topical examples such as free trade, interest groups, agricultural policy, advertising, health care and more. (Prerequisite(s): READ 0721 or READ 0724 or EAPP 0860 with a grade of "C" or better, or appropriate assessment score) (MiTc: Goals 5 & 8) 3C/3/0/0

ECON 1790 Special Topics in Economics
This course is designed to present additional or unique material and learning experiences within a specified discipline. The course will be based on student need, flexibility, and may be designed to meet various transfer and pre-major course requirements. Please see a current Course Schedule for complete details. (MiTc: Goal 5) Variable credits 1-6

Electrical Technology

ELTN 1410 National Electric Code 1 and Trade Calculations
This is an introductory course to comprehending the National Electrical Code and the mathematical skills that are required to perform electrical circuit calculations required in the electrical industry. Students will study the history of the code, the code making process, how changes are adopted into the code and the NEC basic structural components. Technical areas include definitions of technical terms and concepts, applied arithmetic calculations, algebraic functions, trigonometry functions and graphing as they apply to circuit analysis and code requirements. 4C/2/2/0

ELTN 1422 Direct Current Circuit Analysis
This course covers the basic concepts of electricity and DC circuits. Topics included are resistance, current, voltage, power, conductors and insulators. Students will learn methods to mathematically determine electrical quantities using Ohm’s law and additional electrical formulas, to determine values in series, parallel and combination circuits. The skills and techniques needed to use electrical multimeters to test and troubleshoot circuits is studied. Hands-on experiments for all DC circuit types will consist of building circuits with power supplies and electrical components, and will be evaluated with electrical multimeters. 5C/2/3/0

ELTN 1432 Alternating Current Circuit Analysis
This course covers the basic concepts of AC circuits. Topics included are the study of electromagnetic principles, sine wave principles and relationships, inductance, capacitance, series and parallel circuits, power, circuit analysis and resonance. Students will learn methods to mathematically determine instantaneous electrical values. Hands-on experiments will include the construction of circuits showing the operation of electromagnets, sine waves, series and parallel resistive, inductive and capacitive circuits. (Prerequisite(s): ELTN 1410 and ELTN 1422) 5C/2/3/0

ELTN 1442 Single-Phase Motors and Generators
This course starts with the basic characteristics of DC motors and DC generators, the types, construction, principles of operation, installation, and maintenance, and formats of controls. Next the student will discover the common types of AC motors used today, the construction, principles of operation, installation and troubleshooting methods. Hands-on experiments using specialized test equipment and electrical meters will include energizing both DC motors and generators and also AC motor types under various load conditions. (Prerequisite(s): ELTN 1410 and ELTN 1422) 5C/2/3/0

ELTN 1470 Electrical Technology Operations
Provides students with additional time to complete the hours for MN DOLI 95% attendance requirements for each course of the program. (Prerequisite(s): ELTN 1422 or instructor approval) 2C/0/2/0

ELTN 1512 Three-Phase Systems Motors and Generators
This course covers three-phase theory, wiring system calculations, methods, and installations. Three-phase motors and generators will also be introduced so students can identify, connect, operate, troubleshoot, and maintain them. This course also covers the proper use of three-phase test equipment used to operate, troubleshoot, and maintain the systems studied in this course. 5C/3/2/0

ELTN 1522 Introduction to Electronics and Test Equipment
Students are introduced to semiconductors, study different types of diodes and connect them in typical circuits. Complete power supply circuits are connected, analyzed and tested. This course covers transistor theory, operation, connection, testing, and troubleshooting practices for transistors in amplifier and switching applications. This course covers the use of electrical and electronic test equipment. 5C/2/3/0

ELTN 1532 Intermediate Electronics and PLC’s
This course covers transistor theory, operation, connection, testing, and troubleshooting practices for transistors in amplifier and switching applications. It covers transistor the information necessary to gain working and troubleshooting knowledge of thyristors, light, and heat sensitive devices and electrical transducers. Also introduced are programmable logic controllers (PLC’s) and it explains how they can be used to control machines and building equipment. Hands-on programming of simple process control examples including system wiring to input/output devices will be fully integrated throughout the course. 5C/2/3/0

ELTN 1540 Low Voltage Systems and Job Site Safety
This course will cover the basic concepts associated with fire and security alarm systems and data communications systems. Hands-on application of components include fire alarm systems, security systems, and data communication and cabling systems. This course will also cover all aspects OSHA job safety for construction electricians. It will address safety issues for awareness rather than compliance purposes. 4C/2/2/0

ELTN 2410 Distribution, Power and Specialty Transformers
This course covers single-phase, Three-phase and specialty transformer operation, including transformer losses, efficiency, and phase relationships. There is extensive math and in-depth coverage of Article 450 of the National Electrical Code. 4C/2/2/0

ELTN 2420 Motor Controls
This course covers design, wiring, and troubleshooting of control and load circuits for single-phase and Three-phase motors. Also covered is the sizing of conductors, circuit short circuit and ground fault protection, and the calculation and proper sizing of motor overload protection. There is also in-depth coverage of Article 430 of the National Electrical Code. 4C/2/2/0

ELTN 2430 Residential Wiring and Blueprint Reading
This course covers the material and design aspect of residential wiring. Topics covered include branch circuit requirements, wiring methods, and the use of blueprints. Related articles in the National Electrical Code are also covered. 4C/1/3/0

ELTN 2440 Heating and Cooling System Controls
This course covers the control of heating and cooling systems in
residential and commercial situations. Gas, oil, and electric systems are covered. Related articles in the National Electrical Code are also covered. 4C/2/2/0

ELTN 2510 Wiring Methods and Systems
This course covers the methods used to deliver power in a safe and efficient electrical installation. Conductor properties and various configurations are discussed and installed. (Prerequisite(s): ELTN 2410, ELTN 2420, ELTN 2430, ELTN 2440) 4C/2/2/0

ELTN 2522 Commercial Wiring Methods
This course covers the design, material usage and safe installation practices on commercial job sites. Power tool safety and usage is applied in a hands-on mockup setting. (Prerequisite(s): ELTN 2410, ELTN 2420, ELTN 2430, ELTN 2440) 5C/2/3/0

ELTN 2532 Industrial Wiring Methods and Service Entrance
This course covers the design, material usage and safe installation practices on industrial job sites. Requirements and safe installation of service entrance equipment and conductors are also covered. (Prerequisite(s): ELTN 2410, ELTN 2420, ELTN 2430, ELTN 2440) 5C/2/3/0

ELTN 2540 National Electrical Code 2
This course takes an in-depth look at the requirements of chapters one through five in the current National Electrical Code. Compliance is discussed in the classroom and reinforced in a hands-on mockup setting. (Prerequisite(s): ELTN 2410, ELTN 2420, ELTN 2430, ELTN 2440) 4C/2/2/0

ELTN 2550 Introduction to Renewable Energy
This course presents a discussion of renewable energy systems and resources such as solar, wind, hydro and geothermal. Topics will include photovoltaic cells, solar panels and arrays. In addition, students will learn about generation and effectiveness of various renewable energy systems. 2C/2/0/0

Electromechanical Systems

EMEC 1511 AC/DC Fundamentals
This course is an introduction to electrical power and relay control systems found in modern industrial machinery and automation. Topics include electricity basics, parts of an electrical circuit, use of a multimeter, understanding transformers, electrical relay control, and electro-pneumatic devices. 4C/2/2/0

EMEC 1521 Electrical Motors
This course is an introduction to electrical motors and generators found in modern industrial machinery and automation. Topics focus on the various types of AC and DC motors. 4C/2/2/0

EMEC 1530 Motor Controls
This course is an introduction to electrical motor controls found in modern industrial machinery and automation. The learning is based on practical online instruction and classroom hands-on tasks involving electronically operated devices and associated peripheral equipment. Topics include motor protection, braking, running on reduced power, and sensor controls. 4C/2/2/0

EMEC 1540 Motor Drives
This course is an introduction to electronic motor drives found in modern industrial machinery and automation. The learning is based on practical online instruction and classroom hands-on tasks involving electronically operated devices and associated peripheral equipment. Topics include variable frequency drives, inverters, position and velocity controls. 4C/2/2/0

EMEC 2400 Industrial Basics
This course is designed to align with the Manufacturing Skill Standards Councils (MSSC) assessment and certification system for manufacturing processes. The course curriculum is based upon federally-endorsed national standards for production workers. Students will learn about Just-In-Time (JIT) manufacturing principles, basics supply chain management, communication skills, customer service, corrective actions, preventative actions, control of documents, control of quality records, internal auditing of processes, and control of nonconforming product. 4C/2/2/0

EMEC 2500 Fluid System Fundamentals
This course is an introduction to hydraulic and pneumatic systems found in modern industrial machinery and automation. Topics include basic laws of fluid mechanics, standard symbols, pumps, control valves, control assemblies, actuators, test equipment, and proper safety procedures. 4C/2/2/0

EMEC 2610 Fluid System Fundamentals – Pneumatics
This course is an introduction to pneumatic power systems found in modern industrial machinery and automation. The learning is based on practical online instruction and classroom hands-on tasks involving pneumatically operated devices and associated peripheral equipment. Topics include basic laws of fluid mechanics, standard symbols, pumps, control valves, control assemblies, actuators, maintenance procedures, test equipment, electric and pneumatic switching/control devices, and proper safety procedures. Online learning computer simulation and 3D software will be used throughout the course as well as laboratory pneumatic equipment. (Prerequisite(s): Journeyman electrician or ELTN/CNEL diploma/AAS) 3C/0/3/0

EMEC 2615 Fluid System Fundamentals – Hydraulics
This course is an introduction to hydraulic fluid drive systems found in modern industrial machinery and automation. The learning is based on practical online instruction and classroom hands-on tasks involving hydraulically operated devices and associated peripheral equipment. (Prerequisite(s): Journeyman electrician or ELTN/CNEL diploma/AAS or instructor approval) 3C/0/3/0

EMEC 2620 Mechanical Fundamentals 1
This course is an introduction to mechanical drive systems. Topics include the transfer of mechanical power through chain/gear/belt drive systems, alignment of drives to loads, and drive component lubrication. The class material will be delivered through online instruction and hands-on labs focusing on various types of drive systems. (Prerequisite(s): Journeyman electrician or ELTN/CNEL diploma/AAS or instructor approval) 4C/2/2/0

EMEC 2625 Mechanical Fundamentals 2
This course continues the work in Mechanical Fundamentals 1 by providing a deeper understanding of mechanical drive systems and introducing the student to various pump systems. The class material will be delivered through online instruction and hands-on labs focusing on various types of bearings, gaskets, drives, and pumps. (Prerequisite(s): Journeyman electrician or ELTN/CNEL diploma/AAS or instructor approval) 4C/2/2/0

EMEC 2741 Electromechanical Troubleshooting and Maintenance
This course introduces students to basic troubleshooting and maintenance techniques used in the industry. Topics include understanding the difference between troubleshooting and maintenance, common issues with basic electromechanical equipment, professional communication, team management, and conflict resolution within a team environment. 4/2/0 (Prerequisites: Journeyman electrician or ELTN/CNEL diploma/AAS or instructor approval), (Co-requisite(s): EMEC 2751 Automated Process Controls, EMEC 2760 Programming for Robotic Manufacturing, Advanced PLC Programming.) 4C/2/2/0

EMEC 2751 Automated Process Controls
This course will cover the essential elements of a process control system. Topics include closed and open loop processes, variable measurement, instrument calibration, and various loop controllers. The learning is based on practical online instruction and hands-on tasks involving level, flow, pressure, and temperature controlled process loops. (Prerequisite(s): Journeyman electrician or ELTN/CNEL diploma/AAS) 4C/2/2/0
EMEC 2760 Programming for Robotic Manufacturing
This course focuses on programming robotics that specialize in manufacturing settings. Topics include robotic safety, homing, programming for automatic and manual operations, work cell coordination, and robotic quality control. The learning is based on practical online instruction and hands-on programming involving an expanding robotic platform. 4C/2/2/0

EMEC 2770 Advanced PLC Programming
This course builds a deep understanding of a Programmable Logic Controller (PLC), a specialized computing system used to automate various industrial settings. Topics include digital and analog input and output modules, internal registers and tables, function block usage, networking, and how to use a PLC to aid in troubleshooting. The learning is based on practical online instruction and hands-on tasks that focus on interacting with PLCs. (Prerequisite(s): Journeyman electrician or ELTN/CNEL diploma/AAS or instructor approval) 4C/2/2/0

Engineering (Pre)

ENGR 1706 Principles of Engineering
Principles of Engineering is a broad-based survey course designed to help students understand the field of engineering and engineering technology and the career pathways. Students are introduced to engineering fundamentals and the knowledge and skills necessary for success as professional engineers and engineering technologies. This course is required for students enrolled in the Science Technician AS degree program. Engineering students should register for ENGR 1707. 2C/1/1/0

ENGR 1707 Introduction to Engineering
Introduction to Engineering is a broad-based course designed to help students understand the field of engineering and engineering technology and the career pathways. Students are introduced to engineering fundamentals and the knowledge and skills necessary for success as professional engineers and engineering technologies. Topics include an overview of the engineering profession, engineering design, manufacturing, use of computer packages, and technical communication. Engineering graphics and solid modeling will be presented including the use of a solid modeling software. This course is required for students enrolled in the Pre-Engineering AS degree program. 3C/2/1/0

ENGR 1709 Digital Electronics
Digital Electronics is the study of electronic circuits that are used to process and control digital signals. Digital Electronics is the foundation of all modern electronic devices such as cellular phones, MP3 players, laptop computers, digital cameras, high definition televisions, etc. In this course, students will be exposed to combinational and sequential logic design, microcontrollers, soldering. It is a project based course requiring use of problem solving, and teamwork, and communication skills to analyze, design, and build digital electronic circuits. 3C/1/2/0

ENGR 1712 Computer Integrated Manufacturing
Computer Integrated Manufacturing (CIM) describes the process of automation of a manufacturing plant with all processes functioning under computer control. In this course, students will explore how things are made, the processes that go into making different types of products, how automation changed manufacturing, and automation processes and basic programming for control systems and robots. (Prerequisite(s): Completion of or concurrent enrollment in ENGR 1706 Principles of Engineering) 2C/1/1/0

ENGR 1714 Engineering CAD
This course introduces students to solid modeling software used in engineering for design and analysis of parts. It includes creating models and drawings for basic extrusions, revolve features, and cuts as well as more complex blends, sweeps and assemblies. 2C/1/1/0

ENGR 1717 Circuit Analysis
This course is meant to develop circuit analysis skills in DC and AC circuits. It includes circuit laws and theorem, mesh and node analysis, natural and step response of RL, RC, and RLC circuits. (Prerequisite(s): PHYS 2710 and MATH 2760 or instructor approval) 4C/3/1/0

ENGR 1790 Special Topics in Engineering
This course is designed to present additional or unique material and learning experiences within a specified discipline. The course will be based on student need, flexibility, and may be designed to meet various transfer and pre-major course requirements. Please see a current Course Schedule for complete course details. Variable credits 1-6

ENGR 2700 Introduction to Problem Solving & Engineering Design
This class introduces the student to a multifaceted engineering problem solving and design paradigm. In this course, students will learn a systematic engineering approach to solving a problem, engineering design process, and technical presentation and analysis of data. Students will be introduced to mathematical, spreadsheet and solid modeling software for use in engineering problem solving. Open-ended activities and design projects will provide opportunities for students to apply common elements of problem solving in the solution of engineering problems in the context of a structured problem solving and design process. (Prerequisite(s): ENGR 1706) 2C/1/1/0

ENGR 2705 Statics
Statics is the first area of study in the science of mechanics. Statics deals with the study of rigid bodies at rest and the forces acting on them. Statics is the foundational course for many fields in engineering including civil, mechanical, biomedical, and structural. In this course, students will use Newton’s three laws of motion to solve equilibrium of particles and rigid bodies on both 2D and 3D; determine centroids and moments of inertia; solve for internal and external forces in trusses, beams, and frames; and develop shear and moment diagrams. (Prerequisite(s): PHYS 2700 or instructor approval) 3C/3/0/0

ENGR 2710 Dynamics
This course continues the development of fundamental engineering concepts. Topics include kinematics and kinetics of particles, systems of particles and rigid bodies, work-energy, linear and angular impulse momentum. (Prerequisite(s): Grade of “C” or better in ENGR 2705) 3C/3/0/0

ENGR 2712 Deformable Body Mechanics
This course focuses on the application of the principles of mechanics of deformable bodies including the underlying concepts of stress and strain. The course further examines the relationships among loads on deformable bodies, the stresses and strains within those bodies and the deformations and stability of those bodies. Topics include: uniaxial loading and deformation, stress and strain at a point, combined stress states, Mohr’s circle, internal forces in beams, material behavior, and torsion of circular shafts. (Prerequisite(s): ENGR 2705) 3C/3/0/0

ENGR 2715 Thermodynamics
This course covers basic thermal energy relationships, processes, and cycles, First and Second Law of Thermodynamics, entropy, and availability. This course is intended for engineering majors and includes open-ended design. (Prerequisite(s): Grade of “C” or better in CHEM 1711 and PHYS 2700) 3C/3/0/0

ENGR 2790 Research Project for Science and Engineering Technology
This course provides students with an opportunity to design and carry out a science research project under the supervision of a faculty advisor and/or industry advisor. The research project will be prepared using literature review, problem identification, procedural documentation, data collection, data analysis, findings, conclusions, and recommendations. Evaluation will be carried out by faculty teams and industry experts. The course will also provide an opportunity for field study in an internship setting. (Prerequisite(s): BIOL 175 Research Fundamentals or CHEM 175 Research Fundamentals; Instructor approval) (MnTC: Goal 3) Variable credits 1-4
ENGL 0921 Fundamentals of Writing 1
This course is designed for beginning writers who need additional foundational writing instruction and experience. It provides sequenced instruction in grammar usage, sentence construction, paragraph unity and coherence, and the writing process. Students will study models of effective sentences and paragraphs and then generate their own work. Additionally, this course will focus on building vocabulary for fluency and precision in communication. Completion of this course with a grade of “C” or better is required to continue on to ENGL 0922. (Prerequisite(s): Placement into this course will be according to college assessment score.) 4C/4/0/0

ENGL 0922 Fundamentals of Writing 2
This course provides credits for certificate and diploma programs and is preparation for ENGL 1711. In addition to reviewing sentence mechanics, students will study a variety of writing models in both paragraph and essay formats. Students must pass the course with a “C” or better in order to move on to ENGL 1711. (Prerequisite(s): ENGL 0921 or EAPP 0870 and READ 0721 or READ 0724 or EAPP 0860 with a grade of “C” or better, or appropriate assessment score) 4C/4/0/0

ENGL 1711 Composition 1
This course emphasizes the process of writing expository and persuasive essays using effective writing skills and a variety of research techniques. The course includes an analysis of primary and/or secondary sources with a focus on critical reading, logical reasoning and academic research writing. (Prerequisite(s): READ 0722 or READ 0724 and ENGL 0922 or EAPP 0900 with a grade of “C” or better, or appropriate assessment score) 4C/4/0/0

ENGL 1712 Composition 2
This course emphasizes critical reading and analytical writing using literature as the basis for composition. The course includes an analysis of primary and/or secondary sources with a focus on academic writing. (Prerequisite(s): ENGL 1711 Composition 1 with a grade of “C” or better) (MnTC: Goal 1) 2C/2/0/0

ENGL 1720 Introduction to Creative Writing
In this course, we will explore creative writing through reading, analysis, discussion and by writing in three genres: poetry, short story and creative nonfiction. Students will develop an understanding of creative writing techniques and the elements of literature through analysis of literary technique and applying knowledge of craft technique to their own work. Students will learn writing techniques through exercise and practice. Students will analyze and respond critically to poetry, fiction and creative nonfiction in the texts and works produced by peers through reading, discussion, group work, workshops and in writing in order to practice an informed response to creative literature. Students will be encouraged to investigate publication opportunities for their own original writing and to present their own original work in a public reading at the end of the semester. (Prerequisite(s): ENGL 1711 Composition 1 with a grade of “C” or better) 3C/3/0/0

ENGL 1725 Introduction to Fiction Writing
This writing intensive course will explore and analyze fictional writing elements (dialogue, setting, character, cause and effect, theme, conflict, resolution etc.) through critical reading of short stories. Learners will discuss and critique literature and their own writing using workshop sessions to explore writing goals and hone creative and critical writing analysis techniques. Learners will develop an understanding of fiction by applying these techniques to our own writing and in discussion of peers’ work. In this course, learners will express a new understanding of fiction writing techniques by applying informed and critical responses to classic and contemporary fictional pieces. Learners will examine the writing process by practicing writing exercises, creating short fiction pieces, examining writing elements through critical reading responses and exams, and by investigating opportunities and tendencies in writing through revision. (Prerequisite(s): ENGL 1711 Composition 1 with a grade of “C” or better) (MnTC: Goal 6) 3C/3/0/0

ENGL 1730 Introduction to Technical Writing
This course introduces students to technical communication and writing for the workplace. The course offers both a structural approach to writing clear and precise professional documents, as well as considering the rhetorical expectations of technical writing. Students will compose formal letters and resumes, research reports, process essays, and multi-modal communications, including Internet publications. Students will learn to compose clear, concise and coherent texts while considering such factors as audience expectations, workplace ethics, and using visuals and audio to successfully convey information in a professional environment. (Prerequisite(s): ENGL 1711 with a grade of “C” or better) (MnTC: Goal 1) 3C/3/0/0

ENGL 1735 Introduction to Non-Fiction-Memoir Writing
In this writing intensive course, we will explore and analyze nonfiction and memoir essay-writing elements (dialogue, setting, narration, structure, theme, conflict, resolution, etc) through critical reading of creative nonfiction essays. By discussing and critiquing creative nonfiction and our own writing using workshop sessions we will explore our classmates’ writing goals, we will hone creative and critical writing analysis techniques. We will develop an understanding of creative nonfiction and memoir by applying these techniques to our own writing and in discussion of our peers’ work. In this course, we will learn to express our new understanding of creative nonfiction writing techniques by applying informed and critical responses to diverse and contemporary nonfictional pieces. By practicing creative nonfiction writing exercises, creating our own nonfiction pieces, examining writing elements through critical reading responses and exams, and by investigating opportunities and tendencies in our own writing through revision, we will examine the writing process. We will also explore current creative nonfiction writing trends and publication possibilities. (Prerequisite(s): ENGL 1711 Composition 1 with a grade of "C" or better, or appropriate assessment score) (MnTC: Goal 6) 3C/3/0/0

ENGL 1740 Introduction to Literary Studies: The Novel
This course introduces the skills and approaches of literary studies through the exploration of novels written in or translated into English. Students will read works representing a variety of voices and viewpoints, analyzing novels using a range of critical frameworks. In addition, students will examine the social and cultural contexts in which assigned novels were written, developing an understanding that literature can reflect, critique, and even shape its cultural moment. (Prerequisite(s): ENGL 1711 with a grade of “C” or better.) (MnTC: Goal 6) 3C/3/0/0

ENGL 1745 Introduction to Literary Studies: The Short Story
This course introduces the skills and approaches of literary studies through the exploration of short stories written in or translated into English. Students will consider the short stories’ historical contexts, critical commentary, and cultural significance, while learning to analyze short stories in terms of meaning, structure, and style. (Prerequisite(s): ENGL 1711 with a grade of “C” or better) (MnTC: Goal 6) 3C/3/0/0

ENGL 1750 Introduction to Literary Studies: Drama
This course introduces students to dramatic literature. The course will cover the concepts of dramatic form and terminology necessary for thematic and literary analysis of the genre. Special emphasis will be given to drama in its historical, social, and cultural contexts. In order to understand this art form more fully, the class will study and discuss a sampling of plays that exemplify different kinds of dramatic structure and various time periods. (Prerequisite(s): ENGL 1711 with a grade of “C” or better) (MnTC: Goal 6) 3C/3/0/0

ENGL 1755 Introduction to Literary Studies: Poetry
In this introductory literature course, students will analyze poetry with a focus on the formal aspects of meter and poetic structure. This course introduces various traditional and free verse poetic forms while considering how form influences meaning or theme. Students will learn to interpret poems in relation to the social and political contexts in which they were written. (Prerequisite(s): ENGL 1711 with a grade of “C” or better.) (MnTC: Goal 6) 3C/3/0/0
ENGL 1760 Introduction to Creative Nonfiction Writing
In this writing course, students craft creative nonfiction by analyzing its elements through critical reading of creative nonfiction. Students will hone analysis techniques through discussion and critique of published creative nonfiction and students’ own original work in class workshops. Students will demonstrate understanding of creative nonfiction writing through analyzing classic and contemporary examples of creative nonfiction and original creative nonfiction created by students in the class. Students will explore the writing process through creation and revision of their own short creative nonfiction works. Students will respond critically to creative nonfictional works in texts and work produced by peers through reading, discussion, group work, workshops, and writing. Students will explore current creative nonfiction writing trends and publication possibilities. (Prerequisite(s): ENGL 1711 with a grade of "C" or better) (MnTC: Goal 6) 3C/3/0/0

ENGL 1770 Introduction to Poetry Writing
In this writing-intensive course, we will analyze and craft poetry by exploring its elements (tone, diction, imagery, symbolism, rhythm, metaphor, theme, etc.) through critical reading and writing of poems. By discussing and critiquing poetry and our own writing using workshop sessions to explore our classmates’ writing goals, we will hone creative and critical poetry analysis techniques. We will develop an understanding of poetry by applying these techniques to our original writing and in discussion of our peers’ work. In this course, we will learn to express our new understanding of poetry writing techniques by applying informed and critical responses to classic and contemporary poems and applying them to the poems we create. By practicing poetry writing exercises, creating poems, examining writing elements through critical reading, responses and exams, and by investigating opportunities and tendencies in our poetry drafts through revision, we will examine the poetry writing process. We will also explore current poetry writing trends and publication possibilities. (Prerequisite(s): ENGL 1711 Composition 1 with a grade of "C" or higher) (MnTC: Goal 6) 3C/3/0/0

ENGL 1780 Recently-Arrived Contemporary Immigrant Literature
Some of the most compelling contemporary American literature has been written by first and second-generation immigrants to the United States. This course will cover a number of works that explore the difficult process of cultural adjustment for writers of various racial and ethnic groups. The course will cover the larger narrative of coming to America but also focus on particular literary, socio-cultural and historical issues. Students will discover how language and narrative strategies are employed by writers to create the stories of their lives: intergenerational conflicts, difficulties tied to language and the formation and re-formation of racial and ethnic identities as writers confront the demands of a new country and life. Immigration and naturalization laws at various moments in US history and how those laws have influenced contemporary literature will be discussed. (Prerequisite(s): ENGL 1711 Composition 1 with a grade of "C" or better) (MnTC: Goals 6 & 7) 3C/3/0/0

ENGL 1790 Contemporary Writers of Color
This course examines American literature as a multi-voiced body and considers the contributions to that body by writers of color. Under consideration are writings by Native American, Asian American, African American and Latino authors. Particular attention will be given to issues of race, gender, ethnicity, class and sexuality and how these issues are reflected in the complicated construction of identity. As a means of considering how various racial identities are constructed and expressed in literature, contemporary and recently-published work by writers from these groups will be read. In order to provide appropriate context for readings and discussions, the class will consider relevant cultural and social histories of these writers as well. (Prerequisite(s): ENGL 1711 Composition 1 with a grade of "C" or better) (MnTC: Goals 6 & 7) 3C/3/0/0

ENGL 1795 Literature and Film
This course will focus on analysis of literature and film. Students will read literature and explore visual texts and then their film counterparts. Students will discuss the themes and values expressed in select literature and films and examine how these texts and films affect them as viewers. The class will include limited discussion of film terminology and techniques that filmmakers use. (Prerequisite(s): ENGL 1711 with a grade of "C" or better) (MnTC: Goal 6) 3C/3/0/0

ENGL 2721 Survey of American Literature 1
A survey of American poetry, essays, novels and short stories from colonial times to the end of the Civil War. This course will help the student to discover the definitions of these distinctive genres, their unique boundaries and potential and what distinguishes them from other forms of writing. The historical, political and cultural background of the time will also be covered in this course, so that the student will find the readings to be more interesting and accessible. (Prerequisite(s): ENGL 1711 Composition 1 with a grade of "C" or better) 3C/3/0/0

ENGL 2722 Survey of American Literature 2
A survey of American poetry, essays, novels and short stories from the end of the Civil War to the present. A continuation of Survey of American Literature 1. This course will help the student to discover the definitions of these distinctive genres, their unique boundaries and potential and what distinguishes them from other forms of writing. The historical, political and cultural background of the time will also be covered in this course, so that the student will find the readings to be more interesting and accessible. While not a requirement, the student will find this course more enjoyable if he has first taken Survey of American Literature 1. (Prerequisite(s): ENGL 1711 Composition 1 with a grade of "C" or better in ENGL 1711) (MnTC: Goals 6 & 7) 3C/3/0/0

ENGL 2726 British Literature Survey 1
In this literature survey course, students will discover the development of a national, and, ultimately, global language and literary history while encountering texts representing diverse voices and viewpoints. This course explores British literature and its historical and cultural contexts from its beginnings in the early medieval period through the late eighteenth century. While analyzing poetry, plays, essays, and/or novels, students will have opportunities to discover that while language and writing conventions change, literature from the past can still speak to us thematically as a reflection of the human experience. (Prerequisite(s): ENGL 1711 with a grade of "C" or better) (MnTC: Goal 6) 3C/3/0/0

