Program Overview
Respiratory Therapists (RTs) provide care and treatment for cardiac and pulmonary issues. Practitioners perform diagnostic tests, administer medical gas therapy, access and record patient emulations and implement care for acute and chronically ill patients. They provide mechanical ventilation, therapeutic procedures, and cardiopulmonary resuscitation. Laboratory procedures include pulmonary function testing; sleep study, arterial blood gas draw and analysis, hemodynamic measurements and radiologic evaluation.

Preparation best suited for this program includes excellent reading skills, biology, chemistry and physics. Further, one should have good manual dexterity and an ability to lift fifty pounds. The goal of the program is to prepare graduates with demonstrated competence in the cognitive (knowledge), psychomotor (skills), and affective (behavior) learning domains of respiratory care practice as performed by registered respiratory therapists (RRT). Upon completion of the program the student is eligible to take the National Certification exam. Certification is required at graduation for licensure.

Career Opportunities
Employment of respiratory therapists is expected to increase much faster than the average for all occupations because of substantial growth of the middle-aged and elderly population, a development that will heighten the incidence of cardiopulmonary disease. Respiratory Therapists are employed by hospitals, clinics or laboratories and home care agencies. Graduates may find employment through contacts made during the clinical training experiences and employment requests received by the instructional staff.

Licensing or certification exams are independent of graduation requirements.

Program Outcomes
1. Graduates demonstrated knowledge and skills in Respiratory Therapy clinical experiences.
2. Graduates demonstrated knowledge and skills in Respiratory Therapy clinical simulations.
3. Graduates prepared to take the National Certification Exam.
4. Graduates prepared for employment as Respiratory Therapists.
5. Graduates communicate effectively with the Health Care Team.

Full-Time Only
Students in this program must be enrolled full-time with a cohort of students. Technical courses are offered only during the day.

Textbook and Supply Costs
Students should expect to spend approximately $2,000, beyond the cost of tuition and fees, for books, for lab coat and other supplies. Additional costs include an ACLS, PALS, BLS course.

Application Process
In addition to completing the regular Saint Paul College application and admission process, students interested in the Respiratory Therapist program must submit a completed Application to Respiratory Therapist Major form and meet the following criteria:
- Completion of the following required General Education courses:
  - BIOL 1730 Human Body Systems
  - ENGL 1711 English Composition
- Documented readiness for, or completion of, the following required General Education course:
  - CHEM 1711 Principles of Chemistry I
    Prerequisite for Chemistry 1 is MATH 0920 Intermediate Algebra or appropriate assessment score or CHEM 1700 Chemistry Concepts
- GPA of 3.0 or above

The Respiratory Therapist Admissions Committee will review each application on the basis of overall academic ability, GPA of college level courses, assessment scores, and meeting the above criteria. Notification of acceptance into the Respiratory Therapist Major will be sent by mail 6-weeks after the deadline date stated on the Application to Respiratory Therapist Major form.

The Application to Respiratory Therapist Major form is available online: saintpaul.edu/programs/Pages/respiratory-therapist.aspx
