Chemistry Transfer Pathway AS DEGREE

Program Overview
The Chemistry Transfer Pathway AS degree is awarded for successful completion of 60 credits in science and liberal arts. It is designed to constitute the first two years of a bachelor’s degree in Chemistry.

Career Opportunities
Chemistry majors are curious, analytical and self-starters. Upon completion of the Chemistry AS degree, students will have developed strong communication skills and grown in their scientific and mathematical reasoning skills as well as developed their ability to perform experiments in a hands-on environment. As graduates in Chemistry, students can choose a number of career options from technical scientific laboratory careers to education. Salaries will vary based on the chosen career path.

Program Outcomes
Students should be able to:
1. Demonstrate basic knowledge and understanding of the fundamentals of experimental and theoretical chemistry.
2. Explain and apply skills in analytical thinking and problem solving, and apply scientific methods to experimental data.
3. Demonstrate skills in laboratory operations including making accurate and precise measurements, preparing solutions, operating instrumentation, experimental design, and the interpretation and reporting of quantitative and qualitative data and results.
4. Communicate their own data and analysis in oral and written communications that uses tables and graphs, describes detailed experimental procedures, and clearly explains conclusions, in order to create clear and compelling papers, posters, or presentations.
5. Work both independently and collaboratively in the classroom and in the laboratory.
6. Apply learned concepts to everyday situations and experiences and critically evaluate contributions to science reported in the media; identify valid approaches to scientific problem solving and reporting.

Transfer Opportunities