ENGL 2727 British Literature Survey 2
This survey course will follow the development of British literature from the Industrial Revolution, through the rise of Britain as a global power, to its post-colonial present. Students will encounter literary works representing a diverse range of voices and viewpoints while exploring texts in their historical and cultural contexts. Analysis of works in a range of genres, including poetry, short stories, novels, essays, and/or plays, will allow students to encounter the economic, social, and cultural upheavals of recent times through the lens of British literature. (Prerequisite(s): ENGL 1711 with a grade of "C" or better) (MnTC: Goal 6) 3C/3/0/0

ENGL 2728 Global Literature
This course introduces students to literature from cultures around the globe, from antiquity to the 21st century, in genres that may include epic poetry, drama, short stories, essays, and/or novels. Through close reading of texts, students explore ways in which literature works to both define and disrupt cultural and social discourse, and discover continuities and differences between cultures across history (ies). Structured thematically, the course may focus on such issues as globalization, identity construction, race and gender, and/or economic justice. (Prerequisite(s): ENGL 1711 with a grade of "C" or better.) (MnTC: Goal 6) 3C/3/0/0

ENGL 2730 Contemporary American Novel
A study of the American novel from the late nineteenth century to the present. Beginning with realistic novels that reflected vast social changes at the turn of the century, this course seeks to discover the unique boundaries and potential of the contemporary American novel, what distinguishes it from other forms of literature and how the form
ENGL 2740 Native American Literature
Through an analysis of structural and thematic elements, this course explores the unique additions that Native American writers have brought to the traditional literary canon. The course emphasizes historical and cultural aspects of the texts while recognizing each individual writer’s narrative or poetic style. (Prerequisite(s): ENGL 1711 with a grade of “C” or better) (MnTC: Goal 6 & 7) 3C/3/0/0

ENGL 2755 LGBTQ Writers
This college literature course, intended for all students, will study works written by members of the LGBTQ community and exploring their experience. We will analyze course readings with a special focus on the distinct concerns, perspectives, and challenges of lesbian, gay, bi-sexual, transgender and queer writers. We will view the works both historically, with an emphasis on the issues and challenges of LGBTQ writers within their own time frame, and from a contemporary perspective. The class will also explore the literature of various races and ethnicities within the family of LGBTQ writers. (Prerequisite: ENGL 1711 Composition 1 with a grade of C or better) (MnTC Goals: 6 and 7) 3C/3/0/0

ENGL 2760 English Novel
Why did the novel as a genre emerge in England during the beginning of the 18th century? Beginning with Daniel Defoe’s Moll Flanders, this course seeks to discover the unique boundaries and potential of the English novel, what distinguishes it from other forms of literature and how the form changed as the English culture changed. The historical, political and cultural background of the time will also be covered in this course, so that the student will find the readings to be more interesting and accessible. (Prerequisite(s): Grade of “C” or better in ENGL 1711 Composition 1) (MnTC: Goals 6 and 7) 3C/3/0/0

ENGL 2775 Introduction to Speculative Fiction and Fantasy Literature
This course will explore science fiction and fantasy through close and comparative readings of various texts. Together we’ll consider how the writers of these genres respond to the various challenges of the twenty-first century, including shifting gender, politics, war, and the impact of new technologies on culture. This course will largely be concerned with the twin goals of articulating the writer’s critique of present social conditions and exploring how those critiques are constructed. (Prerequisite(s): ENGL 1711 Composition 1 with a grade of “C” or better) (MnTC: Goal 6) 3C/3/0/0

ENGL 2776 Women Writers
This college literature course, intended for all students, will explore literature written in English by women. We will analyze course readings with a special focus on the distinct concerns, perspectives, and challenges of women writers. In addition, we will examine the social and cultural contexts in which these works were written, developing our understanding that literature can reflect, critique, and even shape its cultural moment. (Prerequisite(s): ENGL 1711 Composition 1 with a grade of “C” or better) (MnTC: Goals 6 & 7) 3C/3/0/0

ENGL 2778 Urban Literature—Lost in the City
This course explores contemporary literature in the context of the urban landscape. Together, we’ll explore the function of the city in literature with attention to how characters both shape and are shaped by an urban existence. Also, how do various writers portray the city? As a labyrinth? A market place of cross-cultural encounters? A place of refuge? A dystopia? Through close and comparative readings, we’ll construct an informed understanding of how and why a city is portrayed by a particular writer and to what degree the city itself functions as a meaningful character in literature. (Prerequisite(s): ENGL 1711 Composition 1 with a grade of “C” or better) (MnTC Goal: 6) 3C/3/0/0

ENGL 2790 Special Topics in English
This course is designed to present additional or unique material and learning experiences within a specified discipline. The course will be based on student need, flexibility, and may be designed to meet various transfer and pre-major course requirements. Please see current Course Schedule for complete details. (MnTC: Goal 1) Variable credits 1-6

English for Academic Purposes

EAPP 0760 High Intermediate Reading & Vocabulary
This course introduces English learners to academic reading skills at the high intermediate level. Students identify main ideas and details, use pre-reading strategies, and infer meaning in non-fiction and short stories. Students also build their vocabulary through the study of word parts, the academic word list, and dictionary skills. This is a required course. (Prerequisite(s): Appropriate assessment score) 5C/5/0/0

EAPP 0770 High Intermediate Writing and Grammar
This course introduces English learners to academic writing at the high intermediate level. Students will improve their ability to write clear, correct sentences and well-organized paragraphs. They will study parts of speech, sentence structure, and basic verb tenses. They will also become familiar with the writing process and using a computer to create, save and edit their work. This is a required course. (Prerequisite(s): Appropriate assessment score) 5C/5/0/0

EAPP 0780 High Intermediate Speaking and Listening
This course introduces English language learners to academic speaking and listening skills at the high intermediate level. Students will deliver presentations, participate in group discussions, and take lecture notes. In addition, students will develop their pronunciation, vocabulary and grammar and apply their language skills to learn about campus resources and engage in the college community. Use of the multimedia language laboratory is part of this course. This is a required course. (Prerequisite(s): Appropriate assessment score) 5C/5/0/0

EAPP 0860 Advanced Reading & Vocabulary
This course develops academic reading and vocabulary skills at the advanced level. Students analyze main ideas and details, use a variety of reading strategies, and summarize passages from authentic non-fiction texts and novels. Students further develop their academic vocabulary through the study of the academic word list, context clues, and dictionary skills. This is a required course. (Prerequisite(s): Appropriate assessment score or completion of EAPP 0760 with a grade of “C” or better) 5C/5/0/0

EAPP 0870 Advanced Writing & Grammar
This course develops academic writing skills at the advanced level. Students will improve their ability to write clear, correct sentences and well-organized paragraphs and essays. They will also study advanced sentence and grammar structures and apply this grammar knowledge in a variety of writing situations. This course emphasizes the writing process, basic research skills, and the use of online materials. This is a required course. (Prerequisite(s): Appropriate assessment score or completion of EAPP 0770 with a grade of “C” or better) 5C/5/0/0

EAPP 0880 Advanced Speaking & Listening
This course develops advanced speaking and listening skills for English learners. Students will summarize lectures, lead small group
Course Descriptions

GISC 1760 Introduction to GIS
This course introduces students to fundamental and applied concepts in geographic information systems. Students will become intimately familiar with the use of rasters and vectors in a digital computer environment and learn how to use specialized GIS software (ESRI's ArcGIS suite of products) to import, display, create, manipulate, and analyze digital spatial data. The ultimate goal of this course is to teach students to become effective GIS practitioners that understand the theory related to GIS and appreciate the limitations and strengths of GIS.

GISC 1765 Cartography
This course introduces students to the art and science of making maps. Students will examine concepts related to scale, map projections, shape, proportion, color, human cognition of space, and the spatial arrangement of information in maps. The ultimate goal of this course is to teach students how to effectively convey a message with a map that contains subjectively selected features representing a simplified version of the outside world.

GISC 1770 Spatial Thinking
Students taking this course will receive a broad introduction to the discipline of geography and use it as a building block for learning how to conceptualize spatial information in landscape space. They will use key spatial indicators such as proximity, shape, density, position, gradient, juxtaposition, and others in evaluating landscape-scale phenomena. The diverse cultural and biophysical landscapes of Minnesota will serve as the backdrop for developing and applying these principles.

GISC 1775 Introduction to Remote Sensing
This course introduces students to fundamental and applied concepts in remote sensing. Students will be exposed to a detailed review of the electromagnetic spectrum, atmospheric windows, passive and active sensors, digital image processing techniques (including geometric and radiometric corrections), and image classification methods, among other topics. The ultimate goal of this course is to teach students how to become adept at locating and properly processing remotely sensed data so that it is useful in a GIS computing environment while developing a good understanding of remote sensing theory and the limitations and strengths of remote sensing.

GISC 1780 Spatial Analysis
This course introduces students to more rigorous GIS techniques for using customized spatial analyses to investigate and enhance digital spatial data in a GIS environment. The true power of GIS involves the ability to spatially adjust, extend, modify, and integrate digital spatial data (both rasters and vectors). The ultimate goal of this course is to teach students how to apply conceptual skills acquired in the spatial thinking course to digital spatial data in a GIS. Students will use extensions (especially 30 Analyst and Spatial Analyst) and customized toolboxes in ESRI's ArcGIS suite of software to conduct the analyses.

GISC 2720 Web-Based GIS
This course introduces intermediate and advanced GIS students to concepts and techniques for integrating GIS with the Internet. Topics explored in the class will include various protocols, approaches, hardware, software, and programming languages utilized to serve digital spatial data via the Internet. Practical experience with Google Earth, KLM, KMZ, Google Map APIs, Javascript APIs, Flex APIs, and ArcGIS Server will be used to teach and reinforce concepts.

GISC 2725 Object-Based Image Analysis
This course introduces intermediate and advanced GIS students to the complexities of acquiring, processing, and extracting information from remotely sensed data with a high spatial resolution. Students will become familiar with applying object-based image analysis techniques on a data stack generated from LiDAR returns, QuickBird imagery, IKONOS imagery, aerial, and/or corresponding derivative data (e.g., vegetation indices, wetness indices, erosion indices, etc.).

GISC 2730 Programming and Scripting in GIS
This course provides intermediate and advanced GIS students an introduction to the programming interface and function in ArcGIS. Fundamental concepts of computer programming are introduced from a geospatial processing perspective via the use of Python. General programming concepts will focus on object-oriented programming and scripting. Students will acquire basic programming skills and techniques necessary to search, explore, revise, manipulate, analyze, and model spatial data beyond the standard options available in the standard ArcGIS interface and extensions.
Geography

GEOG 1700 Physical Geography
This course introduces students to natural landscapes and the geography of the physical environment. Topics include: volcanoes, earthquakes, tornadoes, hurricanes, landslides, glaciers, soil, the water cycle, etc. The course covers how these processes work, as well as how these systems and humans impact each other. So this course also covers environmental concerns such as destruction of environments, desertification, air pollution, climate change, etc. (Prerequisite(s): READ 0721 or READ 0724 or EAPP 0860 with a grade of "C" or better, or appropriate assessment score) (MnTC: Goals 5 & 10) 3C/3/0/0

GEOG 1720 Human/Cultural Geography
This course covers the geographic study of the world cultural areas. Topics include: cultural geography (patterns of language and religion, folk customs, globalization, popular culture), political geography (formation of countries, conflict over land), populations (growth, distributions, migrations, characteristics), global economic activity, and development. Case studies from many parts of the world will be analyzed and key geographic concepts will be reviewed. (Prerequisite(s): READ 0721 or READ 0724 or EAPP 0860 with a grade of "C" or better, or appropriate assessment score) (MnTC: Goals 5 & 8) 3C/3/0/0

GEOG 1740 World Geography
This course covers the geographic study of the world discussing U.S. and Canada, Latin America, Africa, Middle East, Europe, and various regions in Asia. Topics covered include: cultures and characteristics of regions, development, unique features around the world, movements of people around the world, the natural landscapes, economic influences, and conflict between countries. (Prerequisite(s): READ 0721 or READ 0724 or EAPP 0860 with a grade of "C" or better, or appropriate assessment score) (MnTC: Goals 5 & 8) 3C/3/0/0

GEOG 1750 Minnesota Geography
In this course, students will explore Minnesota’s regions. Topics covered include: people (culture, settlement patterns, and migrations), physical landscapes (glacial landforms, soils, and waterways), land use (agriculture, manufacturing, urbanization, etc.), geopolitical issues, and economics. (Prerequisite(s): READ 0721 or READ 0724 or EAPP 0860 with a grade of "C" or better, or appropriate assessment score) (MnTC: Goals 5 & 10) 3C/3/0/0

GEOG 1790 Special Topics in Geography
This course is designed to present additional or unique material and learning experiences within a specified discipline. The course will be based on student need, flexibility, and may be designed to meet various transfer and pre-major course requirements. Please see a current Course Schedule for complete course details. (Prerequisite(s): READ 0721 or READ 0724 or EAPP 0860 with a grade of "C" or better, or appropriate assessment score) (MnTC: Goal 5) Variable credits 1-6

Global Studies

GLOS 1710 Introduction to Global Studies
This interdisciplinary course introduces students to the concept of global studies and the processes of globalization. Students will examine the economic, political, cultural, and environmental aspects of globalization, with an emphasis on social change and conflict. Students will also discuss the effects of global cooperation, conflict, and interdependence on efforts to manage and mitigate global problems, both today and in the future. (Prerequisite(s): READ 0721 or READ 0724 or EAPP 0860 with a grade of "C" or better, or appropriate assessment score) (MnTC Goals: 5 & 8) 3C/3/0/0

Global Trade

BUSN 1400 Introduction to International Business
Introduces the student to the general field of international business. Study will cover foreign investments, cultural differences, impact of trade agreements, international payments, logistics, taxation, and personnel issues. This course provides the foundation for other International Trade courses. 3C/3/0/0

BUSN 1430 International Communications and Cultural Awareness
Covers potential problems in the international transaction due to language, and cultural differences. Both written and oral issues will be discussed. In addition, the areas of social and business habits that are different from one country to another will be covered. An understanding of these various needs will help ease the international transaction. 3C/3/0/0

BUSN 1512 Export Shipping and Compliance
This course introduces students to the flow of merchandise in an international trade transaction, using various modes of transportation, routing, paperwork, regulations and Incoterms. The principle documents that must be prepared for shipments will be analyzed and created. Information will include the purpose of each document, its function, common problems in preparing and processing this type of document. Discussion will include reviewing documents from the banker, freight forwarder and shipper perspective. Export compliance issues will be discussed. 3C/3/0/0

BUSN 2420 U.S. Customs and Importing
Provides students with the basic knowledge needed for customs clearance. This includes classification of products using the Harmonized System, understanding import regulations, marking rules, preparing entry documentation, learning various types of entries and special provisions. This course will help prepare the student to take the U.S. Customs Broker exam. Import compliance will also be discussed. 3C/3/0/0

BUSN 2530 International Marketing
Study marketing from the international point of view. Topics include how and where to find new international customers, evaluating the needs of international customers, and keeping these customers happy while bringing a profit to the company. Also included are the fundamentals of selling, advertising, the effect of cultural differences on selling and advertising procedures, and techniques of closing the sale. 3C/3/0/0

INTL 2491 International Trade Internship
Cooperative work study program between the Saint Paul College International Trade Program and a business facility to allow the student an employment-like experience. Job duties must reflect program goals. (Prerequisite(s): Instructor approval) Variable lab credits 1–3

INTL 2497 International Trade Special Projects
The intent of this course is to allow flexibility in providing learning experiences to meet a special need of the student, the major program and the College. (Prerequisite(s): Instructor approval) Variable lab credits 1–3

Health

HLTH 1300 Behaviors for Success - Respecting Diversity
This course focuses on the exploration of healthcare careers and the requirements needed by health care personnel to effectively work in a variety of health care settings. Types of health care facilities and systems, applying for employment, accountability and responsibility, standards of dress, workplace behavior, approaches needed to assist individuals, expectations of teams and team members, common healthcare facility policies and requirements are explored. This course also provides a framework for dealing with diverse clients/individuals
and staff. Included are belief systems, cultural practices, respect and sensitivity to cultural issues, gender issues and sexuality issues. Awareness and use of effective strategies to appropriately deal with client and staff diversity are emphasized. 1C/1/0/0

HLTH 1310 Communication in Healthcare
This course emphasizes the importance of effective communication between and among healthcare professionals and clients/individuals. Included are verbal and non-verbal communication, listening skills, interpersonal communication, team communication, documentation and reporting, and the use of electronic communication devices in health care facilities. Focus is on the development of effective communication skills to support quality client/individual care. 1C/1/0/0

HLTH 1320 Safety Precautions and Awareness of Client Needs
This course focuses on healthcare safety and standard precautions required of healthcare facilities as well as personal safety standards and requirements to work in healthcare settings. This course also presents challenges and issues related to awareness and sensitivity needed to understand the healthcare needs of clients/individuals. 1C/1/0/0

HLTH 1410 Medical Terminology
Students recognize and build medical terms after learning the meaning of their component parts. A computer lab may be utilized to review terminology and provide practice in word building. (Prerequisite(s): READ 0722 or READ 0724 or EAPP 0900 with a grade of “C” or better, or appropriate assessment score) 1C/0/1/0

HLTH 1418 Somatic Practitioner: Business and Ethics
In this course, students will be introduced to different types of business and ethical standards in the somatic industries of massage therapy, personal training, esthetics and wellness in the massage therapy industry, and basic aspects of a business plan. Topics include scope of practice, certifications, legal requirements, equipment options, charting, time management skills and payment tracking methods. Principles of professional ethics and interactions with clients are integrated throughout the course. (Prerequisite(s): Declared major in Massage Therapy or Sport and Exercise Sciences major) 2C/1/1/0

HLTH 1421 Anatomy & Physiology for the Somatic Practitioner
Assist the student to acquire basic knowledge of body structure and function with a more detailed exploration of musculoskeletal, nervous and endocrine system. Students also recognize and build medical terms. Basic concepts of nutrition and understanding of the digestive system will be explored. A thorough understanding of the sliding filament theory and types of muscle contraction will be explored. (Prerequisite(s): Declared major in Massage Therapy, Sport and Exercise Sciences or Yoga program) 4C/2/2/0

HLTH 1422 Health & Wellness Coaching
The major focal points of this course is to coordinate knowledge of exercises, lifestyle and nutrition through thoughtful assessment and inquiry, collaborative problem-solving and goal-setting, and safe, open and honest dialogue to assist clients in obtaining future wellness results. Students will learn to help future clients by providing instruction and mentoring, assist in setting goals and help define an action plan that is holistic in nature. Emphasis will be on practical application of working with clients. (Prerequisite(s): Declared major in Massage Therapy or Personal Trainer program) 4C/2/2/0

HLTH 1425 Clinical Applications in Kinesiology
This is a course in the applied study of human movement. Students will study muscles of the body, origin and insertion sites, nerve innervation, associated bones and bony landmarks and action. Students will investigate planes of movement, types of joints, discuss directions and positions of the human body and perform basic structural assessment. Adhesions and trigger points will be discussed and palpated. This course will also look at the theory and practice of functional muscle testing. (Prerequisite(s): HLTH 1421 recommended or instructor permission. Physical ability to palpate the human body and willingness to view selected Human Cadaver videos are recommended.) 3C/1/2/0

HLTH 1432 CPR for the Professional Rescuer and Healthcare Provider
This American Red Cross course teaches CPR and AED use for those with a duty to respond. Course meets CPR requirements for Nurses, Nurse Assistants, and other allied health professionals. It is accepted for certification by the National Registry of Emergency Medical Technicians (NREMT). Skills are demonstrated for basic life support: solo and two-person CPR for the infant, child, and adult; the use of bag valve masks (BVM’S); obstructed airway management; and training in Automatic External Defibrillators (AED’S) for victims of sudden cardiac arrest. Certification is valid for two years. 1C/1/0/0

HLTH 1454 Yoga Postures/Asanas
A yoga practice can increase mental clarity, focus and support vitality in daily life. This course presents yoga principles and postures, called asanas, which develop balance, strength and flexibility. Students will learn the foundational yoga postures in each of the main categories of postures including: seated postures, standing postures, inversions, arm balances, hip openers and twists. Students will study an overview of the health benefits gained through yoga practice. Discuss health limitations with the instructor. (Prerequisite(s): Concurrent enrollment in HLTH 1459. Must have at least six months regular yoga practice experience prior to attending this training) 3C/2/1/0

HLTH 1458 Relaxation and Meditation
Learn relaxation techniques and study the many benefits of meditation. Students learn various mindfulness practices including guided relaxation, gentle yoga, breathing techniques, walking meditation, and sitting meditation. Students will develop a consistent routine and learn techniques to help cope with stress and cultivate a deeper awareness of themselves and how they relate to the world. 3C/2/1/0

HLTH 1459 Yoga Asanas/Teaching Methodology
Deepen your understanding of the yoga asanas (postures). Students will study the yoga postures in each of the main categories of postures, seated postures, standing postures, inversions, arm balances, hip openers and twists. Refine your understanding and skills of alignment within asanas. Teaching methodology includes alignment, sequencing, adjustments and effective ways to guide students in a yoga practice. Discuss the business aspects of teaching yoga. (Prerequisite(s): Concurrent enrollment in HLTH 1454. Discuss health limitations with the instructor.) 3C/2/1/0

HLTH 1465 Functional Holistic Nutrition
The focus of this class is to develop a solid awareness of nutrition; be able to utilize that awareness and make suggestions to somatic practitioner clientele in a legal and ethical fashion, as outlined by the National Association of Nutrition Professionals (NANP) associate membership. 4C/3/1/0

HLTH 1485 Therapeutic Exercise
The focus of this course is the management of common, soft-tissue injuries through inhibitory techniques, bracing, taping, advanced stretching and corrective exercise techniques. Adaptive exercise for special populations such as geriatrics and pregnancy will also be discussed. (Prerequisite(s): HLTH 1425 recommended) 3C/3/2/0

HLTH 1490 Personal Fitness 1
The major focal points of this course is to create ground frame knowledge of personal fitness including strength, endurance and flexibility for the betterment of individual health. Functional strength training, Active Integrated and Dynamic stretching and aerobic exercise options will be examined and performed. Individuals will create their own personal fitness plan and implement that plan during open Fitness Lab hours. 1C/0/1/0

HLTH 1541 Yoga History/Philosophy
This course will provide a solid foundation in the historical and philosophical concepts of yoga. Study historical texts such as the Bhagavad Gita and Patanjali’s Yoga Sutras that provide lessons and offer clear steps on the path of yoga. Learn philosophical concepts of various schools of yoga including: Tantra, Ayurveda, chakras, and more. 3C/2/1/0
HLTH 1570 Trained Medication Aide
This program provides an overview of the requirements concerning medications and their administration. Other topics include legal criteria, medical abbreviations, medical math and basic dosage calculations, use of the Physician’s Desk Reference (PDR) along with current medication handbooks. A basic overview of body systems and drug classifications are included. Administration of medications via oral, eye, ear, rectal, topical and inhalant routes will also be covered. Attendance of all classes is mandatory; any absence will may result in repeating the course. Students must attain 90% on all examinations to continue in the course. 2C/1/1/0

HLTH 1575 EKG & Telemetry
This comprehensive 6 credit course will prepare students to be an EKG Technician and take the Certified EKG Technician (CET) exam. An EKG Technician attaches electrodes to the patient’s body which then sends a signal to a machine displaying the activity in a recognized pattern. The technician will recognize abnormalities in EKG tracings and report them to a physician or other authorized healthcare providers for interpretation. Students will study: cardiac anatomy and physiology, EKG equipment (attaching to patients, proper safety and operation, recognize artifacts and resolve problems), how to recognize tracings that deviate from normal and prioritize reporting of such deviations, heart rhythms and wave forms, obtain basic vitals, HIPAA compliance, use of Holter monitors, introduction to stress tests and 12-lead EKGs. 6C/4/2/0

HLTH 1580 Medical Office Skills for the Patient Care Technician
The Medical Office Skills Technician course provides the student with the administrative skills necessary for being a Patient Care Technician. The course consists of topics such as electronic health records, documentation, patient records, insurance, and medical coding as they apply to inpatient and outpatient settings. (Pre-requisite(s): HLTH 1410) 3C/3/0/0

HLTH 1585 Job Readiness Certification Exam Preparation
The Job Readiness/Certification Exam Preparation course prepares students for their career as a Patient Care Technician and for the certification exam. Students will develop cover letters, resumes, and interview skills. Study skills for the certification exam exam review will also be covered. A SAMPLE certification exam will be administered in this course as well. This course is for Patient Care Technician students in their last semester of coursework. 2C/2/0/0

HLTH 1600 Foundations of Fitness
The purpose of the course is to seek improvement of the student’s knowledge and understanding about the components of physical fitness, and how those components contribute to lifelong health and well-being. This course is designed to provide knowledge for the individual to assess, motivate, and maintain a lifestyle of wellness. 2C/0/2/0

HLTH 1610 Sport and Exercise Coaching
This course introduces the student to the major components of fitness analysis, basic exercise program design, and the skills necessary for teaching individual activities. Components of exercise physiology are included throughout. Must earn a grade of “C” or better to proceed. (Prerequisite(s): Must be enrolled in Sport and Exercise Sciences program.) 5C/3/2/0

HLTH 1620 Advanced Concepts in Training
This course explores advanced components of fitness analysis, functional training program design, and the skills necessary for teaching group activities. Components of exercise physiology are included throughout. (Prerequisite(s): HLTH 1610 with a grade of “C” or better) 5C/3/2/0

HLTH 1630 Functional Exercise Physiology
The emphasis of this class is to prepare Personal Trainers to be Metabolic Testing Specialists. Exploration of the effects of various types of exercise on body systems complete with testing protocols will be performed. VO2 max test, power tests, plyometric tests, Lactate testing, body fat testing, and speed testing will be performed. Progressions based on testing outcomes will be created. (Prerequisite(s): HLTH 1610 with a grade of “C” or better) 3C/1/2/0

HLTH 1690 Sport and Exercise Sciences Internship
This course is the final component of the personal trainer curriculum that serves to integrate all materials learned in a practical setting. Students will be placed at various training facilities providing direct application of personal training techniques and methodologies. Must earn a grade of “C” or better in this course. (Prerequisite(s): Instructor approval) 5C/0/5/0

HLTH 1900 Pathology for the Somatic Practitioner
This course is designed to teach the study of deviations from normal anatomy and physiology as well as basic pharmacology. Students will examine injury and disease related conditions most likely to be encountered in a somatic practice. Special attention is given to signs and symptoms, indications and contraindications of treatment methods, as well as instruction related to skin, neuromuscular and soft tissue conditions. Basic pharmacology will be examined along with drug/supplement interactions. (Recommendation(s): HLTH 1421) 4C/3/1/0

History

HIST 1730 Contemporary World History
This course surveys Contemporary World History, from the end of World War II to the present with a focus on Europe, Asia, Africa, Latin America and the Middle East. Significant forces, ideas, events and people that have influenced the world since 1945 are studied. Course themes highlight how and why events transpired and created change in people’s lives. Historical events are studied to provide an appreciation for their influence on contemporary society and the implications they may hold for the future. (Prerequisite(s): READ 0721 or READ 0724 or EAPP 0860 with a grade of “C” or better, or appropriate assessment score) (MnTC: Goals 5 & 8) 3C/2/0/0

HIST 1745 U.S. History to 1877
This course surveys the political and social history of America from the seventeenth century to the end of the Civil War, The interaction of Europeans, Native Americans, and Africans through the Colonial Era, the American Revolution, and the Early Republic will be discussed. Topics covered also include Jacksonian Democracy, westward expansion, the role of women in the nineteenth century, nineteenth century immigration, and the controversy over slavery. (Prerequisite(s): READ 0721 or READ 0724 or EAPP 0860 with a grade of “C” or better, or appropriate assessment score) (MnTC: Goals 5 & 7) 4C/4/0/0

HIST 1746 U.S. History Since 1877
This course surveys the political and social history of America from the end of the Civil War to the present. Topics covered include Reconstruction and racial segregation in the South, the Gilded Age and Progressive Era, the Great Depression of the 1930s, World Wars I and II, the war in Vietnam, the Civil Rights Movement, and social movements of the 1960s. Throughout the course the roles of women, immigrants, and people of color will be discussed. (Prerequisite(s): READ 0721 or READ 0724 or EAPP 0860 with a grade of “C” or better, or appropriate assessment score) (MnTC: Goals 5 & 7) 4C/4/0/0

HIST 1750 Minnesota History
This course surveys Minnesota’s historical development from the pre-Columbian period to the present. It focuses on the historic importance of Minnesota’s geography and natural resources, American Indian-white relations, the development of Minnesota’s unique political tradition and the emergence of Minnesota’s diverse society and economy. Course readings, videos and class discussions are supplemented by visits to metro-area historic sites and the Minnesota Historical Society’s History Center. In addition, students are exposed to the tools and techniques historians use to study the past as a part of completing research projects. (Prerequisite(s): READ 0721 or READ 0724 or EAPP 0860 with a grade of “C” or better, or appropriate assessment score) (MnTC: Goals 5 & 10) 3C/2/0/0
HIST 1760 History of World Civilizations to 1500
This course surveys world history from the first civilizations to 1500 C.E. Course themes focus on political, ideological, economic, social, cultural, religious, technological and environmental developments in Africa, Eurasia and the Americas. (Prerequisite(s): READ 0721 or READ 0724 or EAPP 0860 with a grade of "C" or better, or appropriate assessment score) (MnTC: Goals 5 & 8) 3C/3/0/0

HIST 1761 History of World Civilizations since 1500
This course surveys world history from 1500 C.E. to the present. Course themes focus on political, ideological, economic, social, cultural, religious, technological and environmental developments in Africa, Eurasia and the Americas. Special focus is given to global factors that allowed the West to exercise significant influence over the development of Africa, Asia and the Americas. (Prerequisite(s): READ 0721 or READ 0724 or EAPP 0860 with a grade of "C" or better, or appropriate assessment score) (MnTC: Goals 5 & 8) 3C/3/0/0

HIST 1770 History of Women in the United States
This course explores the history of women in the United States from the colonial period to the present. Within this chronological framework, the course examines how women understood their lives as individuals and as members of families and communities. The course also explores strategies through which women of diverse races, classes, and ethnicities struggled to control their own lives and identities. Special focus is given to how ideologies of gender, race, class and sexuality framed American society and culture. (Prerequisite(s): READ 0721 or READ 0724 or EAPP 0860 with a grade of "C" or better, or appropriate assessment score) (MnTC: Goals 5 & 8) 3C/3/0/0

HIST 1773 African American History
This course explores the history of African American men and women in the United States from their involuntary arrival in the early 17th century to the present. Within this chronological framework, the course will examine the historical changes that have shaped African American life and culture, explore how African Americans have understood their lives as individuals and as members of families, communities and institutions, evaluate how ideas about race and color have framed the societies in which Americans lived, and examine the struggle of African Americans to gain freedom, full citizenship, civil rights, and equality. (Prerequisite(s): READ 0721 or READ 0724 or EAPP 0860 with a grade of "C" or better, or appropriate assessment score) (MnTC: Goals 5 & 7) 3C/3/0/0

HIST 1780 History of Race, Ethnicity, and Immigration of the United States
This course surveys the experiences of ethnic minorities and immigrant groups within the United States from the colonial period to the present. The experiences of American Indians, African Americans and immigrant groups from Europe, Africa, Asia and Latin America are explored and their contributions to, and struggles within, a multicultural America are analyzed. Additional course themes include: slavery and its legacies, US government American Indian policy, US government immigration policy, the development of race as a social construct, and the continued impact systemic racism has on American society. (Prerequisite(s): READ 0721 or READ 0724 or EAPP 0860 with a grade of "C" or better, or appropriate assessment score) (MnTC: Goals 5 & 9) 3C/3/0/0

HIST 2780 Special Topics in History
This course is designed to present additional or unique material and learning experiences within a specified discipline. The course will be based on student need, flexibility, and may be designed to meet various transfer and pre-major course requirements. Please see a current Course Schedule for complete course details. (Prerequisite(s): READ 0721 or READ 0724 or EAPP 0860 with a grade of "C" or better, or appropriate assessment score) (MnTC: Goals 5 & 7) Variable credits 1-6

HIST 2790 Historical Methods
This course is a capstone experience intended for students pursuing an AA degree with an emphasis in history. Students will arrange this course with a history instructor and, along with the instructor, tailor their course to their interests and/or intended future area of study. Students will be exposed to the profession’s methodology and produce a research-based semester-long capstone project. (Prerequisite(s): Instructor approval) (MnTC: Goals 5 & 7) 2C/2/0/0

Hospitality Management

HSPM 1410 Introduction to Hospitality Management
This course provides an orientation to the hospitality industry. This includes an introduction to the structure of lodging, food service and tourism organizations, the role of lodging departments, the future of the industry and career opportunities. Course structure includes lecture, projects, discussion and guest speakers. 3C/3/0/0

HSPM 1440 Event Management and Planning
This course will provide an overview of Event Management. Topics include identifying the purpose of special events, planning timelines, organization, managing volunteers, evaluation, invitations and logistics. Emphasis will be placed on the principles of management and marketing and how they apply in event planning. Career opportunities in event planning will also be explored. 3C/3/0/0

HSPM 2420 Hotel and Lodging Operations
This course provides students the key principles in the lodging industry, focusing on strategic planning as the foundation for operation effectiveness. 3C/3/0/0

HSPM 2591 Hospitality, Management Internship
This course provides hands-on opportunity to work in the hospitality industry. (Prerequisite(s): Advisor approval) Variable credits 1-3

Human Resources

HMRS 1400 Human Resource Management
An introduction to the basic principles of Human Resource functions and services. It will provide background and understanding for further Human Resources courses in the Human Resource Program. 3C/3/0/0

HMRS 1410 Talent Development
This course provides students with a basic understanding of g activities related to Talent Development. Topics include: Talent Strategy as it relates to developing and retaining employees; Workforce Planning as it relate to forecasting and meeting short- and long-term workforce development needs; Employee Development and Training as it relates to Capability Development, Performance and Leadership; and Talent Analytics related to driving decisions and improving overall Talent Development efforts. 3C/3/0/0

HMRS 1420 Digital HR
Explores the application of technologies to HR related activities. Includes the use of social, mobile, analytics and cloud technologies being used to make HR initiatives more effective and efficient. 3C/3/0/0

HMRS 1430 Total Rewards
Covers foundational concepts related to compensation and benefits administration. Students explore methods to improve employee wellbeing by delivering meaningful rewards. Topics include various types of benefits that are typically offered by employers, direct and indirect compensation methods, and how these offerings relate to business strategy. 3C/3/0/0

HMRS 2410 Employee/Labor Relations
This course focuses on employee relations techniques such as: coaching, mentoring, performance management, employee discipline, workplace violence prevention, employee crisis management and effective communication, including gender and generational communication in the workplace. Also covered are the labor relations issues that supervisors need to deal with on a daily basis when working in a union environment. 3C/3/0/0
HMRS 2420 Employment Law and HR Policies
Provides students with an understanding of EEO legislation and other federal laws relating to employment and the impact of these laws on an organization. Students will also study the emerging legal issues facing today’s Human Resource Departments. The course will also define the needs for HR policies and the development of a variety of policies. 3C/3/0/0

HMRS 2430 Performance Management and Coaching
The course provides a comprehensive review of methods for improving employee productivity and job satisfaction. Students will explore a variety of leadership coaching tools, techniques and best practices. Topics include improving skills for developing trust, confidence, and rapport. Students will learn to navigate employee discipline and performance issues and receive a primer on legal, practical and psychological issues they should be aware of when coaching employees. 3C/3/0/0

HMRS 2440 Talent Acquisition
This course focuses on the staffing function and covers factors to consider and strategies to use in the talent acquisition process. Students explore techniques for recruitment, selection, orientation and documentation that ensure legal compliance and organizational effectiveness. 3C/3/0/0

HMRS 2550 Human Resource Special Projects
The intent of this course is to allow flexibility in providing a learning experience to meet a special need of the student, the major program, and the College. (Prerequisite(s): Instructor approval) Variable 1-3 credits

HMRS 2591 Human Resource Internship
Designed to provide the student with a purposeful, occupational experience in the Human Resource field. Each internship is an individualized experience. A training plan is created for each student, in conjunction with the training site, to provide experience related to the skills and knowledge acquired in the program. (Prerequisite(s): Advisor approval) Variable credits 3-6

HMRS 2600 Human Resources Capstone
This course reviews the principles covered in the Human Resources degree program through activities and assessment related to program outcomes. Students will demonstrate the knowledge and abilities required to perform as an HR professional, and the skills to conduct an effective job search in the HR field. 3C/3/0/0

Humanities

HUMA 1720 The Ancient and Medieval World
This course introduces students to the global humanities and shows the relationship between cultures of the past and life in the present. The course includes an examination of written works, art, architecture, and religion from Greece, Rome, the Middle Ages and the Renaissance, and other cultures. Texts, materials and interdisciplinary assignments will examine the arts and ideas of the West in relation to those of other world cultures, including India, East Asia, Africa and Native America. (Prerequisite(s): READ 0722 or READ 0724 or EAPP 0900 with a grade of “C” or better, or appropriate assessment score) (MnTC: Goals 6 & 8) 4C/4/0/0

HUMA 1730 The Modern World
This course introduces students to the global humanities and shows the relationship between the culture of the past and life in the present. The course includes an examination of written works, art, architecture and music from the Modern World (roughly the 16th century to the present). Texts, materials and interdisciplinary assignments will examine the arts and ideas of the West in relation to those of other world cultures, including India, East Asia, Africa and Native America. (Prerequisite(s): READ 0722 or READ 0724 or EAPP 0900 with a grade of “C” or better, or appropriate assessment score) (MnTC: Goals 6 & 8) 4C/4/0/0

HUMA 1740 U.S. Cultural Diversity: Native/African/Latin/Asian American Humanities
This course intends to introduce students to humanities of Native Americans, African Americans, Latin Americans and Asian Americans in the United States in the 20th century, and to look at the relationship between those works and culture and life in the United States in the present. We will look at humanities pieces in a historical and cultural context, pieces almost exclusively created by, for, and about peoples belonging to or identifying with one or more of these groups, including literature, visual art, music, dance, theatre and/or film. We will look especially at works with themes about identity, community, borders, and power. (Prerequisite(s): READ 0722 or READ 0724 or EAPP 0900 with a grade of “C” or better, or appropriate assessment score) (MnTC: Goals 6 and 7) 4C/4/0/0

HUMA 1780 American Film
This course offers an introduction to American cinema as art form and medium of cultural communication from its earliest years at the end of the nineteenth century to the present day. We consider the evolution of the Hollywood industry, film form, cinematic experience, genres, independents, social and political movements, and issues of national identity. Students taking this course develop skills to approach film as informed and critical viewers of style and content. Through film screenings and discussion, we explore relationships between movies and the images and ideas Americans have had of themselves. (Prerequisite(s): READ 0722 or READ 0724 or EAPP 0900 with a grade of “C” or better, or appropriate assessment score) (MnTC: Goals 6 & 7) 3C/3/0/0

HUMA 1790 International Film
This course introduces key developments and movements in the history of world cinema, from its origins in the late nineteenth century to the present. Students examine style, content, and historical contexts of narrative films from Europe, Asia, Africa, and Latin America. This course develops skills in critical viewing, describing, and analyzing film as art form and as cultural communication. (Prerequisite(s): READ 0722 or READ 0724 or EAPP 0900 with a grade of “C” or better, or appropriate assessment score) (MnTC: Goals 6 & 7) 3C/3/0/0

HUMA 1795 Special Topics in Humanities
This course is designed to present additional or unique material and learning experiences within a specified discipline. The course will be based on student need, flexibility, and may be designed to meet various transfer and pre-major course requirements. Please see a current Course Schedule for complete course details. (Prerequisite(s): READ 0722 or READ 0724 or EAPP 0900 with a grade of “C” or better, or appropriate assessment score) (MnTC: Goal 6) Variable credits 1-6

Individualized Studies

INDS 1401 Study Skills and Strategies for Individualized Studies and Planning
This course is designed to help students identify and develop necessary skills and strategies to enhance study skills and college success. This course covers the development of the individualized studies degree plan. Upon completion of the course, students will have a completed individualized studies plan which meets their career and employment goals. Focused topics will include college expectations; overcoming barriers to success; study skills such as time management and note-taking; learning styles; college resources; and maintaining physical, mental, and emotional health. 3C/3/0/0

Interpreter/Transliterator Sign Language

INTP 1440 Orientation to Interpreting
This course introduces students to the profession of sign language interpreting. It covers the history of interpreting as a field of professional practice, the required professional ethical and performance standards, the impact of legislation on the field, the phenomena of cross cultural dynamics, oppression of minority groups and the role of an interpreter as a cultural mediator. (Prerequisite(s): INTP 1500 Interpreting Process with a grade of “C” or better) 3C/3/0/0
INTP 1442 English Grammar for Sign Language Interpreters
This course covers fundamentals of English grammar and writing and their relationship to the study of ASL and interpreting/transliterating. Topics include: parts of speech; prepositional phrases; simple, perfect, and progressive verb tenses; passive and active voice sentences; direct and indirect objects; predicate adjectives, predicate nouns, and predicate pronouns; fundamentals of English sentence structure; punctuation; capitalization; proofreading strategies; and grammatical aspects of English that create challenges for interpreters/transliterators. The course provides terminology and skill-building exercises which will enable students to: more clearly talk about and analyze aspects of English and ASL; more accurately evaluate their interpreting/transliterating work; identify non-standard English; and evaluate and develop their use of spoken and written standard English. (Prerequisite(s): Completion of ASLS 1413 American Sign Language 3 with a grade of “C” or better) 2C/2/0/0

INTP 2540 Video Relay Interpreting/Video Remote Interpreting
This course introduces students to Video Remote Interpreting and Video Relay Interpreting. It consists of the history of VRI and VRS as a field of professional practice. It covers the call opening, middle and closing, call management, special populations, cultural considerations, register, affect, current technology, ethical considerations, federal and state governing rules, and similarities and differences between VRI and VRS. Vicarious trauma, self-care, and team interpreting topics occur through consecutive interpretation. The goal of the course is to develop cognitive processing skills involved in the interpreting process. (Prerequisite(s): Acceptance into the Sign Language Interpreter/Transliterator Program and ASLS 1420 ASL Linguistics and/or INTP 1442 English Grammar for Sign Language Interpreters with a grade of “C” or better or taken concurrently with ASLS 1420 ASL Linguistics and INTP 1442 English Grammar for Sign Language Interpreters. It is necessary for students in the Sign Language Interpreter/Transliterator Program to be able to process auditory and visual information.) 2C/2/0/0

INTP 2421 Voice to Sign Interpreting
This course introduces students to Video Remote Interpreting and Video Relay Interpreting. Provides students techniques for translating the source language English to the target language American Sign Language (ASL) in simultaneous manner. (Prerequisite(s): Grade of “C” or better in INTP 1513) 4C/1/3/0

INTP 2442 Voice to Sign Interpreting 2
This course allows students to continue practicing rendering the target language (ASL) from the source language (English) simultaneously. It also provides preparation for Internship. Continued emphasis and focus is on appropriate uses of lexical and syntactic principles and non-manual behaviors of ASL. (Prerequisite(s): Completion of INTP 2421 with grade of “C” or better) 2C/1/1/0

INTP 2431 Transliterating
This course covers the process of Transliterating (changing a message expressed in spoken English into a coded form of the language). The process moves along a continuum from Contact Language to a signed form of English. Specific subtasks are isolated in order to focus on transliterating skill development, enhancing component skills and incorporating ASL features. These skills are integrated into the performance of beginning to intermediate tasks. (Prerequisite(s): Grade of “C” or better in INTP 1513) 4C/1/3/0

INTP 2432 Transliterating 2
This course expands the process of visually representing English. Students will focus on the expansion and enhancement of transliterating skills at the English end of the ASL-English continuum. Students will incorporate ASL features into intermediate to advanced level texts presented in a simultaneous mode. (Prerequisite(s): Grade of “C” or better in INTP 2431) 2C/1/1/0

INTP 2450 Deaf/Blind Interpreting
Provides students with a working knowledge of the requirements, skills and communication techniques needed to interact and/or interpret with consumers who are Deaf/Blind. (Prerequisite(s): INTP 2411, INTP 2421, INTP 2431) 2C/2/0/0

INTP 2585 Internship Orientation
This course introduces students to the requirements, guidelines, professional practices and types of placements for field experience. Students will discuss protocol, skills, ethics and business practices needed for specific site placements. (Prerequisite(s): Grade of “C” or better in INTP 1513) 1C/1/0/0

INTP 2592 Interpreter Internship
This course is a career-related, supervised work experience that integrates classroom theory and skills with real-life experiences; further develops skills and abilities initiated in program coursework; develops mentoring relationships and skills; identifies resources; expands application of ethical decision making and problem-solving; and prepares students for national certification and employment. (Internship Eligibility: Grade of “C” or better in INTP 2411, 2421, and 2431. Internship Placement: Grade of “C” or better in Interactive Performance Skills Evaluations in INTP 2412 Sign to Voice 2, INTP 2422 Voice to Sign 2 and INTP 2432 Transliterating 2) 5C/0/0/5
Course Descriptions

**Massage Therapy**

**MASS 1400 Introduction to Therapeutic Massage**
This course will enable the student to track the history and development of massage therapy, understand the scope of practice, body mechanics for the practitioner, contraindications for therapy and professional ethics for practitioners. Students will review massage-specific anatomy and physiology with emphasis on muscle identification, actions and insertions on the skeleton. Students will be introduced to basic massage techniques through demonstration and practice. Students will practice correct table set-up and sanitation. Must earn a grade of "C" or better to proceed. (Prerequisite(s): Declared Massage Therapy major) 4C/2/2/0

**MASS 1421 Massage Spa Techniques**
Students will refine previously learned techniques from the MASS 1400 course. Advanced techniques in chair massage, hydrotherapy, stone therapy, lymphatic drainage massage, reflexology, aromatherapy, pregnancy massage and body wraps will be introduced. Students will learn to integrate various spa techniques in a single massage session. Must earn a grade of "C" or better in this course. (Prerequisite(s): MASS 1400 with a grade of "C" or better) 2C/0/2/0

**MASS 1422 Massage Clinical Techniques**
Students will refine previously learned techniques in Swedish massage and deep-tissue massage by demonstrating mastery of massage therapy contraindications, body mechanics, muscle actions and insertions. Students will learn stretches for both client and self-care. Advanced techniques in chair massage, reflexology, myofascial release, lymph drainage and neuromuscular therapy will be introduced. Must earn a grade of "C" or better in this course. (Prerequisite(s): MASS 1400 with a grade of "C" or better) 4C/2/2/0

**MASS 1423 Advanced Clinical Sports Massage Techniques**
Students will refine previously learned techniques. Students will investigate various treatment protocols utilizing scientifically proven, outcome-based techniques including Neuromuscular Therapy, Manual Lymphatic Drainage, Myofascial Release, Travel Trigger Point Therapy, Muscle Energy Technique, Proprioceptive Neuromuscular Facilitated Stretching, Active Isolative Stretching and Positional Release Technique. Students will learn to perform thorough patient assessments utilizing medical histories and objective findings through palpation, functional muscle testing, range of motion testing, postural examination and gait examination. Students will learn to create a care-plan based on evaluations; create treatment plans using carefully selected techniques for the given pathology; and learn to recommend exercises to the patient. Students will learn to give supplementary care as prescribed by a licensed Physician, Chiropractor or Physical Therapist for pathologies including multiple sclerosis, spinal cord injury, traumatic brain injury, stroke, diabetes, AIDS, cancer, burns, post-surgical scarring, chronic pain and fibromyalgia. (Prerequisite(s): Certificate in Massage Therapy or equivalent as evaluated by faculty) 5C/0/0/5

**MASS 1480 Massage Therapy Practicum**
This course meets the requirement of the performance and documentation of the minimum 50 full-body sessions. Students will demonstrate and apply all previously learned techniques including use of client intake information, knowledge of massage therapy contraindications and skills in charting for each client. Must earn a grade of "C" or better in this course. (Prerequisite(s): MASS 1400 and MASS 1422 with a grade of "C" or better) 4C/0/0/4

**MASS 1490 Clinical Massage Internship**
Students will refine all previously learned techniques and put them into practice. Students are placed in a traditional clinical setting at Chiropractic offices, Medical Sport Institutes and Physical Therapy clinics for half of the internship. For the second half students may choose to focus on an area of choice such as oncology, pre and post natal, geriatric, AIDS, infant massage, or orthopedic settings. Must earn a grade of "C" or better in this course. (Prerequisite(s): MASS 1423 (with a grade of "C" or better), Instructor approval or completion of entire clinical massage curriculum and professional membership with ABMP including liability insurance. Students must have current CPR certificate and liability insurance on file at Saint Paul College before starting internship.) 5C/0/0/5

**Mathematics**

**MATH 0740 Foundation for Statistics**
Foundation for Statistics course will focus on essential skills required for success in Introduction to Statistics for students concurrently enrolled in Introduction to Statistics (Math 1740). Topics included are typically found in arithmetic, pre-algebra, elementary algebra, intermediate algebra, geometry and introductory statistics. These concepts are taught through the context of descriptive data analysis. Core arithmetic and algebra skills that are needed to understand the concepts, formulas, and graphs used in transfer-level Statistics are investigated in a "just-in-time" approach, rather than in the standard sequence found in the traditional algebra path. (Prerequisite(s): MATH 0745 with a grade of "C" or better, or appropriate assessment score) 2C/0/0/0

**MATH 0745 Fundamental Mathematics**
This course is designed for those who need to learn the basic principles of mathematics. Topics include whole numbers, fractions, decimals, and percents, applications of percents, graphs, plane geometry, solid figures, graphs and simple statistical measures, integers, polynomials, and linear equations. 0C/0/0/0

**MATH 0910 Introductory Algebra**
This course is intended for students who need to master the fundamentals of algebra. The topics include a review of the real number system, solving equations and inequalities, and their applications, graphing linear equations, solving systems of linear equations, exponents, polynomials and quadratic equation solving and applications. (Prerequisite(s): MATH 0745 with a grade of "C" or better, or appropriate assessment score) 3C/3/0/0

**MATH 0920 Intermediate Algebra**
This course is intended for students who have had one year of high school algebra and need a refresher before taking courses such as College Algebra and/or Pre-Calculus. The topics include a review of solving equations and inequalities and their applications, exponents and polynomials, factoring polynomials, solving quadratic equations and their applications, rational expressions, rational exponents and radicals, and graphing functions (linear and quadratic). Students wanting to take Calculus will have the option of taking either Pre-Calculus or both College Algebra and Trigonometry as their prerequisites. (Prerequisite(s): Grade of "C" or better in MATH 0910, or appropriate assessment score) 3C/3/0/0

**MATH 1411 Applied Mathematics**
This course is required for students in certain trade programs. It is designed to help students develop the numerical skills needed to perform tasks in their trade. Topics include whole numbers, fractions, decimals, percents, ratios and proportions, powers, roots, integers, polynomials, equations, plane and solid geometry, trigonometric functions, and word problems relevant to the trades. (Placement into this course will be according to college assessment score.) 3C/2/1/0

**MATH 1420 Trade Algebra and Trigonometry**
This course is intended for the student who needs to master the fundamentals of algebra and right triangle trigonometry as they apply to the construction trades. The content of this course includes a review of basic math, simplifying expressions involving constants and variables, solving algebraic equations, solving literal problems using spreadsheets and graphing calculators and solving construction trade problems with algebra and right triangle trigonometry. (Placement into this course will be according to college assessment score.) 3C/3/0/0

**MATH 1710 Liberal Arts Mathematics**
This class includes selected topics from the mathematics of social choice, growth and symmetry, and probability and statistics.
MATH 1700 Introduction to Statistics
This course covers concepts and applications of descriptive and inferential statistics. Measures of central tendency and variance, confidence intervals, normal distributions and central limit theorem are explored. The student learns about probability distributions and random variables. Techniques of estimation, hypothesis testing, z-scores, t-tests, F-tests, Chi-square tests, analysis of variance (ANOVA) and linear regression are covered in this course. This course can be used to fulfill the general education requirement for math, and transfer to 2 and 4 year institutions. (Prerequisite(s): MATH 0920 with a grade of “C” or better, or appropriate assessment score) (MnTC: Goal 4) 3C/3/0/0

MATH 1750 Trigonometry
This course introduces trigonometric functions and their applications. Topics in trigonometry include angles and the unit circle, graphs of functions, equations, identities, triangles, and the Laws of Sines and Cosines. Vectors, polar coordinates, and parametric equations will also be explored. A review of the fundamentals of functions will be included at the beginning of the course. Students wanting to take Calculus will have the option of taking either Pre-Calculus or both College Algebra and Trigonometry as their prerequisites. (Prerequisite(s): MATH 0920 with a grade of “C” or better, or appropriate assessment score) (MnTC: Goal 4) 4C/4/0/0

MATH 1762 Pre-Calculus
Pre-Calculus is often described as an accelerated version of College Algebra and Trigonometry. This course introduces algebraic and trigonometric functions and their applications. Topics include polynomial, rational, exponential, logarithmic functions, sequences, series, and limits. Vectors, parametric equations, and analytic geometry will also be explored. In addition, this course covers trigonometric functions, identities and equations and the laws of sines and cosines. (Prerequisite(s): MATH 0920 Intermediate Algebra with a grade of “C” or better, or MATH 1730 College Algebra with a grade of “C” or better, or appropriate assessment score) (MnTC: Goal 4) 5C/5/0/0

MATH 1790 Special Topics in Mathematics
This course is designed to present additional or unique material and learning experiences within a specified discipline. The course will be based on student need, flexibility, and may be designed to meet various transfer and pre-major course requirements. Please see a current Course Schedule for complete details. (MnTC: Goal 4) Variable credits 1-6

MATH 2100 Intermediate Statistics
Second course in statistics provides an approach to statistical practices including nonparametric methods, simple regression, multiple regression, logistic regression, log-linear regression, ANOVA and survival, component and Bayesian data analysis. Application and interpretation of computer output will be highlighted. This course should be useful to students who are interested in learning natural sciences, economics, finance and data science. This course can be used to fulfill the general education requirement for math, and transfer to 2 and 4 year institutions. (Prerequisite(s): MATH 1740 Introduction to Statistics with a grade of “C” or better) (MnTC: Goal 4) 4C/4/0/0

MATH 2240 Statistics for Psychology/Behavioral Sciences
Students use basic mathematical and computerized procedures to analyze data in the behavioral sciences. Statistical software is used to conduct descriptive and inferential data analyses. Students choose and apply statistical procedures to help answer psychological and behavioral scientific research questions. Students read, interpret, and write APA-style results sections for behavioral science research. (Prerequisite(s): PSYC 1710 and MATH 1740 with a grade of “C” or better, or MATH 1730 with a grade of “C” or better, or a higher MATH course with a grade of “C” or better) (MnTC Goals: 5) 4C/4/0/0

MATH 2460 Discrete Mathematics
This is a course in discrete mathematical structures to prepare students for advanced courses. Topics include set theory, functions and relations, the big O notation, logic, truth tables and Boolean expressions, proof techniques including mathematical induction, and tree/graph fundamentals. Credit will not be awarded for both MATH 2460 and CSC 2460. (Prerequisite(s): MATH 1730 or higher) 4C/4/0/0

MATH 2749 Calculus 1
This course is a beginning calculus course, which introduces the concepts of limits, derivative, differentiation and integration of functions with emphasis on applications. Topics include introduction to the derivatives and limits, tangent to a curve, properties of limits, derivative of a real function, the power rule and the algebra of derivatives, the chain rules, the mean value theorem, applications of differentiation including max-min problems and related rate problems, anti-derivatives and the definite integral. Graphing calculators are used to further the student’s understanding of essential concepts. (Prerequisite(s): MATH 1750 Trigonometry or MATH 1762 Pre-Calculus with a grade of “C” or better, or appropriate assessment score) (MnTC: Goal 4) 4C/4/0/0

MATH 2750 Calculus 2
This course is a continuation of MATH 2749 Calculus 1 and the continued development of the properties and applications of integration. Topics include applications of integral, transcendental functions, techniques of integration, sequences and series and parametric equations and polar coordinates. A graphing calculator is required. Upon completion of Calculus 2, students can take either MATH 2753 or MATH 2760. (Prerequisite(s): A grade of “C” or better in MATH 2749) (MnTC: Goal 4) 4C/4/0/0

MATH 2753 Multivariable Calculus
This course is intended for students who have successfully completed MATH 2750 Calculus 2 and covers the calculus of several variables. Topics include functions of several variables, three-dimensional analytic geometry, vectors, partial derivatives, multiple integrals, vector fields, surface integrals, Green’s Theorem, Stokes Theorem, and the Divergence Theorem. (Prerequisite(s): MATH 2750 Calculus 2 with a grade of “C” or better or appropriate assessment score) (MnTC: Goal 4) 4C/4/0/0

MATH 2760 Differential Equations and Linear Algebra
This course is an introduction to differential equations and linear algebra, which focuses on ordinary differential equations but students will be introduced to partial differential equations. Topics include the basic definition, terminology and ideas of ordinary differential equation, finding solutions of and working with applications of first and second order differential equations, existence and uniqueness of solutions, variation of parameters, undetermined coefficients, matrix
formulation of linear systems, Laplace transforms, and an introduction to numerical and graphical methods of solutions. Additional topics include Gaus-Jordan reduction and system of linear equations, matrices and coordinates relative to different bases, general linear spaces, orthogonality, determinants, eigenvalues, eigenvectors, and phase plane analysis of linear and nonlinear systems of ordinary differential equations. (Prerequisite(s): MATH 2750 Calculus 2 with a grade of “C” or better or appropriate assessment score) (MnTC: Goal 4) 4C/4/0/0

Medical Laboratory Technician

MDLT 1400 Introduction to Medical Laboratory Science
This course is designed to introduce students to the field of medical laboratory science and the role of the Medical Laboratory Technician in healthcare. The history of the medical laboratory science profession, and its scope of practice including lab practice areas and personnel will be discussed. In addition, the course will cover educational requirements, employment opportunities, certification, licensure, regulation and professional and patient codes of ethics. Must earn a grade of “C” or better in this course to proceed in MDLT Major coursework. (Prerequisite(s): Enrollment in MDLT Major courses) 1C/1/0/0

MDLT 1410 Laboratory Techniques
This course covers basic skills and techniques used in the medical lab which includes basic instrumentation. Major topics covered are: safety and standard precautions, laboratory glassware and pipettes, microscopy, balances and weighing, specimen collection and processing, spectrophotometry, metric/chemistry math and solutions, and laboratory information systems. Must earn a grade of “C” or better in this course to proceed in MDLT Major coursework. (Prerequisite(s): CHEM 1711 and BIOL 1730 or concurrent enrollment) 3C/2/1/0

MDLT 1421 Hematology 1
This course covers basic hematology procedures involving manual methods of cell counting and hemoglobin analysis. Emphasis is placed on hematoepoiesis theory and blood cell structure concepts including function, appearance, and cell differentiation. Students will employ a laboratory information system to order tests and report results. Must earn a grade of “C” or better in this course to proceed in MDLT Major coursework. (Prerequisite(s): Enrollment in MDLT Major courses) 2C/1/1/0

MDLT 1422 Hematology 2
This course is a continuation of Hematology 1 in which blood cell differentiation study continues. Hematology instrumentation will be introduced and students will evaluate quality control. Emphasis is placed on correlating laboratory findings with hematologic diseases. Coagulation theory and laboratory procedures are used to evaluate homeostasis. Students will employ a laboratory information system to order tests and report results. Must earn a grade of “C” or better in this course to proceed in MDLT Major coursework. (Prerequisite(s): MDLT 1421) 4C/1/3/0

MDLT 1430 Urinalysis/Body Fluids
This course covers basic urinalysis procedures used in the clinical laboratory in the examination of a patient’s urine. Students study urine formation, renal physiology, the role of the kidney in health and disease, urine specimen types, and components of the routine urinalysis test. The course also includes an overview of other non-urine body fluids analyzed in the clinical laboratory. In the laboratory, students will perform routine urinalysis using both manual and automated methods. Students will practice using a laboratory information system to order tests and report results. Must earn a grade of “C” or better in this course to proceed in MDLT Major coursework. (Prerequisite(s): Enrollment in MDLT Major courses) 3C/2/1/0

MDLT 1441 Clinical Chemistry 1
This course covers the analysis of various chemical constituents of plasma and serum. The physiology, methodology, and clinical significance of carbohydrates, non-protein nitrogen, and bilirubin is addressed. The course includes a review/overview of renal and liver function including blood tests to assess each. Laboratory Techniques concepts of solution math, spectrophotometry, pipetting and safety will be reviewed and emphasized. Quality assurance concepts, quality control procedures, and manual laboratory techniques will be presented and practiced. POCT procedures will be discussed and practiced. Students will employ a laboratory information system to order tests and report results. Must earn a grade of “C” or better to proceed in MDLT Major coursework. (Prerequisite(s): CHEM 1711 & BIOL 1740 or concurrent enrollment and MDLT 1410) 2C/1/1/0

MDLT 1442 Clinical Chemistry 2
This course covers the continued study of various chemicals in plasma/serum that are routinely analyzed to contribute to patient care. The physiology, test methodology and clinical correlations of proteins, enzymes, electrolytes, lipids, acid/base balance, and endocrinology are discussed. The course also includes a brief overview of therapeutic drug monitoring and toxicology. Instrumentation principles/methodologies found in modern clinical chemistry laboratories and concepts that are basic to the operation and maintenance of automated laboratory instruments are covered. Students will test samples and controls using a variety of automated analyzers. Students will employ a laboratory information system to order tests and report results. (Prerequisite(s): grade of “C” or better in MDLT 1441, BIOL 1740 and HLTH 1410) 4C/1/3/0

MDLT 1446 Phlebotomy
This course provides beginning instruction in blood specimen collection skills and procedures. The course addresses safety, legal issues, customer service, professionalism, the circulatory system, equipment, venipuncture, skin puncture procedures, and specimen transport/processing. Students may employ a laboratory information system to document specimen collection. Emphasis is placed on attaining competency in safe blood specimen collection as well as on demonstration of effective communication and professional skills to perform phlebotomy in a health care setting. Must earn a grade of “C” or better to proceed in MDLT Major coursework. (Prerequisite(s): MDLT 1410) 1C/0/1/0

MDLT 1451 Learning Lab 1-Introductory Skills
This course reinforces the basic skills required for gaining proficiency in performing introductory medical laboratory procedures in hematology and basic skills. It is designed to allow completion of hands-on skill activities and enhance attainment of skills in MDLT 1410 and MDLT 1421. Students will be given the opportunity to perform a variety of laboratory techniques with direct instructor supervision. Must earn a grade of “C” or better in this course to proceed in MDLT Major coursework. Safety, problem solving and quality assurance are emphasized. (Prerequisite(s): Concurrent enrollment in MDLT 1410 and MDLT 1421) 1C/0/1/0

MDLT 1452 Learning Lab 2-Introductory Skills
This course reinforces the basic skills required for gaining proficiency in performing introductory medical laboratory procedures in urinalysis, clinical chemistry, phlebotomy. It is designed to allow completion of hands-on skill activities and enhance practical aspects of MDLT 1430, MDLT 1441, and MDLT 1446. Students will be given the opportunity to perform a variety of laboratory techniques with direct instructor supervision. Safety, problem solving and quality assurance are emphasized. Must earn a grade of “C” or better to proceed in MDLT Major coursework. (Prerequisite(s): Concurrent enrollment in MDLT 1441, MDLT 1430, and MDLT 1446) 1C/0/1/0

MDLT 1453 Learning Lab 3-Intermediate Skills
This course reinforces the basic skills required for attaining proficiency in performing intermediate level medical laboratory procedures in phlebotomy, and clinical chemistry. It is designed to allow completion of hands-on skill activities and enhance practical aspects of MDLT 1442. Students will be given the opportunity to perform a variety of laboratory techniques with direct instructor supervision. Safety, problem-solving and quality assurance are emphasized. Must earn a grade of “C” or better to proceed in MDLT Major coursework. (Prerequisite(s): Concurrent enrollment in MDLT 1442) 1C/0/1/0
MDLT 1454 Learning Lab 4-Intermediate Skills
This course reinforces the basic skills required for attaining proficiency in performing intermediate level medical laboratory procedures in phlebotomy, immunology and hematology. It is designed to allow completion of hands-on skill activities and enhance attainment of skills in MDLT 1510 and MDLT 1422. Students will be given the opportunity to perform a variety of laboratory techniques with direct instructor supervision. Must earn a grade of “C” or better in this course to proceed in MDLT Major coursework. (Prerequisite(s): Concurrent enrollment in MDLT 1422 and MDLT 1510) 1C/0/1/0

MDLT 1510 Immunology
This course covers basic theory in immunology, non-specific immunity and serological procedures. The reactions of antibodies and antigens are studied and performed in the laboratory. Laboratory procedures are designed to instruct the student in basic serology procedures such as serial dilutions, the use of commercial kits and interpretation of results. Students will employ a laboratory information system to order tests and report results. Must earn a grade of “C” or better in this course to proceed in MDLT Major coursework. (Prerequisite(s): Enrollment in MDLT Major courses) 2C/1/1/0

MDLT 1600 Medical Laboratory Math
This course will introduce the Medical Laboratory Technician student to mathematical formulas and calculations routinely used in the Medical Laboratory Science career. Topics of study include a review of basic algebra, rounding and significant figures, the metric system, logarithms, solutions & concentration, dilutions, graph construction & interpretation and statistics for quality control & method evaluation. Practice problems will provide real world context for application in today’s medical laboratory setting. (Prerequisite(s): Appropriate assessment scores or MATH 0910 with a grade of “C” or better) 1C/0/1/0

MDLT 2410 Immunohematology
This course covers the introduction to both the theoretical and practical aspects of Immunohematology, a specialized branch of laboratory medicine which involves the study of blood group antigens and antibodies. Areas of study include a review of immunology concepts, blood group genetics, reagents and quality assurance, antigens and antibodies of the ABO, Rh and other blood group systems, pre-transfusion testing procedures (ABO/Rh typing, antibody screening and identification, cross-match), hemolytic disease of the fetus and newborn, neonatal and obstetric transfusion medicine testing, adverse effects of transfusion, donor screening, and blood component preparation and usage. Students will perform a variety of transfusion medicine laboratory tests utilizing both tube and gel system methods. Must earn a grade of “C” or better in this course to proceed in MDLT Major coursework. (Prerequisite(s): Grade of “C” or better in MDLT 1510) 3C/1/2/0

MDLT 2420 Clinical Microbiology
This course covers the isolation and identification of clinically significant microorganisms. Emphasis is placed on organism’s growth characteristics, techniques for identification, safety, and quality assurance. Students will study conventional identification and susceptibility methods along with instrumentation used in the clinical microbiology lab. Students are introduced to recent advances in organism identification techniques. The correlation between pathogens, types of infection, and specimen sources is explored. Must earn a grade of “C” or better in this course to proceed in MDLT Major coursework. (Prerequisite(s): Grade of “C” or better in MDLT 1510) 4C/1/3/0

MDLT 2430 Clinical Practice Orientation
This course explains role of the MDLT student during the practicum phase of the program. Students prepare for the Clinical Practice experience and review theoretical concepts and procedures of testing performed in various clinical laboratory departments. Clinical practice policies and expectations are addressed. Additionally, the application process and timeline of certification is discussed. Must earn a grade of “C” or better in this course to proceed in MDLT Major coursework. (Prerequisite(s): Grade of “C” or better in all coursework required through the first year including summer term) 1C/0/0

MDLT 2455 Learning Lab 5-Advanced Skills
This course reinforces the basic skills required for attaining proficiency in performing medical laboratory procedures in phlebotomy and immunohematology. It is designed to allow completion of hands-on skill activities and enhance practical aspects of MDLT 2410 course. This course also provides an opportunity for the enrolled students to recall and practice key laboratory skills from first-year MDLT courses in preparation for the upcoming MLT Clinical Practice. Students will be given the opportunity to perform a variety of laboratory techniques with direct instructor supervision. Safety, problem-solving and quality assurance are emphasized. Must earn a grade of “C” or better to proceed in MDLT Major coursework. (Prerequisite(s): MDLT 1446 and MDLT 2410) 1C/0/1/0

MDLT 2456 Learning Lab 6-Advanced Skills
This course reinforces the basic skills required for attaining proficiency in performing advanced level medical laboratory procedures in phlebotomy, microbiology, mycology, and parasitology. It is designed to allow completion of hands-on skill activities and enhance attainment of skills in MDLT 2500 and MDLT 2420. Students will be given the opportunity to perform a variety of laboratory techniques with direct instructor supervision. Safety, problem solving, and quality assurance will be emphasized. Must earn a grade of “C” or better in this course to proceed in MDLT Major coursework. (Prerequisite(s): Concurrent enrollment in MDLT 2500 and MDLT 2420) 1C/0/1/0

MDLT 2500 Molecular Diagnostics/Advanced Body Fluid Analysis
This course provides a comprehensive overview of the fundamental principles of molecular diagnostics and explores the application of molecular techniques in the medical laboratory. Topics of study include: molecular diagnostic foundation concepts, nucleic acid structure and function, genetics, molecular methodologies and quality assurance. The course also provides an opportunity for advanced study of non-blood, non-urine body fluids, with particular emphasis on hematologic exam. Topics of study include CSF, synovial, and serous fluids. (Pre-requisites: MDLT 1510, MDLT 1430 & MDLT 1422) 2C/1/1/0

MDLT 2591 Clinical Practice
In this clinical laboratory course, the student is provided competency-based instruction in an affiliate hospital/clinic laboratory under the supervision of laboratory professionals. The work-based experience provides an opportunity for students to refine lab techniques and apply knowledge learned in the didactic phase in an employment-like setting with direct patient care that offers realistic experiences unavailable in student laboratory sessions. The experience also allows students to enhance non-technical attributes including, but not limited to, communication, critical thinking, multi-tasking and independent work skills. Using competency checklists provided by the college laboratory professionals at the affiliate evaluate student clinical skills, application of knowledge, professional behavior and attributes in each department of the clinical laboratory (hematology, chemistry, urinalysis, microbiology, transfusion medicine, and coagulation) and specimen collection and processing skills. Required off-campus afternoons provide learning activities on special topics that assist students in attaining competency in the clinical practice setting. Additional required learning activities assigned by campus faculty that are supplemental to the Clinical Practice competency checklists assist students in maintaining mastery of cognitive theory in major clinical laboratory departments. Must earn a grade of “P” to proceed in MDLT Major coursework. (Prerequisite(s): Grade of “C” or better in all MDLT program requirements) Variable credits 1-9

MDLT 2593 Comprehensive Examinations
Students’ knowledge of theory and practical applications in all department areas of the clinical laboratory will be evaluated by comprehensive examinations to assist them in their preparation for the national certification examination desired by potential employers. Students complete final summative evaluations of Clinical Practice experiences and of various components they experienced as a MLT Major. Job placement tracking efforts are described and forms provided. (Prerequisite(s): Grade of “C” or better in all required courses in the Medical Laboratory AAS degree including successful completion of MDLT 2591 Clinical Practice) 1C/0/1/0
Medical Office

MEDS 1420 Health Information Foundations
This course introduces the student to the health information management profession by covering topics fundamental to the field such as content, function, structure, and uses of health information, along with the health information profession itself. It covers prominent healthcare data sets, their purpose and use, as well as typical departmental functions associated with managing health information. An introduction of clinical vocabularies and classification systems is covered, as well as secondary data sources such as registries and indexes. Finally, students will learn the history, organization, financing, and delivery of health care services in the United States. Must earn a grade of “C” or better in this course to proceed. 3C/3/0/0

MEDS 1470 Anatomy and Physiology/Medical Office
This course provides the student with an understanding of anatomy and physiology of all systems of the human body. Common disease conditions of each body system will be highlighted. This course provides the student with a fundamental knowledge base for work in the medical office careers field. Must earn a grade of “C” or better in this course to proceed. 3C/3/0/0

MEDS 1480 Medical Terminology
This course exposes the student to the language of healthcare known as medical terminology. The student will develop an understanding of medical terminology by studying the pronunciation and definition of word parts as well as the proper format in bringing word parts together to form medical terms. Development of this foundation is designed to provide a medical vocabulary for future healthcare staff. Must earn a grade of “C” or better in this course to proceed. 3C/3/0/0

MEDS 1551 Medical Formatting/Transcription 1
This course covers formatting and transcription of a variety of medical documents. Emphasis will be on authentic forms and material, formatting, spelling, building speed and accuracy, and proofreading and correcting errors. Must earn a grade of “C” or better in this course to proceed. (Prerequisite(s): MEDS 1480 or concurrent enrollment) 3C/2/1/0

MEDS 1552 Transcription And Documentation II
A continuation of MEDS 1551. A variety of dictated medical material will be produced using electronic equipment. Emphasis will be on authentic material, building speed and accuracy, advanced editing, proofreading and correcting errors. Must earn a grade of “C” or better in this course to proceed. (Prerequisite(s): MEDS 1551) 3C/2/1/0

MEDS 1553 Advanced Medical Documentation
Advanced course that continues the development of medical transcription skills using word processing equipment to produce a variety of usable medical documents. Emphasis will be on authentic material, building speed and accuracy, advanced editing, proofreading and correcting errors. Material will be from physicians from various ethnic backgrounds and will cover various medical specialty areas. Must earn a grade of “C” or better in this course to proceed. (Prerequisite(s): MEDS 1552) 3C/2/1/0

MEDS 1560 Computerized Health Information
An introduction to the concepts of computer technology associated with healthcare and the tools and techniques for collecting, storing and retrieving health care data. This course will explain the difference between data and information as well as discuss networks, data integrity and security, document imaging and automatic identification. Health information systems including administrative, patient registration, ADT, HIM applications, clinical, point of care, lab, radiology, pharmacy and voice recognition, will also be discussed. Must earn a grade of “C” or better in this course to proceed. (Prerequisite(s): MEDS 1420) 3C/3/0/0

MEDS 1562 Billing and Reimbursement
This course provides an introduction to commercial, managed care and federal insurance plans, including medical claim form preparation and processing, as well as the reimbursement systems and prospective payment systems (PPS) used in the healthcare industry. Billing processes and procedures will be discussed and practiced including clean claims and denials and adherence to the National Correct Coding Initiatives. Chargemaster maintenance, regulatory guidelines, and reimbursement monitoring and reporting will be covered, in addition to compliance strategies. Must earn a grade of “C” or better in this course to proceed. (Prerequisite(s): MEDS 1420) 2C/2/0/0

MEDS 1570 Human Disease
This course provides basic information about major disease conditions affecting all the major body systems. Information about diagnostic, treatment, and surgical procedures is also included. Students will do in-depth research on selected disease conditions using Merck Manual and the Internet. They will review and analyze medical reports reflecting the disease conditions that are presented in class. Must earn a grade of “C” or better in this course to proceed. (Prerequisite(s): MEDS 1480 or MEDS 1470 or instructor permission) 3C/3/0/0

MEDS 2430 Pharmacology for the Medical Office
This course offers basic information about drug terminology, drug names (generic and brand), drug classes, and the use of drugs. Drugs frequently prescribed for common disease conditions will be reviewed by body system. Students will use electronic resources and text-based references such as the Physician’s Desk Reference (PDR) to look up detailed information about selected drugs that are being reviewed in class. Must earn a grade of “C” or better in this course to proceed. (Prerequisite(s): MEDS 1480) 2C/2/0/0

MEDS 2432 Alternative Health Record Systems
This course focuses on managing health information in health care facilities other than acute care hospitals. An introduction to the basic components of the content, use and structure of health care data and data sets and how these components link to primary and secondary record systems. Topics to be discussed include the content of the health record, documentation requirements, health care data sets, registries and indices, forms and screen design and primary versus secondary records. An explanation of the organization, financing and delivery of healthcare services will be discussed, as well as a discussion of such topics as accreditation standards and licensure and regulatory agencies. Must earn a grade of “C” or better in this course to proceed. (Prerequisite(s): MEDS 1420) 2C/2/0/0

MEDS 2434 Legal and Ethical Aspects of Health Information
An introduction to the legal and ethical issues that are relevant to health information. The court system and legislative process, as well as legal vocabulary will be communicated. Topics to be discussed include confidentiality, release of information, retention guidelines, patient rights and advocacy, advanced directives, and ethics. The new HIPAA guidelines will also be reviewed. Must earn a grade of “C” or better in this course to proceed. (Prerequisite(s): MEDS 1420) 2C/2/0/0

MEDS 2440 Supervision of Health Information
An introduction to the principles of supervision and organization in order to develop effective skills in leadership, motivation and team building approaches. Topics will include basic management principles, human resource supervision, budgeting basics, ergonomics, how to market HIM services and performance or quality improvement. Must earn a grade of “C” or better in this course to proceed. (Prerequisite(s): MEDS 1420) 2C/2/0/0

MEDS 2461 ICD-10-CM Coding
This course teaches the student to accurately code diagnoses using the ICD-10-CM coding system. This class brings the student through all of the coding conventions in order to develop a basic coding foundation. Coding of diagnoses from each body system will be covered as well as coding from healthcare documents. Emphasis is on Principle Diagnosis, Secondary Diagnoses, Complications, and Comorbidities. Other topics include DRG’s, coding compliance, over-coding and under-coding. Must earn a grade of “C” or better in this course to proceed. (Prerequisite(s): A grade of “C” or better in MEDS 1470 and MEDS 1480) 3C/3/0/0
MEDS 2462 ICD-10-PCS Coding
This course teaches the student to accurately code procedures using the ICD-10-PCS coding system. This class brings the student through all of the coding conventions in order to develop a basic coding foundation. Coding procedures from each section of ICD-10-PCS will be covered as well as coding from operative reports, emergency room reports, physician office reports and other health care documents. Students will also be trained in coding from all sections within the CPT-4 system as well as Evaluation and Management coding and HCPCS Level 2-National coding. Must earn a grade of “C” or better in this course to proceed. (Prerequisite(s): A grade of “C” or better in MEDS 1470 and MEDS 1480) 4C/4/0/0

MEDS 2470 CPT-4 Coding
This course teaches the student to accurately code procedures using the CPT-4 coding system. This class brings the student through all of the coding conventions in order to develop a basic coding foundation. Coding procedures from each body system will be covered as well as coding from operative reports, emergency room reports, physician office reports and other health care documents. Students will also be trained in coding from all sections within the CPT-4 system as well as Evaluation and Management coding and HCPCS Level 2-National coding. Must earn a grade of “C” or better in this course to proceed. (Prerequisite(s): A grade of “C” or better in MEDS 1470 and MEDS 1480) 3C/3/0/0

MEDS 2480 Advanced Coding
In this course, students will use their basic ICD and CPT coding skills while learning to correctly code diagnoses and procedures from a multitude of source documents such as Inpatient Records; Ambulatory Surgery Records; Emergency Room Reports; Physician Office Cases and Ancillary Service Reports. Students will also become familiar with Diagnosis Related Groups and Ambulatory Payment Classifications. Through instruction in coding these cases, the students will become familiar with what will be expected of them in a real coding position in a healthcare organization. Must earn a grade of “C” or better in this course to proceed. (Prerequisite(s): A grade of “C” or better in MEDS 2461, MEDS 2462 and MEDS 2470) 3C/3/0/0

MEDS 2510 Quality Management and Health Statistics
This course is an introduction to the principles of the quality assessment process which encompasses a framework for gaining skills in collecting and analyzing data. This course covers quality assessment and improvement including collection tools, data analysis and reporting techniques. Utilization management, risk management and case management will also be discussed. This course is also a study of the effective use, collection, arrangement, presentation and verification of health care data. Vital statistics, healthcare statistics and descriptive statistics, as well as reliability and validity of data will be discussed. Research techniques and the IRB process will also be covered. Must earn a grade of “C” or better in this course to proceed. (Prerequisite(s): MEDS 1420 with a grade of “C” or better) 3C/3/0/0

MEDS 2590 HIT Internship/Capstone Project
Students will apply the coursework, theories, skills, and ethics learned during the program to the HIT Internship/Capstone. Under the supervision of a qualified health information professional, the student will gain professional practice and experience, when available, in a healthcare facility. Students will meet written goals and objectives and be evaluated by the Health Information Supervisor and the College Internship Coordinator. The capstone includes a focused review and objective measurement of the Domains and Subdomains required for writing the national certification examination. Students are required to select an independent area of study from a wide-range of topics and disciplines to broaden their scope of interest in health information management. Students work with faculty advisors to schedule the internship, independent study, and healthcare project. Must earn a grade of “C” or better in this course to proceed. (Prerequisite(s): All required coursework for the Health Information Technology AAS Degree with a “C” or better in all MEDS-prefix courses and instructor approval.) 3C/3/0/0

MEDS 2594 Medical Coding Capstone Project
The focus of this class is to simulate 3 credits of on the job experience as a medical coding specialist at a multi-speciality healthcare facility. This internship will provide you with an opportunity to utilize your coding skills and knowledge in an electronic environment. The coding capstone is a vital part of your education that serves as a format to demonstrate your level of expertise. All coding assignments in this course may be compiled into a portfolio to present to a future employer. (Prerequisite(s): All required coursework for the Medical Coding Diploma with a grade of “C” or better or instructor approval.) 3C/3/0/0

Music

MUSC 1030 Applied Strings
Provides private instruction in music -- Instrumental lessons by arrangement with the instructor. Fifteen one-hour lessons per semester. Coursework will be suited to the skill level of the student to develop musical technique. Extra charge for lessons assessed per semester. 2C/2/0/0

MUSC 1310 Applied Voice
Provides private instruction in music -- Vocal lessons by arrangement with the instructor. Fifteen one-hour lessons per semester. Coursework will be suited to the skill level of the student to develop musical technique. Extra charge for lessons assessed per semester. These credits may be repeated up to 8 credits. 2C/2/0/0

MUSC 1320 Applied Piano
Provides private instruction in music -- Instrumental lessons by arrangement with the instructor. Fifteen one-hour lessons per semester. Coursework will be suited to the skill level of the student to develop musical technique. Extra charge for lessons assessed per semester. These credits may be repeated up to 8 credits. 2C/2/0/0

MUSC 1701 Music Theory 1
This course is part 1 of a four-semester sequence in Music Therapy. It will focus on the development of written music notation, including scales, tonality, key modes, intervals, triads, seventh chords, roman numeral analysis with bass position symbols, lead-sheet symbols, principles of voice leading and part writing. (Prerequisite(s): READ 0722 or READ 0724 or EAPP 0900 with a grade of “C” or better, or appropriate assessment score) (MnTC: Goal 6) 2C/2/0/0

MUSC 1702 Aural Skills 1
This course is part 1 of a four semester sequence that should be taken concurrently with the Music Theory sequences. Aural Skills focuses on practical musicianship training in sight singing and ear training. (Prerequisite(s): READ 0722 or READ 0724 or EAPP 0900 with a grade of “C” or better, or appropriate assessment score) 1C/1/0/0

MUSC 1703 Music Theory 2
This course is part 2 of a four-semester sequence in Music Therapy. It will focus on the development of written music notation, including, roman numeral analysis with bass position symbols, lead-sheet symbols, principles of voice leading, part writing, harmonic progressions, sequences, cadences, phrases, periods, sentences, two-part tonal counterpoint and non-chord tones (Prerequisite(s): MUSC 1701 Music Theory 1 with a grade of “C” or better). (MnTC: Goal 6) 2C/2/0/0

MUSC 1704 Aural Skills 2
This course is part 2 of a four semester sequence that should be taken concurrently with the Music Theory sequence. Aural Skills focuses on practical musicianship training in sight singing and ear training. (Prerequisite(s): MUSC 1701 Music Theory 1 and MUSC 1702 Aural Skills 1 with a grade of “C” or better.) 1C/1/0/0

MUSC 1720 Fundamentals of Music
This course has been designed and structured for students with very little or no musical background. Its goal is to provide you with the tools for a basic understanding of the rudiments of music. Course topics include: The Keyboard, Notation: Staff, and Melody, Clefs, Major Scales, Key Signatures, Minor Scales, Intervals, Triads and The
Dominant Seventh Chord, Introduction to Rhythm and Meter, Basic Ear Training Exercises. (Prerequisite(s): READ 0722 or READ 0724 or EAPP 0900 with a grade of "C" or better, or appropriate assessment score) (MnTC: Goal 6) 3C/3/0/0

MUSC 1730 Concert Choir
This course is a mixed choral ensemble specializing in a wide range of sacred and secular choral literature of all historical periods and nationalities. The ensemble provides singers the opportunity to rehearse, learn and perform repertoire for an a cappella choir as well as repertoire performed with professional instrumental ensembles. The Saint Paul College Concert Choir is open to all students, regardless of major. (MnTC: Goal 6) 2C/0/2/0

MUSC 1735 Class Piano 1
This course is part 1 of a two semester sequence designed to develop basic keyboard and musicianship skills including technique, sight reading, harmonization, accompaniment, theory, and piano repertoire in preparation for the Piano Proficiency Exam. (MnTC: Goal 6) 2C/0/2/0

MUSC 1736 Class Piano 2
This course is part 2 of a two semester sequence designed to develop basic keyboard and musicianship skills including technique, sight reading, harmonization, accompaniment, theory, and piano repertoire in preparation for the Piano Proficiency Exam. (Prerequisite(s): MUSC 1735 with a grade of "C" or better or instructor approval) (MnTC: Goal 6) 2C/0/2/0

MUSC 1740 Music Appreciation
This course is designed to heighten the enjoyment of music by improving listening skills, increasing musical knowledge, and exploring new forms and styles of Western music throughout the centuries. Course topics students will learn include basic elements of music, musical form and style throughout history, and representative composers and their music. (Prerequisite(s): READ 0722 or READ 0724 or EAPP 0900 with a grade of "C" or better, or appropriate assessment score) (MnTC: Goals 6 & 8) 3C/3/0/0

MUSC 1745 History of Rock and Roll
The purpose of this course is to explore the emergence of rock and roll music as a cultural phenomenon in the United States. Besides rock and roll, American musical styles including rhythm and blues, country, folk and rock will be studied within a historical and cultural perspective. Attendance at a live performance is required. (Prerequisite(s): READ 0722 or READ 0724 or EAPP 0900 with a grade of "C" or better, or appropriate assessment score) (MnTC: Goals 6 & 7) 3C/3/0/0

MUSC 1750 Jazz History
This introductory course is designed to help students become familiar with and appreciate jazz as an important American art form. The course follows the historical development of jazz style and innovations to Post-Modern developments and integration with other musical forms. Attendance at a live performance is required. (Prerequisite(s): READ 0722 or READ 0724 or EAPP 0900 with a grade of "C" or better, or appropriate assessment score) (MnTC: Goals 6 & 7) 3C/3/0/0

MUSC 1760 American Music
This course provides an introduction to folk, ethnic, popular and classical music in the United States. It is designed to help students become familiar with the music from diverse cultural groups and regions of the country. America’s Music is an historical overview of the evolution of musical traditions in American society. Attendance at a live performance is required. (Prerequisite(s): READ 0722 or READ 0724 or EAPP 0900 with a grade of "C" or better, or appropriate assessment score) (MnTC: Goals 6 & 7) 3C/3/0/0

MUSC 1765 Music of Latin America and the Caribbean
This course introduces the musical styles and genres of Latin American and Caribbean music and the mix of aesthetic, cultural, and geographical distinctions that have emerged over time to define and identity the music of the continent. (Prerequisite(s): READ 0722 or READ 0724 or EAPP 0900 with a grade of "C" or better, or appropriate assessment score) (MnTC: Goals 6 & 7) 3C/3/0/0

MUSC 1770 Music in World Cultures
The aim of this course is to gain a broader understanding of music as worldwide phenomenon through the study of selected musical traditions and cultures of the world. This course will concentrate on the development and historical background of the music, the introduction of typical musical instruments and most well-known musicians of each region, and the relationship between music and the society. (Prerequisite(s): READ 0722 or READ 0724 or EAPP 0900 with a grade of "C" or better, or appropriate assessment score) (MnTC: Goals 6 & 8) 3C/3/0/0

MUSC 1790 Special Topics in Music
This course is designed to present additional or unique material and learning experiences within a specified discipline. The course will be based on student need, flexibility, and may be designed to meet various transfer and pre-major course requirements. Please see a current Course Schedule for complete details. (MnTC: Goal 6) Variable credits 1-6

MUSC 1800 Music Production 1
An introductory course in music production using a digital audio workstation. Students will be introduced to standard audio recording and production techniques as well as basic audio theory. (Prerequisite(s): READ 0722 or READ 0724 or EAPP 0900 with a grade of "C" or better, or appropriate assessment score) (MnTC: Goal 6), 3C/3/0/0

MUSC 2703 Music Theory 3
This course is part 3 of a four-semester sequence in Music Theory. It will focus on the development of written music notation, including roman numeral analysis with bass position symbols, lead-sheet symbols, principles of voice leading, part writing, dominant and secondary functions, modulations, chromaticism, mode mixture, Neapolitan chords and larger compositional forms. (Prerequisite(s): MUSC 1703 Music Theory 2 (with a grade of "C" or better). (MnTC: Goal 6), 2C/2/0/0

MUSC 2705 Aural Skills 3
This course is part 3 of a four semester sequence that should be taken concurrently with the Music Theory sequence. Aural Skills focuses on practical musicianship training in sight singing and ear training. (Prerequisite(s): MUSC 1703 Music Theory 2 and MUSC 1704 Aural Skills 2 with a grade of "C" or better). 1C/1/0/0

MUSC 2710 Music Theory 4
This course is part 4 of a four-semester sequence in Music Theory. It will focus on the development of written music notation, including, roman numeral analysis with bass position symbols, lead-sheet symbols, principles of voice leading, part writing, augmented sixth chords, enharmonic spellings and modulations, advanced harmonic vocabulary, tonal harmonies of the late nineteenth century, and post-tonal music of the twentieth century. (Prerequisite(s): MUSC 2700 Music Theory 3 (with a grade of "C" or better). (MnTC: Goal 6) 2C/2/0/0

MUSC 2711 Chamber Singers
This course is a small ensemble of mixed voice parts, which performs works from a wide variety of secular and sacred vocal music ranging from early music, such as madrigals and motets, to part songs, to vocal jazz scores and beyond. The emphasis is on a capella singing, through some accompaniments may be employed as preserved by the genre or style. Singers are expected to maintain vocal Independence and have a strong sense of pitch and rhythm. Music reading skills are not required, but are extremely beneficial to the progress of the ensemble. 2C/0/2/0

MUSC 2713 Guitar Ensemble
This course consists of the study and performance of standard guitar ensemble literature with emphasis on intonation, rhythmic alignment, balance, style and the requirements of effective ensemble playing. This course will culminate in a public performance. (MnTC: Goal 6) 2C/0/2/0
MUSC 2714 String Ensemble
The course consists of the study of a variety of string ensemble literature with emphasis on intonation, balance, style and the requirements of effective ensemble playing. Open to all string instruments and piano. This course will culminate in a public performance. 2C/0/2/0

MUSC 2715 Aural Skills 4
This course is part 4 of a four semester sequence that should be taken concurrently with the Music Theory sequence. Aural Skills focuses on practical musicianship training in sight singing and ear training. (Prerequisite(s): MUSC 2700 Music Theory 3 and MUSC 2705 Aural Skills 3 with a grade of "C" or better). 1C/1/0/0

MUSC 2720 Music History 1: Medieval to Baroque
A study of Medieval, Renaissance, and Baroque periods of music. An emphasis is placed on the development of music and its literature within social, cultural, political, and religious contexts. (Prerequisite(s): ENGL 1711) (MnTC: Goals 6 & 8) 3C/3/0/0

MUSC 2721 Music History 2: Classical to Modern
A study of Classical, Romantic, and Twentieth Century periods of music. An emphasis is placed on the development of music and its literature within social, cultural, political, and religious contexts. (Prerequisite(s): ENGL 1711) (MnTC: Goals 6 & 8) 3C/3/0/0

MUSC 2800 Music Production 2
A continuation of MUSC 1800 Music Production 1. This course discusses advanced music production techniques using a digital audio workstation. (Prerequisite(s): MUSC 1800 Music Production 1 with a grade of "C" or better) (MnTC: Goal 6). 3C/3/0/0

MUSC 2900 Music Entrepreneurship
Music entrepreneurship is based on the process of identifying opportunities in the music industry marketplace, exploring potential resources to pursue those opportunities, and committing to action the resources necessary to exploit the opportunities for long-term gain. Over the course of the semester we will examine the tools required to successfully create and maintain a life in the music industry. (Prerequisite(s): READ 0721 or READ 0724 or EAPP 0860 with a grade of "C" or better, or appropriate assessment score) 3C/3/0/0

MUSC 2950 Music Production Capstone
The Music Production Capstone allows the student to cultivate their talent and accumulate skills by producing a master recording of your choice. They will apply concepts of a music producer such as scheduling, budgeting, overseeing and engineering recording sessions, and balancing business and creative tasks. Advanced topics in recording, editing, mixing, and mastering will also be covered. The final project for the course includes releasing a recording on several digital platforms. (Prerequisite(s): READ 0721 or READ 0724 or EAPP 0860 with a grade of "C" or better, or appropriate assessment score) 2C/2/0/0

Natural Sciences

NSCI 1710 Earth Science
This course introduces students to topics in geology, oceanography, meteorology and astronomy. The solid earth and earth processes, the liquid hydrosphere and the gaseous atmosphere are studied, as well as the earth as a part of the solar system. It is intended for students interested in the natural sciences and can be used to fulfill the lab science requirement. Two hours of lab per week are required. Lab time will be used to reinforce lecture concepts and will include experiments, hands-on activities, and field trips. Traditional, hybrid, and online sections are available. (Prerequisite(s): READ 0722 or READ 0724 or EAPP 0900 with a grade of "C" or better, or appropriate assessment score) (MnTC: Goals 3 & 10) 4C/3/1/0

NSCI 1721 Introduction to Geology
This course introduces students to the fundamentals of geology, including rock and mineral formation, geologic time, global tectonic processes such as earthquakes and volcanoes, and earth surface processes that change our landscape. Current issues relating to geology, such as global climate change and energy resources will be addressed as well. Two hours of lab per week are required. Lab time will be used to reinforce lecture concepts and will include experiments, hands-on activities and field trips. Traditional and hybrid sections are available. (Prerequisite(s): READ 0722 or READ 0724 or EAPP 0900 with a grade of "C" or better, or appropriate assessment score) (MnTC: Goals 3 & 10) 4C/3/1/0

NSCI 1730 Introduction to Oceanography
This course introduces students to basic scientific principles of oceanography. Topics covered will include the geological, biological, atmospheric, and chemical processes at work in the oceans, as well as contemporary issues related to marine pollution and resource use. Course includes lab-like learning activities. Traditional and online sections are available. (Prerequisite(s): READ 0721 or READ 0724 or EAPP 0860 with a grade of "C" or better, or appropriate assessment score) (MnTC: Goals 3 & 10) 3C/3/0/0

NSCI 1740 Introduction to Meteorology
This course introduces students to basic scientific principles of meteorology. Topics include basic properties of the atmosphere, weather terminology, weather phenomena, instrumentation and forecasting. Course includes lab-like learning activities. Traditional and hybrid sections are available. (Prerequisite(s): READ 0721 or READ 0724 or EAPP 0860 with a grade of "C" or better, or appropriate assessment score) (MnTC: Goals 3 & 10) 3C/3/0/0

NSCI 1750 Natural Disasters
This course introduces students to the investigation of the physical processes, origins of natural disasters and human and economic impacts caused by natural disasters. Content covered will include earthquakes, volcanoes, severe weather, climate change, wildfires, floods and other catastrophic phenomena. Course includes lab-like learning activities. Traditional, online and hybrid sections are available. (Prerequisite(s): READ 0721 or READ 0724 or EAPP 0860 with a grade of "C" or better, or appropriate assessment score) (MnTC: Goals 3 & 10) 3C/3/0/0

NSCI 1770 Introduction to Energy and the Environment
This course introduces students to energy production, supply, efficiency and the projections of future needs. The potential of solar, biomass, photovoltaics, wind and other continuous flow sources are covered. Crude oil, natural gas, coal and nuclear sources of energy are studied. Environmental, political, economic and ethical considerations are reviewed. Course includes lab-like learning activities. Traditional and hybrid sections are available. (Prerequisite(s): READ 0721 or READ 0724 or EAPP 0860 with a grade of "C" or better, or appropriate assessment score) (MnTC: Goals 3 & 10) 3C/3/0/0

NSCI 1780 Contemporary Issues in Science
Scientific dilemmas and advances in science make headlines every day. Without knowing the science behind the top issues, it is difficult to separate fact from hype. In this course we will focus on contemporary issues such as climate change, renewable energy, environmental toxins, stem cell research, gene therapy, and pandemic diseases. Students will learn the basic scientific concepts behind each issue and will then explore the ethical dilemmas that each issue brings up. Course includes lab-like learning activities. Traditional, hybrid, and online sections are available. (Prerequisite(s): READ 0721 or READ 0724 or EAPP 0860 with a grade of "C" or better, or appropriate assessment score) (MnTC: Goals 3 & 10) 3C/3/0/0

NSCI 1782 Minnesota Geology
This course surveys Minnesota’s geological history, from exploring the formation of the bedrock more than 2 billion years ago to the current processes that shape the land usage in this State today. Students will learn about the many ways the state’s geology contributed to the economic, environmental and political development. Topics include: geologic time, plate tectonics, rock and mineral identification, topographic and geologic maps, superficial processes, and
environmental concerns. Through numerous field trips, we will look to the Twin Cities metro area to provide examples of many different earth and environmental processes, and to give us hands-on experience understanding how these processes work (glacial history, rock formations, caves and ancient ocean floor, rivers, and other geologic sites). Course includes lab-like learning activities. Traditional and hybrid sections are available. (Prerequisite(s): READ 0722 or READ 0724 or EAPP 0990 with a grade of "C" or better, or appropriate assessment score) (MnTC: Goals 3 & 10) 3C/3/0/0

NSCI 1790 Special Topics in Natural Science
This course is designed to present additional or unique material and learning experiences within a specified discipline. The course will be based on student need, flexibility, and may be designed to meet various transfer and pre-major course requirements. Please see a current Course Schedule for complete course details. (MnTC: Goals 3 & 10) Variable credits 1-6

NSCI 2770 Natural Sciences Internship
This course provides students with an opportunity to design and carry out a science research project under the supervision of a faculty advisor. The research report will be prepared using literature review, problem identification, procedural documentation, data collection, data analysis, findings, conclusions, and recommendations. Evaluation will be carried out by faculty teams and experts in the field. The course will also provide an opportunity for field study in an approved internship setting. (Prerequisite(s): Instructor approval) (MnTC: Goal 3) Variable credits 1-4

Nursing Assistant/Home Health Aide

NAST 1111 Nursing Assistant & Home Health Aide
This course introduces concepts of basic human needs, health illness continuum, and basic nursing assistant and home health aide skills. Skills are demonstrated in a supervised laboratory setting. (Prerequisite(s): READ 0721 or READ 0724 or EAPP 0860 with a grade of "C" or better, or appropriate assessment score) 4C/3/1/0

NAST 1112 Nursing Assistant-Clinical
This course will give the student clinical experience in a long-term care facility. Completion of NAST 1111 and NAST 1112 will meet the state and federal criteria for employment in long-term care. The student must attend all hours of clinical. (Prerequisite(s): NAST 1111) 1C/0/1/0

Ojibwe

OJIB 1310 Beginning Ojibwe 1
This course is an introduction to the Ojibwe language, a spoken language of the Anishenaabeg people of the north central region of North America. You will learn basic communication skills that will prepare you for further study and application. The vocabulary centers on everyday themes and seasonal life. You will learn language in the context of culture and real-life situations. (Prerequisite(s): READ 0721 or READ 0724 or EAPP 0860 with a grade of "C" or better, or appropriate assessment score) (MnTC: Goal 8) 5C/5/0/0

OJIB 1320 Beginning Ojibwe 2
The course is a continuation of Ojibwe 1. You will further develop communication skills to prepare for further study and application. The vocabulary centers on everyday themes and seasonal life. You will learn the language in the context of culture and real-life situations. You will learn more complex grammatical structures, as well as engage in more reading and writing activities. (Prerequisite(s): OJIB 1310) (MnTC: Goal 8) 5C/5/0/0

Pharmacy Technology

PHAR 1700 Success Skills for the Pharmacy Technician
This course reinforces the basic skills required for gaining proficiency in performing introductory pharmacy technician knowledge and skills. It is designed to allow completion of skill activities and enhance attainment of skills in PHAR 1710, 1715 and 1720 (first semester pharmacy technician courses). Students will be given the opportunity to perform a variety of pharmacy skills with direct instructor supervision. This course is an elective course and is recommended for students who benefit from direct instructor supervision to reinforce the online learning throughout the first semester of the pharmacy technician program. (Co-Requisite(s): PHAR 1710, PHAR 1715, and PHAR 1720) 2C/0/0/0

PHAR 1710 Pharmacy Law and Ethics
This course will provide the student with the Federal and State laws as they pertain to pharmacy. This course will also address ethical theories and principles as they apply to the area of pharmacy practice. It will assist in preparing the student for the Pharmacy Technician Certification Exam. Must earn a grade of "C" or better to proceed in the Pharmacy Technician program. 3C/3/0/0

PHAR 1715 Fundamentals of Pharmacy Technology 1
Fundamentals of Pharmacy Technology will provide students with a detailed, interactive experience that leads to the understanding of community pharmacy practice, medication safety and communications in health care. Students will participate in active learning activities in the classroom, online and in the pharmacy lab. This course is intended to meet the goals of the model curriculum for pharmacy technician training developed by the American Society of Health-System Pharmacists. This class will provide to the student information necessary for preparation of the Technician Certification Exam in prescription processing. Must earn a grade of "C" or better to proceed in the Pharmacy Technician program. 5C/4/1/0

PHAR 1720 Foundations of Pharmaceutical Calculations
This course will introduce the student to foundational mathematical calculations utilized in pharmacy practice. This course will teach mathematical calculation and problem solving for production of pharmaceutical products. Must earn a grade of "C" or better to proceed in the Pharmacy Technician program. (Prerequisite(s): MATH 0745 or appropriate assessment score) 4C/4/0/0

PHAR 1730 Principles of Pharmacy
This course offers a didactic review of prescription processing with laboratory application. Students will receive skill development and problem solving in non-sterile product preparation. (Prerequisite(s): PHAR 1720 with a grade of "C" or better) 5C/3/2/0

PHAR 1735 Pharmacy Medication Technology
The student will use technologies within the scope of pharmacy practice. (Prerequisite(s): PHAR 1715 with a grade of "C" or better) 1C/1/0/0

PHAR 1740 Success Skills for the Pharmacy Technician 2
This course reinforces the skills required for gaining proficiency in performing intermediate pharmacy technician knowledge and skills. It is designed to allow completion of skill activities and enhance attainment of skills in PHAR 1730, PHAR 1735, and PHAR 2710 (second semester pharmacy technician courses). Students will be given the opportunity to perform a variety of pharmacy skills with direct instructor supervision. This course is an elective course and is recommended for students who benefit from direct instructor supervision to reinforce the online learning throughout the second semester of the pharmacy technician program. (Prerequisite(s): PHAR 1710, PHAR 1715, PHAR 1720 with a grade of "C" or better) (Co-Requisite(s): PHAR 1730, PHAR 1735) 2C/2/0/0

PHAR 1750 Pharmacy Externship 1 - Retail
Students will receive pharmacy practice experience to refine skills necessary for employment as a pharmacy technician in a retail setting. (Prerequisite(s): PHAR 1710, PHAR 1715, and PHAR 1720 with a grade of "C" or better) 3C/0/0/3

PHAR 1800 Pharmacy Technician Certification Exam Preparation
This course prepares students to take the Pharmacy Technician Certification Exam through the Pharmacy Technician Certification Program. Schedule for complete course details. (MnTC: Goals 3 & 10) Variable credits 1-6
PHIL 1710 Logic
Logic is the study of arguments. This course uses the tools of symbolic logic to explore logical concepts such as logical truth, consistency, equivalence, and validity. It introduces an artificial, symbolic language that can be used to test the logical properties of statements and arguments. These analytical skills support work in a range of subjects, including evolution, astronomy and astrology, and theories and ideas in the social sciences, physics, and biology. The course will address questions such as: What is the nature of science? Is science compatible with religion? How does science work? Are there limits to the knowledge science can give us? What is the difference between science and pseudoscience? How can we do a good job of understanding and evaluating scientific reasoning, especially when it is reported in the media? The course will explore these questions using historical and contemporary case studies about a variety of subjects, including evolution, astronomy, and the nature of life. It introduces an artificial, symbolic logic to explore logical concepts such as logical truth, consistency, equivalence, and validity.

PHIL 1715 Philosophy of Scientific Reasoning
This course explores philosophical questions about the nature of science and scientific reasoning and helps students build skills at using and evaluating scientific reasoning. For instance, the course will address questions such as: What is the nature of science? Is science compatible with religion? How does science work? Are there limits to the knowledge science can give us? What is the difference between science and pseudoscience? How can we do a good job of understanding and evaluating scientific reasoning, especially when it is reported in the media? The course will explore these questions using historical and contemporary case studies about a variety of subjects, including evolution, astronomy and astrology, and theories and ideas in the social sciences, physics, and biology. The goal of the course will be to use these case studies to explore philosophical questions about the nature of scientific reasoning and to develop their own ability to understand and evaluate scientific reasoning in their lives and career fields. (Prerequisite(s): PHIL 2720 or PHIL 2742 or EAPP 0900 with a grade of “C” or better, or appropriate assessment score) (MnTC: Goal 4) 3C/3/0/0

PHIL 1717 Ethics
This course equips students with philosophical skills and theoretical frameworks useful for fostering productive reflection about ethical controversies. Topics could include the nature and ground of moral judgments, views about what constitutes a good life, theories of right or wrong conduct, and particular moral issues such as animal welfare, civil disobedience, the morality of truth-telling and promising extreme poverty, racism and sexism, gun control, and genetic manipulation. (Prerequisite(s): PHIL 1730 or PHIL 1735 or PHIL 2710 with a grade of “C” or better) 4C/4/0/0

PHIL 1720 Ethics
This course will focus on helping students develop the ability to understand, analyze, and evaluate moral arguments about the value of nature and our obligations to the natural world and the human and non-human creatures that inhabit it. Topics will include global warming, pollution, animal welfare, anthropocentric and non-anthropocentric views of the value and role of nature, ecofeminism, the moral status of cultural and religious practices that affect the environment, energy and resource policy, conservation and the land ethic, and global and intergenerational justice. The course will include philosophical analysis of cultural differences regarding medical practices, contemporary moral decision-making on topics such as disclosure, confidentiality, human cloning, medical research, abortion, transplantation and organ markets, allocation of limited resources, conscientious objection, research on human subjects, and euthanasia. The course is open to all students interested in health care ethics. (Prerequisite(s): PHIL 1720 or PHIL 1722 or EAPP 0900 with a grade of “C” or better, or appropriate assessment score) (MnTC: Goals 6 & 9) 3C/3/0/0

PHIL 1722 Health Care Ethics
This course introduces basic ethical theories, principles, and decision-making guidelines used in health care ethics. It examines moral issues confronting health care practitioners, patients, and others involved in medicine. The course includes philosophical analysis of cultural differences regarding medical practices, contemporary moral decision-making on topics such as disclosure, confidentiality, human cloning, medical research, abortion, transplantation and organ markets, allocation of limited resources, conscientious objection, research on human subjects, and euthanasia. The course is open to all students interested in health care ethics. (Prerequisite(s): PHIL 0722 or PHIL 0724 or EAPP 0900 with a grade of “C” or better, or appropriate assessment score) (MnTC: Goals 6 & 9) 3C/3/0/0

PHIL 1724 Environmental Ethics
This course will focus on helping students develop the ability to understand, analyze, and evaluate moral arguments about the value of nature and our obligations to the natural world and the human and non-human creatures that inhabit it. Topics will include global warming, pollution, animal welfare, anthropocentric and non-anthropocentric views of the value and role of nature, ecofeminism, the moral status of cultural and religious practices that affect the environment, energy and resource policy, conservation and the land ethic, and global and intergenerational justice. The course will include an introduction to basic skills and concepts in ethical theory and applied ethics. (Prerequisite(s): PHIL 0722 or PHIL 0724 or EAPP 0900 with a grade of “C” or better, or appropriate assessment score) (MnTC: Goals 6 & 10) 3C/3/0/0

PHIL 1742 Greek and Roman Mythology
This survey course introduces students to Greek and Roman myths: stories about gods, heroes and heroines, monsters, the workings of the universe, and how human beings fit in. Myths address various important questions people have, such as “why are human beings on the earth?” “what is the best way to live a life?” and “why is there death?” We will look at how people have attempted to answer and...
make sense of these questions, as well as consider how these stories are a product of a particular culture and why they were so important to the people that produced them. We will also look at how they have continued to influence culture into the present time. (Prerequisite(s): READ 0722 or READ 0724 or EAPP 0900 with a grade of “C” or better, or appropriate assessment score) (MnTC: Goals 6 & 8) 3C/3/0/0

PHIL 1750 Eastern Philosophy
The purpose of this course is to acquaint the student with the major Asian philosophies. Students will engage in study of the history and ideas of the following schools of thought: Hinduism, Taoism, Confucianism and Buddhism. This will include examination and analysis of selections from works such as the Upanishads, the Tao Te Ching, the Analects of Confucius and the Dhammapada. Topics of study will include the nature of reality and being, social philosophy and ways of attaining knowledge. We will compare the ideas of Eastern philosophers on certain fundamental issues with the conclusions of various Western philosophies. The course will be conducted in a discussion format supplemented by instructor lectures. (Prerequisite(s): READ 0722 or READ 0724 or EAPP 0900 with a grade of “C” or better, or appropriate assessment score) (MnTC: Goals 6 & 8) 3C/3/0/0

PHIL 1760 World Religions
This course is an introduction to the world religions of Hinduism, Buddhism, Judaism, Christianity and Islam. Attention may also be given to indigenous religions and new religious movements. The course will focus on the main practices and beliefs, scriptures, formative periods and historical development of these religions. It will also include ways fundamental religious questions are answered and a critique of religion from a secular perspective. (Prerequisite(s): READ 0721 or READ 0724 or EAPP 0860 with a grade of “C” or better, or appropriate assessment score) (MnTC: Goals 6 & 8) 3C/3/0/0

PHIL 1770 Feminist Philosophy
Feminist philosophers seek to understand and critique practices and institutions that oppress and subordinate women. They explore questions like: what is the nature of gender oppression, and how is it related to other types of oppression, such as racial oppression? What makes someone a woman or man? Is there a difference between a person’s sex and their gender? Are women “naturally” different from men, and would it matter if they were? Is there a male bias in science and ethics? Can a pluralistic society like ours fight women’s oppression while also recognizing the rights of cultures to maintain their distinctive practices? In this class, students will work to understand and evaluate prominent feminist answers to these questions, with an emphasis on helping students develop their own well-reasoned views on feminist issues and apply those views to their own lives. (Prerequisite(s): READ 0722 or READ 0724 or EAPP 0900 with a grade of “C” or better, or appropriate assessment score) (MnTC: Goals 6 & 7) 3C/3/0/0

PHIL 1790 Special Topics in Philosophy
This course is designed to present additional or unique material and learning experiences within a specified discipline. The course will be based on student need, flexibility, and may be designed to meet various transfer and pre-major course requirements. Please see a current Course Schedule for complete course details. (Prerequisite(s): READ 0722 or READ 0724 or EAPP 0900 with a grade of “C” or better, or appropriate assessment score) (MnTC: Goal 6) Variable credits 1-6

Phlebotomy

PHLB 1405 Phlebotomy
This course provides instruction in blood specimen collection skills and procedures. The course addresses safety, legal issues, customer service, professionalism, equipment, venipuncture, skin puncture procedures, and specimen transport/processing. Emphasis is placed on attaining competency in safe blood specimen collection and effective sample processing/handling to preserve specimen integrity as well as on demonstration of effective communication and professional skills to function in a health care setting. (Prerequisite(s): HLTH 1410, BIOL 1730, PHIL 1722, COMM 1710 or COMM 1720, HLTH 1430 or HLTH 1432 or concurrent enrollment) 4C/2/2/0

PHLB 1410 Phlebotomy Clinical Experience
This course provides concentrated practice and phlebotomy skill development in a health care setting (affiliate) where information learned in PHLB 1405 can be applied. Students work under the guidance and supervision of clinical staff at the assigned affiliate. Demonstration of a minimum of 100 successful blood collection procedures is required. The specific class times will vary according to the assigned site. (Prerequisite(s): PHLB 1405) 2C/0/0/2

Physics

PHYS 1720 Principles of Physics 1
This course introduces students to fundamental principles of physics and their application to familiar phenomena. Topics include motion, fluids, heat, work, forces, gravity, waves and sound, and energy. The topics will be related to modern technology and everyday phenomena. The course is intended for students who have not had a high school physics course. Class includes lecture and lab. (Prerequisite(s): MATH 1730 with a grade of “C” or better) (MnTC: Goal 3) 4C/3/1/0

PHYS 1722 Principles of Physics 2
This course is a continuation of PHYS 1720 Principles of Physics 1. It covers electricity and magnetism, light and optics, simple circuits, topics in modern physics and applications and technology. Class includes lecture and lab. (Prerequisite(s): PHYS 1720 Principles of Physics 1) (MnTC: Goal 3) 4C/3/1/0

PHYS 1760 Descriptive Astronomy (no lab)
This course introduces students to astronomy. It includes the observation of the planets and stars weather permitting. The course will include topics such as life and death of stars, dark matter, formation of a solar system, the Big Bang Theory and more. Course includes lab-like learning activities. (Prerequisite(s): READ 0721 or READ 0724 or EAPP 0860 with a grade of “C” or better, or appropriate assessment score) (MnTC: Goals 3 & 10) 3C/3/0/0

PHYS 2700 General Physics 1 (with Calculus)
Calculus-based course with a study of Kinematics, Dynamics, Laws of Motion, Gravitation, Kinetic and Potential Energy, Conservation of Energy, Linear and Angular momentum; Equilibrium and Fluid Dynamics. Designed to fulfill physics requirements for students in liberal arts and sciences, engineering, and other related science fields. Class includes lecture and lab. High School Physics is recommended. (Prerequisite(s): MATH 2749 Calculus 1 with a grade of “C” or better) (MnTC: Goal 3) 5C/4/1/0

PHYS 2710 General Physics 2 (with Calculus)
Continuation of General Physics 1 (with Calculus). Topics include: Wave Phenomenon, Fluids, Electricity and Magnetism; electrical circuits, light and optics. Designed to fulfill physics requirements for students in liberal arts and sciences, engineering, and other related science fields. Class includes lecture and lab. (Prerequisite(s): PHYS 2700 General Physics 1 with a grade of “C” or better) (MnTC: Goal 3) 5C/4/1/0

PHYS 2760 Introductory Astronomy (with lab)
This course is designed for the non-science student who wants to know more about astronomy. We’ll be studying the motion of the night sky, the planets and what shapes them, how stars are made and what happens when stars die all the way out to the edges of the known universe. Topics of note will include Planetary Formation, Extra Solar Planet Search, Dark Matter, Dark Energy, the Expanding Universe, and many more fun topics! This course includes a laboratory component with hands on activities to help build understanding. (Prerequisite(s): MATH 0745 with a grade of “C” or better or appropriate assessment score) (MnTC: Goals 3 & 10) 4C/3/1/0

PHYS 2790 Special Topics in Physics
This course is designed to present additional or unique material and learning experiences within a specified discipline. The course will be based on student need, flexibility, and may be designed to meet various transfer and pre-major course requirements. Please see a current Course Schedule for complete details. (MnTC: Goal 3) Variable credits 1-6

**Pipefitting**

**PIPE 1410 Pipe Science/Math**  
Study of selected branches of physics and math applied to pipefitting. Areas covered include properties of matter, heat, math and mechanics. Must earn a grade of “C” or better in this course to proceed. (Prerequisite(s): Must be enrolled in Pipelfitting pre-apprenticeship program) 3C/2/3/0

**PIPE 1451 Pipe Shop 1**  
Care and use of tools and equipment and uses of different types of pipe fittings, hangers and the assembly of pipe and fittings are covered. Must earn a grade of “C” or better in this course to proceed. (Prerequisite(s): Must be enrolled in Pipelfitting pre-apprenticeship program) 3C/2/1/0

**PIPE 1452 Pipe Shop 2**  
Course consists of tube bending, flaring, soldering, brazing and rigging. Must earn a grade of “C” or better in this course to proceed. (Prerequisite(s): PIPE 1451 and must be enrolled in Pipelfitting pre-apprenticeship program) 4C/0/4/0

**PIPE 1540 Electric Controls**  
Fundamentals of electricity and electrical circuits are covered. Must earn a grade of “C” or better in this course to proceed. (Prerequisite(s): PIPE 1451 and must be enrolled in Pipelfitting pre-apprenticeship program) 3C/1/2/0

**PIPE 1550 Basic Gas**  
This is an introductory course on gas used in gas fired heating systems. Areas covered include natural gas burners, LP gas burners, pipe sizing, flue venting, electricity and safety pertaining to gas fired systems. Must earn a grade of “C” or better in this course to proceed. (Prerequisite(s): PIPE 1451 and must be enrolled in Pipelfitting pre-apprenticeship program) 3C/2/1/0

**PIPE 1555 Basic Electricity**  
Introductory course in basic electrical theory and electrical circuits. Electrical safety, terminology and circuit layout. Proper operation and care for multi meters. 2C/1/1/0

**PIPE 1560 Basic Refrigeration**  
Fundamental concepts of refrigeration are presented, Fundamental practices of repairing and maintaining refrigeration systems. 4C/1/3/0

**PIPE 1565 Heating and Cooling 1**  
Introductory course on low pressure steam. Areas include boiler, piping and heat transfer units. Fundamental concepts of heating and air conditioning are presented. Heat transfer theory and accessories. 4C/1/3/0

**PIPE 1570 Heating and Cooling 2**  
This course is a basic study of hydronic heating and cooling systems. Areas include systems, piping layout and figuring heat loss and cooling load. 4C/1/3/0

**PIPE 1575 Pipe Blueprint Reading**  
Study of basic drafting principles as they relate to piping drawing and blueprints. 2C/0/2/0

**PIPE 1580 Pipe Welding 1**  
Introductory course for OxyAcetylene torch setup safety and operation. Shielded Metal Arc Welding setup and operation concentrating on Fillet Welding. 3C/0/3/0

**PIPE 1585 Pipe Welding 2**  
This course covers the requirements for SMAW on open root joints. OxyFuel torch cutting and beveling of piping. Arc welding on both plate and pipe. 2C/0/2/0

**PIPE 2605 Pipelfitting 1**  
Basic knowledge necessary to the beginning of a pipelfitting career. 2C/0/2/0

**PIPE 2606 Pipelfitting 2**  
This course is designed to fill out an experienced pipelfitter’s resume based on knowledge and acquiring certification levels. 2C/0/2/0

**PIPE 2614 Boiler Systems**  
This course is intended to provide the apprentice a strong foundation in stationary steam engineering, separate or combined low and high pressure and liquid systems. 2C/1/1/0

**PIPE 2615 Pipe Layout and Installation 1**  
Care and use of tools and equipment used by the pipelifter. Study the pipe matches necessary for pipe installation. Different types of pipe, pipe fittings, hangers and supports. Skills needed to install steel threaded pipe with both straight and offset runs. (Prerequisite(s): Must be enrolled in the Pipelfitting apprenticeship program) 2C/0/2/0

**PIPE 2616 Pipe Layout and Installation 2**  
Advanced pipe layout math skills. Skills needed to run copper, PVC, CPVC. This will include soldering, bending, and flaring copper. Threading, gluing, and fusing of plastic pipe. Students will have the opportunity to receive a Certification in Fusion Installation. (Prerequisite(s): Must be enrolled in the Pipelfitting apprenticeship program) 2C/0/2/0

**PIPE 2623 Apprenticeship Refrigeration & Air Conditioning**  
This course covers applied refrigeration and air conditioning for first year pipe trade apprentices. The course focuses on the understanding of refrigeration theory and its application as it relates to the installation, operation, maintenance, troubleshooting, and repair of residential, commercial, industrial, and institutional refrigeration and air conditioning systems. A strong emphasis is placed on electrical theory, electrical application, electrical code, and electrical safety, as it applies to both low and high voltage circuits of air conditioning and refrigeration equipment. (Prerequisite(s): Must be enrolled in the Pipelfitting apprenticeship program) 2C/0/2/0

**PIPE 2626 Basic Service Applications**  
This course is intended to provide a fundamental understanding of the various mechanical equipment and controls associated with heating and air conditioning equipment. Basic schematics, fundamentals of electricity and in-field troubleshooting techniques will also be covered. (Prerequisite(s): Must be enrolled in the Pipelfitting apprenticeship program) 2C/0/2/0

**PIPE 2627 Basic Electricity**  
This course is intended to provide the apprentice a basic understanding of electricity. This course will combine both text and practical hands-on work. (Prerequisite(s): Must be enrolled in the Pipelfitting apprenticeship program) 2C/0/2/0

**PIPE 2628 Commercial Pneumatics**  
This course is on learning control of modern air conditioning, ventilation, and heating equipment. Part of the course will be on design, service, and basic understanding of various air handling systems. Another part will be hands on pneumatic and electric controls. (Prerequisite(s): Must be enrolled in the Pipelfitting apprenticeship program) 2C/0/2/0

**PIPE 2631 Instrumentation**  
This course provides an understanding of instrumentation, controls and pneumatics for industrial, manufacturing and process plants. 2C/0/2/0
PIE 2632 Commercial Refrigeration
This course encompasses electrical wiring diagrams electronic control theory and circuits related to the components used in the installation and repair of Refrigeration systems. Refrigeration mechanical components and related equipment and tools used for installation and repair. (Prerequisite(s): Must be enrolled in the Pipelowering pre-apprentice program) 2C/0/2/0

PIE 2636 Electrical Controls and Diagrams
This is an in-depth study of electrical controls and motors as there applied to heating, ventilation, air-conditioning, and refrigeration. Here you will learn the theory, designed to prepare you for the real world of service in the HVAC industry. The focus in this course is on electrical controls, motors and their control. With a large emphasis of your time will be making diagrams and preparation for shop projects. Prepare you for the challenges you will face servicing HVAC equipment. The project design is to develop the skills needed to work safely and efficiently in this trade. (Prerequisite(s): Must be enrolled in the Pipelifter apprenticeship program) 2C/0/2/0

PIE 2638 Computer Controls
This course is designed to assist students in understanding computer concepts including the functions of the Internet and the Web. (Prerequisite(s): Must be enrolled in the Pipelifter apprenticeship program) 2C/0/2/0

PIE 2641 Foreman Leadership
This course will cover both the METAL and the MENTAL aspect of the role of Foreman/Supervisor, as well as how to deal with both employers (management) needs and wants, and following the rules of labor unions, OSHA, demanding General Contractors and others. (Prerequisite(s): Must be enrolled in the Pipelifter apprenticeship program) 2C/0/2/0

PIE 2642 Piping Design
This course will introduce the fundamentals in the design of ASNE B31.1 Power Piping, material selection, and supports. The course will provide the UA Apprentice examples of applications of power piping codes, and proper piping material selection and installation. Classroom examples will be demonstrated on the fundamentals of ordering materials, calculating pipe hanger loads, flexibility analysis, design of expansion loops, cold springing, hanger selection and installation, hanger spacing and inspection, and reaction forces on piping systems. The course will provide hands-on experience in the installation of constant and variable spring hangers and proper piping installation practices. (Prerequisite(s): Must be enrolled in the Pipelifter apprenticeship program) 2C/0/2/0

PIE 2643 Test and Balance of Systems
This course covers the necessary steps for pipe trades apprentices and journeymen to start up, test, and balance heating, ventilation, and air conditioning systems. Students shall learn to test and balance systems by instruction and hands-on experience in measuring quantities such as pressures, temperature, the rates at which air and water are flowing, and electrical current and voltage. These measurements are then compared with corresponding quantities called for by the design specifications, and any necessary regulating is done to make actual measurements meet required values. (Prerequisite(s): Must be enrolled in the Pipelifter apprenticeship program) 2C/0/2/0

PIE 2644 Power Burners and Controls
This is a course on gas and oil power burners and related control systems. The course will include flame safety controls and boiler controls. Also included will be different boiler and burner types and designs. (Prerequisite(s): Must be enrolled in the Pipelifter apprenticeship program) 2C/0/2/0

PIE 2645 Direct Digital Controls
This course is focused on computer based electronic control systems that control a wide variety of heating, ventilating, air conditioning, refrigeration (HVACR) and other equipment installed in buildings which regulate environmental systems. (Prerequisite(s): Must be enrolled in the Pipelifter apprenticeship program) 2C/0/2/0

PIE 2651 Refrigeration Code
This course is designed to prepare students for the City of Saint Paul Competency Card in refrigeration code. (Prerequisite(s): Must be enrolled in the Pipelifting pre-apprentice program) 1C/0/1/0

PIE 2652 Oil Code
This course covers the installation and repair of fuel oil burning equipment, storage tanks and piping systems. Codes governing the installation and start up and service of this equipment will be covered. The emphasis in this course will be to apply knowledge learned in this class to the safe and proper installation and service of equipment and to obtain a certificate of competency for this work. (Prerequisite(s): Graduate of Pipelifting day school program or pipelifting work experience) 1C/0/1/0

PIE 2653 Gas Code
This course covers the installation and repair of gas burning equipment and piping systems. Codes governing the installation and start up and service of this equipment will be covered. (Prerequisite(s): Graduate of Pipelifting day school program or pipelifting work experience) 1C/0/1/0

PIE 2654 Hot Water Code
This course is intended to provide the student with information on the proper and safe piping of hot water. (Prerequisite(s): Graduate of Pipelifting day school program or pipelifting work experience) 1C/0/1/0

PIE 2655 Ammonia Code
The purpose of this course is for registered Pipefitting Apprentices to learn and understand the Minnesota Department of Labor and Industry, High Pressure Piping and Code for Power Piping Systems. Registered apprentices shall also be instructed in the current proper piping practices for the installation of steam, hot water, oil, and ammonia refrigeration systems. 2C/0/2/0

PIE 2656 High Pressure Steam Code
The purpose of this course is for registered pipefitter apprentices to learn and understand the Minnesota Department of Labor and Industry, High Pressure Piping and Code for Power Piping Systems. Registered apprentices shall also be instructed in the current proper piping practices for the installation of high steam pressure steam systems. 2C/0/2/0

PIE 2657 Advanced Boiler Systems
Review of Hydronics heating and cooling systems. Introduction to boiler types, such as fire tube, water tube, condensing, and non-condensing boilers. Students will understand hot water, low pressure steam, and high pressure steam boilers. Learning how to size pipe to attain delivery of desired BTU’s to equipment. Discussion and understanding of the different burner fuel systems, as in natural gas, oil, propane, and electric. Students will understand burner ignition, and flame safety. Thorough coverage of pumps for HVAC systems, covering different types, i.e. positive displacement, and non positive displacement, pump installation, alignment, and repair. Pumping system calculations on pumping head & GPMs and pump curve analysis. 2C/0/2/0

PIE 2658 OSHA 30/Pro 10/ Heritage/Standard
This course covers Industry safety practices professionalism, communication and mutual respect. Also covered is United Association History; how the United Association became an organization of trade workers, the importance of the collective bargaining agreement, and work site performance. 2C/0/2/0

PIE 2659 Commercial Building Systems
Covers industry safety standards, ASHRAE standards, HVAC-R Star Certification program curriculum. 2C/0/2/0

PIE 2660 Industrial Rigging
Knowledge required to properly rig and lift piping and equipment associated with the installation of piping systems. 2C/0/2/0
PLMB 2610 PreApprentice Plumbing
This is an introductory course on the use of tools, materials and fittings used in the plumbing field. (Prerequisite(s): Must be enrolled in the Plumbing apprentice program) 2C/0/2/0

PLMB 2612 Job Safety & Health
This course provides knowledge of jobsite hazards and work safety. (Prerequisite(s): Must be accepted into the Plumbing apprentice program) 2C/0/2/0

PLMB 2614 Applied Math for Plumbing
This course covers basic mathematics and practical application to plumbing. (Prerequisite(s): Must be enrolled in the Plumbing apprentice program) 4C/0/4/0

PLMB 2616 Plumbing Welding
This is an introductory course into welding and the principles of joining pipe in the plumbing industry. (Prerequisite(s): Must be enrolled in the Plumbing apprentice program) 4C/0/4/0

PLMB 2618 Basic Drawing
This course introduces the student to basic concepts of drafting, blueprints and plan specifications used in the construction field. (Prerequisite(s): Must be enrolled in the Plumbing apprentice program) 4C/0/4/0

PLMB 2621 Plumbing 1
This course introduces the student to basic scientific principles applied in plumbing. It will introduce the student to drainage and vent systems and the Minnesota State Plumbing Code. (Prerequisite(s): Must be enrolled in the Plumbing apprentice program) 4C/0/4/0

PLMB 2622 Plumbing 2
This course covers proper pipe sizing and installation of piping systems, the installation of plumbing fixtures, appliances and methods used in the installation and repair of these systems. (Prerequisite(s): Must be enrolled in the Plumbing apprentice program) 4C/0/4/0

PLMB 2623 Plumbing 3 Gas Installations & Gas Controls
This course introduces the student to fundamental principles of gas burning appliances and the service and repair of these appliances and systems. (Prerequisite(s): Must be enrolled in the Plumbing apprentice program) 4C/0/4/0

PLMB 2624 Plumbing 4 Commercial & Residential Service
This course introduces students to tools and methods used in servicing and repair of plumbing systems in residential and commercial buildings. (Prerequisite(s): Must be enrolled in the Plumbing apprentice program) 4C/0/4/0

PLMB 2631 Plumbing Code 1
This course covers the Minnesota State Plumbing code and looks at each section in detail. (Prerequisite(s): Must be enrolled in the Plumbing apprentice program) 2C/0/2/0

PLMB 2632 Plumbing Code 2
This course covers the Minnesota State Plumbing code and is a continuation of Plumbing Code 1. (Prerequisite(s): Must be enrolled in the Plumbing apprentice program) 2C/0/2/0

PLMB 2633 Plumbing Code 3
This course covers the Minnesota State Plumbing code and is a continuation of Plumbing Code 2. (Prerequisite(s): Must be enrolled in the Plumbing apprentice program) 2C/0/2/0

PLMB 2634 Plumbing Code 4
This course covers the Minnesota State Plumbing code and is a continuation of Plumbing Code 3. (Prerequisite(s): Must be enrolled in the Plumbing apprentice program) 2C/0/2/0

PLMB 2640 Advanced Blueprint Reading & Heavy Rigging
Study of basic blueprint reading and layout and pipe drawings related to the plumbing field. This course also introduces the student to basic rigging. (Prerequisite(s): Must be enrolled in the Plumbing apprentice program) 4C/0/4/0

Political Science

POLS 1720 Introduction to American Government
This course provides an overview of the American political system. The course focuses on the principles of the constitution; the concept and processes of federalism; the interaction between the executive, legislative and judicial branches of government; the emergence of political parties, popular opinion, political campaigns; the evolution of domestic and foreign policy; and the role of the media in US politics. (Prerequisite(s): READ 0721 or READ 0724 or EAPP 0860 with a grade of "C" or better, or appropriate assessment score) (MnTC: Goals 5 & 9) 3C/3/0/0

POLS 1740 Introduction to World Politics
This course introduces core themes, concepts, and debates in the study of international politics. This course will focus on the causes of war, the global economy, human rights, and humanitarian intervention. (Prerequisite(s): READ 0721 or READ 0724 or EAPP 0860 with a grade of "C" or better, or appropriate assessment score) (MnTC: Goals 5 & 8) 3C/3/0/0

POLS 1750 Introduction to Political Science
This course provides an introduction to political science with an emphasis on democracy, ideologies and current issues. We will explore how ideological differences lead to disagreements on a variety of global and domestic issues. (Prerequisite(s): READ 0721 or READ 0724 or EAPP 0860 with a grade of "C" or better, or appropriate assessment score) (MnTC: Goals 5 & 9) 3C/3/0/0

POLS 1760 Introduction to Political Philosophy
This course provides an introduction to enduring themes and questions in the history of political philosophy. We will study a selection of both historical and contemporary thinkers as a way to investigate the social, moral and political foundations of modern society. (Prerequisite(s): READ 0721 or READ 0724 or EAPP 0860 with a grade of "C" or better, or appropriate assessment score) (MnTC: Goals 5 & 9) 3C/3/0/0

POLS 1790 Special Topics in Political Science
This course is designed to present additional or unique material and learning experiences within a specified discipline. The course will be based on student need, flexibility, and may be designed to meet various transfer and pre-major course requirements. Please see a current Course Schedule for complete course details. (MnTC: Goals 5 & 9) Variable credits 1-6

Practical Nursing

PRNS 1425 Essentials of Clinical Pharmacology
This course introduces the concepts of pharmaceuticals and dosage math. Included is information on pharmacokinetics, pharmacodynamics, common adverse side effects, and contraindications to drug use. Emphasis is placed on drug classifications and safe administration of medications to patients across the life span. Dosage math includes information on the systems of measurement, conversions, solving for x, ratio and proportions, pediatric formulas, and IV drip rate problems. Must earn a grade of "C" or better in this course to proceed. (Prerequisite(s): HLTH 1310, HLTH 1410, BIOL 1730, ENGL 1711, and PSYC 1720 with a grade of "C" or better. Must be accepted as a Practical Nursing major) 2C/2/0/0

PRNS 1436 Foundations of Nursing
Students in Foundations of Nursing are introduced to basic theory and nursing skills required to care for patients of both genders throughout the lifespan, with particular emphasis on the geriatric patient. Students
are given the opportunity to demonstrate these skills in the laboratory setting. An introduction to the nursing process provides the student with a beginning framework for decision making. The concepts of teamwork, collaboration, safety, quality improvement, professional identity/behavior, patient-centered care, evidence based practice, and care management are introduced. (Prerequisite(s): HLTH 1310, HLTH 1410, BIOL 1730, ENGL 1711, and PSYC 1720 with a grade of "C" or better. Must be accepted as a Practical Nursing major.) 4C/2/2/0

PRNS 1481 Clinical 1
This course provides students the opportunity to work with health care personnel, apply learned basic skills, the nursing process, and critical thinking in caring for assigned patients. Students will follow plans of care, deliver safe and competent cares to patients of both genders, and complete written clinical assignments applying to theory learned in Level I. Students will demonstrate competency within the Practical Nurse scope of practice under the direction of a nursing instructor. Must earn a grade of "C" or better in this course to proceed. (Prerequisite(s): HLTH 1310, HLTH 1410, BIOL 1730, ENGL 1711, PSYC 1720 with a grade of "C" or better. Must be accepted as a Practical Nursing major.) 3C/0/3/0

PRNS 1482 Clinical 2
In this clinical course, the Practical Nursing students will maintain a safe and effective care environment while taking care of selected patients throughout the life span. Students will implement cares and skills learned in prior Practical Nursing theory and lab courses while functioning within the roles and limitations of the LPN scope of practice. Students will use patient centered cares in collaboration with teamwork to meet the basic needs of assigned patients. Students will maintain professional identity by demonstrating dependability and accountability. Must earn a grade of "C" or better in this course to proceed. (Prerequisite(s): Grade of "C" or better in PRNS 1425, PRNS 1435, PRNS 1481, PRNS 1521 and PRNS 2411) 3C/0/3/0

PRNS 1483 Clinical 3
In this clinical course, the Practical Nursing students will care for selected patients in specialty areas (med/surg, psychosocial nursing, pediatrics and obstetrics) to afford them a well-rounded experience. Students will implement patient centered cares learned in prior theory and lab courses. Students will continue to use LPN scope of practice as a guide to implement a safe and effective care environment, and medication administration will be safe. Students will demonstrate professional identity by being dependable and accountable for actions. Must earn a grade of "C" or better in this course to proceed. (Prerequisite(s): Grade of "C" or better in PRNS 1484 and PRNS 1531) 3C/0/3/0

PRNS 1484 Clinical 2
In this clinical course, the Practical Nursing students will maintain a safe and effective care environment while taking care of selected patients throughout the life span. Students will implement cares and skills learned in prior Practical Nursing theory and lab courses while functioning within the roles and limitations of the LPN scope of practice. Students will use patient centered cares in collaboration with teamwork to meet the basic needs of assigned patients. Students will maintain professional identity by demonstrating dependability and accountability. Must earn a grade of "C" or better in this course to proceed. (Prerequisite(s): PRNS 1425, PRNS 1436, PRNS 1481, PRNS 1521, and PRNS 2410 with a grade of "C" or better) 2C/0/2/0

PRNS 1521 Medical Surgical Nursing 1
This theory course is a detailed study of pathophysiology of adult patients. Students use their knowledge of normal physiology. Sensory, neurological, musculoskeletal, integumentary, hematologic, lymphatic, immune and infectious disease disorders are studied. Course topics also include fluid/electrolyte imbalance, pain management, pre- and post-operative care, oncology and gerontology. Students apply knowledge based on patient-centered care within the practical nurse scope of practice in preparation to provide safe, quality care. Must earn a grade of "C" or better in this course to proceed. (Prerequisite(s): HLTH 1310, HLTH 1410, BIOL 1730, ENGL 1711, and PSYC 1720 with a grade of "C" or better. Must be accepted as a Practical Nursing major.) 4C/4/0/0

PRNS 1524 Medical Surgical Nursing 2
This theory course continues the study of pathophysiology of adult patients. Genitourinary/reproductive, cardiovascular, gastrointestinal, respiratory and endocrine system disorders are studied. Students at this level continue utilizing critical thinking to apply information to situations in a safe and effective care environment. Principles of inter-professional teams and shared decision-making are studied and discussed in preparation for clinical experiences. Must earn a grade of "C" or better in this course to proceed. (Prerequisite(s): PRNS 1425, PRNS 1436, PRNS 1481, PRNS 1521, and PRNS 2410 with a grade of "C" or better. Must be accepted as a Practical Nursing major.) 3C/3/0/0

PRNS 1531 Maternal Child Health
This course is designed to build on the student’s understanding of child growth and development and the basic health needs of the mother, the newborn infant, and the family during pregnancy, labor, delivery, and post-partum period. It provides an overview of the LPN scope of practice when caring for the obstetric and pediatric patient. Patient centered care is emphasized while discussing common pediatric disorders, recommended plans of care, and the concepts of prevention and treatment. Concepts of teamwork and collaboration are integrated throughout the course along with a specific group project each student must complete and present. Upon completion of this course, students will be able to describe safe and effective care utilizing the nursing process for the obstetric and pediatric patient. Must earn a grade of "C" or better in this course to proceed. (Prerequisite(s): Grade of "C" or better in PRNS 1425, PRNS 1436, PRNS 1481, PRNS 1521, PRNS 2410.) 2C/2/0/0

PRNS 2410 Psycho/Social Nursing
This course is designed to build on the student’s understanding of human behavior and provides an overview of the LPN scope of practice when caring for patients with alterations in mental health. Patient-centered care is emphasized while exploring common mental health disorders such as depression, anxiety, schizophrenia, bipolar disorder, eating disorders, and cognitive disorders. Concepts of teamwork and collaboration are integrated throughout the course. The basic components of evidence-based practice are introduced. Upon completion of this course, students will be able to describe safe and effective patient care to maintain psychosocial integrity by using the nursing process. Must earn a grade of "C" or better in this course to proceed. (Prerequisite(s): Grade of "C" or better in, HLTH 1410, BIOL 1730, ENGL 1711, and PSYC 1720. Must be accepted as a Practical Nursing major.) 2C/2/0/0

PRNS 2492 Transition to Practice
In this course additional topics and skills are taught that relate to the professional scope of practice for the graduate practical nurse, demonstrating the progression from education to practice. Students will work in a clinical setting applying the knowledge, skills, attitude and the practice of safe effective care expected of the Practical Nursing graduate. They have progressed from a novice level to an accomplished level in the areas of communication, teamwork, problem-solving and the practice of safe effective care. In depth NCLEX-PN preparation is also emphasized in this course. Must earn a grade of "C" or better in this course to complete the program. (Prerequisite(s): Grade of "C" or better in all Nursing Program course requirements (PRNS 1425, PRNS 1436, PRNS 1481, PRNS 1484, PRNS 1483, PRNS 1521, PRNS 1524, PRNS 1531, and PRNS 2410) (All prerequisites must have a minimum grade of 2.0 GPA equivalent). 3C/2/1/0

Psychology

PSYC 1710 General Psychology
This course introduces psychological theory, experimental findings and applications of human behavior. Topics include research methodology, the nervous system, perception, cognition and memory, learning theory, human development, personality, emotions, attitudes,
motivation, socialization and psychological disorders and related treatments. The course will explore current research and issues in psychology, including the influence of heredity and the environment on behavior. (Prerequisite(s): READ 0721 or READ 0724 or EAPP 0860 with a grade of “C” or better, or appropriate assessment score) (MnTC: Goal 5 & 7) 4C/4/0/0

PSYC 1720 Lifespan Development
The focus of this course is on human development throughout the lifespan. The course includes research methodology, theoretical perspectives and the physical, cognitive and psychosocial changes that influence people throughout their development. An application of research and theory to current issues will be addressed. (Prerequisite(s): READ 0721 or READ 0724 or EAPP 0860 with a grade of “C” or better, or appropriate assessment score) (MnTC: Goals 5 & 9) 3C/3/0/0

PSYC 1740 Abnormal Psychology
This course offers an integrated and multidimensional perspective of the study of psychopathology. Students learn about research methods, clinical assessment and diagnosis of psychological disorders using DSM codes as a reference. Students also explore the ways in which mental illness affects people’s lives. (Prerequisite(s): PSYC 1710 General Psychology) (MnTC: Goals 5 & 7) 4C/4/0/0

PSYC 1750 Introduction to Health Psychology
This course examines how psychological, social and biological factors interact with and affect individuals’ efforts to promote their own health and prevent or cope with illness. Topics include individual responses by gender, age and ethnicity; variations in health-related behaviors, stress and illness; whether, and what kind of, treatment individuals seek for health problems and whether they adhere to treatment recommendations; and the theories and methods used by psychologists to understand these issues. (Prerequisite(s): READ 0721 or READ 0724 or EAPP 0860 with a grade of “C” or better, or appropriate assessment score) (MnTC: Goals 5 & 7) 3C/3/0/0

PSYC 1780 Psychology of Death and Dying
Death is a topic that is often avoided, yet it is a universal part of the human experience. In this course, students will examine historical and sociocultural forces that influence our understanding of death and dying and explore topics such as end-of-life decision-making, grief and mourning, funeral customs, understanding death across the lifespan, and legal and ethical issues related to death and dying. Students will also explore their own attitudes and reactions to death and dying. Through gaining a deeper understanding of dying and death, we can reduce our fear and be more empowered when facing these inevitable events. (Prerequisite(s): READ 0721 or READ 0724 or EAPP 0860 with a grade of “C” or better, or appropriate assessment score) (MnTC: Goals 5 & 9) 3C/3/0/0

PSYC 1790 Special Topics in Psychology
This course is designed to present additional or unique material and learning experiences within a specified discipline. The course will be based on student need, flexibility, and may be designed to meet various transfer and pre-major course requirements. Please see a current Course Schedule for complete course details. Variable credits 1-6

PSYC 2240 Statistics for Psychology/Behavioral Sciences
Students use basic mathematical and computerized procedures to analyze data in the behavioral sciences. Statistical software is used to conduct descriptive and inferential data analyses. Students choose and apply statistical procedures to help answer psychological and behavioral scientific research questions. Students read, interpret, and write APA-style results sections for behavioral science research. (Prerequisite(s): PSYC 1710 and MATH 1740 with a grade of “C” or better, or MATH 1730 with a grade of “C” or better, or a higher MATH course with a grade of “C” or better) (MnTC: Goals 5) 4C/4/0/0

PSYC 2720 Social Psychology
This course focuses on social psychological theories and research to analyze how an individual’s thoughts, feelings, and actions influence other people, social settings, and institutions. Specific emphasis will be placed on the ways in which an individual’s cognitive processes affect their emotions and behaviors as well as their interpretation of social interactions. Topics include perception, attribution, socialization, attitudes, conflict, altruism, groups, power, conformity, prejudice, collective behaviors, and social movements. (Prerequisite(s): PSYC 1710 or SOCI 1710 with a grade of “C” or better) (MnTC: Goal 5 & 7) 4C/4/0/0

Public Health

PUBH 1700 Personal and Community Health
This course is designed to look at health from a personal, community, and populations perspective. Students will explore the many dimensions of health practices, behaviors, and concerns by covering topics such as, mental/emotional health, dietary practices, physical fitness, disease prevention and management guidelines, and health promotion. 3C/3/0/0

PUBH 1710 Consumer Health
Students will explore the selection, evaluation, and understanding of health information, medical services, advertising of products, health quackery, and socio-cultural factors revolving around consumer health. Students will learn basic knowledge and skills to navigate through consumer health issues, services, and products. 3C/3/0/0

PUBH 1790 Special Topics in Public Health
This course is designed to present additional or unique material and learning experiences within a specified discipline. The course will be based on student need, flexibility, and may be designed to meet various transfer and pre-major course requirements. Please see a current Course Schedule for complete course details. Variable credits 1-6

PUBH 2700 Public Health Overview
A foundation course that introduces students to the concept, history and practice of public health. The course examines the environmental, social, political and behavioral determinants of health and disease from a population perspective. It also looks at options for intervening to maintain the public’s health through the use of the health care, public health, environmental health, and safety systems as well as laws and taxation. 3C/3/0/0

PUBH 2710 Public Health Education
This is a foundations course in health education and promotion for health educators. Students will learn the theories and models of health education, promotion, behavior change, and health promotion within government, worksites, public health agencies, and community organizations. Students will also explore determinants of disease, health, prevention, and interventions. 3C/3/0/0

PUBH 2720 Personal and Community Health
This course introduces key principles and concepts of global health. Students will examine how culture, human rights, economics, policies, and health care systems contribute to the global burden of disease and health promotion. In addition to traditional methods of assessment, this course will emphasize oral presentations. 3C/3/0/0

PUBH 2730 Public Health Administration
This is a foundational course in health policy and management related to the delivery, quality, and cost of healthcare for individuals and populations. Students will explore local health professional training requirements, health insurance systems, the organization and management within public health settings and how they are influenced by politics. 3C/3/0/0

PUBH 2740 Environmental Health
This course is an introduction to the identification and analysis of environmental influences on health. Students will explore major environmental threats to health found in the house, air, water, solid waste, toxic waste, sanitation, and land use, as well as laws, policies, and practices associated with their control in the US and around the world. 3C/3/0/0
Course Descriptions

PUBH 2750 Public Health Advocacy & Leadership in Action
Take your public health education knowledge to the next level. In this course, students will develop an understanding of advocacy and their personal leadership style within public health promotion and education. Students will be prepared to participate within a community organization addressing a health issue important to them. Students will focus on the ways in which advocacy and leadership are connected to the assessment, planning, and implementation of health education and promotion programs. (Prerequisite(s): PUBH 2710) 3C/3/0/0

PUBH 2770 Public Health Practicum
This course is designed to provide public health students with 80 hours of worksite experience in the community. Students will apply public health knowledge gained throughout the program under the supervision of a public health professional. Students will have a shared responsibility in choosing the worksite, participating in appropriate worksite tasks, and reporting on their experience. (Prerequisite(s): Instructor approval) 2C/0/0/2

Reading

READ 0721 Reading 1
This course provides instruction in developing an active reading approach to college-level texts, emphasizing the close relationship between reading and thinking. The content includes strategic vocabulary building, paraphrasing, responding to texts, increasing reading stamina, and improving comprehension. (Prerequisite(s): Placement into this course will be according to college assessment score). 3C/3/0/0

READ 0722 Reading 2
This course provides instruction in developing an active and critical reading approach to college-level texts, emphasizing analysis and synthesis of multiple sources. The content includes academic vocabulary building, summarizing, interpreting text, developing research skills, increasing reading stamina, and improving comprehension. (Placement into this course will be according to assessment score or successful completion of READ 0721 or EAPP 0860 with a grade of “C” or better.) 3C/3/0/0

READ 0724 Fast Track Reading
This course fulfills the developmental reading requirements for the college-level courses in one semester. This accelerated course provides instruction in developing an active and critical reading approach to college-level texts, emphasizing the relationship between reading and thinking, as well as analysis and synthesis of multiple sources. Content includes strategic and academic vocabulary building, paraphrasing and summarizing, responding to and interpreting texts, developing research skills, increasing reading stamina, and improving comprehension. (Placement into this course will be according to college assessment score.) 5C/5/0/0

READ 0725 Vocabulary Development
This course is designed to develop academic vocabulary by using a variety of strategies, including determining meaning from context and gaining knowledge of Latin/Greek roots and word parts. A variety of methods to increase reading, writing, and speaking vocabularies are utilized, and students establish systematic vocabulary study that can be used for lifelong development. 1C/1/0/0

READ 1350 Critical Reading and Thinking
This course is designed to improve critical reading and thinking skills necessary for academic study. Students will read, analyze, and synthesize college level texts with the goal of expanding effectiveness and confidence in academic reading. (Prerequisite(s): READ 0722 or READ 0724 or EAPP 0900 with a grade of “C” or better, or appropriate assessment score) 2C/2/0/0

READ 1450 Enhancing Vocabulary for College Success
This course focuses on expanding and enhancing college-level and discipline specific vocabulary relevant to major study. Systematic vocabulary study and major-related research are utilized, as well as word building strategies such as knowledge of Latin/Greek roots and word parts. The course includes multimodal practice of learned vocabulary - students will incorporate new words into a variety of assignments and contexts, both orally and in writing. (Prerequisite(s): READ 0722 or READ 0724 or EAPP 0900 with a grade of “C” or better, or appropriate assessment score) 1C/1/0/0

READ 1490 Special Topics in Reading
This course is designed to present additional or unique material and learning experiences within a specified discipline. The course will be based on student need, flexibility, and may be designed to meet various transfer and pre-major course requirements. Please see a current Course Schedule for complete course details. Variable credits 1-6

Respiratory Therapist

RESP 1411 Respiratory Care Essentials
This course introduces the basic sciences and concepts required for the study of Respiratory Care. This includes fundamentals of chemistry, cardiopulmonary anatomy, physiology, mathematics, physics, and an introduction to the equipment used in basic respiratory care. An introduction to the sim lab and patient’s medical record will be provided. Must earn a grade of “C” or better in this course to proceed. (Prerequisite(s): Acceptance into the program major. Must be taken concurrently with RESP 1412) 2C/1/0/0

RESP 1412 Respiratory Care Essentials Lab
This introductory lab course provides a hands on experience with basic oxygen devices and equipment used in the practice of Respiratory Care. This will take place in the lab and simulation center. Vital signs, oxygen and pulse oximetry competencies will be done. Must earn a grade of “C” or better in this course to proceed. (Prerequisite(s): Must be taken concurrently with RESP 1411) 1C/0/0/0

RESP 1510 Cardiopulmonary Pathophysiology 1
This course is an introduction to the assessment and pathophysiology of the patient with cardiopulmonary disease. Emphasis is on assessment of oxygenation, ventilation and acid-Base balance. Students are introduced to pulmonary pathophysiology emphasizing differences in obstructive and restrictive lung disease. Must earn a grade of “C” or better in this course to proceed. (Prerequisite(s): CHEM 1711, HLTH 1410, BIOL 1730, RESP 1411 and 1412) 3C/3/0/0

RESP 1521 Respiratory Care Therapeutics
This course introduces the student to basic respiratory care therapeutics including: oxygen administration, aerosol delivery devices, bronchial hygiene methods and lung hyperinflation techniques. Specific equipment, indications, contraindications, and adverse reactions associated with each therapeutic procedure are covered. Must earn a grade of “C” or better in this course to proceed. (Prerequisite(s): CHEM 1711, RESP 1411 and 1412, BIOL 1730; Co-Requirement(s): RESP 1522, RESP 1540) 4C/3/1/0

RESP 1523 Respiratory Care Therapeutics Lab
This course provides demonstrations and hands on practice in the use of equipment and procedures required for basic Respiratory Care Therapeutics. This will take place in a supervised lab and SIM lab. Modalities included are High Flow, Small Volume Nebulizer, Hyperinflation Therapy, Bronchial Hygiene Therapy and Airway Management. Must earn a grade of “C” or better in this course to proceed. (Prerequisite(s): RESP 1412; Co-requisite(s) RESP 1521) 2C/0/2/0

RESP 1540 Respiratory Care Pharmacology
This course includes a study of pharmacological agents used in cardiopulmonary care. This would include the principles of pharmacological therapy, drug dosages, and the safe and effective administration of these agents. Must earn a grade of “C” or better in this course to proceed in the Respiratory Care Program. (Prerequisite(s): CHEM 1711, HLTH 1410 & BIOL 1730; Co-Requirement(s): RESP 1411 and 1412) 2C/2/0/0

For more information, please visit saintpaul.edu
RESP 1580 Introduction to Clinical
This course will introduce the student to the electronic medical record and requirements to start clinical’s the following semester. (Prerequisite(s): Entry to the Program; Co-requisite(s): RESP 1411, RESP 1412, and RESP 1540 1C/0/0/1

RESP 1581 Respiratory Care Clinical 1
Students will have direct patient contact and provide basic patient care procedures as directed by the clinic instructor. Emphasis is on data collection, application of oxygen, aerosol and humidification devices. Students will collect vital signs and practice physical assessment techniques. Students will record pertinent information in patient’s computerized chart. Must earn a grade of “C” or better in this course to proceed. (Prerequisite(s): RESP 1411,1412, and RESP 1580) 3C/0/0/3

RESP 1582 Respiratory Care Clinical 2
A continuation of clinical practice procedures for administration of routine patient care therapy. Student will build on previous clinical experience. Emphasis is on bedside patient assessment, High Flow, SVN, MDI and CPAP. Must earn a grade of “C” or better in this course to proceed. In conjunction with clinical, a hybrid element includes case discussions, research data and clinical practice guidelines to enhance learning development. Specific hospital based policies and practice while identifying the AARC Clinical Practice Guidelines. (Prerequisite(s): RESP 1581, RESP 2410) 3C/0/0/3

RESP 1583 Respiratory Care Clinical 3
A continuation in clinical practice with emphasis given to acute care therapy. Mechanical ventilation and critical care skills are practiced and evaluated. In conjunction with clinical, a hybrid element includes case discussions, research data and evidence based clinical practice guidelines to enhance learning development. Specific hospital based policies and practice while identifying the AARC Clinical Practice Guidelines. Must earn a grade of “C” or better in this course to proceed. (Prerequisite(s): RESP 1582) 6C/0/0/6

RESP 1597 Respiratory Care Clinical 4
A continuation of clinical practice skills with emphasis on critical care monitoring and procedures. Students will rotate through pediatrics, long term care and adult critical care. Specialty rotations also are done this semester. Must earn a grade of “C” or better in this course to proceed. (Prerequisite(s): RESP 1593) 3C/0/0/5

RESP 1599 Respiratory Care Clinical 5
A continuation of clinical practice skills with emphasis on critical care time management at an Adult ICU of the students choosing. In conjunction with clinical, a hybrid element includes case discussions, research data and evidence based clinical practice guidelines to enhanced learning development. Students will also rotate through Pediatric ICU and Neonatal ICU. A sleep rotation in a sleep lab will also occur. Each clinical training during hospital rotations will be supported through student internship/specific hospital based regulations and practice while identifying the AARC Clinical Practice Guidelines. Must earn a grade of “C” or better in this course to proceed. (Prerequisite(s): RESP 1597) 4C/0/0/4

RESP 2411 Mechanical Ventilation
This is an introductory course in the use of mechanical ventilation. Positive and negative pressure machines are discussed, as well as other equipment and procedures related to mechanical ventilation. Methods of monitoring ventilator patient response to therapy are also described. Must earn a grade of “C” or better in this course to proceed. (Prerequisite(s): RESP 1510, RESP 1521, RESP 1522, RESP 1540, RESP 1591; Co-requisite(s): RESP 1592) 3C/1/2/0

RESP 2412 Mechanical Ventilation Lab
This course provides hands-on practice in the clinical application and safety of mechanical ventilation. This will take place in a supervised lab. Must be taken concurrently with RESP 2411 Mechanical Ventilation. Must earn a grade of “C” or better in this course to proceed. 1C/0/1/0

RESP 2420 Cardiopulmonary Pathophysiology 2
This course continues the study of cardiopulmonary pathophysiology. Emphasis is placed on specific obstructive, restrictive and hemodynamic abnormalities. Must earn a grade of “C” or better in this course to proceed. (Prerequisite(s): RESP 1510; Co-requisite(s): RESP 1592) 1C/0/1/0

RESP 2430 Neonatal/Pediatric Respiratory Care
This course introduces the student to principles of neonatal and pediatric respiratory care. Must earn a grade of “C” or better in this course to proceed. (Prerequisite(s): RESP 2420) 2C/1/1/0

RESP 2440 Management of the Critically Ill Patient
This is an advanced course in mechanical ventilation and medical management of the critically ill patient. Must earn a grade of “C” or better in this course to proceed. (Prerequisite(s): RESP 2411, 2412, and RESP 2420; Co-requisite(s): RESP 1593) 4C/1/3/0

RESP 2450 Cardiopulmonary Diagnostics
This course will examine cardiopulmonary function studies, the techniques used and the significance of the individual tests with regard to pulmonary disease. Must earn a grade of “C” or better in this course to proceed. (Prerequisite(s): RESP 2420) 1C/0/1/0

RESP 2452 Advanced Simulation
This hybrid course is designed to train allied health program students in advanced critical care life support skills in a medical simulation lab setting. Students will be evaluated and observed on independent and team approach skills in a diverse simulation competency based scenario. Students will be assessed on skills based competencies on mock simulation patients in the lab, case study and scenario discussions. Students will be videotaped while they perform skills. Students must earn a grade of “C” or better in this course to proceed. (Prerequisite(s): RESP 2440; Co-requisite(s): BLS Card through AHA) 3C/0/3/0

RESP 2458 Multidisciplinary RT
This course reviews the multidisciplinary positions in respiratory care and management skills/position that is essential towards understanding an organizational environment and a healthcare manager’s ability to perform various functions. This course will review the challenges of respiratory care professions and when necessary, classical theory and concepts. This curriculum will focus on relatively new concepts and trends in organizational management. An Online Research review will incorporate evidence based medicine and learner based theory concepts to promote concepts of respiratory care management. It is designed to help develop a solid base of understanding of the traditional core management functions of planning, decision making, organizing, staffing and decision making as well as the emerging functions of coaching, counseling, teaching and facilitating. In addition, students will also review different specialties and alternative sites in Respiratory Care. (Prerequisite(s): RESP 2440; Co-Requisites: RESP 2452) 1C/0/1/0

RESP 2470 Registry Review
This course is an advanced study in Respiratory Care Procedures and prep for the NBRC CRT and RRT exam. Each student will need to successfully pass an entry level CRT self-assessment exam at the end of the course. Must earn a grade of “C” or better in this course to proceed. (Prerequisite(s): RESP 2411, RESP 2412, and RESP 1593) 3C/1/2/0

RESP 2510 Survey of Human Disease
This course is an advanced study in Respiratory Care Procedures and prep for the NBRC CRT and RRT exam. Each student will need to successfully pass an entry level CRT self-assessment exam at the end of the course. Must earn a grade of “C” or better in this course to proceed. (Prerequisite(s): RESP 2411 and 2412) 2C/1/1/0
**Sheet Metal**

<td>SMET 1430</td>
<td>Sheet Metal Drafting &amp; Blueprint Reading</td>
<td>Covers principles of mechanical drawing. Students will interpret sheet metal blueprints. 2C/1/1/0</td>
</tr>
<tr>
<td>SMET 1440</td>
<td>Sheet Metal Welding</td>
<td>Covers the four processes used to weld sheet metal: Oxyacetylene, Shielded Metal Arc Welding, Gas Metal Arc Welding (Wirefeed) and Gas Tungsten Arc Welding (Tig or Helarc). 5C/1/4/0</td>
</tr>
<tr>
<td>SMET 1450</td>
<td>Sheet Metal Practical Problem Solving</td>
<td>This course covers math used in the sheet metal trade. 2C/1/1/0</td>
</tr>
<tr>
<td>SMET 1510</td>
<td>Duct System Layout &amp; Design</td>
<td>Covers the layout and design of duct systems used for HVAC and industrial ventilation systems. (Prerequisite(s): SMET 1410, SMET 1415, SMET 1420, SMET 1430, SMET 1440, SMET 1450) 4C/2/2/0</td>
</tr>
<tr>
<td>SMET 1520</td>
<td>Duct System Fabrication</td>
<td>Covers the fabrication and assembly of various types of duct systems. (Prerequisite(s): SMET 1410, SMET 1415, SMET 1420, SMET 1430, SMET 1440, SMET 1450) 4C/1/3/0</td>
</tr>
<tr>
<td>SMET 1530</td>
<td>Architectural Sheet Metal</td>
<td>Covers the fabrication and assembly of various types of architectural sheet metal systems. Installation techniques will also be described. (Prerequisite(s): SMET 1410, SMET 1415, SMET 1420, SMET 1430, SMET 1440, SMET 1450) 4C/2/2/0</td>
</tr>
<tr>
<td>SMET 1540</td>
<td>Power Machine Operation</td>
<td>Covers the fabrication of sheet metal items using the power shear, press brake, power rolls, punch press and spotwelder. (Prerequisite(s): SMET 1410, SMET 1415, SMET 1420, SMET 1430, SMET 1440, SMET 1450) 3C/1/2/0</td>
</tr>
<tr>
<td>SMET 1550</td>
<td>Sheet Metal CAD/CAM Systems</td>
<td>Covers the setup and operation of plasma cutting systems and computer-aided drafting systems. (Prerequisite(s): SMET 1410, SMET 1415, SMET 1420, SMET 1430, SMET 1440, SMET 1450) 3C/1/2/0</td>

<th>Course Code</th>
<th>Course Title</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>SOCI 1710</td>
<td>Introduction to Sociology</td>
<td>This course introduces students to sociology: the systematic study of human interaction and society. Major theoretical perspectives and research methods of sociology will be examined. The primary goal is to create an awareness of, and appreciation for, the range of social and cultural variations throughout the United States and worldwide, stressing characteristics shared by all people. Readings and social science examples will be drawn from cultures around the world, including the pluralistic culture of the United States. Another focus of the class is to dispel common myths and stereotypes surrounding society and human behavior. (Prerequisite(s): READ 0721 or READ 0724 or EAPP 0860 with a grade of “C” or better, or appropriate assessment score) (MnTC: Goals 5 &amp; 7) 4C/4/0/0</td>
</tr>
<tr>
<td>SOCI 1720</td>
<td>Social Problems</td>
<td>This course introduces students to modern issues of societal concern, including social problems that have endured over time and those that have emerged as societies modernize and cultures change. The influence of globalization on cultures around the world will be discussed. Specific topics include: inequalities of race, class, gender, age, and sexual orientation, modern family issues, crime and violence, drugs, war and terrorism, global health, environmental factors affecting society and culture, poverty, and population growth. Critical thinking skills will be developed through class discussions, debates, and course assignments. (Prerequisite(s): READ 0721 or READ 0724 or EAPP 0860 with a grade of “C” or better, or appropriate assessment score) (MnTC: Goals 5 &amp; 8) 3C/3/0/0</td>
</tr>
<tr>
<td>SOCI 1730</td>
<td>Sociology of Families and Relationships</td>
<td>This course introduces students to the central ideas, challenges, theoretical perspectives and the diversity of human relationships, marriages and families. Global perspectives regarding families and the diversity of intimate relationships in contemporary societies will be discussed. Topics in this course could include the origins of marriage and diverse patterns of love, conflict, sexuality, parenting, single-hood, interpersonal violence, divorce, extended families and gender roles. Reading and examples will be drawn from societies around the world. Common myths and challenges related to stereotypes of the “typical” family and “functional” relationships will be explored. Critical thinking skills will be developed through class discussions, debates and course assignments. (Prerequisite(s): READ 0721 or READ 0724 or EAPP 0860 with a grade of “C” or better, or appropriate assessment score) (MnTC: Goals 5 &amp; 7) 3C/3/0/0</td>
</tr>
<tr>
<td>SOCI 1740</td>
<td>Sociology of Work</td>
<td>Sociology of Work introduces students to theories, issues and perspectives about work and workplaces in a global economy. The course explores occupations and professions in historical and contemporary settings. The interdependence of economic, social and political factors that shape and change the nature of work are covered within a global context. (Prerequisite(s): READ 0721 or READ 0724 or EAPP 0860 with a grade of “C” or better, or appropriate assessment score) (MnTC: Goals 5 &amp; 7) 3C/3/0/0</td>
</tr>
<tr>
<td>SOCI 1760</td>
<td>Mass Media and Society</td>
<td>This course provides students with a general understanding of how mass media operates in society and the influence of media messages in the areas of print media, recordings, radio, film, advertising, public relations, digital media and the Web. The course will emphasize basic definitions and the functions of mass media forms and practices; the impact of mass media on society; and major theoretical perspectives and research methods of society will be used to analyze various examples of media. Specific areas of discourse explored in this course may include racism, sexism, heterosexism, ageism, stereotypes, discrimination, violence, and crime. (Prerequisite(s): READ 0721 or READ 0724 or EAPP 0860 with a grade of “C” or better, or appropriate assessment score) (MnTC: Goal 5) 4C/4/0/0</td>
</tr>
</tbody>
</table>
SOCI 1765 Sociology of Crime and Deviance
This course will offer students an introduction to the sociological study of crime and deviance. We will examine the major types of crimes, such as violent crime, property crime, cybercrime, white-collar crime, and organized crime. This course will cover major sociological theories used to explain crime and deviance. Students will also learn about the relativity of deviance, how power, social control, and labeling are used to socially construct definitions of deviance, and the consequences of being labeled deviant. Topics in deviance may include suicide, mental illness, obesity, body modification, substance abuse, and sexual diversity. (Prerequisite(s): READ 0722 or READ 0724 or EAPP 0900 with a grade of "C" or better, or appropriate assessment score) (MnTC: Goals 5 & 7) 3C/3/0/0

SOCI 1766 Juvenile Delinquency
This course is designed to familiarize students with the sociological study of juvenile delinquency in the United States, while simultaneously cultivating an historical and international perspective on delinquency. Topics include the nature of delinquency, means of measuring delinquency, theoretical understandings of delinquency, societal influences upon and responses to delinquency, as well as the development of the juvenile justice system. (Prerequisite(s): READ 0721 or READ 0724 or EAPP 0860 with a grade of "C" or better, or appropriate assessment score) (MnTC Goals: 5 & 9) 3C/3/0/0

SOCI 1772 Introduction to Criminal Justice
This course will introduce students to the major components of the American Criminal Justice System, specifically the police, corrections and the courts. Students will discuss the various types of crime and how crime is measured. Additional topics may include: a brief history of crime and punishment, the development of the criminal justice system, causes of crime and victimization, styles of policing, levels of the court system, philosophies of punishment, juvenile justice and prison life. (Prerequisite(s): READ 0721 or READ 0724 or EAPP 0860 with a grade of "C" or better, or appropriate assessment score) (MnTC: Goals 5 & 9) 3C/3/0/0

SOCI 1774 Introduction to Corrections
This is an introductory course designed to provide students with an overview of the problems and ethical dilemmas that face America’s correctional system. The institution of corrections is not only a study of our prison system but is, in fact, the study of a complex network of societal relationships and institutions. This course examines the history, present, and future of U.S. corrections. The role of penitentiaries, prisons, jails, and grass roots organizations is explored along with the concepts of punishment, rehabilitation, retribution, restoration and transformation. (Prerequisite(s): READ 0721 or READ 0724 or EAPP 0860 with a grade of "C" or better, or appropriate assessment score) (MnTC: Goals 5 & 9) 3C/3/0/0

SOCI 1776 Probation, Parole and Alternative Sentencing
This course is designed to introduce students to the fields of probation and parole. We will examine a variety of community-based correctional practices and strive to understand the roles of individuals who work within community programming. Most importantly, we will begin to gain an understanding of those individuals who receive the services of these fields. The ultimate goal of this course is for students to develop their ability to critically examine a diverse range of correctional programming. (Prerequisite(s): READ 0721 or READ 0724 or EAPP 0860 with a grade of "C" or better, or appropriate assessment score) (MnTC: Goals 5 & 9) 3C/3/0/0

SOCI 1790 Special Topics in Sociology
This course is designed to present additional or unique material and learning experiences within a specified discipline. The course will be based on student need, flexibility, and may be designed to meet various transfer and pre-major course requirements. Please see a current Course Schedule for complete course details. (Prerequisite(s): READ 0721 or READ 0724 or EAPP 0860 with a grade of "C" or better, or appropriate assessment score) (MnTC: Goal 5) Variable credits 1-6

SOCI 1791 Special Topics in Sociology 2
This course is designed to present additional or unique material and learning experiences within a specified discipline. The course will be based on student need, flexibility, and may be designed to meet various transfer and pre-major course requirements. Please see a current Course Schedule for complete course details. (Prerequisite(s): READ 0721 or READ 0724 or EAPP 0860 with a grade of "C" or better or appropriate assessment score) (MnTC: Goal 5) Variable credits 1-6

SOCI 2720 Social Psychology
This course focuses on social psychological theories and research to analyze how an individual’s thoughts, feelings, and actions influence other people, social settings, and institutions. Specific emphasis will be placed on the ways in which an individual’s cognitive processes affect their emotions and behaviors as well as their interpretation of social interactions. Topics include perception, attribution, socialization, attitudes, conflict, altruism, groups, power, conformity, prejudice, collective behaviors, and social movements. (Prerequisite(s): PSYC 1710 or SOCI 1710 with a grade of “C” or better) (MnTC: Goal 5 & 7) 4C/4/0/0

Spanish

SPAN 1710 Beginning Spanish 1
An introduction to Spanish based on real-life situations as well as to various aspects of Hispanic societies and cultures. Comprehension and basic speaking skills are emphasized. Some reading and writing is required. The overall goal of this course is to provide students with the linguistic foundation necessary to later achieve proficiency in the Spanish language. No previous knowledge of Spanish necessary. (Prerequisite(s): READ 0721 or READ 0724 or EAPP 0860 with a grade of "C" or better, or appropriate assessment score) (MnTC: Goal 6 & 8) 5C/4/1/0

SPAN 1720 Beginning Spanish 2
A continuation of SPAN 1710. Emphasis is on extending skills in everyday spoken Spanish. (Prerequisite(s): SPAN 1710 with grade of "C" or better or Placement Exam or instructor approval) (MnTC: Goal 6 & 8) 5C/4/1/0

SPAN 1730 Intermediate Spanish 1
This course provides continued development of communication in reading, writing, listening and speaking. There is an emphasis on communicating ideas in writing and conversation. As a part of the course, students will be exposed to the cultures of Spanish-speaking people through art, literature and history. (Prerequisite(s): SPAN 1720 with a grade of “C” or better or Placement Exam or instructor approval) (MnTC: Goals 6 & 8) 5C/4/1/0

SPAN 1740 Intermediate Spanish 2
This course is a continuation of SPAN 1730. The course provides continued development of communication in reading, writing, listening and speaking. There is an emphasis on communicating ideas in writing and conversation. As a part of the course, students will be exposed to the cultures of Spanish-speaking people through art, literature and history. This course is usually offered during the spring term (Prerequisite(s): SPAN 1730 with a grade of “C” or better, or Placement Exam or instructor approval) (MnTC: Goals 6 & 8) 5C/4/1/0

SPAN 1790 Spanish for the Workplace
An introduction to basic Spanish conversational communication focusing on the specific context and situations of the workplace. The aim of this course is to achieve a basic level of proficiency in conversational Spanish to exchange information and perform basic everyday tasks. This class may be offered for specific career industries such as the Hospitality or Healthcare industries. When this happens, the career industry will be specified in the title. No previous knowledge of Spanish is necessary. (Prerequisite(s): READ 0721 or READ 0724 or EAPP 0860 with a grade of "C" or better, or appropriate assessment score) (MnTC: Goal 8) 3C/3/0/0
Course Descriptions

Study Skills and Success Strategies

STSC 1200 College Success Strategies
This course is designed to help students create greater success in college and in life. We will focus on the strategies, habits, and values necessary for students to take charge of their own academic and personal development through active and collaborative engagement. 2C/2/0/0

Supply Chain Logistics

BSLM 2491 Business Logistics Management Internship
Students who participate in an internship gain first-hand knowledge in the industry under the guidance of a faculty member and a worksite supervisor. Students must state their goals and planned outcomes to participate in an internship. (Prerequisite(s): Instructor approval) Variable credits 1–3

BSLM 2497 Business Logistics Management Special Topics
The intent of this course is to allow flexibility in providing learning experiences to meet a special need of the student, the major program and the College. (Prerequisite(s): Instructor approval) Variable credits 1–3

BUSN 1420 Transportation Management
Introduction to basic transportation concepts and the relevance of transportation in our economy. Characteristics of each mode of transportation including rail, highway, carrier pricing, pipelines, air and water will be discussed and evaluated. 3C/3/0/0

BUSN 1530 Distribution Management
Designed to clarify and define the primary role of warehousing and logistics in today’s economy. This course includes inventory control, material handling equipment, just-in-time productivity and quality control. 3C/3/0/0

BUSN 2451 Procurement Principles and Applications
The course covers a broad overview of the objectives of Procurement; its authority, responsibility, management function and expectations. Students learn how and why the procurement function has far-reaching effects on a company’s profit or loss. Procurement is a dynamic business function and is important in controlling costs in large dollar expenditures. The Procurement department deals with Production, Engineering, Marketing, Sales, Logistics, Stores, Inventory Control, Transportation, Quality Assurance and Finance. The primary objective of procurement is to buy the right materials, of the right quality, in the right quantity, at the right time, at the right price, from the right source. 3C/3/0/0

BUSN 2520 Supply Chain Management
Supply chain management provides training in the areas of efficient administration and control of logistical components: transportation, inventory, packaging, warehousing, materials handling, customer service and their eventual integration into a logistics system. 4C/4/0/0

Surgical Technology/Sterile Processing

SURG 1405 Introduction to Surgical Technology
This course provides a broad study of the operative environment, professional roles, moral/legal/ethical responsibilities, and medical communications used in surgical technology. (Requires concurrent enrollment is SURG 1410 & SURG 1415) 1C/1/0/0

SURG 1410 Sterile Processing
The course will introduce various surgical instruments, the classification and use(s), including the process of cleaning, decontamination, disinfection, and sterilization of equipment and supplies used in the surgical services department. Distribution and management of supplies to all customer service areas is also addressed for health care settings. (Prerequisite(s): BIOL 1471, BIOL 1740, BIOL 2721; Co-requisite(s): SURG 1415 and BIOL 2722) 3C/2/1/0

SURG 1415 Surgical Microbiology
This course addresses natural and artificial body defense mechanisms and the methods by which infectious diseases are recognized, treated, transmitted, and prevented. Disinfection and sterilization are also included. Content covers the application of aseptic technique and various environmental controls. (Prerequisite(s): BIOL 1471, BIOL 1740, BIOL 2721; Co-requisite(s): SURG 1410 and BIOL 2722.) 2C/2/0/0

SURG 2400 OR Fundamentals
To prepare competent entry-level surgical technologists in the cognitive (knowledge), psychomotor (skills), and affective (behavior) learning domains. Course discusses in depth the concepts around the following areas as it relates to the Surgical Technologists role. In this interactive course the learner will focus on the patient and the surgical technologist in the operating room as it relates to safety, fire risk, positioning, prepping, patient transfer. Introduces to the learner concepts around safety, of self and also for the patient. Theory and physics around the safe use of electro cautery, lasers, and microscopes and robotics in the operating room. The learner will also be introduced to a wide variety of supplies, their safe and proper use in the operating room, such as suture, dressings, drains, and catheters. The learner will also explore the concepts around wound healing as it relates to the surgical patient. Surgical prepping, safety protocols, technique and theory will be explored. (Prerequisites: SURG: 1405, 1410, and 1415) 1C/1/0/0

SURG 2405 Pharmacology
Learners will review basic math skills and learn a framework of pharmacological principles in order to apply them safely in a surgical environment. These will include metric system, percentages, and proportions for medication calculations. Commonly used medication with surgical applications are reviewed in depth. These include antibiotics, diagnostic agents, diuretics, drugs that affect coagulation, ophthalmic agents, perioperative medications, anesthesia agents for both local and general anesthesia Specific topics include drug administration routes and methods, blood and fluid usage, drug reactions including malignant hyperthermia and allergic reactions. (Prerequisites: SURG 1405, 1410, and 1415) 2C/2/0/0

SURG 2411 Pathology & Procedure
To prepare competent entry-level surgical technologists in the cognitive (knowledge), psychomotor (skills), and affective (behavior) learning domains. This course reviews the pertinent anatomy and physiology related to the following surgical systems/specialties. General surgery, OB/GYN, orthopedics, ear nose and throat (ENT), ophthalmic, neurology, spinal procedures, cardio-thoracic, peripheral vascular, urology, maxillofacial, head and neck, plastics, geriatrics, trauma (pediatrics and adult), robotics and laser. Conditions that warrant surgical correction are discussed and studied in depth. Also introduced are common specialized instrumentation by type, function, and name. Common procedures in each of the surgical specialty areas are explained in depth; to include indication, anatomy involved, incision(s), patient positioning, prepping, draping, dressings and suture used in such cases. (Prerequisite(s): BIOL 2722, SURG 1405, SURG 1410, and SURG 1415) 3C/1/2/0

SURG 2415 Operating Room Lab 1
Learners will practice the concepts and theories learned in 2410 Pathology and Procedures and 2405 Pharmacology. Basic skill sets will be put into practice for scrub gown and gloving (both open and closed), draping of the surgical patient, as well as set up appropriate instrumentation on back-table and mayo stand for general surgery
abdominal cases. Focus will be on use of correct sterile technique, surgical consciousness, and communication by way of working within a team in the surgical environment. Learner will be able to practice passing instruments, load surgical blades and needles, and properly change contaminated gown and gloves. A focus will be made around labeling drugs properly that will be used in the sterile field. (Prerequisites: SURG 1405, 1410, and 1415) AC/0/4/0

SURT 2420 Operating Room Lab 2
Learners will directly build on skill sets learned in SURG 2415, as they bring in more complex procedures to their training, from the curriculum in SURG 2411, these are then practiced directly in the lab session. The procedures will require new skill sets in the areas of draping, specialty equipment, instruments, and team communication. (Prerequisites: SURG 1405, 1410, and 1415) AC/0/4/0

SURT 2430 Operating Room Clinical 1
Students are assigned to a pre-planned clinical facility and assist with surgical procedures within the operative setting under the personal supervision of a clinical preceptor. This clinical practicum is designed for the student to integrate knowledge and theory from previous classes specific to Surgical technology, to develop skill set specific to that of a practicing Surgical Technologist. Clinical assignments are based on a set of weekly clinical performance objectives that must be met prior to the completion of OR lab 2. Students will participate in 3 clinical conferences to debrief current learning and synthesize knowledge with practice. Also covered in these sessions are professional topics such as understanding the roles, responsibilities and variety of personalities that comprise OR settings, the development of a resume, cover letter, thank you letter, and the development of answers to commonly asked interview questions. Students will complete practice exams to prepare for the National Certification Exam administered by the National Board of Surgical Technology and Surgical Assisting. Participation in the Certification exam is MANDATORY. (Prerequisite(s): SURG 2405, 2411, 2415, and 2420) AC/0/8/0

SURT 2435 Operating Room Clinical 2
Students are assigned to a pre-planned clinical facility and assist with surgical procedures within the operative setting under the personal supervision of a clinical preceptor. This clinical practicum is designed for the student to integrate knowledge and theory from previous classes specific to Surgical technology, to develop skill set specific to that of a practicing Surgical Technologist. Clinical assignments are based on a set of weekly clinical performance objectives that must be met prior to the completion of OR lab 2. Students will participate in 3 clinical conferences to debrief current learning and synthesize knowledge with practice. Also covered in these sessions are professional topics such as understanding the roles, responsibilities and variety of personalities that comprise OR settings, the development of a resume, cover letter, thank you letter, and the development of answers to commonly asked interview questions. Students will complete practice exams to prepare for the National Certification Exam administered by the National Board of Surgical Technology and Surgical Assisting. Participation in the Certification exam is MANDATORY. (Prerequisite(s): SURG 2405, 2411, 2415, and 2420) AC/0/8/0

Theatre and Drama

THTR 1710 Introduction to Theatre
This course introduces students to the study and exploration of theatre. Students will study the diversity of drama and explore the methods and styles of actors, directors, playwrights and designers. (MnTC: Goal 6) AC/3/0/0

THTR 1716 Theatre Around the World
This course provides an introduction to the diverse theatrical styles and plays performed around the world. Students will explore a variety of theatre focusing on Eastern and Western cultures around the globe exploring the cultural, historical, social, religious, and linguistic significance of this work. Students will examine the aspects that go into creating these forms of theatre including, acting, design, and stagecraft. Students will explore these forms of theatre and their impact on theatre around the world today. (Prerequisite(s): READ 0722 or READ 0724 or EAPP 0900 with a grade of “C” or better, or appropriate assessment score) (MnTC: Goal 6 & 8) AC/3/0/0

THTR 1725 Acting 1
This course provides students an Introduction to Acting. Students engage in physical and vocal exercises training the actor’s voice and body. Students will also develop the skills to respond critically to theatrical performances. Students engage in vocal and physical warm-ups and exercises, read and analyze plays, use improvisation towards developing characters in scenes from a variety of plays. (Prerequisite(s): READ 0722 or READ 0724 or EAPP 0900 with a grade of “C” or better, or appropriate assessment score) (MnTC: Goal 6) AC/3/0/0

THTR 1730 Theatre Stagecraft and Production
This course provides an introduction to Theatre Stagecraft and Production with units on acting, stage movement, set construction, painting, lighting, special effects, and scenic design, among other topics. Participation in current theatre production is required. This course may be repeated for credit. (MnTC: Goal 6) AC/3/0/0

THTR 1731 Theatre Performance Practicum
Students who are interested in pursuing active participation as a performer in a Saint Paul College theatrical production will be eligible for this course. Students will take an active role as a live performer within a college production. This course may be replaced in subsequent terms for a maximum of 4 credits. (Prerequisite(s): Instructor approval) (MnTC: Goal 6) AC/0/1/0

THTR 1732 Technical Theatre Practicum
Students who are interested in pursuing active participation as a technical worker in a Saint Paul College theatrical production will be eligible for this course. Students will take an active role as a technical worker within a college production. This course may be replaced in subsequent terms for a maximum of 4 credits. (Prerequisite(s): Instructor approval) (MnTC: Goal 6) AC/0/1/0

THTR 1740 Fundamentals of Playwriting – Playwriting 1
This course focuses on the skills necessary for writers who write for the stage rather than the page. Students work to develop an ability to create stage plots and dialogue. Through a series of writing and reading activities, exercises and assignments, students work to explore character, conflict and drama through their writing. Students also work through writing exercises to develop the skills to structure a play with a clear beginning, middle and end. Students are encouraged to develop their work and the course culminates in a reading of short plays. (Prerequisite(s): READ 0722 or READ 0724 or EAPP 0900 with a grade of “C” or better, or appropriate assessment score) (MnTC: Goal: 6) AC/3/0/0

THTR 1790 Special Topics in Drama and Theatre
This course is designed to present additional or unique material and learning experiences within a specified discipline. The course will be based on student need, flexibility, and may be designed to meet various transfer and pre-major course requirements. Please see a current Course Schedule for complete details. (MnTC: Goal 6) Variable credits 1-6

THTR 2725 Acting 2
This course provides students continued study in acting skills. Students work to develop and exercise basic acting skills through practical application of the fundamental elements of the actor’s art and work. Students will become more familiar with the actor’s tools and a variety of acting techniques and the best ways to utilize them. Students engage in more detailed physical and vocal exercises training the actor’s voice and body. Students read and analyze plays and develop character analysis and script analysis skills. Through acting exercises, activities, development of acting techniques, and scene work, students will develop the skills required to create three-dimensional characters in scene work. (Prerequisite(s): THTR 1725 Acting 1 or instructor approval) (MnTC: Goal 6) AC/3/0/0
TRKM 1400 Introduction and Safety  
This course will introduce the student to the trucking industry and the role of the student as a truck technician within this industry. Personal, shop, tool and environmental safety will be emphasized. 1C/0/1/0

TRKM 1445 Truck Welding 1  
Beginning course includes a combination of oxyacetylene welding, cutting, arc and MIG welding in a limited time. Basic shop procedures and safety are emphasized as is proper care of tools and equipment. Instruction will be conducted by lecture-demonstrations and shop practice. Practice on four basic joints in three basic positions is provided. Building an understanding and skill in the use of welding and manual cutting equipment are developed. 2C/0/2/0

TRKM 1455 Truck Welding 2  
Continuation of skills developed in TRKM 1445. Includes advanced Arc and MIG welding techniques for frame repair in the trucking industry. Emphasis on safety procedures. 2C/0/2/0

TRKM 1521 Electrical 1  
This course covers the design, theory of operation, repair procedures, and diagnosis of batteries, lighting systems, instruments and accessories used in commercial trucks. 5C/1/4/0

TRKM 1522 Electrical 2  
This course covers the design, theory of operation, repair procedures and diagnosis of starting systems, charging systems and an introduction to electronic systems used in commercial trucks. 5C/1/4/0

TRKM 1551 Clutch and Transmission  
This course covers the design, theory of operation, repair procedures, and diagnosis of clutches and manual transmissions used in commercial trucks. 5C/1/4/0

TRKM 1552 Driveshafts and Differentials  
This course covers the design, theory of operation, repair procedures and diagnosis of drive shafts and differentials used in commercial trucks. 4C/1/3/0

TRKM 1553 Automatic and Automated Transmission  
This course covers the design, theory of operation, repair procedures, and diagnosis of automated manual transmissions and automatic transmissions used in commercial trucks. 4C/1/3/0

TRKM 1560 Truck Brake Systems  
This course covers the design, theory of operation, repair procedures, and diagnosis of hydraulic and air brake systems used in commercial trucks. 6C/1/5/0

TRKM 2401 Steering and Suspension Systems  
This course covers the design, theory of operation, repair procedures, and diagnosis of steering, suspension and chassis components used in commercial trucks. 6C/1/5/0

TRKM 2425 Truck Cab Climate Control Systems  
This course covers the design, theory of operation, repair procedures, and diagnosis of the heating, ventilation and air conditioning systems used in commercial trucks. 3C/1/2/0

TRKM 2440 Gasoline Engines  
This course covers the design, theory of operation, repair procedures, and diagnosis of gasoline engine fuel and ignition systems used in commercial trucks. Engine overhaul procedures will also be covered. 6C/1/5/0

TRKM 2511 Diesel Engines 1  
This course covers the design, theory of operation, repair procedures, and diagnosis of diesel engines used in commercial trucks. 6C/1/5/0

TRKM 2512 Diesel Engines 2  
This course covers the design, theory of operation, repair procedures, and diagnosis of mechanical and electronic fuel systems used on diesel engines in commercial trucks. 6C/1/5/0

TRKM 2540 Preventive Maintenance  
This course covers the preventive maintenance practices used to keep commercial trucks and trailers in proper and safe working order. Shop procedures, record keeping, computer use and job seeking skills will also be covered. 3C/1/7/0

Welding Technology

WLDG 1402 Industrial Shop Practices 1  
This core course covers all of the safety instruction for the 1400 level welding courses and shop equipment that will be used during the first semester. Students will demonstrate safe practices while using welding and shop equipment. Students will also identify the characteristics of mild steel. (Co-Requisite(s): WLDG 1402-1450 will be taken in succession within the same semester block) 4C/4/0/0

WLDG 1410 Welding Basics  
This introductory course will cover shop safety practices, the theories and concepts necessary for an understanding of basic oxyacetylene welding, cutting and brazing processes. Emphasis will be on safe work habits based on current industry standards. It will also cover carbon arc and plasma arc cutting. (Co-Request(s): WLDG 1402-1450 will be taken in succession within the same semester block) 2C/0/2/0

WLDG 1420 SMAW: E6010  
This course covers the introduction of the theories and concepts necessary for the SMAW process using the E6010 electrode in the various welding positions, according to current industry and AWS standards. Instruction on the use, care and safety practices of SMAW equipment will also be emphasized. (Co-Request(s): WLDG 1402-1450 will be taken in succession within the same semester block) 2C/0/2/0

WLDG 1431 SMAW: E7018  
This course covers more advanced techniques of the SMAW weld process using the E7018 electrode. Students will learn to weld using proper technique and will judge their welds. Students will be exposed to the qualification process using weld place testing procedures. An emphasis will be put on safety while using the SMAW equipment. (Co-Request(s): WLDG 1441, WLDG 1420, WLDG 1410, WLDG 1402 WLDG 1450) 2C/0/2/0

WLDG 1441 SMAW: Short Arc  
This course is an introduction to the GMAW process using short circuit transfer. Students will learn to weld using proper technique and will judge their welds. An emphasis will be put on safety while using the GMAW equipment. (Co-Request(s): WLDG 1402, WLDG 1410, WLDG 1420, WLDG 1431, WLDG 1450 will be taken in succession within the same semester block) 3C/0/3/0

WLDG 1450 Intro to Blueprint/Measuring Devices  
This course is designed to cover such fundamental principles of drawing interpretation as may be required by a layout welder and setup person. To accomplish this objective, basic lines and blueprint viewing functions are studied and projects are assigned to reinforce base knowledge. This course also covers the use of different measuring devices used in the welding trades. (Co-Request(s): WLDG 1402-1450 will be taken in succession within the same semester block) 3C/3/0/0

WLDG 1502 Industrial Shop Practices  
This core course covers all the required safety instructions for all the 1500 category welding processes and the related shop equipment used. Instruction on welding equipment set-up and parameter settings along with welding theory will be covered for all welding processes. Students will be able to identify and demonstrate proper safety practices and usage on shop and welding equipment. (Prerequisite(s): Must complete 1st semester core group 1402-1450 prior to advancing to 2nd semester
core group 1502-1540) (Co-requisite(s): WLDG 1510, WLDG 1520, WLDG 1530, WLDG 1540) 4C/4/0/0

**WLDG 1510 GMAW Spray and Pulse Spray**
Provides students with the opportunity to build proficiency in the GMAW process using the spray and pulse spray transfers on mild steel. All positions will be covered. Students will be expected to work to industry standards for apprentice welders in the area of quality and efficiency. Welding test plate procedures will be offered allowing the student the opportunity to achieve qualification. (Prerequisite(s): Must complete 1st semester core group 1402-1450 prior to advancing to 2nd semester core group 1502-1540; Co-Requisite(s): WLDG 1502-1540 will be taken in succession within the same semester block) 3C/0/3/0

**WLDG 1520 GMAW Core Wires**
Designed to build proficiency in FCAW, FCAW-G, Metal Core and SAW processes. The student will be expected to perform to industry standards as required for apprentice welders. Weld plate testing procedures will be stressed, allowing the student the opportunity to achieve qualification. (Prerequisite(s): Must complete 1st semester core group 1402-1450 prior to advancing to 2nd semester core group 1502-1540; Co-Requisite(s): WLDG 1502-1540 will be taken in succession within the same semester block) 3C/0/3/0

**WLDG 1530 Intro to GTAW**
Provides students with the opportunity to build proficiency in the GTAW process on mild steel in all positions. The student will be expected to work to industry and AWS standards for apprentice welders in the area of quality and efficiency. (Prerequisite(s): Must complete 1st semester core group 1402-1450 prior to advancing to 2nd semester core group 1502-1540; Co-Requisite(s): WLDG 1502-1540 will be taken in succession within the same semester block) 3C/0/3/0

**WLDG 1540 Blueprint Welding Symbols/Math/ Welder Qualification**
This course will focus on the knowledge of welding symbols as specified by the American Welding Society, (AWS). Welding inspection and welder qualification procedures will also be covered. (Prerequisite(s): Must complete 1st semester core group 1402-1450 prior to advancing to 2nd semester core group 1502-1540; Co-Requisite(s): WLDG 1502-1540 will be taken in succession within the same semester block) 3C/0/3/0

**WLDG 2402 Industrial Shop Practices 3**
Students will perform mathematical problems and apply it to metal working problems/situations they may encounter on the job site. (Prerequisite(s): Must complete 1st and 2nd semester core groups 1402-1540 prior to advancing to 3rd semester core group 2402-2442) (Co-requisite(s): WLDG 2411, WLDG 2420, WLDG 2430, WLDG 2442) 4C/4/0/0

**WLDG 2411 GMAW: Aluminum and Stainless Steel**
Students have the opportunity to build proficiency in the GMAW process using Aluminum & Stainless Steel in various weld positions. The student will create welds to industry standards on Stainless-Steel and Aluminum. (Prerequisite(s): Must complete 1st & 2nd semester courses WLDG 1402-1540). (Corequisite(s): WLDG 2402, 2420, 2430, 2442) 3C/0/3/0

**WLDG 2420 GTAW Aluminum and SST**
Provides students with the opportunity to build proficiency in the GTAW process using aluminum & stainless steel in various weld positions. Aluminum & Stainless number systems will also be reviewed. Students will be expected to perform to industry and AWS standards as required for apprentice welders in the areas of quality and efficiency. (Prerequisite(s): Must complete 1st & 2nd semester core groups 1402-1540 prior to advancing to 3rd semester core group 2402-2442; Co-Requisite(s): WLDG 2402-2442 will be taken in succession within the same semester block) 4C/0/4/0

**WLDG 2430 Grinding and finishing**
Designed to create an in-depth knowledge of abrasives and equipment used in the welding & fabricating industry. Students will gain proficiency in both grinding and high grade finishing on various base materials according to paint, food and pharmaceutical standards. (Prerequisite(s): Must complete 1st & 2nd semester core groups 1402-1540 prior to advancing to 3rd semester core group 2402-2442; Co-Requisite(s): WLDG 2402-2442 will be taken in succession within the same semester block) 2C/1/1/0

**WLDG 2442 Introduction to Robotics**
Student will be introduced to basic Robotic/CNC machine processes as it applies to manufacturing. Students will be given specified projects in order to develop fabrication techniques used in industry. (Prerequisite(s): Must complete 1st & 2nd semester core groups 1402-1540 prior to advancing to 3rd semester core group 2402-2442) (Co-requisites: WLDG 2402, WLDG 2411, WLDG 2420 & WLDG 2430) 3C/0/3/0

**WLDG 2500 2D CAD**
This course introduces the practices and procedures for the use of Radan software in the Fabrication field. Students will be required to work within industry standards for 2D CAD blueprint drafting. (Prerequisite(s): Must complete 1st, 2nd & 3rd semester core groups 1402-2442 or receive instructor approval prior to advancing to 4th semester Advanced Certificate 2500-2560; Co-Requisite(s): WLDG 2500-2560 will be taken in succession within the same semester block) 2C/2/0/0

**WLDG 2510 Safety**
Designed to give students safety and operational instruction on all shop equipment required in the 2500 series certificate. Students will demonstrate correct safety procedures required in all the automated fabrication processes. (Prerequisite(s): Must complete 1st, 2nd & 3rd semester core groups 1402-2442 or receive instructor approval prior to advancing to 4th semester Advanced Certificate 2500-2560; Co-Requisite(s): WLDG 2500-2560 will be taken in succession within the same semester block) 1C/1/0/0

**WLDG 2520 CNC Plasma**
This course is designed to expose the student to CNC functions utilizing M & G coding Editing and perform CNC programing functions. Students will use proper safety equipment set up procedures and perform CNC operations according to industry standards. (Prerequisite(s): Must complete 1st, 2nd & 3rd semester core groups 1402-2442 or receive instructor approval prior to advancing to 4th semester Advanced Certificate 2500-2560; Co-Requisite(s): WLDG 2500-2560 will be taken in succession within the same semester block) 2C/1/1/0

**WLDG 2530 Press Brake Operations**
Designed to build proficiency in sheet metal fabrication the student will be expected to work within industry standards using math formulas, bend allowances and measuring instruments as required for apprentices. Students will program the CNC press to achieve correct bending outcomes to industry requirements. (Prerequisite(s): Must complete 1st, 2nd & 3rd semester core groups 1402-2442 or receive instructor approval prior to advancing to 4th semester Advanced Certificate 2500-2560; Co-Requisite(s): WLDG 2500-2560 will be taken in succession within the same semester block) 3C/1/2/0

**WLDG 2540 Robotic Welding Operations**
Designed to build proficiency in fabrication skills beyond the previous diploma courses. The student will be expected to work within Industry standards as for apprentice fabricators using robotic programing, set up procedures, trouble shooting and repair of robotic functions. (Prerequisite(s): Must complete 1st, 2nd & 3rd semester core groups 1402-2442 or receive instructor approval prior to advancing to 4th semester Advanced Certificate 2500-2560; Co-Requisite(s): WLDG 2500-2560 will be taken in succession within the same semester block) 3C/1/2/0

**WLDG 2550 Industrial Equipment**
Designed to build proficiency in the metal fabricating field, the student will be expected to perform within industry standards for apprentice
welders/fabricators. The student will be introduced to lifting devices which are encountered in live work situations, using fork truck and overhead cranes. (Prerequisite(s): Must complete 1st, 2nd & 3rd semester core groups 1402-2442 or receive instructor approval prior to advancing to 4th semester Advanced Certificate 2500-2560; Co-Requisite(s): WLDG 2500-2560 will be taken in succession within the same semester block) 2C/1/1/0

WLDG 2560 Layout Practices
Course 2560 will allow the student to demonstrate knowledge of manufacturing layout and planning through designated projects. These projects will require the student to use advanced techniques in design, layout and fabrication processes used in industry. (Prerequisite(s): Must complete 1st, 2nd & 3rd semester core groups 1402-2442 or receive instructor approval prior to advancing to 4th semester Advanced Certificate 2500-2560; Co-Requisite(s): WLDG 2500-2560 will be taken in succession within the same semester block) 4C/1/3/0

Women’s and Gender Studies

WGST 1785 Foundations in Women’s Studies
This course serves as an introduction to the field of women’s and gender studies. Using an interdisciplinary approach, the course examines the conditions and circumstances affecting the lives of (primarily) women in the United States. The course explores the roles that women play in society, with careful attention to the ideas and factors that shape those roles. Students will examine how ideas about gender (as well as race, ethnicity, social class, sexual orientation, physical ability and age) are informed by institutions, cultural beliefs, and social practices. Throughout the course, emphasis is placed on the diversity of women’s experience in contemporary United States and connections to women worldwide. (Prerequisite(s): READ 0721 or READ 0724 or EAPP 0860 with a grade of “C” or better, or appropriate assessment score) (MnTC: Goals 5 & 9) 3C/3/0/0

WGST 1790 Special Topics in Women’s and Gender Studies
This course is designed to present additional or unique material and learning experiences within a specified discipline. The course will be based on student need, flexibility, and may be designed to meet various transfer and pre-major course requirements. Please see a current Course Schedule for complete course details. (MnTC: Goals 5 & 9) Variable credits 1-6
Stakeholders

Minnesota State Colleges and Universities Board of Trustees

Asani Ajogun
Technical College Student
(Term Dates: September 22, 2020 - June 30, 2022)

Alexander Cirillo, Jr.
At Large
(Term Dates: July 15, 2018 - June 30, 2024)

Victor Ayemobuwa

Directions & Parking

Easy to Find. Easy to Get To.

From the South (35E)
Take the Kellogg Boulevard Exit, turn left. Continue to John Ireland Boulevard, turn left at the traffic light. Continue to Marshall Avenue, turn right.

From the North (35E) or From the East (I-94W)
Take the Marion Street Exit, turn left passing over the freeway. Continue on Kellogg Boulevard to John Ireland Boulevard, turn right at the traffic light. Continue to Marshall Avenue, turn right.

From the West (I-94E)
Take the Marion Street Exit, at the top of the exit ramp take a right onto Kellogg Boulevard. Turn right at traffic light onto John Ireland Boulevard. Continue to Marshall Avenue, turn right.

Bus Information
Saint Paul College is also easy to reach by bus. Please visit www.metrotransit.org for route information.

Visitor Parking
Visitor parking is available in any open, undesignated space in the Parking Ramp or Lot B, C, D or E. Enter the parking lot via Marshall Avenue or Kellogg Blvd.
Parking Information

Parking Policy
It is mandatory for all motor vehicles parked on the Saint Paul College campus to use the controlled parking access system. Visitors may park anywhere in the lots and ramp except for marked reserved spaces. Vehicles parked in handicapped parking spaces require a valid State-Issued Handicapped Permit. All violators will be ticketed.

Regulations
All persons operating a vehicle on campus are responsible for being familiar with, and complying with, all traffic and parking regulations. A complete list of parking violations and parking policy may be obtained from the Office of Public Safety on the first floor. Saint Paul College assumes no liability for care of, damage to, and/or protection of any vehicle or its contents at any time while it is operated on or parked on the campus property. Possession of a parking access card neither reserves nor guarantees a parking space.

Motorcycle Parking
Motorcycle parking is available in the designated parking area by the Kellogg Boulevard entrances. Visitors with motorcycles can park in the lower lot designated motorcycle parking area and use any exit at the Marshall Avenue or Concordia Avenue gates by paying the hourly rate when leaving. The cement motorcycle parking area is located to the left of the Kellogg Boulevard entrance in the lower lot.

No Parking Zones
- Any restricted parking space without a proper parking tag.
- Any handicapped space without a legally displayed sticker or license plate.
- Fire lanes. This includes leaving room for a minimum of two vehicles to pass at the end of each row.
- In front of any garage doors.
- Any Right-of-Way areas. This includes the area north of the Truck and Fabrication Shops to allow for oversized vehicle maneuvering.
- Any areas not paved or designated for parking. This includes sidewalks, curbs, and lawns.

If You Receive a Citation for a Parking Violation
Payment is to be directed to the Tuition Office and requires a copy of the citation. Payment is due fifteen (15) business days from the date the citation was issued. Checks are to be made payable to Saint Paul College. You may appeal your citation within fifteen (15) business days from the date the citation was issued. Appeal forms are available at the Public Safety Desk. The form must be filled out completely to be considered. If you fail to pay your parking citation(s), the fine(s) will be placed on your student record. If the ticket goes unpaid, a hold will be placed on your account and you will be unable to get a copy of your transcript or register until the fine is paid. Unpaid tickets will be processed through the college’s normal collection process and the debt may be submitted to Minnesota Department of Revenue for collection.

It is mandatory that all motor vehicles parked on the Saint Paul College campus use the parking access system to go in and out of the parking lot.
